Also [*l. c.*], a plant, bulb, or flower of this genus. See MONTBRETIA.

tri'tu-ber'cu-lar (trī'tū-bûr'kŭ-lăr), *a.* **a** Having or designating teeth with three cusps or tubercles ; tricuspid. **b** Pertaining to trituberculy.

tri'tu-ber'cu-ly (trī'tū-bûr'kŭ-lĭ), *n.* [*tri-* + L. *tuberculum* tubercle.] *Zoöl.* A theory of the development of mammalian molar teeth The primitive, or *haplodont*, stage is that of simple cones, as in reptiles. The simple cone (**protocone**) then developed a smaller cone in front (**paracone**) and another behind (**metacone**), this being the **triconodont** stage. Next, a cingulum was developed (see CINGULUM, 2 *c*) and the three cones became arranged in a triangle, the two smaller cusps having moved to the outer side in upper and to the inner in lower molars. This primitive triangle is called the **trigon** and this stage the **tritubercular** or **trigonodont.** The trigon being a cutting apparatus, an extension of the posterior part of the crown, the **talonid**, was developed in lower molars for crushing, and a smaller corresponding part, the **talon**, appeared in upper molars. Another large cone, the **hypocone**, then arose, usually from the cingulum, and took a place in the crown posterior to the protocone. In more complex forms, smaller intermediate cusps appeared and are designated by the ending **-conule**, as **metaconule**, etc. Other small cusps and elements derived from the cingulum are given the termination **-style**, as **parastyle**, etc. The crests, composed of several cusps and styles, are given the termination **-loph**, as **protoloph**, etc. The cusps, styles, crests, etc., of the lower jaw are distinguished from those of the upper by the termination **-id**, as **protoconid**, etc. Cf. MULTITUBERCULY.

trit'u-ra-ble (trĭt'ū-rā-b'l), *a.* Capable of being triturated.

trit'u-rate (-rāt), *v. t.* ; TRIT'U-RAT'ED (-rāt'ĕd) ; TRIT'U-RAT'ING (-rāt'ĭng). [L. *trituratus*, p. p. of *triturare* to thresh (grain), fr. *terere, tritum*, to rub, rub to pieces. See TRITE.] **1.** To rub, grind, bruise, or thrash.

trout (trout), *n.* [AS. *truht*, L. *tructa, tructus*; cf. Gr. *τρώκτης* a sea fish with sharp teeth, from *τρώγειν* to gnaw.]

1. Any of certain fishes of the salmon family and genus *Salmo* (and in America also of the genera *Salvelinus* and *Cristivomer*), averaging much smaller in size than the salmons, and highly esteemed by anglers on account of their gameness, finely flavored and rich flesh, and handsome (usually mottled or speckled) coloration. Most of them live all the year in fresh water, many requiring clear cold streams and lakes, but others are anadromous. Authorities are not agreed in regard to the number of forms (esp. of the genus *Salmo*) deserving recognition as species. Two species, the river or brown trout *Salmo fario*, inhabiting fresh water, and the sea trout *S. trutta*, which is anadromous, are usually recognized in Great Britain. In western North America, among many forms of the genus *Salmo*, the cutthroat, steelhead, and rainbow trouts are the most important. The most widely distributed trout of eastern North Amerca is the brook, or speckled, trout (*Salvelinus fontinalis*). It is finely and irregularly barred with dark olive or black above and has small round red spots on the sides. The Dolly Varden trout of the Pacific slope is an allied species. See also NAMAYCUSH, OQUASSA.

troy (troi), *a.* Pertaining to or designating the system of weights (**troy weights**) commonly used in England and the United States for gold, silver, etc.;—so named from Troyes in France. In this system—

1 pound (*lb.*) = 12 ounces (0.82286 lb. av. or 373.2509 g.)
1 ounce (*oz.*) = 20 penny weights (1.09714 oz. av. or 31.1035 g.)
1 penny weight (*dwt.*) = 24 grains (0.87771 dr. av. or 1.5552 g.)

The ounce, however, is now preferably divided decimally. The troy pound thus contains 5,760 grains. It became well known in England during the 14th and 15th centuries and in 1527 replaced the Tower pound (5,400 grains) as the legal mint standard. The troy pound, or more correctly the troy ounce, is also the basis of apothecaries' weight. The Scotch troy weight, or Dutch weight, was a system of weights formerly used in parts of France, the Netherlands, and Scotland. In it the stone contained 16 pounds; the pound (7,609 grains or 493 grams) contained 16 ounces. It was prohibited at the "Union," but long continued in use for weighing iron, lead, hemp, flax, meal, meat, etc.

troy, *n.* Troy weight.

trump'et (trŭm'pĕt; -pĭt; 151), *n.* [ME. *trumpete*, F. *trompette*, dim. of *trompe*. See TRUMP a trumpet.] **1.** *Music.* **a** A wind instrument consisting of a long metallic tube, commonly once or twice curved, with cup-shaped mouthpiece, and ending in a bell.

Modern Trumpet, with Pistons.

It is typical of the well-known and ancient family of instruments giving their tones by the vibration of the player's lips against the mouthpiece of a long tube. Besides its fundamental tone, a series of harmonics can be produced by varying the force of blowing and the embouchure. Other tones are variously secured, as by means of finger holes and keys, as in the obsolete key bugle and serpent; of a slide, as in the trombone; or of valves, as in the modern cornet-à-pistons, which last give easily all the scale tones of its compass, though with some loss of purity.
The [orchestral] *trumpet* differs from the horn by having a tube that is cylindrical instead of conical, except for the bell at the end. . . . Its mouthpiece, too, is a shallow hemispherical cup, and not a tapering cone. This difference . . . is of great importance in giving the *trumpet* tones their martial quality. The tube of the *trumpet* is just half the length of that of the horn, and in consequence its tones sound an octave higher. *A. Elson.*
b An 8-ft. organ-reed stop with a trumpetlike tone.
2. A trumpeter; hence, one who praises or acts as the mouthpiece of renown. *Archaic.* *Dryden.*
3. A sound as of a trumpet; esp., an elephant's cry.
4. *Mach.* A funnel, or short flaring pipe, used as a guide or conductor, as for yarn in a knitting machine.

of one or more of its members. Properly, a truss should be in the form of a triangle or of a combination of triangles, because this is the only polygon whose shape cannot alter without changing the length of its sides. When so designed, the only strains in the members will be those of tension and compression. A truss of considerable length, as compared to its width or height, is frequently called a *girder*.
8. *Naut.* An iron band around a lower mast, with a pivoted attachment to a lower yard at the center, to keep the yard in position and allow it to be braced around; formerly, a rope connection serving the same purpose.

trussed (trŭst), *a.* **1.** Provided with a truss, as a bridge.
2. *Her.* Depicted with wings closed; — said of birds.

truss'ing (trŭs'ĭng), *vb. n.* of TRUSS. Hence: *n. Arch. & Engin.* **a** The members forming a truss. **b** Trusses in general, or the trusses and framework of any structure.
c Stiffening or bracing with struts, ties, etc., as in a truss.

truss'ing, *p. pr.* of TRUSS. Hence: *a.* That trusses; specif., *Her.*, depicted as seizing or holding (its prey); — said of a bird of prey; as, a falcon *trussing* a duck.

trust (trŭst), *n.* [ME. *trust, trost* (also *trist, trest*; cf. TRUST, *v.*), prob. fr. Scand.; cf. Icel. *traust* confidence, security, Dan. & Sw. *tröst* comfort, consolation; akin to G. *trost*, Goth. *trausti* a convention, covenant; cf. also AS. *trūwian* to trust, Icel. *trūa*, and LL. *trustis* trust, protection; all akin to E. *true*. See TRUE.] **1.** Assured reliance on the integrity, veracity, justice, friendship, or other sound principle, of another; confidence; faith; belief.
Most take things upon *trust*. *Locke.*
2. Assured anticipation; dependence upon something future or contingent, as if present or actual; hope.
Such *trust* have we through Christ. *2 Cor.* iii. 4.
3. The person or thing on which confidence is reposed; ground of reliance, faith, or hope.
O Lord God, thou art my *trust* from my youth. *Ps.* lxxi. 5.
4. State or quality of being reliable; trustworthiness. *Obs.*
5. Custody; care; charge; keeping.
Who will commit to your *trust* the true riches? *Luke* xvi. 11.
6. Credit given; esp., reliance on future payment for merchandise or other property delivered; as, to sell on *trust*.
7. The condition, obligation, or right of one to whom anything is confided; responsible charge or office.
[I] serve him truly that will put me in *trust*. *Shak.*
8. That which is committed or intrusted to one; specif.: **a** A duty, task, or charge imposed in faith or confidence or by any relation; as, parenthood imposes a *trust*. **b** That committed or intrusted to one to be used or cared for in the interest of another; as, public office is a public *trust*.
9. An equitable right or interest in property distinct from the legal ownership thereof; a use (as it existed before the Statute of Uses); also, a property interest held by one person for the benefit of another. Trusts are *active*, or *special*, *express*, *implied*, *constructive*, etc. See these terms. In a **passive trust** the trustee simply has title to the trust property, while its control and management are in the beneficiary.
10. A business organization or combination consisting of a number of firms or corporations operating, and often united, under an agreement creating a trust (in sense 9), esp. one formed mainly for the purpose of regulating the supply and price of commodities, etc.; often, opprobriously, a combination formed for the purpose of controlling or monopolizing a trade, industry, or business, by doing acts in restraint of trade; as, a sugar *trust*. A trust may take the form of a corporation or of a body of persons or corporations acting together by mutual arrangement, as under a contract or a so-called gentlemen's agreement. When it consists of corporations it may be effected by putting a majority of their stock either in the hands of a board of trustees (whence the name *trust* for the combination) or by transferring a majority to a holding company. The advantages of a trust are partly due to the economies made possible in carrying on a large business, as well as the doing away with competition. In the United States severe antitrust statutes have been passed by the Federal government and in many States, with elaborate statutory definitions.
Syn. — TRUST, CONFIDENCE, RELIANCE, DEPENDENCE, ASSURANCE. TRUST is an absolute and assured resting on that which is its object, and is often more instinctive, less reasoned, than CONFIDENCE, which is apt to suggest somewhat definite grounds of assurance; as, "O God . . . in thee is my *trust*" (*Ps.* cxlii. 8); "He was a gentleman on whom I built an absolute *trust*" (*Shak.*); "those in whom we had no *confidence*, and who reposed no *confidence* in us" (*Burke*); "No subterfuge or pleading shall win my *confidence* again" (*Cowper*). RELIANCE and DEPENDENCE are commonly more objective than *trust* and *confidence*, and suggest the act or state as well as the feeling; as, no *reliance* (or *dependence*) can be placed on his word; he acted in *reliance* (or *dependence*) on the promise that had been made. ASSURANCE, as here compared (see CONFIDENCE), adds to *trust* the element of certitude; as, "Faith is the *assurance* of things hoped for, a conviction of things not seen" (*Heb.* xi. 1, *Am. R. V.*). See DEPENDENCE, BELIEF, RELIABLE.
trust fund doctrine. *Law.* = AMERICAN DOCTRINE.

trust (trŭst), *v. t.*; TRUST'ED; TRUST'ING. [ME. *trusten, trosten*, also *tristen, tresten*; cf. Icel. *treysta*, reflexive, to trust, fr. *traust*, n. See TRUST, *n.*; cf. truth (trōōth), *n.*; *pl.* TRUTHS (trōōthz, trōōths). [ME. *treuthe, trouthe, treowþe*, AS *trēowþ*. See TRUE; cf. TROTH, BETROTH.] Quality or state of being true; hence:
1. Fidelity; constancy; steadfastness; faithfulness.
Whispering tongues can poison *truth*. *Coleridge.*
2. Troth; pledge; agreement; promise. *Obs. Chaucer.*
3. Sincerity; genuineness; specif.: **a** Veracity; conformity to truth in character, action, and speech; sincerity and genuineness in expressing feeling or belief.
If this will not suffice, it must appear
That malice bears down *truth*. *Shak.*
b In architecture, avoidance of deceits and imitations; in art, conformity with nature or conviction.
4. **a** Conformity to fact or reality; exact accordance with that which is, or has been, or shall be. Truth is a character of things, of propositions, or of beliefs. As a character of things, it is the same as fact or reality, and by the Scholastics was termed **transcendental truth**. Certain modern philosophers maintain that reality is properly that which the mind is compelled — by heredity or experience — to approve as a basis for conduct, and that this is also precisely what we mean by *truth*. The older view assumes *truth* to be a conformity of the mind with external things, while its expression is a proposition or judgment which may be described as *true of* some reality or object. Such *truth*, when in relation to the human mind, is **logical truth**, when in relation to the divine mind, **ontological truth**. Distinction is also drawn between **real truth**, or the agreement of a judgment with its object, and **formal truth**, or the agreement of reasoning with logical principles. As a character of belief, *truth* is called **ethical truth**, and it consists of conformity of statement or action to the speaker's or actor's belief, and resolves largely into sincerity and faithfulness. *Truth*, as an attribute of the divine mind, is similarly viewed in this light, as the steadfast fulfillment of the divine intention or promise.
Truth is not the agreement of knowledge with an object beyond itself, and therefore ex hypothesi unknowable, but the agreement of our judgments with the objects of our knowledge. *Thos. Case (Encyc. Brit.).*
The . . . character of *truth* is its capability of enduring the test of universal experience, and coming unchanged out of every possible form of fair discussion. *Sir J. Herschel.*
Necessary truths are those in which we not only learn that the proposition is true, but see that it must be true; in which the negation of the *truth* is not only false, but impossible; in which we cannot, even by an effort of imagination, or in a supposition, conceive the reverse of that which is asserted. *Whewell.*
In the treatise De Veritate, St. Anselm distinguishes three kinds of *truth*, — veritas rectitudinis, veritas cogitationis, and veritas voluntatis. A proposition is true when it expresses the relation existing between things; a thought is true when we judge (cogitamus) that to be which is, and that not to be which is not; the will is true when we will what we ought to will. The *truth* of the will is moral rectitude. In fact, *truth* of whatever kind is rectitude: *truth* may, therefore, be defined "Rectitudo sola mente perceptibilis." *Wm. Turner.*
b Conformity with higher, more advanced, or ideal ideas of civilization.
Truth crushed to earth shall rise again:
The eternal years of God are hers. *Bryant.*
5. *Philos. of Hegel.* The fully realized result. The *truth* of the acorn is the oak tree, the *truth* of being is becoming (that is, the body is made by the soul for the soul's use). *W. T. Harris.*
6. Conformity to rule; exactness; close correspondence with an example, mood, object of imitation, or the like.
Plows, to go true, depend much on the *truth* of the iron work. *Mortimer.*
7. *Mech.* Accuracy or correctness of formation, adjustment, or position; — chiefly in phr. *out of truth*. *Eng.*
8. That which is true; as: **a** Real state of things; fact; reality; actual being or nature. *Shak.* **b** A true statement or proposition; an established principle, fixed law, or the like; as, the great *truths* of morals.
Even so our boasting . . . is found a *truth*. *2 Cor.* vii. 14.
9. Righteousness; true religion.
Grace and *truth* came by Jesus Christ. *John* i. 17.
Sanctify them through thy *truth*; thy word is *truth*. *John* xvii. 17.
Syn. — TRUTH, VERACITY, VERITY, VERISIMILITUDE. TRUTH is in general conformity to fact or reality; VERACITY is (esp. habitual) observance of the truth; as, "An honest mind and plain, he must speak *truth*" (*Shak.*); "This same *truth* is a naked and open daylight" (*Bacon*); "Ye shall know the *truth*, and the *truth* shall make you free" (*John* viii. 32); "to vindicate [Geoffrey's] *veracity* as an historian" (*Pope*); "a man of perfect *veracity* in thought, word, and deed" (*Carlyle*); "It Tennyson's charm] lay in a great *veracity* of soul" (*T. Watts-Dunton*). VERITY is the quality of being true or real; the word often denotes an assured tenet; as, "I could almost as soon doubt the Gospel *verity* as his *veracity*" (*Coleridge*); the eternal *verities*. VERISIMILITUDE is resemblance to truth or reality; as, "There is no *verisimilitude* in the characters, but there is *verisimilitude* in the thoughts; they are true to life, and are always passing through our minds" (*Jowett*); "Scott . . . satisfied himself with seeking *verisimilitude* rather than antiquarian accuracy" (*Walter Raleigh*). See REAL, HONEST.

tube (tūb), *n.* [L. *tubus;* akin to *tuba* a trumpet: cf. F. *tube.*] **1.** A hollow cylinder, of any material, to convey liquids or gases or for some other purpose; a pipe; as, a fire *tube;* a water *tube;* a condenser *tube* (see CONDENSER, 2 e); the *tubes* of a tubular bridge; a friction *tube;* the *tube* of a musical instrument; bronchial *tube;* a priming *tube,* etc.

☞ The word *tube* is arbitrarily associated with certain articles or devices not customarily called *pipes,* and vice versa, although *tube* and *pipe* are practically synonymous mechanically; as, iron *pipe;* glass or rubber *tube;* gas *pipe;* boiler *tube.*

2. Specif.: **a** Something with a tube or tubelike part as its chief feature, as a gun or a telescope. "Glazed optic *tube.*" *Milton.* **b** *Elec. & Magnetism.* A space, usually assumed to be tubular in form, bounded by lines of force or induction; — called specif. *tube of force.*

This suggests a systematic mode of drawing lines of force. We can describe a small closed curve at some point near the magnet, and can imagine lines of force drawn through each point of this curve; these lines, if continued, will of course be found to start from a north pole of a magnet and end on a south pole; so they thus form a hollow *tube* leading from one pole to the other, whose cross section is small near each end, but greater at a distance. If the initial small curve is taken of exactly the proper size, this *tube* is called a "unit *tube.*" *J. S. Ames.*

c *Ordnance.* The inner cylinder of a built-up gun, usually extending from the inner face of the breechblock to the muzzle. It carries the rifling on its inner surface and is surrounded by the jacket and hoops, if any are used. **d** *Bot.* The narrow basal portion of a gamopetalous corolla or a gamosepalous calyx; also, the united part of a monadelphous androecium.

3. *Zoöl.* **a** A more or less cylindrical, sometimes crooked or spirally twisted, case secreted or constructed by many annelids, larval insects, and other animals, for protection or concealment. **b** One of the siphons of a bivalve mollusk.

4. *Elec. Railways.* A tunnel for a tube railway; also, *Colloq.,* a tube railway. *Chiefly Eng.*

tube of a vector, *Math.,* a tubular surface formed by all the lines of a vector that pass through a given closed contour. — **tubes of Bel-li'ni** (bĕl-lē'nē) [after Lorenzo *Bellini,* Italian anatomist], *Anat.,* the large excretory ducts of the uriniferous tubules of the kidney opening on the free surface of the papillæ. — **t. of Fer'rein'** (fĕ'răn') [after A. *Ferrein* (1693–1769), French anatomist], *Anat.,* the tubes which form the pyramids of Ferrein of the kidney. See under PYRAMID. — **t. of Mie'scher** (mē'shĕr). *Zoöl. & Med.* = MIESCHER'S TUBES. See SARCOSPORIDIA.

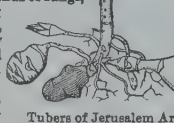
tube, *v. t.;* TUBED (tūbd); TUB'ING (tūb'ĭng). To furnish with, or inclose in, a tube or tubes; as, to *tube* a well; to *tube* media in bacteriology; also, to form into a tube; to make tubular; as, to *tube* yarn.

tube casts. *Med.* Casts of the tubules of the kidney found in the urine, fibrinous, granular, hyaline, etc.

tube foot. *Zoöl.* One of numerous small tentaclelike flexible tubular processes of starfishes, sea urchins, and most holothurians, bearing at the end an adhesive sucker and employed like small legs in crawling, or in holding on to objects, and serving also in respiration and as tactile organs. Their cavity is part of the water-vascular system.

tube'-nosed' (tūb'nōzd'), *a. Zoöl.* Having the nostrils prolonged in the form of horny tubes, as in the petrels.

tu'mor (tū'bẽr), *n.* [L., a hump, knob, truffle; prob. akin to *tumere* to swell. Cf. TUMID.] **1.** *Bot.* **a** A short fleshy underground stem or shoot bearing minute scale leaves with buds or "eyes" in their axils, as the potato and the Jerusalem artichoke. **b** [NL.] [*cap.*] A large genus of fungi, the truffles, typifying the family Tuberaceæ, and characterized by the warty peridium and rounded or ovoid asci. See TRUFFLE.



Tubers of Jerusalem Artichoke.

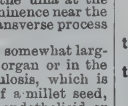
Its upper surface forms part of the floor of the third ventricle. Its lower surface bears the infundibulum to which the pituitary body is attached.

tu'ber-cle (tū'bẽr-k'l), *n.* [L. *tuberculum,* dim. of *tuber:* cf. F. *tubercule,* OF. also *tubercle.* See TUBER.] **1.** Any of various small knoblike prominences or excrescences, esp. on some part of an animal or plant; specif.: **a** *Bot.* (1) A nodule on the roots of leguminous plants. (2) A small tuber. (3) A tuberous root which bears adventitious buds, simulating a tuber. **b** *Anat. & Zoöl.* (1) A prominence on the crown of a molar tooth. (2) A small rough prominence (smaller than a tuberosity) on a bone, for the attachment of one or more muscles or ligaments, as that on the front of the head of the tibia for the ligamentum patellæ, that on the femur at the upper part of the junction of the neck and great trochanter, that on the ulna at the base of the coronoid process, etc. (3) An eminence near the head of a rib which articulates with the transverse process of a vertebra.

2. *Med.* A small rounded morbid growth somewhat larger than a papule, in the substance of an organ or in the skin; esp., the specific lesion of tuberculosis, which is a translucent grayish nodule of the size of a millet seed, consisting of a collection of lymphocytes, endothelioid or epithelioid cells, and giant cells.



Tubercle Bacillus.

tubercle of Dar'win. *Anat.* = DARWINIAN TUBERCLE. — **t. of Ro-lan'do** (rō-lăn'dō), *Anat.,* the enlarged upper end of the funiculus of Rolando.

tubercle bacillus. *Bacteriol. & Med.* A minute vegetable organism (*Bacillus,* properly *Bacterium, tuberculosis*), which is the exciting cause of tuberculosis. It was discovered in 1882 by the German physician and bacteriologist Robert Koch.

tu'ber-cled (tū'bẽr-k'ld), *a.* Tuberculated.

tu-ber'cu-lar (tū-bûr'kū-lẽr), *a.* Of, pert. to, like, or of the nature of, a tubercle or tubercles; having tubercles; tuberculated; specif., *Med.,* characterized by the presence of tubercles; sometimes, affected with tuberculosis; tuberculous; as, a *tubercular* growth, leprosy, patient.

tubercular meningitis, *Med.,* acute hydrocephalus.

tu-ber'cu-lar-ize (-īz), *v. t.;* -IZED (-īzd); -IZ'ING (-īz'ĭng). [*tubercular* + *-ize.*] *Med.* To infect with tuberculosis. — **tu-ber'cu-lar-i-za'tion** (-ĭ-zā'shŭn), *n.*

tu-ber'cu-late (-lāt), *a.* [NL. *tuberculatus.*] Tuberculated; also, tubercular.

tu-ber'cu-lat'ed (-lāt'ĕd), *a.* Having, or characterized by, a tubercle or tubercles; as, a *tuberculated* surface. — **tu-ber'cu-la'tion** (-lā'shŭn), *n.*

tu-ber'cu-lin (-lĭn), *n.* Also **tu-ber'cu-line** (-lĭn; -lēn; 184). A sterile liquid containing the growth products of the tubercle bacillus. It was put forth as a cure for tubercular diseases by Koch about 1890. It failed as a remedy, but is used in the diagnosis of tuberculosis of cattle. The **tuberculin test** consists in the hypodermic injection of tuberculin, having little or no effect with healthy cattle, but causing a marked rise in temperature in tuberculous animals.

tu-ber'cu-lo-ci'din (-lō-sī'dĭn), *n.* [*tuberculum* + root of L. *caedere* to kill.] *Physiol. Chem.* A special substance contained in tuberculin, supposed to be the active agent of the latter freed from various impurities.

tu-ber'cu-loid (tū-bûr'kū-loid), *a.* [*tuberculum* + *-oid.*] *Med.* Resembling a tubercle.

tu-ber'cu-lo'sis (-lō'sĭs), *n.* [NL. See TUBERCLE; -OSIS.] *Med.* An infectious disease the exciting cause of which is the tubercle bacillus and which is characterized by the production of tubercles (see TUBERCLE, 2); specif., this disease when seated in the lungs; pulmonary phthisis, or consumption. Among the most frequent seats of tuberculosis are the lungs, the intestinal tract, the lymphatic glands, the serous membranes, the bones, the skin, the brain, the Fallopian tubes, the uterus, and the spleen. The symptoms vary with the localization. The disease affects, besides men, many of the lower animals, as cattle, hogs, dogs, cats, monkeys, rabbits, and guinea pigs.

tu-ber'cu-lous (tū-bûr'kū-lŭs), *a.* Having, or characterized by, tubercles; tubercular; hence, *Med.,* affected with, or of the nature of, tuberculosis.

tu'ber-in (tū'bẽr-ĭn), *n.* [From TUBER.] *Physiol. Chem.* A globulin, the typical proteid of the potato tuber.

tube'rose' (tūb'rōz'; tū'bẽr-ōs'; 277), *n.* [Cf. G. *tuberose,* F. *tubéreuse,* NL. *Polianthes tuberosa.* See TUBEROUS.] A Mexican bulbous amaryllidaceous plant (*Polianthes tuberosa*), commonly cultivated in gardens for its spike of fragrant white lilylike single or double flowers.

tu'ber-os'i-ty (tū'bẽr-ŏs'ĭ-tĭ), *n.; pl.* -TIES (-tĭz). **1.** State or quality of being tuberous.

2. An obtuse prominence; specif., *Anat.,* any of certain large prominences on bones, usually serving for the attachment of muscles or ligaments, as the two (distinguished as *greater* and *lesser*) near the upper end of the humerus, the lateral eminences of the head of the tibia, the rough eminence on the lower back part of the ischium on which the body rests when sitting, that on the inner front aspect of the radius for the attachment of the biceps tendon, or any of certain prominences on the cuboid and navicular bones of the foot. Also, the tubercle of a rib.

tu'ber-ous (tū'bẽr-ŭs), *a.* [L. *tuberosus:* cf. F. *tubéreux.* See TUBER; cf. TUBEROSE.] **1.** Covered with knobby or wartlike prominences; knobbed.

2. *Bot.* Consisting of, bearing, or resembling, a tuber, or tubers.

Tuberous Roots of Dahlia.

tuberous begonia. See BEGONIA, 2. — **t. pea,** the heath pea. — **t. root,** a thick fleshy root resembling a tuber, but having no buds or scale leaves. Tuberous roots are often fascicled, as in the dahlia. — **tu'ber-ous-root'ed,** *a.*

tube worm. Any annelid building, and living in, a tube, as a serpulid.

tu-bic'o-lous (tū-bĭk'ō-lŭs), *a.* [L. *tubus* a tube + E. *-colous.*] *Zoöl.* **a** Inhabiting a tube. **b** Spinning a tubular web; as, *tubicolous* spiders.

tu'bi-form (tū'bĭ-fôrm), *a.* Tubular in form; tuberiform.

tump'y (tŭm'pĭ; tōōm'pĭ), *a.* Having many tumps, or hillocks; uneven. *Dial. Eng.*
tumrelle. † TUMBREL.
tum'tum (tŭm'tŭm), *n.* [Perh. corruption of E. *tandem.*] A dogcart. *Anglo-Ind.*
tu'mu-la-ry (tū'mū-lȧ-rĭ). Var. of TUMULAR.
tu'mu-late (-lāt), *v. t.* [L. *tumulatus*, p. p. of *tumulare* to tumulate. See TUMULUS.] To cover with a mound. *Obs.*
tu'mu-la'tor, *n.* *Obs.*
tu'mu-li, *n.*, *pl.* of TUMULUS.
tu-mult', (tŭ-mŭlt'), *v. i.* To make a tumult. *Obs.*
tu-mult'er (tū-mŭl'tẽr), *n.* A maker of tumults. *Obs.*
tu-mul'tu-ate (-tū-āt), *v. i.* [L. *tumultuatus*, p. p. of *tumultuari* to make a tumult.] To make a tumult. *Obs.* — **tu-mul'tu-a'tion** (-ā'shŭn), *n.* *Obs.*
tumyllere. † TUMBLER.
tun. Ton. *Ref. Sp.*
tun (tŭn), *n.* [AS. *tūn.* See TOWN.] *A.-S. Hist.* A town.
tun. † TUNE.
tu'na (tōō'nȧ), *n.* [Cf. Sp. *atún*, E. TUNNY.] The tunny, esp., on the California coast, the great or common tunny. [TUNICLE.]
tu'na-cle (tū'nȧ-k'l). Var. of TUNAG, *n.* A short mantle for women. *Scot. Obs. or R.*
tun'-bel'ly, *n.* A pot-belly. — **tun'-bel'lied**, *a.* *Both Obs. or R.*
tunbrugge. † TUBEUGGE.
tun'ca (tŭn'kȧ), *n.* [Hin d. *tankhwāh.*] *India.* **1.** An assignment on the revenue of a locality in favor of an individual. [by the month.]
2. The wages of a servant hired
tun'car, tun'caw. † TUNCA.
tund (tŭnd), *v. t.* [L. *tundere.*] To pound or bruise, as in a mortar. *Obs.* — **tun-da'tion** (tŭn-dā'shŭn), *n.* *Obs.*
tund, *v. t. & i.* To beat. *Slang, Winchester College, Eng.*
tun'der (*dial.* tōōn'dẽr), *n.* [Cf. Icel. *tundr.* See TINDER, *n.*] Tinder. *Obs. or Dial. Eng.*
tun'-dish' (*dial.* tŭn'-; tōōn'-), *n.* A funnel. *Obs. or Dial. Eng.*
tun'dre. † TUNDER.
tun'dun (tŭn'dŭn), *n.* = BULL-ROARER.
tune. † TOWN; TINE, to shut.
tune'a-ble (tūn'ȧ-b'l). Var. of TUNABLE. — **tune'a-bly**, *adv.* — **tune'a-ble-ness**, *n.*
‖ **tu ne ce'de ma'lis.** [L.] Do not thou yield to evils. *Vergil (Æ., vi. 95).*
tunfolk. † TOWNFOLK.
tung. Obs. or ref. sp. of TONGUE.
tun'gah. † TANGA.
tungd. Tongued. *Ref. Sp.*
tunge. † TONGUE, TONG.
tung oil (tŭng). [See TUNG TREE. See oil, *Table I.*]
tun'gread', *a.* Having the circumference of a tun. *Obs.*
tung'state (tŭng'stāt), *n. Chem.* A salt of tungstic acid.
tung-sten'ic (tŭng-stĕn'ĭk), *a.* Of, pert. to, or containing, tungsten.
tung'sten-if'er-ous (tŭng'stĕn-ĭf'ẽr-ŭs), *a.* See -FEROUS; TUNGSTEN. [Tungstite.]
tungsten ocher *or* **ochre.** *Min.*
tung'sto-si-lic'ic (tŭng'stō-sĭ-lĭs'ĭk), *n. Chem.* Silicotungstic; specif., designating a white crystalline acid to which the formula $H_8SiW_{12}O_{40}{\cdot}20H_2O$ has been assigned. — **tung'sto-sil'i-cate** (-sĭl'ĭ-kāt) [see -ATE,[3] b], *n.*
Tun-gu'si-an (tōōn-gōōz'ĭ-ăn), *a.* & *n.* = TUNGUSIC.
tungy. † TONGUEY, talkative.
tun'hoof (tŭn'ho͝of'), *n.* [Cf. AS. *tun* inclosure, E. ALEHOOF.] Ground ivy. *Dial. Eng.*
tu'ni-cae, tu'ni-cæ va'gi-na'les (tū'nĭ-sē vă'jĭ-nā'lēz), etc., *pls.* of TUNICA, TUNICA VAGINALIS, etc.
tu'ni-ca-ry (tū'nĭ-kȧ-rĭ), *n.*; *pl.* -RIES (-rĭz). [L. *tunica* a tunic.] *Zoöl.* A tunicate. *Obs.*
tun'ist (tūn'ĭst), *n.* A tuner. *R.*
tunk (tŭnk), *n. & v. t. & i.* Rap; thump. *Dial. or Colloq.*
tunkaw. † TANGA.
tun'ker (tŭn'kẽr), *n. Eccl.* = DUNKER.
tun'na (tōōn'nȧ), *n.* [Sw., barrel, cask.] See MEASURE.
tun'nage. Var. of TONNAGE.
tunne. † TON, TUN.

6. *Shipbuilding.* The tubelike water-tight passage through which the propeller shaft passes, between the stern tube and either the afterpeak bulkhead or a dwarf bulkhead terminating a small chamber called the *stuffing-box recess.*
7. *Sulphuric-Acid Manuf.* A tube of sheet lead, connecting adjoining leaden chambers when a series is used.
8. A long wire-covered passageway forming a snare into which partridges and the like were decoyed. *Obs.*
tunnel of Corti. *Anat.* See ORGAN OF CORTI.

tun'nel (tŭn'ĕl), *v.t.;* TUN'NELED (-ĕld) or TUN'NELLED; TUN'NEL-ING or TUN'NEL-LING. **1.** To form into or like a tunnel. **2.** To catch in a tunnel net.
3. To make an opening, or a passageway, through or under; as, to *tunnel* a mountain; to *tunnel* a river.

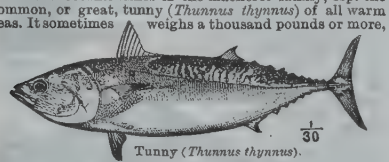
tun'nel, *v.i.* To cut, blast, or otherwise make, a tunnel.

tun'nel-er, tun'nel-ler (tŭn'ĕl-ẽr), *n.* One that tunnels; specif.: **a** A machine used in tunneling, as one used in mining to cut a drift, or an annular groove so that the drift may easily be made, in a single operation. **b** One that uses a tunnel to catch birds. See TUNNEL, *n.*, 8. *Obs.*

Tunnel Stern.

tunnel stern. A design of motor boat stern, for use in shallow waters, in which the propeller is housed in a tunnel and does not extend below the greatest draft.

tun'ny (tŭn'ĭ), *n.; pl.* -NIES (-ĭz). [F. *thon;* cf. Pr. *thon,* It. *tonno;* fr. L. *thunnus, thynnus,* Gr. θύννος, θύννος.] Any of several oceanic fishes of the mackerel family, esp. the common, or great, tunny (*Thunnus thynnus*) of all warm seas. It sometimes weighs a thousand pounds or more,



Tunny (*Thunnus thynnus*). 1/30

and is extensively caught in the Mediterranean. On the Atlantic coast of America it is called *horse mackerel;* on the Pacific coast, where it is much sought for as a game fish, it is called *tuna.* The flesh is coarse and oily, but is often eaten; the oil is sometimes used in currying. The little tunny (*Gymnosarda alleterata*) of the Mediterranean and North Atlantic, and the **long-finned tunny,** or albacore (see ALBACORE **a**), are smaller species.

tun shell. Any of numerous marine tænioglossate gastropods belonging to the genus *Dolium.*

Tun Shell (*Dolium perdix*).

tup (tŭp), *v. t.;* TUPPED (tŭpt); TUP'PING. [ME. *tuppe;* perh. akin to *top* summit, head.] **1.** To butt, as a ram does. *Local, Eng.*
2. To cover; — said of a ram. *Shak.*
3. To beat or upset with a tup; specif., to upset (a piece too long for forging under a power hammer) by a tup or monkey slung from the roof and swung like a battering ram.

tup, *n.* **1.** A ram (male of the sheep).
2. Any of various devices acting by impact; as: **a** The ram or monkey, or falling weight, of a pile driver, drop hammer, etc.; specif., the heavy head of a steam hammer in which the upper pallet is secured. **b** A pavior's mallet.

tu'pe-lo (tū'pē-lō), *n.; pl.* -LOS (-lōz). *Bot.* A North American tree (*Nyssa multiflora*) having brilliant, glossy foliage, acid red berries, and hard, cross-grained wood. Also, any of several related species of *Nyssa.* See BLACK GUM **a.**

tupelo gum. Any tupelo or sour gum; specif., the tree *Nyssa aquatica,* which has softer wood than *N. multiflora.*

Tu'pi (tōō'pē), *n.* An Indian of the tribe from which the Tupian stock takes its name, dwelling, at the advent of the Portuguese, about the mouth of the Amazon. Also, their language, which is the basis of the Indian trade language of the Amazon.

Tu'pi-an (-pĭ-ăn), *a.* Designating, or pert. to, a linguistic stock of South American Indians comprising the most important Brazilian tribes. Agriculture, pottery, and stone working were practiced by them at the time of the conquest. The Tupi and the Guaraní were originally the most powerful of the stock, which is hence also called *Tupi-Guaranian.*

Tup-pe'ri-an (tŭ-pē'rĭ-ăn), *a.* Of or pert. to M. F. Tupper (1810–89), author of "Proverbial Philosophy," a long series of trite moralizings in blank verse; hence, uninspired; commonplace. — **Tup'per-ism** (tŭp'ẽr-Iz'm), *n.*

tuque (tūk), *n.* [Canadian F. See TOQUE.] A kind of warm cap for winter wear, made from a knit bag with closed tapered ends, by pushing one end up in the other.

tu'ra-cin (tū'rȧ-sĭn), *n. Physiol. Chem.* An amorphous reddish violet pigment containing copper, obtained from certain feathers of several species of touraco.

Tu-ra'ni-an (tū-rā'nĭ-ăn), *a.* [From *Tur,* in Persian legend, one of the three brothers from whom sprang the races of mankind.] Of, pert. to, or designating, the languages now commonly called the *Ural-Altaic languages;* also, of, pert. to, or designating, the people who speak them.

Tu-ra'ni-an, *n. Ethnol.* **a** A member of any of the peoples of Ural-Altaic stock; vaguely, a member of any division of a supposed nomadic people who preceded the Aryans in Europe and Asia. *Obsoles.* **b** A member of any tribe or nationality of Turkic or Tataric stock. *Rare.*

tur'ban (tûr'băn), *n.* [Formerly *turband, turbant, tolibant,* F. *turban,* OF. *tolliban;* cf. It. *turbante;* fr. Turk. *tulbend, dulbend,* fr. Per. *dulband.* Cf. TULIP.] **1.** A headdress worn by men in the Levant and by most Mohammedans of the male sex, consisting of a cap, with a sash, scarf, or shawl, usually of cotton or linen, wound about it, and sometimes hanging down the neck.

One form of Turban, 1.

2. A headdress likened to an Oriental turban; as: **a** A headdress resembling a turban fashionable among women in Europe and America in the early 19th century. **b** A bandanna, or square of cotton cloth, worn by negro women in the West Indies and the southern United States.
3. A kind of woman's or child's hat with no brim or with brim turned up close to the crown.
4. A turban squash.
5. *Cookery.* A drum-shaped case for entrées, fillets, etc.

tur'baned (tûr'bănd), *a.* Wearing a turban.

turban lily. A European lily (*Lilium pomponium*) cultivated for its deep red, spotted, turban-shaped flowers.

turban squash. A variety of squash in which the fleshy receptacle does not extend over the ovary, which therefore protrudes like a cap or turban.

turban stone. A round stone pillar with a turban carved at the top; — a common form of Mohammedan tombstone.

tur'ba-ry (tûr'bă-rĭ), *n.; pl.* -RIES (-rĭz). [LL. *turbaria* a place for digging peat, fr. *turba* peat; cf. OF. *torberie.* See TURF.] *Eng. Law.* An easement to dig turf or peat on another's land; also, the ground where turf is dug.

Tur'bel-la'ri-a (tûr'bĕ-lā'rĭ-ȧ; 115), *n. pl.* [NL., fr. L. *turbellae* a bustle, stir, dim. fr. *turba* disturbance; — so named because the cilia cause tiny currents in the water.] *Zoöl.* The class of flatworms consisting of the planarians. It formerly included the nemerteans also.

X20
One of the Turbellaria (*Macrostomum auritum*). *a* Otolith; *m* Mouth; *e-n* Body Cavity containing *d* food; *c c'-d* Male Organs; *e-c'* Ovaries.

tur'bel-la'ri-an (-ăn), *a. Zoöl.* Pertaining to the Turbellaria. — *n.* A turbellarian worm.

tur'bid (tûr'bĭd), *a.* [L. *turbidus,* fr. *turbare* to disturb. See TROUBLE; cf. DISTURB, PERTURB.] **1.** Having the lees or sediment disturbed; roiled; hence, loosely, muddy; not clear; — used of liquids; as, *turbid* water or wine.
2. Disturbed; confused; disordered. "Such *turbid* intervals that use to attend close prisoners." *Howell.*
Syn. — TURBID, MUDDY. Anything is TURBID when its clearness is disturbed, esp. by the stirring up of sediment of any sort; that is MUDDY which is turbid with mud; both words are used fig. (*muddy* being the stronger) of that which is confused, disturbed, or cloudy; as, "the *turbid* ebb and flow of human misery" (*M. Arnold*); "Joubert had far less smoke and *turbid* vehemence in him than Coleridge" (*id.*); "'*Turbid* ecstasy' is surely not . . . good. . . . *Turbid* rather suits the *muddy* kind of inspiration which London porter confers" (*Lamb*); his thinking is *muddy.* See DARK.
— **tur-bid'i-ty** (tûr-bĭd'ĭ-tĭ), **tur'bid-ness,** *n.* — **tur'bid-ly,** *adv.*

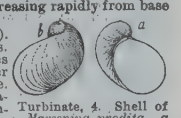
tur'bi-nal (tûr'bĭ-năl), *a.* [L. *turbo, turben, -inis,* a top, whirl.] *Anat. & Zoöl.* Rolled in a spiral; scroll-like; turbinate; — applied to the thin, plicated, bony or cartilaginous plates covered with olfactory and mucous membrane borne on the walls of the nasal chambers. There are usually several of these plates in each nasal chamber. The turbinals of man are commonly called **turbinated bones.** In fishes *turbinal* has been applied to bones otherwise called *nasals.*

Turbinate, 2. Capsule of Ludwigia.

tur'bi-nal, *n.* A turbinal bone or cartilage.

tur'bi-nate (-bĭ-nāt), *a.* [L. *turbinatus,* fr. *turbo, turben, -inis,* a whirl, top.] **1.** Whirling in the manner of a top.
2. *Bot.* Shaped like a top, or inverted cone; narrow at the base and broad at the apex.
3. *Anat. & Zoöl.* Turbinal.
4. *Zoöl.* Spiral with whorls decreasing rapidly from base to apex; — said of certain shells.

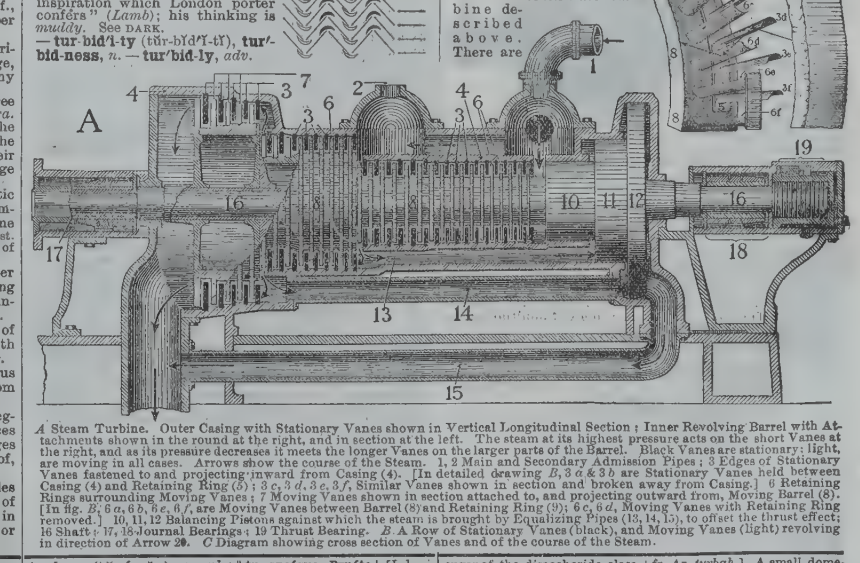
tur'bi-nat-ed bone (tûr'bĭ-nāt'ĕd). *Anat.* A turbinal bone or process. In man there are three such bones or processes, borne on the outer wall of the nasal fossa on each side. The *inferior* and largest is a separate curved bony plate, horizontally placed and separating the inferior and middle meatuses in the nose. The *middle* and *superior* turbinated bones are merely processes of the ethmoid.



Turbinate, 4. Shell of *Marsenina prodita.* *a* Front view; *b* Dorsal view. Natural size.

tur'bi-na'tion (-nā'shŭn), *n.* [Cf. L. *turbinatio* a pointing in the form of a cone. See TURBINATE.] **1.** Act of spinning, or whirling, as a top.
2. A turbinate or whorled formation, as a shell.

tur'bine (tûr'bĭn; -bīn), *n.* [L. *turbo, -inis,* that which spins or whirls round, whirl, akin to *turba* a crowd, *turbare* to disturb. Cf. TROUBLE.] **1.** A whirlwind. *Obs.*
2. A rotary motor actuated by the reaction, impulse, or both, of a current of water under pressure. A turbine usually consists of a series of curved vanes arranged to rotate on a central spindle, the whole being inclosed by a casing permitting the inlet and outlet of the water in a desired manner. Turbines are usually classified according to the manner in which the water flows through them, as: **parallel-flow,** *or* **axial-flow, turbine,** in which water enters the turbine through fixed guide blades, passing axially and spirally through the passages and discharges in a direction parallel or axial to the turbine spindle, as in the **Jonval turbine; outward-flow turbine,** in which water flows axially into the machine, passing through it radially, and discharging radially outward from the rim, as in the **Fourneyron turbine; inward-flow turbine,** in which water enters from the circumference, passing radially inwards, and escaping axially, as in the **Thomson turbine** or **Francis turbine; mixed-flow turbine,** combining the inward-flow and parallel-flow types, as in the **Schiele turbine.** This classification applies to reaction or to reaction-and-impulse turbines. In turbines working solely by impulse, as the **Girard turbine,** parallel flow is universally adopted, and the water passages are only partly filled, contrasting with reaction turbines, which are only at their best efficiency with "drowned" passages. Cf. PELTON WHEEL, WATER WHEEL.



A Steam Turbine. Outer Casing with Stationary Vanes shown in Vertical Longitudinal Section; Inner Revolving Barrel with Attachments shown in the round at the right, and in section at the left. The steam at its highest pressure acts on the short Vanes at the right, and as its pressure decreases it meets the longer Vanes on the larger parts of the Barrel. Black Vanes are stationary; light, are moving in all cases. Arrows show the course of the Steam. 1, 2 Main and Secondary Admission Pipes; 3 Edges of Stationary Vanes fastened to and projecting inward from Casing (4). [In detailed drawing *B*, 3 *a* & 3 *b* are Stationary Vanes held between Casing (4) and Retaining Ring (5); 3 *c*, 3 *d*, 3 *e*, 3 *f*, Similar Vanes shown in section and broken away from Casing.] 6 Retaining Rings surrounding Moving Vanes; 7 Moving Vanes shown in section attached to, and projecting outward from, Moving Barrel (8). [In fig. *B*, 6 *a*, 6 *b*, 6 *e*, 6 *f*, are Moving Vanes between Barrel (8) and Retaining Ring (9); 6 *c*, 6 *d*, Moving Vanes with Retaining Ring removed.] 10, 11, 12 Balancing Pistons against which the steam is brought by Equalizing Pipes (13, 14, 15), to offset the thrust effect; 16 Shaft; 17, 18 Journal Bearings; 19 Thrust Bearing. *B* A Row of Stationary Vanes (black), and Moving Vanes (light) revolving in direction of Arrow 20. *C* Diagram showing cross section of Vanes and of the course of the Steam.

tur'bi-nel (tûr'bĭ-nĕl), *a.* [L. *turbo, turben,* a top, whirl.] *Anat. & Zoöl.* Rolled in a spiral; scroll-like; turbinate; — applied to the thin, plicated, bony or cartilaginous plates covered with olfactory and mucous membrane borne on the walls of the nasal chambers. tunnel disease. *Med.* a Caisson disease. b Ankylostomiasis.
tun'neled, tun'nelled (tŭn'ĕld), *a.* Having a tunnel.
tunnel head. *Metal.* The top of a smelting furnace where the materials are put in.
tunnel kiln. A limekiln using coal for fuel, as distinct from a *flame kiln,* using wood or peat.
tun'nel-ler. Var. of TUNNELER.
tunnel net. A fishing net with a wide mouth at one end and narrow at the other. [VAULT.]
tunnel vault. *Arch.* = BARREL.
tunnel weaver. Any territelarian spider.
tun'ner (tŭn'ẽr; tōōn'ẽ(r)), *v. t.* To put (ale, etc.) in tuns or casks. *Dial. Eng.* [*Obs.*]
tun'ning-mele', *n.* A funnel.
tun'ny-back, *n.* The stickleback. *Dial. Eng.*
tunny oil. See OIL, *Table II.*
tun'y (tŭn'ĭ), *a.* Tuneful; melodious. *Colloq.*
tuo, tuone. + TWO, TEEN.
tuom. Dial. Eng. var. of TOOM.
tup, *v. i.* **1.** To butt, as a ram. **2.** To copulate, as a ram.
tupace. + TOPAZ.
Tu-pa'ia (tū-pä'yȧ), *n.* [NL., of Malay origin. See TANA, the animal.] *Zoöl.* The principal genus of squirrel shrews, type of a family, **Tu'pa-i'i-dæ** (tū'pā-ĭ'ĭ-dē). [Maori.] The tutu.
tu'pa-ki'hi (tōō'pä-kē'hē), *n.* [Maori corruption of E. *two-barrel.*] A double-barreled gun. *Dial. New Zealand.* [TYPHOON.]
tu-phan' (tōō-fän'). Var. of
tup'-head'ed, *a.* Sheep-headed; stupid. *Rare.* [TUPIAN.]
Tu'pi-Gu-a-ra'ni-an, *a.* See
tup'man (tŭp'măn), *n.; pl.* -MEN (-mĕn). A man who breeds, or deals in, tups. *Dial. Eng.*
Tup'man, Tra'cy (trā'sĭ). In Dickens's "Pickwick Papers," a member of the Pickwick Club, who is very amorous.
tuppe. + TWOPENCE.
tup'pence (tŭp'ĕns). Var. of
tup'pee (tŭp'ē), *n.* [Hind. *tapsi-macch.*] A threadfish (*Polydactylus risua* or allied species) of the Ganges.
tu'pu-na (tōō'pōō-nä), *n. sing. & pl.* [Maori.] An ancestor or parent. *New Zealand.*
tuqueht. + TEWIT.
tu'qui (tōō'kē), *n.* A kind of yam (*Dioscorea sativa*). *Phil. I.*
‖ **tu quo'que.** [L.] Thou also; — a retort charging an adversary with being or doing the same as one's self.
‖ **tu quo'que, Bru'te!** [L.] = ET TU, BRUTE.
tur. + TOWER.
tur (tōōr), *n.* [Cf. Russ. *tur* urus.] Any of several Caucasian wild goats, as *Capra cylindricornis* of the eastern, *C. severtzowi* of the western, and *C. caucasica* of the central, Caucasus.
tu'ra-co', tu'ra-cou', tu'ra-koo'. Vars. of TOURACO.
tu'ra-co-ver'din (tōō'rȧ-kō-vûr'dĭn), *n.* [See TOURACO; VERDANT.] A green pigment found in feathers of the touraco.
Tu'ra-cus (tū'rā-kŭs), *n.* [NL. See TOURACO.] *Zoöl.* The typical genus of touracos, including those with feathered nostrils.
tu-ran'ose (tū-răn'ōs; tōō-răn'ōs), *n.* [G. *turanos,* fr. *Turan* Turkestan, because got from Turkestan manna.] *Chem.* A sugar of the disaccharide class, $C_{12}H_{22}O_{11}$, resulting from the partial hydrolysis of melezitose.

tur'bi-nal (tûr'bĭ-năl), *a.* [L. *turbo, turben, -inis,* a top, whirl.] *Anat. & Zoöl.* Rolled in a spiral; scroll-like; turbinate; — applied to the thin, plicated, bony or cartilaginous plates covered with olfactory and mucous membrane borne on the walls of the nasal chambers. There are usually several of these plates in each nasal chamber. The turbinals of man are commonly called **turbinated bones.** In fishes *turbinal* has been applied to bones otherwise called *nasals.*

tur'bi-nal, *n.* A turbinal bone or cartilage.

tur'bi-nate (-bĭ-nāt), *a.* [L. *turbinatus,* fr. *turbo, turben, -inis,* a whirl, top.] **1.** Whirling in the manner of a top.
2. *Bot.* Shaped like a top, or inverted cone; narrow at the base and broad at the apex.
3. *Anat. & Zoöl.* Turbinal.
4. *Zoöl.* Spiral with whorls decreasing rapidly from base to apex; — said of certain shells.

tur'bi-nat-ed bone (tûr'bĭ-nāt'ĕd). *Anat.* A turbinal bone or process. In man there are three such bones or processes, borne on the outer wall of the nasal fossa on each side. The *inferior* and largest is a separate curved bony plate, horizontally placed and separating the inferior and middle meatuses in the nose. The *middle* and *superior* turbinated bones are merely processes of the ethmoid.

tur'bi-na'tion (-nā'shŭn), *n.* [Cf. L. *turbinatio* a pointing in the form of a cone. See TURBINATE.] **1.** Act of spinning, or whirling, as a top.
2. A turbinate or whorled formation, as a shell.

tur'bine (tûr'bĭn; -bīn), *n.* [L. *turbo, -inis,* that which spins or whirls round, whirl, akin to *turba* a crowd, *turbare* to disturb. Cf. TROUBLE.] **1.** A whirlwind. *Obs.*
2. A rotary motor actuated by the reaction, impulse, or both, of a current of water under pressure. A turbine usually consists of a series of curved vanes arranged to rotate on a central spindle, the whole being inclosed by a casing permitting the inlet and outlet of the water in a desired manner. Turbines are usually classified according to the manner in which the water flows through them, as: **parallel-flow,** *or* **axial-flow, turbine,** in which water enters the turbine through fixed guide blades, passing axially and spirally through the passages and discharges in a direction parallel or axial to the turbine spindle, as in the **Jonval turbine; outward-flow turbine,** in which water flows axially into the machine, passing through it radially, and discharging radially outward from the rim, as in the **Fourneyron turbine; inward-flow turbine,** in which water enters from the circumference, passing radially inwards, and escaping axially, as in the **Thomson turbine** or **Francis turbine; mixed-flow turbine,** combining the inward-flow and parallel-flow types, as in the **Schiele turbine.** This classification applies to reaction or to reaction-and-impulse turbines. In turbines working solely by impulse, as the **Girard turbine,** parallel flow is universally adopted, and the water passages are only partly filled, contrasting with reaction turbines, which are only at their best efficiency with "drowned" passages. Cf. PELTON WHEEL, WATER WHEEL.
3. A form of steam engine analogous in construction and action to the water turbine described above. There are

A Steam Turbine. Outer Casing with Stationary Vanes shown in Vertical Longitudinal Section; Inner Revolving Barrel with Attachments shown in the round at the right, and in section at the left. The steam at its highest pressure acts on the short Vanes at the right, and as its pressure decreases it meets the longer Vanes on the larger parts of the Barrel. Black Vanes are stationary; light, are moving in all cases. Arrows show the course of the Steam. 1, 2 Main and Secondary Admission Pipes; 3 Edges of Stationary Vanes fastened to and projecting inward from Casing (4). [In detailed drawing *B*, 3 *a* & 3 *b* are Stationary Vanes held between Casing (4) and Retaining Ring (5); 3 *c*, 3 *d*, 3 *e*, 3 *f*, Similar Vanes shown in section and broken away from Casing.] 6 Retaining Rings surrounding Moving Vanes; 7 Moving Vanes shown in section attached to, and projecting outward from, Moving Barrel (8). [In fig. *B*, 6 *a*, 6 *b*, 6 *e*, 6 *f*, are Moving Vanes between Barrel (8) and Retaining Ring (9); 6 *c*, 6 *d*, Moving Vanes with Retaining Ring removed.] 10, 11, 12 Balancing Pistons against which the steam is brought by Equalizing Pipes (13, 14, 15), to offset the thrust effect; 16 Shaft; 17, 18 Journal Bearings; 19 Thrust Bearing. *B* A Row of Stationary Vanes (black), and Moving Vanes (light) revolving in direction of Arrow 20. *C* Diagram showing cross section of Vanes and of the course of the Steam.

practically only two distinct kinds, and they are typified in the de Laval and the Parsons and Curtis turbines. The **de Laval turbine** is an impulse turbine, in which steam impinges upon revolving blades from a flared nozzle. The flare of the nozzle causes expansion of the steam, and hence changes its pressure energy into kinetic energy. An enormous velocity (30,000 revolutions per minute in the 5 H. P. size) is requisite for high efficiency, and the machine has therefore to be geared down to be of practical use. Some recent developments of this type include turbines formed of several de Laval elements compounded as in the ordinary expansion engine. The **Parsons turbine** is an impulse-and-reaction turbine, usually of the axial type. The steam is constrained to pass successively through alternate rows of fixed and moving blades, being expanded down to a condenser pressure of about 1 lb. per square inch absolute. The **Curtis turbine** is somewhat simpler than the Parsons, and consists of elements each of which has at least two rows of moving blades and one row of stationary. The bucket velocity is lowered by fractional velocity reduction. Both the Parsons and Curtis turbines are suitable for driving dynamos and steamships directly. In efficiency, lightness, and bulk for a given power, they compare favorably with reciprocating engines.

Tur′bi-nel′la (tûr′bĭ-nĕl′ȧ), *n.* [NL., dim. fr. L. *turbo*, *-inis*, a top.] *Zoöl.* A genus of large marine rachiglossate gastropods having a thick, heavy, pear-shaped shell, with conspicuous folds on the columella. It is the type of a family, **Tur′bi-nel′li-dæ** (-nĕl′ĭ-dē).

1/3 Turbinella (*T. pyrum*), Ceylon.

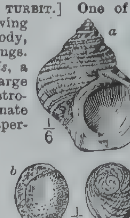
tur-bin′i-form (tŭr-bĭn′ĭ-fôrm; tûr′bĭ-nĭ-fôrm′), **tur′bi-noid** (tûr′bĭ-noid), *a.* [See TURBO; -FORM; -OID.] *Zoöl.* Shaped like a shell of the genus *Turbo*.

tur′bit (tûr′bĭt), *n.* One of a breed of fancy pigeons derived from the owl pigeons and having a short head and beak, a frilled breast, and a peak or a shell crest. The wings, except the quills, are variously colored; the rest of the bird is white.

tur′bit-teen′ (tûr′bĭ-tēn′), *n.* [See TURBIT.] One of a breed of Oriental frilled pigeons having a short bill, rounded head, white body, and colored shoulders and head markings.

Tur′bo (tûr′bō), *n.* [L. *turbo*, *-inis*, a top. See TURBINE.] *Zoöl.* **1.** A large genus of marine rhipidoglossate gastropods, usually having a heavy turbinate shell, pearly inside, with a rounded aperture and a calcareous operculum.

2. [*l. c.*] A shell of this genus or of the family Turbinidæ.



Turbo. *a T. marmoratus*; *b c* Operculum of *T. smaragdus*.

tur′bo- (tûr′bō-). A combining form for *turbine*, meaning: **a** Coupled directly to a driving turbine; as, **tur′bo-al′ter-na′tor** (an alternator coupled directly to a driving turbine), **tur′bo-blow′er, tur′bo-com-pres′sor, tur′bo-dy′na-mo, tur′bo-fan′, tur′bo-gen′er-a′tor, tur′bo-pump′**, etc. **b** Consisting of a turbine; as, **tur′bo-ma-chine′** (a machine of the nature of a turbine), **tur′bo-mo′tor**, etc.

tur′bot (-bŏt), *n.* [F., OF. *torbout*; — perh. so named from its shape, and fr. L. *turbo*, *-inis*, a top, a whirl. The ending *-ot* or *-bot* is not fully explained.] **a** A large European flounder (*Scophthalmus maximus*) highly esteemed as a food fish. It often weighs from thirty to forty pounds. Its color on the upper side is brownish with small scattered tubercles. The lower, or blind, side is white. **b** Any of numerous flounders more or less like the true turbot, as the American plaice, or summer flounder (see FLOUNDER, 1), the halibut, *Hypsopsetta guttulata* in California and *Ammotretis guntheri* in New Zealand. **c** Locally, as in the West Indies, any of several trigger fishes and filefishes.

1/12 Turbot (*Scophthalmus maximus*).

tur′bu-lence (tûr′bū-lĕns), *n.* [L. *turbulentia*: cf. F. *turbulence*.] Quality or state of being turbulent; a disturbed state; tumult; disorder; as, the *turbulence* of a mob.

The years of . . . warfare and *turbulence* which ensued. *Southey.*

Syn. — Agitation, commotion, tumult, tumultuousness, unruliness, insubordination, rioting.

tur′bu-lent (-lĕnt), *a.* [L. *turbulentus*, fr. *turba* disorder, tumult: cf. F. *turbulent*. See TURBID.] **1.** Aroused to violent commotion; violently agitated; tumultuous; as, the *turbulent* ocean.

Calm region once,
And full of peace, now tossed and *turbulent*. *Milton.*

2. Disposed to insubordination and disorder; restless; unquiet; refractory; as, *turbulent* spirits.

Sagacious, bold, and *turbulent* of wit. *Dryden.*

3. Producing commotion; disturbing; exciting.

Whose heads that *turbulent* liquor fills with fumes. *Milton.*

Syn. — Disturbed, agitated, tumultuous, riotous, seditious, insubordinate, refractory, unquiet.

Tur′co (tûr′kō), *n.*; *pl.* -cos (-kōz). [F., prob. fr. Russ. *Turka*, a collective noun, used of enemies, prop., Turks. The Turcos are said to have been so called by the Russians in the Crimean War, and the term was applied by the Russians to the Japanese during the war with Japan. Cf. also It. *Turco* a Turk.] *Mil.* A member of the force of French Algerian infantry, composed of natives with a sprinkling of French, the chief officers being French. Their uniform has been of the zouave type. The technical name is *Algerian tirailleurs*.

Tur′co- (tûr′kō-). Combining form for *Turkish*, or for *Turkic*, *Turki*. See TURKO-.

Tur′co-phobe (tûr′kō-fōb), **Tur-coph′o-bist** (tŭr-kŏf′ō-bĭst), *n.* [See TURCO-; -PHOBE; -IST.] A person opposed to the Turks or their policy, customs, etc.

Tur′di-dæ (tûr′dĭ-dē), *n. pl.* [NL. See TURDUS.] *Zoöl.* A widely distributed family of singing birds containing the true thrushes and a greater or less number of allied groups, often including the bluebirds, wheatears, stonechats, Old World warblers, Old World redstarts, solitaires, and water ouzels, and the mocking birds and thrashers. In the above broad sense it includes many subfamilies, the true thrushes constituting the subfamily **Tur-di′næ** (tŭr-dī′nē). The Old World warblers (subfamily Sylviinæ), water ouzels (Cinclinæ), and mocking birds and thrashers (Miminæ) are often made separate families. — **tur′dine** (-dīn; -dĭn; 183), *a.*

tur′di-form (tûr′dĭ-fôrm), *a.* [L. *turdus* a thrush + E. *-form*.] *Zoöl.* Having the form or structure of a thrush.

Tur′dus (tûr′dŭs), *n.* [L., a thrush.] *Zoöl.* A genus of thrushes formerly including most of the Turdidæ, but now restricted to Old World species, as the missel thrush, fieldfare, redwing, and song thrush.

tu-reen′ (tŭ-rēn′), *n.* [F. *terrine*, L. *terra* earth. See TERRACE.] A large, deep vessel to hold soup, etc., at the table.

turf (tûrf), *n.*; *pl.* TURFS (tûrfs), *Obs. or R.* TURVES (tûrvz). [AS. *turf*; akin to D. *turf* peat, G. *torf*, OHG. *zurba* turf, Sw. & Icel. *torf* turf, peat, Dan. *törv*, Skr. *darbha* a kind of grass, a tuft of grass.] **1.** The upper stratum of earth and vegetable mold filled with the roots of grass and other small plants, so as to form a kind of mat; sward; sod; also, a piece of this upper stratum cut or pulled off; a sod.

2. Peat, esp. when prepared for fuel. See PEAT.

tur-ges′cen-cy (-ĕn-sĭ) } GESCENT.] **1.** Act of swelling, or state of being turgescent; *Plant Physiol.*, turgor.
2. Pompousness; inflation; bombast; turgidity.

tur-ges′cent (-ĕnt), *a.* [L. *turgescens*, *-entis*, p. pr. of *turgescere*: cf. F. *turgescent*. See TURGESCE.] Becoming turgid or inflated; swelling; growing big.

tur′gid (tûr′jĭd), *a.* [L. *turgidus*, fr. *turgere* to swell.] **1.** Distended abnormally by some internal agent or expansive force; swollen; bloated; inflated; tumid; — esp. applied to a part of the body; as, a *turgid* limb.

2. Swelling in style or language; vainly ostentatious; bombastic; pompous; as, a *turgid* style of speaking.

Syn. — TURGID, TUMID, BOMBASTIC, GRANDIOSE, GRANDILOQUENT, MAGNILOQUENT. TURGID and TUMID imply inflation of style; BOMBASTIC is stronger, and suggests extravagance or rant; as, "My poems have been rightly charged with . . . a general *turgidness*. I have . . . used my best efforts to tame the swell and glitter both of thought and diction" (*Coleridge*); "Shall gentle Coleridge pass unnoticed here, to *turgid* ode and *tumid* stanza dear?" (*Byron*); "a theatrical, *bombastic*, windy phraseology" (*Burke*). GRANDIOSE, as here compared (see GRAND), implies pompousness of speech; GRANDILOQUENT and MAGNILOQUENT suggest an affectedly large and lofty utterance; as, "Marlowe . . . pushes *grandiosity* to the verge of *bombast*" (*Lowell*); "F. was . . . *grandiloquent*, yet courteous. His delivery of the commonest matters of fact was Ciceronian" (*Lamb*); "She was a trifle more *magniloquent* than usual, and entertained us with stories of colonial governors" (*Thackeray*). See REDUNDANCY, OSTENTATIOUS.

tur′key (tûr′kĭ), *n.*; *pl.* -KEYS (-kĭz). [So called because it was formerly erroneously believed that it came originally from *Turkey*: cf. F. *Turquie* Turkey. See TURK.] **1.** Either of two species of large American birds of the pheasant family, one of which (*Meleagris gallopavo*) is of wide range in North America, represented by several varieties in different regions, and is widely kept in domestication in most parts of the world. It formerly occurred wild from southern Mexico to New England and Canada, but now is hardly found north of Virginia. It has handsome plumage with a bronze luster, a naked carunculated head, and whitish tips to the upper tail coverts and tail feathers in the typical variety (that of Mexico), or chestnut tips to the same in the northern varieties. The male is fond of strutting with the feathers puffed out and the tail spread. The domesticated turkeys are derived from the Mexican variety. Several color varieties are bred (bronze, buff, slate, pure white, etc.). The other wild species is the ocellated turkey (which see).

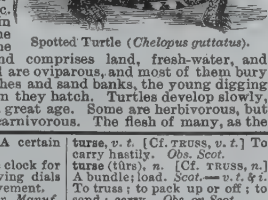
tur'tle (tûr't'l), *n.* [ME. & AS. *turtle*, L. *turtur*; prob. of imitative origin. Cf. TURTLE the tortoise.] A turtledove

tur'tle, *n.* [Prob. same word as the word preceding, and used (prob. by sailors) for Sp. *tortuga* tortoise, turtle, or Pg. *tartaruga.* Cf. TORTOISE.] **1.** Orig., any marine reptile of the order or subclass Chelonia; a sea turtle; now, any reptile of that group; a tortoise, in the broadest sense of that word. Besides the bony shell (composed of an upper convex shield, or *carapace*, and a lower flattened shield, or *plastron*) which incloses the trunk, and into which in many species the head, limbs, and tail may be withdrawn, and the toothless horny beak, the Chelonia have many anatomical peculiarities and form a group which was already differentiated in the Triassic. It now occurs in most parts of the world except the colder regions, and comprises land, fresh-water, and marine forms. All are oviparous, and most of them bury their eggs in beaches and sand banks, the young digging their way out when they hatch. Turtles develop slowly, and some live to a great age. Some are herbivorous, but the majority are carnivorous. The flesh of many, as the green turtle and diamond-back terrapins, is esteemed as food. Some writers have tried to restrict the term *turtle* to the aquatic Chelonia (a few even to the marine forms only, as originally), calling the others *tortoise.* Usage does not warrant this, though sea turtles are rarely called *tortoise*, and land turtles oftener *tortoise* than *turtle.* Cf. TERRAPIN.



Spotted Turtle (*Chelopus guttatus*).

They took office in 451, and their laws were published on ten bronze tables in 450. Then their powers were renewed, new decemvirs were elected, and framed more laws, which were probably the source of the two additional tables published under the consuls Valerius and Horatius in 449. The laws were largely declaratory of previously existing customary secular law, and applied to patricians and plebeians alike. In them religious rules and sanctions are secondary. The tradition that they were based on the report of commissioners sent to Greece seems to be unauthentic.

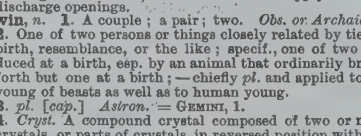
twin, *a.* [ME. *twin* double, AS. *getwinne* two and two, pl., twins; akin to D. *tweeling* a twin, G. *zwilling*, OHG. *zwiniling*, Icel. *tvennr, tvinnr*, two and two, twin, and to AS. *twi-* two. See TWICE, TWO.] **1** Twain; two. *Obs.* **2.** Made up of two distinct, nearly related, and equal members; double; twofold. **3.** Specif.: **a** Consisting of, or being, twins, or a pair; as, *twin* boys. **b** *Bot.* Didymous. **4.** Standing in the relation of a twin; esp., being one of two born at a birth; as, a *twin* brother or sister. **5.** *Cryst.* Of the nature of a twin; formed by twinning.

twin boat, *or* **twin ship**, *Naut.*, a vessel whose deck and upper works rest on two parallel hulls, sometimes with a single paddle wheel between them, as in some river steamers. — **T. Brethren**, *or* **Brothers**, Castor and Pollux. See DIOSCURI and GEMINI, 1 **a**. — **t. colors** *or* **colours**, the two colors of a dichroic substance. — **t. equatorial**, *Astron.*, two telescopes, often a reflector and a refractor, mounted on the two ends of the declination axis. — **t. mill**, *Mech.*, either of a pair of straddle mills. — **t. ship.** See TWIN BOAT. — **T. Stars**, Castor and Pollux. — **t. stock**, *Bee Keeping*, a beehive containing two colonies of bees. — **t. suns**, *Astron.*, a binary, or double star, whose components are nearly equal in magnitude. — **t. tap**, in a surface carburetor, a mixing chamber having two valves, one to regulate the air supply to dilute the mixture from the carburetor proper, and the other the supply of mixture to the engine. — **t. valve**, a valve with one supply and two discharge openings.

twin, *n.* **1.** A couple; a pair; two. *Obs. or Archaic.* **2.** One of two persons or things closely related by ties of birth, resemblance, or the like; specif., one of two produced at a birth, esp. by an animal that ordinarily brings forth but one at a birth; — chiefly *pl.* and applied to the young of beasts as well as to human young. **3.** *pl.* [*cap.*] *Astron.* = GEMINI, 1. **4.** *Cryst.* A compound crystal composed of two or more crystals, or parts of crystals, in reversed position with reference to each other. The relative position of the parts of a twin may be explained by supposing one part to be revolved 180° about a certain axis (the **twinning axis**), this axis being normal to a plane (the **twinning plane**) which is usually one of the fundamental planes of the crystal. This revolution brings the two parts into parallel position, or vice versa. A **contact twin** is one in which the parts are united by a plane surface, called the **composition face**, usually the same as the twinning plane. A **penetration twin** is one in which the parts interpenetrate each other, often very irregularly. Twins are also called, according to form, *cruciform, geniculated*, etc. When more than two simple crystals are involved, the twinning is said to be *repeated*. **Polysynthetic twinning** is repeated twinning in parallel, which sometimes, as in the case of the triclinic feldspars, is shown as a series of striations on the surface. Repeated twinning not in parallel, i.e., in which the successive twinning planes are inclined to one another, tends to produce cyclic forms, which often resemble simple crystals of another system.



Twins. 4. *A* Octahedron showing the Twinning Plane *a b c d e f*. *B* Twinned Octahedron (Contact Twins). *C* Penetration (Cruciform) Twin of Staurolite.

twin, *v. i.*; TWINNED (twĭnd), TWIN'NING. **1.** To bring forth twins. *Tusser.* **2.** To be mated, or coupled, with another; specif., to be born at the same birth.

Tyloses block up the tracheal cavities during the transformation of sapwood to heartwood. **2.** *Med.* A thickening and hardening; callosity.

tymp (tĭmp), *n.* [Cf. TYMPAN.] In an open-front iron blast furnace, the stone or the water-cooled iron casting protecting the top of the opening through which molten slag and iron continually pass into the forehearth, the slag flowing over the dam, while the iron is tapped through a lower opening in the dam. In modern practice the blast furnace has a closed front, and slag and iron are tapped periodically through separate openings, thus doing away with the tymp and the forehearth.

tym'pan (tĭm'păn), *n.* [F., fr. L. *tympanum* a kettledrum, a panel of a door. See TYMPANUM; cf. TYMP.] **1.** A drum. *Obs.* **2.** *Arch.* A panel; a tympanum.

3. *Printing Presses.* The sheet of paper, cloth, or other material, placed between the impression surface (platen, impression cylinder, or the like) and the paper to be printed. In hand presses the tympan is double and consists of two sheets, usually of parchment, stretched on the **tympan frame** (consisting of the inner tympan frame over which the tympan is drawn, and an outer tympan frame holding the tympan in place). Between the sheets is placed the packing of blankets, rubber, or the like. *Tympan* is sometimes applied to the tympan frame. In power presses the tympan is a sheet stretched over the platen, as in a job press, or over the impression cylinder, as in a rotary press or in a perfecting press, and covers packing, make-ready, etc. Often a tympan is considered to include also the accompanying backing, the outside sheet then being distinctively called the **draw sheet** or **top sheet.** In perfecting presses the tympan over the second impression surface receives the offset (set-off) of the first side printed and is variously devised, as by changing the sheet (**shifting,** or **traveling, tympan**), to avoid soiling the printed paper. In lithographic presses the tympan is a sheet of blanket or leather or of thin metal (as zinc or copper) placed between the paper to be printed and the scraper or other impressing surface.

tym-pan'ic (tĭm-păn'ĭk), *a.* [See TYMPANUM.] **1.** Like a tympanum, or drum; as, a *tympanic* membrane.

tym'pa-ni'tes (tĭm'pə-nī'tēz), *n.* [L., fr. Gr. *τυμπανίτης*, fr. *τύμπανον* a kettledrum.] *Med.* **a** Distention of the abdomen, due to air or gas accumulating in the intestinal tract or peritoneal cavity; meteorism. Cf. BLOAT, *n.*, 2.

tym'pa-nit'ic (-nĭt'ĭk), *a.* [L. *tympaniticus* one afflicted with tympanites.] *Med.* Of, pertaining to, or affected with, tympanites. — **tympanitic resonance**, the sound produced by percussion of a distended abdomen.

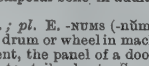
tym'pa-ni'tis (-nī'tĭs), *n.* [NL. See TYMPANUM; -ITIS.] Inflammation of the lining membrane of the middle ear.

tym'pa-no- (tĭm'pə-nō-). A combining form denoting *connection with*, or *relation to*, *the tympanum*.

tym'pa-no-hy'al (-hī'ăl), *a.* *Anat. & Zoöl.* Of or pertaining to the tympanum and the hyoid arch; designating the proximal segment in the hyoidean arch, becoming a part of the styloid process of the temporal bone in adult man. — **tym'pa-no-hy'al**, *n.*

tym'pa-num (tĭm'pə-nŭm), *n.*; *pl.* E. **-NUMS** (-nŭmz), L. **-NA** (-nə). [L., a kettledrum, a drum or wheel in machines, the triangular area in a pediment, the panel of a door, Gr. *τύμπανον*, *τύπανον*, fr. *τύπτειν* to strike, beat. See TYPE; cf. TIMBREL.] **1.** *Anat. & Zoöl.* **a** The eardrum, or middle ear. See 1st EAR, 1. **b** The tympanic membrane.

2. *Zoöl.* **a** One of the naked inflatable air sacs on the neck of the prairie chicken and other grouse. **b** = TRACHEAL TYMPANUM (see TRACHEA, 1). **c** *Entomol.* A thin tense membrane covering an organ of hearing in a leg or other part of an insect.



t Tympanum on Leg of a Grasshopper. Much enlarged.

3. *Arch.* **a** The recessed face of a pediment within the frame made by the upper and lower cornices, being usually a triangular space or table. **b** The space within an arch, and above a lintel or a subordinate arch, spanning the opening below the arch.

4. A water-raising wheel resembling a kind of Persian wheel. See PERSIAN WHEEL, *Illust.*, 1.

5. *Elec.* The diaphragm of a magneto-telephone.

tym'pa-ny (-nĭ), *n.*; *pl.* **-PANIES** (-nĭz). [Gr. *τυμπανίας*, fr. *τύμπανον* a kettledrum. See TYMPANITES.] **1.** Inflation; distention; hence, conceit; bombast; turgidness. "Thine 's a *tympany* of sense." *Dryden.*

2. *Med.* Tympanites; wind dropsy.

Tyn'dal-ll-za'tion (tĭn'dăl-ĭ-zā'shŭn; -ī-zā'shŭn), *n.* [After John *Tyndall*, British physicist.] Sterilization effected by repeated heating to a temperature sufficiently high to destroy the developed germs; intermittent or fractional sterilization. — **Tyn'dal-lize** (tĭn'dăl-īz), *v. t.*

Tyn-da're-us (tĭn-dā'rē-ŭs), *n.* [L., fr. Gr. *Τυνδάρεος*, also *Τυνδάρεως*.] *Gr. Myth.* The husband of Leda. See LEDA, 1.

Tyn-dar'i-des (tĭn-dăr'ĭ-dēz), *n.*; *pl.* **-IDÆ** (-dē). [L., fr. Gr. *Τυνδαρίδης*.] A male descendant, or a child, of Tyndareus.

Tyn'wald, *n.*, *or* **Court of Tyn'wald** (tĭn'wôld; tĭn'-). [Cf. Icel. *þingvöllr*, lit., parliament field. See 1st THING.] The legislature of the Isle of Man, composed of: (1) a lieutenant governor, representing the sovereign, and a council which acts as the upper house, and (2) the House of Keys.

typ'al (tīp'ăl), *a.* Relating to a type or types; belonging to types; serving as a type; typical.

type (tīp), *n.* [F. *type*, fr. L. *typus* a figure, image, a form, type, character, Gr. *τύπος* the mark of a blow, impression, form of character, model, fr. the root of *τύπτειν* to beat, strike; cf. Skr. *tup* to hurt.] **1.** The mark or impression of something; a distinctive stamp; sign; emblem.

> The faith they have in tennis, and tall stockings,
> Short blistered breeches, and those *types* of travel. *Shak.*

2. A figure or representation of something to come; a token; sign; symbol; — correlative to *antitype*.

> A *type* is no longer a *type* when the thing typified comes to be actually exhibited. *South.*

3. That which serves or may serve as an example or pattern; that which possesses or exemplifies characteristic qualities; a model; standard; exemplar. Specif.: **a** *Biol.* A general form or plan of structure common to a number of individuals; hence, the ideal representation of, or the most perfect exemplification of, a natural group; esp., a type specimen, type species, or type genus (which see). **b** *Zoöl.* In some classifications, a group of animals having a certain type of structure; — practically equiv. to *phylum*.

> *Type* stands apart from all other general terms in ethnological nomenclature. It is not a race, a tribe, or any concrete division whatsoever; but is rather in the nature of an abstraction, a model or pattern to which all possible divisions are referable. . . . *Type* necessarily resolves itself into a question of averages; individuals possessing most of the characters peculiar to a group are said to be typical members of that group, and even this only in a relative sense. *A. H. Keane.*

> Since the time of Cuvier and Baer . . . the whole animal kingdom has been universally held to be divisible into a small number of main divisions or *types*. *Haeckel.*

c *Fine Arts.* The original object, or class of objects, scene, face, or conception, which becomes the subject of a copy; esp., *Numis.*, the pattern or design on either side of a medal or coin. **d** *Chem.* A simple compound, used as a model or pattern to which other compounds are conveniently regarded as being related, and from which they may be actually or theoretically derived. The fundamental types used to express the simplest and most essential chemical relations are hydrochloric acid, HCl; water, H_2O; ammonia, NH_3; and methane, CH_4. **e** *Produce Markets.* A sample of the quality, crop, or the like, dealt in when grain, coffee, sugar, or other produce is sold "to arrive."

4. *Print.* **a** A rectangular block, usually of metal or wood, having its face so shaped as to produce, by the process of printing, a letter, figure, or other character. **b** Such blocks, or the letters or characters impressed, collectively.

> Movable *types* . . . were probably used for Babylonian and Assyrian seals, and were undoubtedly employed long before the Christian Era by the potters of Thasos. . . . They were again invented in China in the 10th century A. D., and were also used about the same time for stamping the legends on the coins of Tibet.
> *I. Taylor (The Alphabet).*

In making ordinary type, a steel punch or die is first prepared by an expert cutter, and from this, by means of a stamping machine, a copper matrix is made, which is fitted to a mold. The type is then cast from type metal, the jet of surplus metal is broken off, and the rough surface is planed and grooved. In the cut, *a* is the *body*; *b*, the *face*, or part from which the impression is taken; *c*, the *shoulder*, or top of the body; *d*, the *counter*; *e*, *serifs*; *f*, *stem*; *g*, *beard*; *h*, the *nick*; *i*, the *groove* made in the process of finishing; *j*, the *feet*. The nicks (see *Illust.*), of which there are on each type from one to four variously grouped, assist the compositor in distinguishing front from back, and also one font from another. The type provided for composition of an ordinary book consists of roman CAPITALS, SMALL CAPITALS, and lower-case letters, and *italic CAPITALS* and *lower-case* letters, with accompanying figures, points, reference, accent, and diacritical marks, and a few signs and other characters, in all more than two hundred characters. Besides the ordinary roman and *italic*, some of the most important of the varieties are:

Metal Type, 4.

Old English. **Black Letter.** **Boldface.**
Gothic. **Antique.** **Clarendon.**
Caslon Old Style. French Elzevir.
Typewriter. *Script.*

According to its width, type is referred to as *extracondensed*, *condensed*, *lean*, *standard*, *fat*, *expanded*, and *extended*. The following line illustrates these seven varieties:

M M M M M M M

The following table shows all the sizes of type common in book work; the column of black squares shows the sizes of the corresponding em quad, and the numbers refer to the nearest equivalent in the point system in use in *America*. See POINT SYSTEM.

Common Name	Specimen	Em quad	Point
Diamond	abcdefghijklmnopqrstuvwxyz		4½
Pearl	abcdefghijklmnopqrstuvwxyz		5
Agate	abcdefghijklmnopqrstuvwx		5½
Nonpareil	abcdefghijklmnopqrstuvw		6
Minion	abcdefghijklmnopqrstuv		7
Brevier	abcdefghijklmnopqrstu		8
Bourgeois	abcdefghijklmnopqrs		9
Long Primer	abcdefghijklmnopqr		10
Small Pica	abcdefghijklmnop		11
Pica	abcdefghijklmn		12
English	abcdefghijklm		14
Columbian	abcdefghijk		16
Great Primer	abcdefghij		18

Excelsior and brilliant are smaller than diamond; they are seldom used. Sizes larger than great primer are paragon (or two-line long primer), double small pica (or two-line small pica), double pica (or two-line pica), double English (or two-line English), double great primer (or two-line great primer), double paragon (or two-line paragon), canon (or two-line double pica). Above this the sizes are called five-line pica, six-line pica, and so on. As a result of the use of the point system, the arbitrary names given above are falling into disuse. In *England*, owing to lack of a point system, there is some confusion as to the exact dimensions of sizes, but the above account is substantially correct for that country. *Agate*, however, is called *ruby* in England, where also a size intermediate between nonpareil and minion is employed, called emerald. The standard height of type, technically called **height to paper**, is, in England, 0.9175 inch; in the United States it is 0.9186 inch. Height formerly varied from 0.9166 to 0.9186.

☞ For ordinary printed matter the *number of words* to the square inch of the different type bodies is approximately as follows, the first figure showing the number for matter set solid, the second for that which is leaded: Diamond, 80 and 60; pearl, 69 and 50; agate, 57 and 42; nonpareil, 47 and 34; minion, 38 and 27; brevier, 32 and 23; bourgeois, 28 and 20; long primer, 21 and 16; small pica, 17 and 14; pica, 14 and 11; English (solid), 10; columbian (solid), 7.

5. *Cryst.* A form of structure common to a group of crystals; also, the group having this form. See SYMMETRY.

6. *Math.* The simplest of the forms equivalent with respect to a group.

Syn. — See EMBLEM.

type (tīp), *v. t.*; **TYPED** (tīpt); **TYP'ING** (tīp'ĭng). **1.** To represent by a type or symbol beforehand; to prefigure. *Rare.*

2. To produce a copy of; to represent; typify.

> Let us *type* them now in our own lives. *Tennyson.*

3. To typewrite. *Colloq.*

-type (-tīp). [See TYPE, *n.*] A combining form signifying *impressed form*, *stamp*, *print*, *type*, *typical form*, *representative*, as in stereo*type*, photo*type*, ferro*type*, mono*type*.

type genus. *Biol.* That genus of a family or subfamily from which the name of the family or subfamily is formed (see FAMILY, 7; SUBFAMILY). In practice, the type genus has more often been selected because it was the largest, best-known, or earliest described genus, or the one first used as the basis of a family or subfamily name, rather than (as is theoretically preferable) because its structure was most representative of the family as a whole.

type metal. An alloy used in making type, stereotype plates, etc., and in backing up electrotype plates. It consists essentially of lead and antimony (commonly in the proportion of four to one), often with a little tin, nickel, or copper. It expands slightly on cooling, thus preserving in all its sharpness the form of the mold.

type'set'ter (tīp'sĕt'ẽr), *n.* One that sets type; specif.: **a** A compositor. **b** A machine for setting type.

type'set'ting, *n.* Act or process of setting type.

typesetting machine. Any of various keyboard machines for automatically setting or composing printers' types; — called also *composing machine*. Of recent kinds, one sets up actual types, and the other sets up matrices and casts the type in the operation (cf. LINOTYPE).

type species. *Bot. & Zoöl.* That species of a genus upon which the generic name depends, theoretically the one most perfectly exemplifying the characters of the genus; a genotype. If the genus originally contained but one species, that species is the type species. Recent authors in describing new genera usually designate a type species for each, but many of the earlier authors described genera of many species without designating one as the type, and much disagreement of later authors has resulted.

type specimen. The specimen or individual on which the original scientific description of a given species or subspecies is based. Cf. COTYPE, TOPOTYPE, PARATYPE.

type theory. *Chem.* The theory that chemical compounds, esp. organic ones, are derived by replacement from a limited number of type compounds. The older type theory of Dumas (1839) placed too much emphasis on the arrangement of the atoms and too little on their nature; the newer type theory of Laurent and Gerhardt (1846–) was less mechanical and included the conception of radicals or residues; it developed into the unitary theory.

type wheel. A wheel with raised characters on its periphery, used in typewriters, printing telegraphs, etc.

type'write' (tīp'rīt'), *v. t. & i.* To write with a typewriter.

type'writ'er (-rīt'ẽr), *n.* **1.** Any of various instruments or machines for writing in characters similar to those produced by printers' types. In the prevailing designs the characters are produced by striking the paper through an inked ribbon by steel types, the latter being actuated by corresponding keys on a keyboard (see TYPE WHEEL). The paper is clipped to a platen which is automatically traversed along with a carriage when a key is struck.

2. One who operates a typewriter.

3. *Print.* A style of type imitating typewriting.

type'writ'ing (-rīt'ĭng), *n.* Act or art of using a typewriter; also, a print made with a typewriter.

Ty'pha (tĭ'fȧ), *n.* [NL., fr. Gr. *τύφη* cat-tail.] *Bot.* A genus of plants constituting the family Typhaceæ (order Pandanales). They are tall erect herbs with sword-shaped leaves and monœcious flowers in dense spikes, the staminate being uppermost. The species are natives of fresh and salt marshes in both hemispheres. They are known as *cat-tail*, *reed mace*, *flag*, etc.,

typh-lit'ic (tĭf-lĭt'ĭk), *a.* *Med.* Pertaining to, or affected with, typhlitis.

typh-li'tis (-lī'tĭs), *n.* [NL., fr. Gr. *τυφλός* blind, closed (of the cæcum) + *-itis*.] *Med.* Inflammation of the cæcum.

Ty-pho'eus (tī-fō'ŭs), *n.* [Gr. *Τυφωεύς*, *Τυφώς*.] *Class. Myth.* A monster, according to Hesiod, a son of Tartarus and Gæa, or of Hera alone, having a hundred heads with fearful eyes and voices. He begot the unfavorable or dangerous winds and tried to gain the sovereignty of gods and men, but was conquered by Zeus with a thunderbolt and buried in Tartarus under Mt. Etna. Later he is identified with Typhon (which see).

ty'pho-gen'ic (tī'fō-jĕn'ĭk), *a.* [*typhus* + *-genic*.] *Med.* Producing typhus.

ty'phoid (tī'foid), *a.* [*typhus* + *-oid*: cf. F. *typhoïde*, Gr. *τυφώδης*. See TYPHUS.] *Med.* Of or pert. to typhus; resembling typhus; of a low grade, like typhus; as, *typhoid* symptoms. — *n.* Typhoid fever.

typhoid fever, *Med.*, an infectious febrile disease caused by a bacillus (*Bacillus typhosus*) introduced into the system through the alimentary canal, and characterized by fever, diarrhea, and intestinal ulceration.

tym'pa-nism (tĭm'pə-nĭz'm), *n.* *Med.* A flatulent distention of the belly; tympanites.

tym'pa-nism, *n.* Execution by cudgeling, as with drumsticks. *Obs.*

tym'pa-nist (-pə-nĭst), *n.* [Gr. *τυμπανιστής*: cf. L. *tympanista*.] One who beats a drum. *R.*

tym'pa-nis'ter, *n.* [L. *tympanistria*.] A female player on the timbrel. *Obs.* [nitic. *Obs.*

tym'pa-nit'i-cal, *a.* Tympanitic. *Obs.*

tym-pan'i-ty (tĭm-păn'ĭ-tĭ), *n.* Tympanites. *Obs.*

tym'pa-nize (tĭm'pə-nīz), *v. i.* [L. *tympanizare* to beat a drum, Gr. *τυμπανίζειν*.] To drum. *Obs.*

tym'pa-nize, *v. t.* *Obs.* **1.** To make into a drum.

2. To drum upon.

tym'pa-no (tĭm'pə-nō), *n.*; *pl.* TYMPANI (-nī). Var. of TIMPANO.

tym'pa-no-cer'vi-cal (-sûr'vĭ-kăl), *a.* See TYMPANO-.

tym'pa-no-Eu-sta'chi-an, *a.* See TYMPANO-. [See TYMPANO-.]

tym'pa-no-mal'le-al, *a.* *Anat.* [See TYMPANO-.]

tym'pa-no-man-dib'u-lar, *a.*, **tym'pa-no-mas'toid**, *a.*, **tym'pa-no-max'il-la-ry**, *a.* See TYMPANO-.

tym'pa-non (tĭm'pə-nŏn), *n.* [Gr. *τύμπανον*. See TYMPANUM.] *Gr. Antiq.* A kettledrum; — a frequent attribute of Cybele.

tym'pa-no-per'i-ot'ic, *a.* *Zoöl.* See TYMPANO-. — **tym'pa-no-per'i-ot'ic**, *n.*

tym'pa-no'sis (-nō'sĭs), *n.* [NL.] *Med.* Tympanites.

tym'p'a-no-squa-mo'sal, *a.*, **tym'pa-no-tem'po-ral**, *a.* See TYMPANO-.

tym'pa-not'o-my (tĭm'pə-nŏt'ō-mĭ), *n.* [*tympano-* + *-tomy*.] *Surg.* Incision of the tympanic membrane.

tym'pan sheet. *Print.* A sheet on or in a tympan, as, formerly, a sheet pasted on the tympan to serve as a guide in laying the sheets evenly for printing, a sheet used in underlaying, or the outer sheet of a tympan.

Tym-pan'u-chus (tĭm-păn'ū-kŭs), *n.* [NL.; Gr. *τύμπανον* (see TYMPANUM, 2) + *ἔχειν* to have.] *Zoöl.* The genus of American grouse consisting of the prairie chickens.

tympill. † TEMPLE.

tynd (tĭnd; tīn). Scot. var. of TINE, prong.

Tyn'dale's Bi'ble (tĭn'dălz). See BIBLE, 2.

Tyn-dar'i-das (tĭn-dăr'ĭ-dē), *n.*, *pl.* of TYNDARIDES.

tyne. Var. of TINE.

tyne. † TIME. [TYNEWALD.]

Tyne'wald (tīn'wôld). Var. of TYNWALD.

tynge. † THING.

tynke. † THINK.

tynt. † TENT.

typ. *Abbr.* Typographer; typographical; typography.

typ-ar'chi-cal (tĭp-är'kĭ-kăl), *a.* Of or pert. to rulers over type or printing. *Nonce Word.*

type. † TIP.

type bar. **1.** In a typewriting machine, a bar, or one of a number of bars, bearing type for producing a printed impression.

2. A bar, or slug, cast with a line of type on its face, as by the linotype machine.

type class. *Math.* The assemblage of all order types (or ordinals) corresponding to a given transfinite cardinal.

U

U (ū). **1.** The twenty-first letter and *fifth* vowel of the English alphabet. It is a cursive form of the letter V, with which it was formerly used interchangeably, both letters being used either as vowel or consonant (like I and J: cf. J). As early as the 10th century, however, V came to be used by preference as the capital initial form, and U as the uncial or cursive medial form. The consonantal sound usually occurring initially and the vowel or semivowel sound medially, V gradually became specialized to represent the former and U the latter, but small U and small V were used interchangeably as late as the 15th century. In dictionaries of English U and V were not given separate alphabetical positions until about 1800. The vowel sound of U, in Anglo-Saxon, or Old English, was the sound which it still retains in most of the languages of Europe, that of long *oo*, as in *tool*, and short *oo*, as in *wood*, but in modern English U has various sounds. See *Guide to Pron.*, § 240. Etymologically U is most closely related to *o*, *y* (vowel), *w*, and *v*; as in *two*, *duet*, *dyad*, *twice*; *top*, *tuft*; *sop*, *sup*, *auspice*, *aviary*. Cf. V, W, Y.

u-lex'ine (ū-lĕk'sĭn; -sēn; 184), *n.* Also **-in.** [See ULEX.] *Chem.* Cytisine, which occurs in common furze (*Ulex europæus*).

u'lex-ite (ū'lĕk-sīt; ū-lĕk'sīt), *n.* [After a Ger. chemist.] *Min.*

ul'lage (ŭl'ăj), *n.* [OF. *eullage*, *ouillage* (or the kindred modern Fr. *ulhage*, *oulhage*), the filling up of a cask, fr. *ouillier*, *oillier*, *euillier*, *aouillier*, to fill a wine cask; properly, to fill up to (OF. *a*, L. *ad*) the bunghole, lit., eye, F. *œil* eye, opening, fr. L. *oculus* eye. Cf. EYE.] **1.** *Com.* The amount which a vessel of liquor, as a cask, lacks of being full; wantage; deficiency.

2. Liquor dregs or lees, stored until drinkable. *Dial. Eng.*

Ul-ma'ce-æ (ŭl-mā'sē-ē), *n. pl.* [NL. See ULMUS,] *Bot.* A family of trees and shrubs, the elm family (order Urticales), distinguished by the alternate stipulate leaves and small apetalous perfect or unisexual flowers. There are about 13 genera (as *Ulmus*, *Celtis*, *Trema*, and *Planera*), and 140 species. — **ul-ma'ceous** (-shŭs), *a.*

Ul'mus (ŭl'mŭs), *n.* [L., an elm.] *Bot.* A genus of trees, the elms, typifying the family Ulmaceæ, of wide distribution in temperate regions. They have serrate leaves and often drooping branches; the fascicled perfect flowers unfold before the leaves and are succeeded by orbicular samaras. Most species are valuable ornamental trees. See ELM.

ul'na (ŭl'nȧ), *n.* [L., the elbow. See ELL.] **1.** An ell. **2.** *Anat. & Zoöl.* **a** The postaxial or inner one of the two bones of the forearm or like part of the fore limb of vertebrates above fishes. In man, the ulna and the humerus form the elbow joint, the ulna articulating with the humerus by a deep cavity, the **greater sigmoid cavity**, and with the side of the head of the other bone of the forearm (the *radius*) by a laterally placed articular surface (the **lesser sigmoid cavity**). The ulna extends beyond the elbow joint, forming a large process (**olecranon process**). In front of the elbow joint is the much smaller **coronoid process**. The distal and smaller end is called the *head*. The ulna serves as a pivot in rotation of the hand. In many animals the ulna is fused with the radius, and is then often much reduced. **b** The hypercoracoid bone of a fish. *Owen.*

ul'nar (ŭl'nȧr), *a.* *Anat. & Zoöl.* Of or pertaining to the ulna; on the same side of the forearm as the ulna.

ulnar artery, the larger of the two terminal branches of the brachial artery. It runs along the ulnar side of the forearm, giving off the anterior and posterior **ulnar recurrent arteries** (small branches to structures of the upper forearm and elbow region), near its origin. — **u. nerve**, *Anat.*, a large nerve arising from the inner part of the brachial plexus and passing down the inner side of the arm and forearm, resting upon the internal condyle of the humerus at the elbow. — **u. vein**, *Anat.*, any of several veins of the forearm. The *anterior* and *posterior ulnar veins* run up the anterior and posterior aspects respectively of the inner side of the forearm and open into the median basilic vein (either separately, or after uniting to form a short single trunk, the *common ulnar vein*), forming with it the basilic vein.

ul-na're (ŭl-nā'rē; 115), *n.*; *pl.* **-NARIA** (-rĭ-ȧ). [NL. See ULNA.] *Zoöl.* The third (counting from the radial side) carpal bone or element of the proximal row; — in *Human Anat.* termed the *cuneiform*. The so-called *ulnare*, or **ulnar carpal**, of birds probably represents both ulnare and centrale.

ul'no- (ŭl'nō-). A combining form used to indicate *connection with*, or *relation to*, *the ulna*.

U'lo-thrix (ū'lō-thrĭks), *n.* [NL. See ULOTRICHI.] *Bot.* A genus of green algæ typifying the family Ulotrichaceæ. The species are common in ponds, etc.; they consist of simple filaments with band-shaped chromatophores.

U-lot'ri-cha'les (ū-lŏt'rĭ-kā'lēz), *n. pl.* [NL.] *Bot.* An order of green algæ (class Chlorophyceæ), including the so-called confervoid algæ and the sea lettuces. They have a multicellular thallus, consisting usually of simple or branched filaments. Asexual reproduction is effected by zoöspores and sexual by fusion of planogametes or of differentiated egg and sperm cells. They grow in fresh or salt water. There are four families, including the Ulotrichaceæ (the type) and the Ulvaceæ.

U-lot'ri-chi (ū-lŏt'rĭ-kī), *n. pl.* [NL., fr. Gr. οὐλόθριξ, οὐλότριχος, woolly-haired; οὖλος woolly + θρίξ, τριχός, hair.] *Anthropol.* The races having woolly or crispy hair. See HAIR, 2. — **u-lot'ri-chous** (-kŭs), *a.*

ul'ster (ŭl'stẽr), *n.* **1.** A long, loose overcoat, worn by both sexes, orig. made of frieze from Ulster, Ireland.

2. *[cap.] Her.* Short for ULSTER KING-OF-ARMS.

ul-te'ri-or (ŭl-tē'rĭ-ẽr), *a.* [L., comp. of *ultra*, *ultro*, beyond, on the other side, properly cases of an old adjective, formed with a comparative suffix, akin to OL. *uls* beyond, L. *olim* formerly, hereafter, orig., at that time, OL. *olle*, *ollus*, that (cf. L. *ille*). Cf. OUTRAGE.] **1.** Situated beyond, or on the farther side; thither; — correl. of *hither*.

2. Further; remoter; more distant; succeeding; as, *ulterior* demands or propositions; *ulterior* views.

ul-te'ri-or, *n.* The ulterior side or part. *Rare. Coleridge.*

‖ **ul'ti-ma** (ŭl'tĭ-mȧ), *a.* [L., fem. of *ultimus* last.] Most remote; farthest; final; last.

ul'ti-ma ra'ti-o (rā'shĭ-ō) [L.], the last or final argument; the last resort, as force; — often with modifying words, as: **ul'ti-ma ra'ti-o re'gum** (rē'gŭm) (of kings), i. e., use of military weapons; force; war; **u. r. re'rum** (rē'rŭm) (of things); **u. r. po'pu-li** (pŏp'ū-lī) (of the people or commonalty), i. e., forcible resistance. **Ultima ratio regum** was made by Louis XIV. an inscription on French cannon.

ul'ti-ma (ŭl'tĭ-mȧ), *n.* [L., fem. of *ultimus* last.] *Gram. & Pros.* The last syllable of a word.

ul'ti-mate (-māt), *a.* [LL. *ultimatus* last, extreme, fr. L. *ultimare* to come to an end, fr. *ultimus* the farthest, last, superl. from the same source as *ulterior*. See ULTERIOR; cf. ULTIMATUM.] **1.** Farthest; most remote in space or time; extreme; last; final; as, man's *ultimate* destiny.

Many actions apt to procure fame are not conducive to this our *ultimate* happiness. *Addison.*

2. Last in a train of progression or consequences; tended toward by all that precedes; arrived at as the last result.

Those *ultimate* truths and those universal laws of thought which we cannot rationally contradict. *Coleridge.*

3. Incapable of further analysis, division, or separation; elemental; as, an *ultimate* particle or constituent.

4. *Mech.* **Maximum**; as, *ultimate* strain, strength, etc., or that at the instant of breaking or rupture.

ultimate analysis. *Chem.* See ANALYSIS, 2 **b**. — **u. belief**, a first principle incapable of proof; an intuitive truth; an intuition. *Sir W. Hamilton.* — **u. ratio**, *Math.*, the limiting value of a ratio, or that value toward which a ratio tends, and which it does not permanently finitely pass.

Syn. — Final, conclusive. See LAST.

ul'ti-mate (-māt), *v. i. & t.*; **-MAT'ED** (-māt'ĕd); **-MAT'ING** (-mā'tĭng). To bring or come to an end or issue; to eventuate; end. *Rare.*

ul'ti-mate-ly (-māt-lĭ), *adv.* Finally; at last; in the end.

ul'ti-ma'tion (-mā'shŭn), *n.* State of being ultimate, or that which is ultimate; ultimatum. *Rare.*

ul'ti-ma'tum (-tŭm), *n.*; *pl.* E. **-TUMS** (-tŭmz), L. **-TA** (-tȧ). [NL. See ULTIMATE.] A final proposition, concession, or condition; esp., the final propositions, conditions, or terms, offered by either of the parties in a diplomatic negotiation; the best terms that a negotiator will offer, the rejection of which usually ends negotiations.

‖ **ul'ti-mo** (ŭl'tĭ-mō), *adv.* [L. *ultimo* (*mense*) in the last month.] In the month preceding the present; — usually abbreviated to *ult.* Cf. INSTANT, *a.*, 2; PROXIMO.

ul'ti-mo-gen'i-ture (ŭl'tĭ-mō-jĕn'ĭ-tūr), *n.* [L. *ultimus* last + *genitura* a begetting.] *Law.* A system of inheritance by which the youngest son succeeds to the estate, as borough-English in England; — opposed to *primogeniture*. — **ul'ti-mo-gen'i-ta-ry** (-tā-rĭ), *a.*

ul'tra (ŭl'trȧ), *a.* [L. *ultra*, adv. & prep., beyond, on the other side. See ULTERIOR.] Going beyond others, or beyond due limit; extreme; fanatical; uncompromising; as, an *ultra* reformer; *ultra* measures.

ul'tra-, *n.* An ultraist; extremist; radical.

ul'tra- (ŭl'trȧ-). [See ULTRA, *a.*] A prefix signifying: **a** *Beyond, on the other side*; as in *ultramarine*, *ultramontane*, *ultramundane*, *ultratropical*. **b** *Excessively, exceedingly, beyond what is common, ordinary, natural, right, proper*, or the like; as in *ultra*conservative, *ultra*democratic, *ultra*despotic, *ultra*liberal.

☞ The reference "See ULTRA-" is sometimes given as the only definition of a word beginning in *ultra-*, if its meaning can readily be gathered from the definitions of the prefix and the root word.

ul'tra-a-tom'ic, *a.* *Chem.* Desig., or pert. to, particles smaller than atoms. See ELECTRON, 2.

ul'tra-bas'ic (-bās'ĭk), *a.* *Petrog.* Extremely basic; — applied to certain igneous rocks, as limburgite, which are very low in silica and rich in ferromagnesian minerals.

ul'tra-cen'te-na'ri-an (-sĕn'tē-nā'rĭ-ăn; 115), *n.* A person more than a hundred years old. — **ul'tra-cen'te-na'ri-an-ism** (-ĭz'm), *n.*

ul'tra-gas'e-ous (-gās'ē-ŭs; *cf.* GASEOUS), *a.* *Physics.* Having the properties exhibited by gases under very low pressures (one millionth of an atmosphere or less). Matter under this condition (which has been termed the **fourth state of matter**) is sometimes called *radiant matter*. See under RADIANT.

ul'tra-ism (ŭl'trȧ-ĭz'm), *n.* [See ULTRA-.] The principles of those who advocate extreme measures, as radicalism.

ul'tra-ist, *n.* An extremist; radical; ultra.

ul'tra-le-gal'i-ty (-lē-găl'ĭ-tĭ), *n.* A condition of extreme legality, or regulation of rights by laws. *Maine.*

ul'tra-ma-rine' (-mȧ-rēn'), *a.* Beyond the sea.

ul'tra-ma-rine', *n.* [Cf. Sp. *ultramarino*. So called because the lapis lazuli was originally brought from beyond the sea, from Asia.] **a** A costly pure blue pigment, prepared by powdering lapis lazuli. **b** An artificial pigment resembling the above in composition and color, but having commonly a tinge of violet. It is prepared, by one method, from kaolin, silica, soda, sulphur, and charcoal by fusion, roasting, and powdering. It is inexpensive and is used in painting, calico printing, bluing, etc. Called also *new blue*, *French blue*, *Gmelin's blue*, etc. **c** Any of several pigments, most of which are produced by modifications of the above process; as, green *ultramarine*, purple *ultramarine*.

ultramarine ash or **ashes.** *Paint.* A delicate gray or bluish gray pigment got as a residuum from lapis lazuli after the extraction of ultramarine. The old masters used it as a middle gray or neutral tint for flesh, skies, and draperies.

ultramarine blue. The color of ultramarine: also, the pigment itself.

ul'tra-mi'cro-scope (ŭl'trȧ-mī'krō-skōp), *n.* *Optics.* An apparatus for rendering visible, by reflected light, particles too small to be perceived by the ordinary microscope. It consists of an arc light and lenses for throwing a concentrated pencil of light upon the solid or liquid to be examined, and a compound microscope for viewing it. The limit of visibility by ordinary microscopic methods is equal to half a wave length of light, or about 0.2 μ (0.0002 mm.), since the light waves bend around a particle of smaller diameter and reunite after passing it. By reflected light much smaller particles, as those of gold in ruby glass, show as points of light in a dark field.

ul'tra-mi'cro-scop'ic (-skŏp'ĭk) } *a.* **1.** Too small to be **ul'tra-mi'cro-scop'ic-al** (-ĭ-kăl) } seen with a microscope.

2. Of or pertaining to an ultramicroscope.

ul'tra-mon'tane (-mŏn'tān), *a.* [LL. *ultramontanus*; L. *ultra* beyond + *montanus* belonging to a mountain, from *mons*, *montis*, mountain: cf. F. *ultramontain*, It. *oltramontano*. See ULTRA-; MOUNTAIN.] Beyond the mountains; esp., beyond the Alps. Specif.: **a** Orig., beyond the Alps from Italy, i. e., north of them; of or pert. to the countries north of the Alps; tramontane. **b** With reference to the countries north of the Alps, situated south of the Alps; Italian; hence, of or pert. to the Italian party in the Roman Catholic Church; esp., of or pert. to ultramontanism or ultramontanes; supporting ultramontanism. See ULTRAMONTANE, *n.*, 2, ULTRAMONTANISM.

ul'tra-mon'tane, *n.* **1.** One who lives beyond the mountains, esp. the Alps; a foreigner.

2. Specif.: **a** Formerly, one who lived north of the Alps; hence, one who maintained the rights of the northern churches, such as the Gallican, against the papal supremacy; one opposed to papal supremacy. **b** One who lives south of the Alps; hence, one identified with the Italian party in the Roman Catholic Church, which favored papal supremacy; now, one who maintains such supremacy. See ULTRAMONTANISM.

ul'tra-mon'ta-nism (-tă-nĭz'm), *n.* [Cf. F. *ultramontanisme*.] The principles of the ultramontanes, or those in the Roman Catholic Church who favor the Pope's supremacy, in opposition to those favoring national churches. Cf. GALLICANISM. The Vatican Council of 1869–70 virtually made to be dogmas of the Church the principles of ultramontanism, according to which the Pope is superior to, and independent of the decrees of, general councils, and is the source of all jurisdiction. — **ul'tra-mon'ta-nist** (-nĭst), *n.*

ul'tra-mun'dane (-mŭn'dān), *a.* [L. *ultramundanus*. See ULTRA-; MUNDANE.] Being beyond the world, or beyond the limits of our system.

ul'tra-trop'i-cal (-trŏp'ĭ-kăl), *a.* Beyond the tropics; extratropical; also, having or designating an excessively tropical temperature; warmer than the tropics.

ul'tra-vi'o-let (-vī'ō-lĕt), *a.* *Physics.* Outside the visible spectrum at its violet end; — said of rays more refrangible than the extreme violet rays. See SPECTRUM, 2.

‖ **ul'tra vi'res** (vī'rēz). [Law Latin, fr. L. *ultra* beyond + *vires*, pl. of *vis* strength.] Beyond power; transcending authority; esp., beyond or exceeding legal power or authority; — used often in relation to acts by corporations in excess of their chartered or statutory rights, or in a more extended sense of the acts of the directors or other agents of the corporation in excess of their powers as such. An act ultra vires in the first sense is void even if unanimously agreed to by all the corporators; an act ultra vires in the second sense does not bind the dissenting members, but may be ratified by them.

The doctrine of *ultra vires*, when invoked for or against a corporation, should not be allowed to prevail, where it would defeat the ends of justice or work a legal wrong. *96 U. S.* 258.

ul'tra-zo-dī'a-cal (-zō-dī'ă-kăl), *a.* *Astron.* Outside the zodiac; having a path not confined to the zodiac proper, as Ceres, Pallas, Juno, and many other asteroids.

ul'u-lant (ŭl'ū-lănt), *a.* [L. *ululans*, p. pr.] Howling; wailing.

ul'u-late (-lāt), *v. i.*; **UL'U-LAT'ED** (-lāt'ĕd); **UL'U-LAT'ING** (-lāt'ĭng). [L. *ululatus*, p. p. of *ululare* to howl, howl forth, shriek.] To howl, as a dog or a wolf; to wail; as, *ululating* jackals; also, to hoot, as an owl.

A hydrous borate of sodium and calcium, in white rounded crystalline masses. H., 1. Sp. gr., 1.65. [LAGONE. *Ir.*

ul'i-can (ŭl'ĭ-kăn). Var. of ULU.

ul-lig'i-nose (ŭ-lĭj'ĭ-nōs), **u-lig'i-nous** (-nŭs), *a.* [L. *uliginosus*, fr. *uligo*, *-inis*, moisture, akin to *uvere* to be moist, *udus* wet.] Muddy; oozy; swampy; also, growing in muddy places.

ul'in-kan, **ul'in-kon** (ŭ'lĭ-k*a*n; -kŏn), *n.* The eulachan.

u-li'tis (ū-lī'tĭs), *n.* [NL.; Gr. οὐλον gum + *-itis*.] *Med.* Inflammation of the gums.

ulke. ✝ ILK.

ull (ŭl). Dial. Eng. var. of **ill** (ĭl).

Ull (ōōl), **Ullr** (ōōl'r), *n.* [Icel. *Ullr.*] *Norse Myth.* One of the Æsir, worshiped chiefly in Sweden, a stepson of Thor, skilful with the bow and ski.

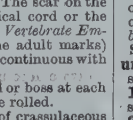
um-bil'i-cal (-ĭ-kăl), *a.* [Cf. F. *ombilical.* See UMBILIC, *n.*] **1.** Of or pertaining to an umbilicus, or umbilical cord. **2.** Pertaining to the center; central. *Rare. De Foe.*

umbilical arteries, *Anat. & Embryol.*, a pair of arteries arising from the internal iliac arteries of the fetus of mammals, which pass through the umbilical cord to the placenta, to which they carry the impure blood from the fetus. These arteries, with the corresponding *umbilical vein* or *veins* (which see), pertain to, or must accompany, the allantois in the early stages. With the assumption of the nutritive function by the placenta, these vessels supersede in function those of the yolk sac. The parts of these arteries within the body of the fetus are called the *hypogastric arteries.* — **u. cord.** **a** *Anat. & Embryol.* The cord or stalk arising from the navel, which connects the fetus of a mammal with the placenta, and contains the two *umbilical arteries* and the *umbilical vein* through which blood circulates between the fetus and the placenta; the navel string. In man it attains an exceptional length (about twenty inches) and a thickness of nearly half an inch, and consists, in the later stages of pregnancy, of little more than the above-mentioned vessels embedded in a mass of gelatinous embryonic connective tissue (the so-called *jelly of Wharton*), invested by an epiblastic epithelium, the other structures present in it in the early stages having become obliterated. **b** *Bot.* The funicle. — **u. fissure,** *Anat.*, the anterior part of the longitudinal fissure on the under surface of the liver, which lodges the umbilical vein in the fetus. — **u. hernia,** *Med.*, hernia of the bowels at the umbilicus. — **u. point.** *Geom.* = UMBILICUS, 5. — **u. region.** *Anat.* See ABDOMINAL REGIONS, *Illust.* — **u. vein,** *Anat. & Embryol.*, a vein, passing through the umbilical cord to the fetus, returning the purified and nutrient blood from the placenta to the fetus. In the human fetus it discharges most of the blood into the portal vein, some directly into the liver, and some (by the *ductus venosus*) into the inferior vena cava. Two are present in early stages, one afterwards disappearing. After birth, the part in the body degenerates, becoming the round ligament of the liver. — **u. vesicle,** *Embryol.*, in the embryo of most mammals, the yolk sac, or, more strictly (since yolk is almost wanting in the egg of most mammals), a sac containing fluid, and representing the yolk sac of oviparous vertebrates. Its cavity communicates, for a time at least, with the embryonic alimentary canal through the umbilicus, by the **vitelline duct.**

um-bil'i-cate (-kāt), *a.* [L. *umbilicatus.* See UMBILIC.] Depressed in the middle, like a navel; navel-shaped; having an umbilicus; as, an *umbilicate* smallpox vesicle.

um-bil'i-ca'tion (-kā'shŭn), *n.* **a** A navel-like depression, or dimpling. **b** The state of being umbilicated.

um'bi-li'cus (ŭm'bĭ-lī'kŭs; *popularly* ŭm-bĭl'ĭ-kŭs; 277), *n.* [L. See UMBILIC.] **1.** *Anat. & Zoöl.* The scar on the middle of the abdomen where the umbilical cord or the yolk sac was attached; the navel; hence, *Vertebrate Embryol.*, the place (which the navel of the adult marks) where the extra-embryonic structures are continuous with those of the body proper of the embryo. **2.** *Gr. & Rom. Antiq.* An ornamental ball or boss at each end of the stick on which manuscripts were rolled. **3.** *Bot.* **a** The hilum. **b** [*cap.*] A genus of crassulaceous plants now merged in *Cotyledon.* **c** A rootlike attachment of the thallus in certain lichens. **4.** *Zoöl.* **a** A depression or pit in the center of the base of many spiral shells around which the whorls coil. **b** A minute pit or depression on the shaft of a feather where the vane begins. **c** The opening at the basal end of a feather. **5.** *Geom.* **a** A focus. *Obs.* **b** A point of a surface at which the curvatures of all normal sections are equal, or the indicatrix is a circle.



Umbilicus (4 a).

um-bil'i-form (ŭm-bĭl'ĭ-fôrm), *a.* [*umbilicus* + *-form.*] Shaped like an umbilicus, or navel.

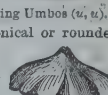
um'ble pie (ŭm'b'l). [See UMBLES.] A pie made of umbles.

um'bles (ŭm'b'lz), *n.* [See NUMBLES.] Numbles. *Obs.*

um'bo (ŭm'bō), *n.*; *pl.* L. **UMBONES** (ŭm-bō'nēz), E. **UMBOS** (ŭm'bōz). [L.] **1.** The boss of a shield, at or near the middle, having, sometimes, a sharp spike. **2.** Any elevation suggestive of the boss; a rounded elevation (often accompanied by a corresponding depression on the opposite surface), in a plate, disk, or membrane, as in the tympanic membrane of the ear where the malleus is attached, or as in the cone scales of certain pines. **3.** *Zoöl.* One of the lateral prominences just above the hinge of a bivalve shell; a beak of a shell. It is the first formed part of the valve.

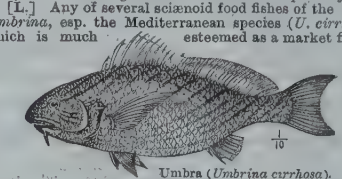
um'bo-nal (ŭm'bō-năl), *a.* Pert. to, or like, an umbo or umbos.

um'bo-nate (ŭm'bō-nāt), *a.* [NL. Umbo, 3. Shells showing Umbos (*u, u*). *umbonatus.* See UMBO.] Having a conical or rounded bosslike protuberance.



Umbonate Pileus of Mushroom.

um'bra (ŭm'bră), *n.*; *pl.* UMBRÆ (-brē). [L., a shadow. Cf. UMBER, the fish, UMBRAGE.] **1.** A shade or shadow; in optics, the complete shadow, within which no light is received from a given source; — distinguished from *penumbra* (which see). **2.** Specif.: *Astron.* **a** The conical shadow projected from a planet or satellite, on the side opposite the sun, within which a spectator could see no portion of the sun's disk. Cf. PENUMBRA, 1. **b** The central dark portion, or nucleus, of a sun spot. **c** The fainter part of a sun spot; — now called *penumbra.* **3.** Usually in *pl. Math.* A symbolic coefficient; — so called by Sylvester as being the mere shadow of a quantity. **4.** [L.] Any of several sciænoid food fishes of the genus *Umbrina*, esp. the Mediterranean species (*U. cirrhosa*), which is much esteemed as a market fish.



Umbra (*Umbrina cirrhosa*).

5. [*cap.*] *Zoöl.* The genus containing the mud minnows. **6.** *Rom. Antiq.* = SHADOW, *n.*, 13.

um-brac'u-lif'er-ous (ŭm-brăk'ū-lĭf'ĕr-ŭs), *a.* [L. *umbraculum* umbrella (dim. of *umbra* shade) + E. *-ferous.*] *Bot.* Bearing an umbrellalike organ or part.

um-brac'u-li-form' (ŭm-brăk'ū-lĭ-fôrm'), *a.* [L. *umbraculum* umbrella (dim. of *umbra* a shade) + E. *-form.*] Having the form of anything that serves to shade, as a tree top, an umbrella, and the like; specif., *Bot.*, having the form of an umbrella; as, an *umbraculiform* pileus.

um'brage (ŭm'brăj), *n.* [F. *ombrage* shade, suspicion, umbrage, L. *umbraticus* of shade, fr. *umbra* a shade. Cf. 1st UMBER, UMBRELLA, UMBRATIC.] **1.** Shade; shadow; obscurity; hence, that which affords a shade, as foliage. *Archaic or Poetic. Milton.* **2.** Disfavor; disesteem; disgrace. *Now Rare.* "He stood some years in *umbrage.*" *Naunton.* **3.** Shadowy resemblance; shadow; also, a shade, or spirit. *Obs.* "No . . . *umbrage* of reason." *Woodward.* **4.** The feeling of being overshadowed; jealousy of another, as standing in one's light or way; hence, suspicion of injury or wrong; offense; resentment; as, to take *umbrage* at another's advancement.
Syn. — See PIQUE.

um-bra'geous (ŭm-brā'jŭs; 277), *a.* [Cf. F. *ombrageux* shy, skittish, suspicious, in OF. also, shady. Umiak.

um'laut (o͞om'lout), *n.* [Ger., from *um* about + *laut* sound.]
1. *Philol.* The change of a root vowel sound by the influence of a vowel, as *u*, or esp. *i*, in a following syllable, the modifying vowel being now generally lost or altered (cf. CONCEALED UMLAUT); vowel mutation. Umlaut, though occurring in other Indo-European languages, is esp. characteristic of the Teutonic languages. It was common in Anglo-Saxon and is highly developed in Icelandic. In German the umlauted vowels resulting from *a*, *o*, *u*, followed by old *i*, are written *ä*, *ö*, *ü*, or *ae*, *oe*, *ue*; as, *männer* or *maenner*, men, from *mann*, man. Examples of forms in modern English resulting from umlaut are: *geese*, pl. of *goose*; *men*, pl. of *man*, etc. Vowels sometimes undergo both umlaut and ablaut.

Theodor Jacobi (1843)... explained the phenomenon of *umlaut* as due to a psychological anticipation of the vowel of the suffix. *Oertel.*

2. Loosely, the two dots used in German to indicate a vowel affected by umlaut.

um'laut, *v. t. Philol.* To affect, form, or sound with umlaut; — said of vowels.

um'pir-age (ŭm'pĭr-ăj; ŭm'pĭ-rāj), *n.* [From UMPIRE.]
1. The office of an umpire; the power, right, or authority of an umpire to decide.
2. The act of umpiring; arbitrament. *Ep. Hall.*

um'pire (ŭm'pīr), *n.* [ME. *nompere*, *nounpere*, fr. OF. *nomper*, *nonper*, uneven, F. *non-pair*; hence the meaning, uneven, i. e., third, person; *non* not + OF. *per* even, equal, peer, F. *pair*; cf. L. *impar* uneven, unequal. The loss of initial *n* is due to preceding *a*, confused with *an*. See NON-; PEER, *n.*]
1. A person to whose sole decision a controversy or question between parties is referred; esp., one chosen to rule on the plays of a game, as cricket, baseball, or the like. Cf. REFEREE, *n.*, **c**.

A man, in questions of this kind, is able to be a skilful *umpire* between himself and others. *Barrow.*

2. *Law.* A third person who is to decide a matter submitted to arbitrators in case of their disagreement.

Syn. — Judge, arbitrator, arbiter, referee.

um'pire, *v. t.*; UM'PIRED (-pīrd); UM'PIR-ING (-pīr-ĭng).
1. To decide as umpire; to arbitrate, as a dispute.

2. To perform the duties of umpire in or for. *Colloq.*

um'pire, *v. i.* To act as umpire.

un- (ŭn-; *see note below*). [ME. *un-*, AS. *un-*, *on-*, the unaccented form of the accented prefix *and-* (cf. ANSWER); akin to D. *ont-*, G. *ent-*, OHG. *int-*, Goth. *and-*. Cf. ANTI-.] An inseparable verbal prefix, added: **a** To verbs to express the contrary, and not the simple negative, of the action of the verb to which it is prefixed; as in *unbend*, *uncoil*, *undo*, *unfold*. **b** To nouns to form verbs expressing privation of the thing, quality, or state expressed by the noun; as in *unfrock*, *unman*, *unsex*. Sometimes participles and participial adjectives formed with this prefix coincide in form with compounds of the negative prefix *un-* (see 2d UN-); as in *undone* (from *undo*) meaning unfastened, ruined, and *undone* (from 2d *un-* and *done*) meaning not done, not finished. *Un-* sometimes merely intensifies a negative already expressed in a word, as in *unloose*.

☞ Usually unaccented or under secondary accent only, but the accent, or the emphasis, esp. in direct contrast, is often stronger than in 2d *un-*. See *Guide to Pron.*, § 87.

un- (ŭn-; *see note below*). [ME. & AS. *un-*; akin to OFries. *un-*, D. *on-*, OS., OHG., & G. *un-*, Icel. *ō-*, *ú-*, Sw. *o-*, Dan. *u-*, W. *an-*, L. *in-*, Gr. *ἀν-*, *ἀ-*, Skr. *an-*, *a-*. Cf. A- not, IN- not, NO, *adv.*] An inseparable prefix, signifying *not*; *in-*; *non-*. *Un-* may be attached to almost any adjective or adverb, and (though less freely) to nouns, from which it may be desired to form a corresponding negative. No attempt is here made to enter all the compounds of *un-* in the *Vocabulary*. Of those entered such as are merely negations of the word (which may be coined from another root word and some simple suffix such as *-able*) are in general referred here, as being sufficiently explained by prefixing *not* to the latter. Definitions are given for: **a** Such as have acquired an opposing or contrary meaning, instead of a merely negative one; as, *unfriendly*, *ungraceful*, *unpalatable*, *unquiet*, *unbelief*, *unrest*, etc.; or else a special intensive sense; as, *unending*, *unparalleled*, *undisciplined*, *undoubted*, *unsafe*, etc. **b** Such as have the value of independent words, the simple words being used either not at all, or relatively little; as, *unconscionable*, *undeniable*, *unspeakable*, *unprecedented*, *unruly*, etc.; or the compound being used in a different sense from the usual meaning of the primitive, or esp. in one of the significations of the latter; as, *unaccountable*, *unalloyed*, *unbelieving*, *unpretending*, *unreserved*, etc.; or the compound being so frequently and familiarly used that it is hardly felt to be of negative origin; as, *uncertain*, *uneven*, etc. **c** Such as need a definition for some special reason, as because of being anomalous or provincial, etc.; as, *unpure* for *impure*, *unsatisfaction* for *dissatisfaction*, etc.

☞ The reference "See UN-, not" is sometimes given as the only definition of a word beginning in *un-*, if its meaning can readily be gathered from the definitions of the prefix and the root word.

☞ The accent in compounds of *un-* often varies with the position of the word, as an *un'born* child, a child *un-born'*, etc. See *Guide to Pron.*, § 87.

un-a'ble (ŭn-ā'b'l), *a.* Not able; incapable; also, *Rare or Poetic*, impotent; helpless; as, *unable* to bear fatigue.

un'der (ŭn'dẽr), *adv.* In a lower position, or in a subject or subordinate condition; — used chiefly in a few idiomatic phrases; as, to *bring under*, to reduce to subjection; to subdue; to *keep under*, to keep in subjection; to control; *to go under*, to be unsuccessful; to fail.

un'der, *a.* Lower in position, intensity, rank, or degree; subject; subordinate; — used esp. in comp. See UNDER-.

under bevel. See BEVEL, 1. — **u. color** *or* **colour**, the color of basal parts of the hair or feathers of mammals or birds.

un'der- (ŭn'dẽr-; *see note below*). The preposition, adverb, or adjective *under*, used in composition. Thus: **a** The preposition (with any of its various senses); as in, *under*body, *n.*; *under*ground, *adv. & a.*; *under*hand, *adv. & a.*, etc. **b** The adverb, esp. with the specif. senses: (1) *from below*; on the *lower* part; as, to *under*mine, *under*prop, *under*line; (2) *below the normal*; *insufficiently*; as, *under*bred; to *understate*. **c** The adjective, meaning: (1) *lower in position*; as in *under*tow; (2) *lower in degree or rank*; *subordinate*; as in *under*sheriff; (3) *lower in intensity*; as in *under*tone; *lesser* (in amount); as in an *under*load; sometimes, *of insufficient intensity*, etc.; as in *under*dose.

☞ The accentuation in compounds of *under-*, esp. the adjectives, often varies somewhat with the sense and the position of the word: as, *un'der-done'* meat, the meat is *un'der-done'*; *un'der-hand'ed* acts, the act was *un'der-hand'ed*. Corresponding adverbs and nouns in *-ness*, usually have slightly stronger accent on the second element; as, *un'der-hand'ed-ly*, *un'der-hand'ed-ness*. Cf. OVER-, *Note*, and see *Guide to Pron.*, § 87.

☞ The reference "See UNDER-" is sometimes given as the only definition of a word beginning in *under-*, if its meaning can readily be gathered from the definitions of the prefix and the root word.

3. Power to understand; the intelligence; the rational powers taken collectively; the power to distinguish truth from falsehood, and to adapt means to ends.

There is a spirit in man; and the inspiration of the Almighty giveth them *understanding.* *Job* xxxii. 8.

The power of perception is that which we call the *understanding.* Perception, which we make the act of the *understanding*, is of three sorts: perception of ideas in our mind; 2. The perception of the signification of signs; 3. The perception of the connection or repugnancy, agreement or disagreement, that there is between any of our ideas. All these are attributed to the *understanding*, or perceptive power, though it be the two latter only that use allows us to say we understand. *Locke.*

In its wider acceptation, *understanding* is the entire power of perceiving and conceiving, exclusive of the sensibility; the power of dealing with the impressions of sense, and composing them into wholes . . . ; and in its most comprehensive meaning it includes even simple apprehension. *Coleridge.*

4. Specifically, the discursive faculty; the faculty of knowing by the medium or use of general conceptions or relations. The distinction between *understanding* and *reason* is essentially that between *discursive* or *applicative* thought, in which the mind passes from relation to relation or from thought to thought, and *insight*, or direct apprehension of the total rationality of a system of thought. The distinction was drawn by Plato under the terms *νόησις* (reason) and *διάνοια* (understanding), the model of the latter being mathematical deduction. Aristotle, with empirical or practical applications in view, substituted for the latter term *τέχνη*, empirical rationality, though he also uses *διάνοια*. The Schoolmen preserved the distinction under the terms *intellectus* (reason) and *ratio* (understanding). This use of *ratio* is responsible for the use of *reason* in English in both senses. In Germany, Kant and Hegel emphasized the distinction, employing *Vernunft* (reason) and *Verstand* (understanding). (See REASON, 6; VERNUNFT; VERSTAND.)

The point of view which we have been considering — that of reflection and relativity — is the point of view which has been distinguished by Kant and Hegel as the standpoint of the *understanding.* It is not separable in kind from the mode of consideration which the same thinkers have designated by the term reason. *B. Bosanquet.*

I use the term *understanding*, not for the noëtic faculty, intellect proper, or place of principles, but for the dianoetic or discursive faculty in its widest signification, for the faculty of relations or comparisons; and thus in the meaning in which "Verstand" is now employed by the Germans. *Sir W. Hamilton.*

F. *uniforme.*] **1.** Having always the same form, manner, or degree ; not varying or variable ; unchanging ; homogeneous ; as, the dress of Asiatics has been very *uniform* ; the temperature is *uniform* ; a stratum of *uniform* clay.

The *uniform* order of phenomena, . . . what we have termed the routine of perceptions. *Karl Pearson.*

2. Of the same form with others ; agreeing with each other ; conforming to one rule or mode ; consonant.

The only doubt is . . . how far churches are bound to be *uniform* in their ceremonies. *Hooker.*

Syn. — See EQUABLE.

uniform convergence, *Math.*, the property (of certain series whose sums are continuous functions of the variable of which their terms are continuous functions) that the number *n* of initial terms (which only need be taken out in order that the sum of any number of remaining terms be less than a preassigned arbitrary positive ε) is *uniform* for all values of the variable in the interval of such convergence. Called also *equable convergence.* — **u. function,** *Math.*, one that has only one value for any one value of its argument, no matter how the argument attains that value. — **u. magnetic field,** a field in which the magnetic force has everywhere the same value and direction and in which the lines of force are therefore straight and parallel. — **u. motion** or **velocity,** the motion or velocity of a body when it passes over equal spaces in equal times. — **u. system,** *Photog.*, a system of diaphragm or stop marking, the numbers of which are proportional to the intensities of the light permitted to pass and hence to the times required for exposure. In it No. 1 corresponds to *f*/4, No. 2 to *f*/5.6, No. 4 to *f*/8, No. 64 to *f*/32, etc. Abbr. *U. S.* — **u. twist,** *Firearms*, a twist of which the spiral course has an equal pitch throughout. — **u. velocity.** See *uniform motion*, above.

u'ni-form, *n.* [F. *uniforme.* See UNIFORM, *a.*] A dress of a particular style or fashion worn by persons in the same service, order, or the like, by means of which they have a distinctive appearance ; as, the *uniform* of the artillery, of the police, of Knights Templars ; a showy *uniform*.

u'ni-form, *v. t.* **1.** To make conformable. *Obs. Sir P. Sidney.* **2.** To clothe with a uniform ; as, to *uniform* soldiers.

u'ni-form'ism (-fôr'mĭz'm), *n.* [From UNIFORM.] *Geol.* The uniformitarian doctrine.

u'ni-form'i-ta'ri-an (-fôr'mĭ-tā'rĭ-ăn ; 115), *a. Geol.* Of, pert. to, or designating, the view or doctrine that existing causes, acting in the same manner and with essentially the same intensity as at present, are sufficient to account for all geological changes. Cf. CATASTROPHISM.

u'ni-form'i-ta'ri-an-ism (-Iz'm), *n.* **1.** *Geol.* Uniformism. **2.** The theory that the world as a whole, in its mental and moral as well as in its physical aspects, is the result or embodiment of a single principle, or of a set of forces, or laws, of uniform operation.

u'ni-form'i-ty (ū'nĭ-fôr'mĭ-tĭ), *n.* [L. *uniformitas* : cf. F. *uniformité.*] Quality or state of being uniform, or unvarying, consistent, conformed to one pattern, etc.

uniformity of, *or* **in the course of, nature,** a phrase originating in the theory of J. S. Mill that the assumption of objective regularity or invariability is necessary to all inductive reasoning. The theory has been widely criticized, and the modern tendency is to regard natural uniformity as determined by the uniformities of our interests and needs, and as objectively real in the sense that the world is so constituted that it responds unfailingly to these interests and needs.

In the contemplation of that *uniformity in the course of nature* which is assumed in every inference from experience, one of the first observations . . . is, that the uniformity in question is not properly uniformity, but uniformities. *J. S. Mill.*

The *uniformity of nature* stands to induction as the axioms of syllogism do to syllogism ; they are not premises, but conditions of inference, which . . . men use spontaneously. *Encyc. Brit.*

u'ni-fy (ū'nĭ-fī), *v. t.* ; **u'ni-fied** (-fīd) ; **u'ni-fy'ing** (-fī'-Ing). [F. *unifier.* See UNI- ; -FY.] To cause to be one or uniform ; to make into a unit ; to unite ; to view as one.

Perception is thus a *unifying* act. *Sir W. Hamilton.*

u'ni-gen'i-tal (ū'nĭ-jĕn'ĭ-tăl), *a.* [L. *unigenitus* only-begotten.] Only-begotten.

u'ni-gen'i-ture (-jĕn'ĭ-tūr), *n.* [L. *unigenitus* only-begotten. See UNI-; GENITURE.] State of being the only-begotten.

U'ni-gen'i-tus (-jĕn'ĭ-tŭs). *Eccl. Hist.* A famous bull issued by Pope Clement XI., in 1713, against the " Moral Reflections on the New Testament " of Pasquier Quesnel, priest of the Oratory, and a celebrated Jansenist. It began with the Latin words " *Unigenitus Dei Filius* " (Only-begotten Son of God), hence the name given to it.

u'ni-glob'u-lar (-glŏb'ū-lăr), *a.* Being or having one globe.

u-nij'u-gate (ū-nĭj'ōō-gāt ; ū'nĭ-jōō'gāt ; 243, 277), *a.* [*uni-* + L. *jugum* yoke, pair : cf. L. *unijugus* having one yoke.] *Bot.* Having but one pair of leaflets ; — said of a pinnate leaf.

Unijugate Leaf.

u'ni-lat'er-al (ū'nĭ-lăt'ẽr-ăl), *a.* One-sided; being on, or affecting, but one side. Specif.:

1. *Law.* Designating, or pert. to, a contract or engagement by which an express obligation to do or forbear is imposed on but one party, as in a deed poll.

2. *Math.* Having only one side ; — said of a surface (**unilateral surface**) on which a continuous path may be drawn from any point to any other point, even to the exactly opposite point through the surface, without piercing the surface or crossing its border, as in *Möbius's sheet* (which see).

3. *Phon.* Pronounced with the oral passage open on one side of the tongue only, as *l* in the pronunciation of some persons. Cf. DIVIDED, 2 **b**.

— **u'ni-lat'er-al-i'ty** (-ăl'ĭ-tĭ), *n.* — **u'ni-lat'er-al-ly,** *adv.*

u'ni-lit'er-al (-lĭt'ẽr-ăl), *a.* Consisting of one letter only.

u'ni-lobed (ū'nĭ-lōbd), *a.* Having, or being of, a single lobe.

u'ni-loc'u-lar (-lŏk'ū-lăr), *a.* Having one cell or cavity only.

u'ni-mod'u-lar (-mŏd'ū-lăr), *a. Math.* Having only one modulus. — **unimodular transformation,** *Math.*, a linear transformation whose determinant (modulus) is equal to 1.

un'im-pas'sioned (ŭn'ĭm-păsh'ŭnd), *a.* Not impassioned. Syn. — See DISPASSIONATE.

un'im-peach'a-ble (-pēch'ă-b'l), *a.* Not impeachable ; not to be called in question ; exempt from liability to accusation ; irreproachable ; blameless ; as, an *unimpeachable* reputation ; *unimpeachable* testimony. *Burke.* — **un'im-peach'a-bil'i-ty** (-ă-bĭl'ĭ-tĭ), *n.*, **un'im-peach'a-ble-ness,** *n.* — **un'im-peach'a-bly,** *adv.*

un'im-ped'ed (-pēd'ĕd), *a.* Not impeded ; specif. : *Phon.* Uttered, as a vowel, without audible friction in the oral passage. *R. J. Lloyd.*

un'im-por'tance (-pôr'tăns), *n.* Want of importance ; triviality. — **un'im-por'tant** (-tănt), *a.*

un'im-pris'on (-prĭz'n), *v. t.* [1st *un-* + *imprison.*] To release from or as if from prison.

un'im-proved' (-prōōvd'), *a.* **1.** Not improved.

2. Not used ; not employed ; esp., not used or employed for a valuable purpose ; as, *unimproved* opportunities.

3. Not tilled, cultivated, or built upon, as land.

4. Untested ; unproved. *Obs.* *Shak.*

un'in-cum'bered (ŭn'ĭn-kŭm'bẽrd), *a.* Not incumbered ; not burdened ; specif., *Law*, free from any temporary lien, burden, or other charge. = UNENCUMBERED.

U'ni-o (ū'nĭ-ō), *n.* [NL., fr. L. *unio* unity, union, a single large pearl. See UNION.] **1.** *Zoöl.* A large genus of freshwater mussels having a rather heavy, oblong shell pearly within, usually sculptured with coarse ridges, and covered with a greenish or blackish epidermis. It is very widely distributed in the Northern Hemisphere, but its greatest development is in the central and southern United States. It formerly included many species now put in *Lampsilis, Obovaria, Plagiola, Pleurobema,* and other genera.

2. [*l. c.*] Any mussel of *Unio* or a related genus.

U-ni'o-la (ū-nī'ō-lă), *n.* [NL., fr. L., a kind of plant.] *Bot.* A small genus of handsome North American grasses having ample panicles of 2-edged spikelets, the lowermost glumes of which are empty. Several species are sand binders.

un'ion (ŭn'yŭn), *n.* [F., fr. L. *unio* oneness, union, a single large pearl, a kind of onion (in this sense perh. a different word), fr. *unus* one. See ONE; cf. ONION, UNIT.] **1.** Act of uniting or joining two or more things into one; state of being so united; junction; coalition; combination.

2. Specif.: Any of various political changes effecting the political union of the different parts of the kingdom of Great Britain and Ireland; as: that of 1835–36, uniting Wales to England; that of 1706, uniting the kingdoms of England and Scotland on and after May 1, 1707; or that of 1800, uniting the kingdoms of Great Britain and Ireland on and after Jan. 1, 1801.

3. That which is united, or made one; something formed by a combination or coalition of parts or members; a confederation; a consolidated body; a league; as, the United States of America are often called "the *Union.*"

4. Specif.: **a** *Eng.* A union of local administration for rating, poor relief, etc., formed by uniting two or more parishes under the government of a body called the board of guardians. Their formation and government are now chiefly regulated by the Local Government Act of 1894. Called also *poor-law union.* Hence, also, a workhouse maintained by such a union. **b** = TRADE-UNION, 1. **c** A device emblematic of union, used on a national flag or ensign, sometimes, as in the military standard of Great Britain, covering the whole field; sometimes, as in the flag of the United States, and the British naval reserve and merchant flags, occupying the upper inner corner; also, by extension, the upper inner corner or canton of a flag, occupied by the union. The *union* of the United States ensign is a cluster of white stars, denoting the union of the States, and equal in number to that of the States, on a blue field. The *union* of the United States Revenue Marine ensign is the eagle of the national coat of arms and thirteen stars in blue on a white field. The *union* of the United States yacht ensign is a fouled anchor surrounded by thirteen stars in white on a blue field. See *Plate I.* The *union* of the British ensign is the three crosses of St. George, St. Andrew, and St. Patrick, in combination, denoting the union of England, Scotland, and Ireland, displayed on a blue field. See *Plate V.*

un'ion-ist, *n.* **1.** One who advocates or promotes union.

2. Specif.: **a** A member or supporter of a trade-union. **b** [*usually cap.*] An adherent or supporter of the federal union of the United States, esp. at the time of the Civil War. **c** [*usually cap.*] In British politics, one who advocates maintaining the present union between Great Britain and Ireland, as opposed to an advocate of home rule.

un'ion-ist (ŭn'yŭn-ĭst) } *a.* Of or pert. to union or unionists;
un'ion-is'tic (-ĭs'tĭk) } promoting or preserving union.

un'ion-ize (-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'ĭng). [*union* + *-ize.*] To cause to become a member of, or subject to the rules of, a trade-union; to organize in a trade-union or trade-unions; as, to *unionize* employees or a shop.

union jack. *Nav.* A jack consisting of the union of the national ensign. See JACK, *n.*, 11.

u-nip'a-rous (ū-nĭp'ă-rŭs), *a.* [*uni-* + *-parous.*] **1.** *Zoöl.* Producing but one egg or young at a time.

2. *Bot.* Producing but one axis at each branching; — said of certain cymose inflorescences.

u'ni-par'tite (ū'nĭ-pär'tīt), *a.* **1.** Not divided into parts.

2. *Math.* **a** Enumerating a single set of objects all of the same kind. **b** Having all its real points comprised in one series through finity or infinity; — said of curves.

u'ni-pe'ri-od'ic (-pē'rĭ-ŏd'ĭk), *a.* [*uni-* + *periodic.*] Having a single period; specif., *Elec.*, pertaining to or designating an alternating current having a frequency of one, or completing a cycle in one second.

u'ni-per'son-al (-pûr'sŭn-ăl), *a.* **1.** Existing as one, and only one, person; as, a *unipersonal* God.

2. *Gram.* Used in only one person, esp. only in the third person singular, as some verbs; impersonal.

u'ni-per'son-al-ist, *n.* *Theol.* One who believes that the Deity is unipersonal.

u'ni-per'son-al'i-ty (-ăl'ĭ-tĭ), *n.* Unipersonal character.

u'ni-pet'al-ous (-pĕt'ăl-ŭs), *a.* *Bot.* Having only one petal.

u'ni-pla'nar (-plā'när), *a.* [*uni-* + *planar.*] *Mech.* Lying or occurring in one plane; as, *uniplanar* motion.

uniplanar point (of a surface), *Math.*, a double point at which the proper cone of tangent lines degenerates into two coincident planes or one doubly laid plane.

u-nip'li-cate (ū-nĭp'lĭ-kāt), *a.* [*uni-* + *plicate.*] Having, or consisting of, but one fold.

u'ni-po'lar (ū'nĭ-pō'lär), *a.* [*uni-* + *polar.*] Having but one pole. Specif.: **a** *Physics.* Having, produced by, or acting by, one pole only. **b** *Anat.* Designating nerve cells supposed to have but one process.

unipolar armature, *Elec.*, an armature which does not reverse its polarity during a complete revolution. — **u. dynamo.** See HOMOPOLAR DYNAMO. — **u. induction,** *Elec.*, induction, as in a conducting circuit, by only one pole of a magnet. — **u. stimulation,** *Physiol.*, the stimulation sometimes produced when one electrode of an induction apparatus is applied to a nerve; — called also *unipolar induction action.*

u-nique' (ū-nēk'), *a.* [F. *unique*; cf. It. *unico*; from L. *unicus,* fr. *unus* one. See ONE.] **1.** Being without a like or equal; single in kind or excellence; sole.

2. *Math.* Single-valued; admitting only one value for any one set of argument values, as a function.

Syn. — See SINGLE.

— **u-nique'ly,** *adv.* — **u-nique'ness,** *n.*

u'ni-sep'tate (ū'nĭ-sĕp'tāt), *a.* [*uni-* + *septate.*] *Bot.* Having but one septum, or partition, as a silicle.

u'ni-sex'u-al (-sĕk'shŭ-ăl; 250), *a.* [*uni-* + *sexual.*] Of one sex; esp., *Zoöl.*, either male or female; not hermaphrodite; specif., *Bot.*, diclinous. — **u'ni-sex'u-al'i-ty** (-ăl'ĭ-tĭ), *n.* — **u'ni-sex'u-al-ly,** *adv.*

u'ni-son (ū'nĭ-sŭn; -zŭn; 277), *n.* [LL. *unisonus* having the same sound; L. *unus* one + *sonus* a sound; cf. F. *unisson,* It. *unisono.* See ONE; SOUND a noise.] **1.** Harmony; agreement; concord; union.

2. *Music.* **a** Identity in pitch; the interval of a perfect prime, represented by the vibration ratio 1 : 1. **b** State of being so tuned or sounded. Parts played or sung in octaves are also loosely said to be in *unison,* esp. when in octaves between male and female voices, or between high-toned and low-toned instruments of the same class. A piece or passage is said to be sung or played in *unison* when all the voices or instruments perform the same part, as distinguished from performing in *harmony.* **c** A unison string.

3. A single unvaried tone. *Rare.* *Pope.*

u'ni-son'al, *a.* [Cf. It. *unisono.*] **1.** Sounding alone. *Obs.*

2. *Music.* Sounded alike in pitch; unisonant; unisonous.

unison string, *Music,* in pianos, any one of two or three strings that are tuned to the same pitch and are struck by one hammer.

u-nis'o-nal (ū-nĭs'ō-năl; 277), *a.* Being in unison; unisonant. — **u-nis'o-nal-ly,** *adv.*

u-nis'o-nance (-năns), *n.* [See UNISONANT.] Accordance of sounds; unison.

u-nis'o-nant (-nănt), *a.* [*uni-* + *sonant.* See UNISON.] Being in unison; having the same degree of gravity or acuteness; sounded alike in pitch.

u-nis'o-nous (-nŭs), *a.* [See UNISON.] Being in unison; unisonant; also, sounding alone.

u'nit (ū'nĭt), *n.* [Abbr. fr. *unity.*] **1.** A single thing or person, or a group regarded as an individual member of a number of groups; as, the *units* of a military force; a system of government which makes the township the *unit.*

2. Specif.: **a** *Arith.* The least whole number; one. **b** *Math.* A single thing, as a magnitude or number, regarded as an undivided whole. **c** Any determinate amount or quantity (as of length, time, heat, value) adopted as a standard of measurement for other amounts or quantities of the same kind. See *List of Units,* below.

3. That which contains or produces a unit; as, an electric power station of three *units*; one *unit* was idle.

4. An English gold coin first issued by James I., which was current at 20 shillings; — so called in reference to the union of England and Scotland. A variety on which the monarch's head appears, crowned with laurel, was called a *laurel.* Also called *unite.*

unit of value, the value of something taken as a standard by comparison with which to reckon the value of other things. — **u. of work,** *Physics,* the amount of work done by a unit force acting through a unit distance, or the amount required to lift a unit weight through a unit distance against gravitation. See ERG, FOOT POUND, KILOGRAMMETER. In *Physics,* units are; **fundamental units,** or those of mass, length, and time; and **derived units,** such as those of area, velocity, acceleration, etc., which are determined by reference to the fundamental ones. In electricity and magnetism, there are certain **absolute units,** and **practical units** derived from such of the former as are unsuitable for practical use.

LIST OF UNITS.

PHYSICAL UNITS.

A **physical unit** is a value or magnitude conventionally adopted as a unit or standard in physical measurement.

An **absolute unit** is one which has an unchanging value at all times and places.

An **absolute system of units** is one based on certain absolute units (specifically, the centimeter, gram, and second) arbitrarily taken as fundamental, and from which other units are derived.

A system is *consistent* when the units in it have such values that the formulæ expressing physical laws are correct without proportionality factors; thus, force *equals* mass times acceleration. In physics the units generally taken as fundamental are the units of *length, mass,* and *time;* that is, *L, M,* and *T.* The **centimeter-gram-second system,** known as the **C. G. S. system,** is a consistent system based on the centimeter as the unit of length, the gram as the unit of mass, and the second as the unit of time, these three units being taken as fundamental. (See CENTIMETER; 2d GRAM; 4th SECOND.)

The dimensions of a quantity in any system are found by expressing the quantity algebraically in terms of the fundamental units of that system; thus velocity is a length divided by a time, and in a length-mass-time system has the dimensions $L\,T^{-1}$. The dimensions of a quantity indicate how its unit will be changed by any change in the fundamental units; thus if the unit of length is changed from the centimeter to the meter, the unit of velocity is increased one hundred fold; if the unit of time is changed from the second to the minute, the unit of velocity is decreased as 1 : 60. Since quantities of like kind have the same dimensions, an equation containing physical quantities will be correct only when each term has the same dimensions.

MECHANICAL UNITS.

The derived mechanical units of the C. G. S. system are as follows. The dimensions of the physical quantity are given in parenthesis. — **unit acceleration,** $a = v \div T$, an acceleration of one centimeter per second per second ($L\,T^{-2}$). — **u. angle,** $a = \text{arc} \div \text{radius}$, an angle which subtends an arc equal to its radius. This unit is called a *radian.* Since an angle is a number expressing a ratio, independent of fundamental units, it has no dimensions. See RADIAN. — **u. angular velocity,** $\omega = a \div T$, an angular velocity of one radian per second (T^{-1}). — **u. force,** $F = M \times a$, a force which, acting for one second upon a mass of one gram, increases its velocity at the rate of one centimeter per second ($L\,M\,T^{-2}$); the C. G. S. unit of force is called a *dyne.* (In engineering mechanics *force* is commonly considered as a fundamental quantity and *mass* as a quantity which is derived according to the relation $M = F \div a$. **u. mass** is then defined as a mass which when acted on by unit force for one second has its velocity changed at the rate of one centimeter per second.) — **u. kinetic energy,** $W = \frac{1}{2}Mv^2$, the energy of a mass of one gram moving with a velocity of one centimeter per second ($L^2M\,T^{-2}$); the C. G. S. unit is called an *erg.* See ERG. — **u. moment of inertia,** $M \times L^2$, the moment of inertia of one gram at a distance of one centimeter from the point with reference to which the moment is computed (L^2M). — **u. momentum,** $M \times v$, the momentum of one gram moving with a velocity of one centimeter per second ($L\,M\,T^{-1}$). — **u. power,** $P = W \div T$, the power with which one work is done at the rate of one erg per second ($L^2M\,T^{-3}$). — **u. pressure,** $F \div S$, a pressure of one dyne per square centimeter ($L^{-1}M\,T^{-2}$). — **u. surface,** $S = L \times L$, the area of a square centimeter (L^2). — **u. torque** *or* **moment,** $F \times L$, a torque or moment produced by a force of one dyne acting on a lever arm or radius of one centimeter ($L^2\,M\,T^{-2}$). — **u. velocity,** $v = L \div T$, a velocity of one centimeter per second ($L\,T^{-1}$). — **u. volume,** $V = L \times L \times L$, the volume of a cubic centimeter (L^3). — **u. work,** $W = F \times L$, the work done by a force of one

union bow. See 6th BOW, 2.

union cord. A strong white cord made of cotton and linen, and used for stay laces.

un'ioned (ŭn'yŭnd), *a.* [*union* + *-ed.*] United. *Rare.*

union grass. Any grass of the genus *Uniola.*

U'ni-on'i-dæ (ū'nĭ-ŏn'ĭ-dē), *n. pl.* [NL. *unio* mussel, fr. L. *unio* a single large pearl + *-idæ.*] *Zoöl.* A very large family of fresh-water mussels having a nacreous, often roughly sculptured shell with a thick epidermis. Their larvæ pass through a glochidium stage. The family is represented in nearly all parts of the world, but chiefly in North America. — **u'ni-on'id** (-ŏn'ĭd), *n.* — **u'ni-on'i-form** (-ĭ-fôrm), *a.* [See UN-, not.]

un-i'on-ized (ŭn'ĭ'ŏn-īzd), *a.*

union joint. *Mech.* **a** A joint formed by means of a union. **b** A piece of pipe made in the form of the letter **T**.

un'ion-nut', *n.* An Australian rutaceous tree (*Bosistoa sapindiformis*) yielding a useful cabinet wood.

union shop. A shop run according to the requirements of a trade-union.

union station. A station used jointly by two or more railroad companies. *U. S. & Canada.*

union suit. An undergarment combining undershirt and drawers in one piece. *Cant.*

union valve. A valve with a union on one side.

u'ni-o'val. *a.* Having but one oval.

u'ni-o'vu-lar, u'ni-o'vu-late, *a.* *Bot.* Having or bearing but one ovule.

u-nip'a-ra (ū-nĭp'ă-rȧ), *n.* [NL. See UNIPAROUS.] A woman who has borne one child.

u'ni-ped (ū'nĭ-pĕd), *a.* [*uni-* + *-ped.*] Having only one foot.

u'ni-phase, *a.* [*uni-* + *phase*], **u'ni-phas'er** (-fāz'ĕr), *n.* *Elec.* = SINGLE-PHASE, SINGLE-PHASER.

u-niph'o-nous (ū-nĭf'ō-nŭs), *a.* [*uni-* + Gr. *φωνή* sound.] Having but one sound, as the drum.

u'ni-po-lar'i-ty (ū'nĭ-pō-lăr'ĭ-tĭ), *n.* State of being unipolar.

u-nip'o-tent (ū-nĭp'ō-tĕnt), *a.* Having power in one way only.

— **u-nip'o-tence** (-tĕns), *n.* [*R.*]

u-nique', *n.* A unique thing.

uniqueness, *n.* [AS. *ungecwēme.*] Displeasing; inconvenient. *Obs.*

u-niq'ui-ty (ū-nĭk'wĭ-tĭ; ū-nēk'wĭ-), *n.* Uniqueness. *R.*

u'ni-ra'di-al, *a.*, **u'ni-ra'di-ate,** *a.*, **u'ni-ra'mose, u'ni-ra'mous,** *a.* See UNI-.

u'ni-reme (ū'nĭ-rēm), *n.* [*uni-* + L. *remus* oar.] *Class. Antiq.* Having but one bank, or tier, of oars, as a galley; single-banked.

unirimed, *a.* [AS. *ungerīmed,* fr. *rīm* number.] Innumerable. *Obs.*

un-irk'et, *a.* [*un-* not + dial. p. p. of *irk.*] Unwearied. *Obs. Scot.*

un-ir'ri-gat'ed, *a.*, **un-ir'ri-ta-ble,** *a.*, **un-ir'ri-tat'ed,** *a.*, **un-ir'ri-tat'ing,** *a.* See UN-, not.

unis. *Abbr.* Unison.

unisele, *a.* = UNISELL. *Obs.*

unisell, *a.* [AS. *ungesēllĭg.*] Unhappy; unfortunate. *Obs.*

uniselthe, *n.* [AS. *ungesēlþ.*] Unhappiness. *Obs.*

unisome, *a.* [AS. *ungesōm.*] Disunited; unreconciled. *Obs.*

u'ni-spi'ral (ū'nĭ-spī'răl), *a.* [*uni-* + *spiral.*] *Bot.* Having a single coil, as the elaters in some liverworts. [UN-, not.]

un-i-s'sued (ŭn-ĭsh'ūd), *a.* See

u'ni-styl'ist (ū'nĭ-stīl'ĭst), *n.* A person having but one style. *R.*

u'ni-sul'cate, *a.* [*uni-* + *sulcate.*] Having a single groove.

unisunde, *n.* = UNSUNDE. *Obs.*

dyne acting through a distance of one centimeter (L^2MT^{-2}); the C. G. S. unit of work is called an *erg*.

MAGNETIC AND ELECTRICAL UNITS.

There are primarily two systems founded on the C. G. S. units of length, mass, and time. They are: (1) **electromagnetic system**, based on the force exerted between two magnetic poles; (2) **electrostatic system**, based upon the force exerted between two quantities of electricity. In addition there is the **practical system**, the units of which are multiples or submultiples of the units in the electromagnetic and electrostatic systems. The principal units of these systems are given below; dimensions and defining equations are given in *Table I.* and *Table II.*

unit flux density, a unit flux per unit area; one line of force or one *maxwell* per square centimeter; the C. G. S. unit is called a *gauss*. See GAUSS. — **u. intensity of magnetic field (magnetic force** *or* **magnetizing force)**, an intensity which acts on unit pole with the force of one dyne; a magnetizing force produced by unit magnetomotive force (one *gilbert*) per centimeter; the C. G. S. unit is called a *gauss*. — **u. intensity of magnetization**, the intensity of magnetization of a magnet with unit magnetic moment per unit volume (see note below under *susceptibility*). — **u. magnetic flux**, the flux produced by unit magnetomotive force through unit reluctance; one line of force; the C. G. S. unit is called a *maxwell*. See MAXWELL. — **u. magnetic moment**, the magnet moment of two unlike unit poles at a distance apart of one centimeter. — **u. magnetic pole**, a pole which in a nonmagnetic medium will repel with a force of one dyne another equal and like pole at a distance of one centimeter. — **u. magnetomotive force** (*or* **magnetic potential**), a magnetomotive force which will produce unit flux (one maxwell) through unit reluctance (one oersted); the magnetomotive force of $1 \div 4\pi$ C. G. S. units of current in one turn (0.7958 ampere turn); the C. G. S. unit is commonly called a *gilbert*, a name not yet authorized by any international electrical congress. See GILBERT. — **u. permeability**, the permeability of a nonmagnetic material (as air) in which a unit flux density is produced by unit magnetizing force. — **u. reluctance**, the reluctance of a cubic centimeter of a material with unit permeability; a reluctance in which unit magnetomotive force produces unit magnetic flux; the C. G. S. unit is commonly called an *oersted*, a name not yet authorized by any international electrical congress. See OERSTED. — **u. reluctivity**, the reluctivity of a material with unit permeability. — **u. susceptibility**, the susceptibility of a substance which has unit intensity of magnetization. (The usage, common in early writing, of stating magnetic properties in terms of susceptibility and intensity of magnetization, has been largely abandoned. With the development of electrical engineering, it has become more usual to express such properties in terms of permeability and flux density.)

ELECTROMAGNETIC UNITS.

unit capacity, a capacity which is charged to unit potential by unit quantity. — **u. current**, a current which in passing through a conductor one centimeter in length bent in the arc of a circle one centimeter in radius creates at the center a unit magnetic field. — **u. electromotive force**, the electromotive force generated in a conductor cutting unit magnetic flux per second. This is also the unit of difference of potential. — **u. energy**, the energy expended in a circuit in which an unvarying unit electromotive force causes an unvarying unit current to flow for one second; the C. G. S. unit is called an *erg*. — **u. inductance**, an inductance such that unit electromotive force is induced by a current varying at the rate of one unit per second. — **u. power**, the power corresponding to an expenditure of unit energy per second. — **u. quantity**, the quantity conveyed by unit current in one second. — **u. resistance**, a resistance through which unit electromotive force will cause unit current to flow.

ELECTROSTATIC UNITS.

unit capacity, a capacity charged to unit potential by unit quantity; a sphere one centimeter in radius has unit capacity. — **u. current**, a current conveying unit quantity in unit time (1 second). — **u. difference of potential**, a difference requiring expenditure of an erg of work to move a unit quantity from one point to another. This is also the unit of electromotive force. — **u. intensity of field**, the intensity of a field in which unit quantity is acted on by unit force. — **u. quantity**, a quantity which in a medium of unit specific inductive capacity (air) repels with a force of one dyne another equal and like quantity at a distance of one centimeter. — **u. resistance**, a resistance between the ends of which there will be unit difference of potential when unit current flows. — **u. specific inductive capacity**, the inductive capacity of air.

☞ It has been proposed to name certain electromagnetic and electrostatic units by prefixing *ab* and *abstat*, respectively, before the name of the corresponding practical unit; thus *abvolt* is the C. G. S. electromagnetic, and *abstatvolt* the C. G. S. electrostatic, unit of electromotive force.

PRACTICAL UNITS.

The units of the **practical system** are multiples of the C. G. S. units, established for convenience in practical use by the International Electrical Congress of 1881 (and later), and so related as to form a *consistent system* (see above); the *ohm* and the *ampere* were the practical units first established, the volt and other practical units being defined in terms of these two; and for definiteness the system might be designated the **ohm-ampere system**. Electrical formulæ are correct when units of any *one* system are used consistently throughout: thus, Ohm's law (current = electromotive force ÷ resistance), which is true in C. G. S. electromagnetic or electrostatic units, is also true in practical units, — the values of current, electromotive force, and resistance being expressed in amperes, volts, and ohms, — but it would not be true if, for example, the value of resistance were given in *megohms*. (*Practical unit* is often, less properly, used for *any* unit practically used, whether a unit of the practical system or not. By this usage, a *megohm* would be *called* a practical unit.)

The fundamental units on which the practical system is based are: the *earth's quadrant* (10^9 centimeters) as unit of length, 10^{-11} *grams* as unit of mass, and the *second* as unit of time.

The *only* units of the practical system which have names and are used are given below; for other quantities the units of the C. G. S. system are more convenient.

1 ampere = 10^{-1} C. G. S. electromagnetic units of current.
= $10^{-1} \times (3 \times 10^{10}) = 3 \times 10^9$ C. G. S. electrostatic units.
1 coulomb = 10^{-1} C. G. S. electromagnetic units of quantity.
= $10^{-1} \times (3 \times 10^{10}) = 3 \times 10^9$ C. G. S. electrostatic units.
1 farad = 10^{-9} C. G. S. electromagnetic units of capacity.

1 watt = 10^7 C. G. S. electromagnetic units of power.
= 10^7 C. G. S. electrostatic units.

magnetic units of the practical system are not used. The International Electrical Congress of 1900 gave the name *maxwell* to the C. G. S. (electromagnetic) unit of magnetic flux and the name *gauss* to the C. G. S. unit of flux density. The C. G. S. unit of reluctance is commonly called *oersted*; the C. G. S. unit of magnetomotive force, *gilbert*, — recommendations of the American Institute of Electrical Engineers which have not yet been adopted by an International Electrical Congress. See above.

Board of Trade unit (B. O. T. unit, B. T. U. or simply a *unit*), a name used in England for one kilowatt hour.
rational units are a system of magnetic and electrical units, first suggested by O. Heaviside, in which unit magnetic pole is defined as a pole from which emanates unit magnetic flux.

**The dimensions of μ and of k alone are not known, but the product μk is known to have the dimensions of the reciprocal of the square of a velocity, $L^{-2}T^2$. Commonly μ and k are *suppressed* from the dimensional formulæ, it being assumed in the *electromagnetic* system that μ is a number without dimensions and that k has accordingly the dimensions $L^{-2}T^2$, and in the *electrostatic* system that k is a number without dimensions and that μ has the dimensions $L^{-2}T^2$. The velocity appearing in the ratio between the electrostatic and electromagnetic units has been found to be approximately 3×10^{10}, the velocity of light.
[a] The C.G.S. electrostatic unit is equal to the C.G.S. electromagnetic unit multiplied by 3×10^{10}. The electrostatic dimensions are equal to the electromagnetic dimensions multiplied by $L^{-1/2}\mu^{-1/2}k^{-1/2}$.
[b] The C.G.S. electrostatic unit is equal to the C.G.S. electromagnetic unit divided by 3×10^{10}. The electrostatic dimensions are equal to the electromagnetic dimensions multiplied by $L^{1/2}\mu^{1/2}k^{1/2}$.
[c] The C.G.S. electrostatic unit is equal to the C.G.S. electromagnetic unit multiplied by 9×10^{20}. The electrostatic dimensions are equal to the electromagnetic dimensions multiplied by $L^{-2}T^2\mu^{-1}k^{-1}$.
[d] The C.G.S. electrostatic unit is equal to the C.G.S. electromagnetic unit divided by 9×10^{20}. The electrostatic dimensions are equal to the electromagnetic dimensions multiplied by $L^2T^{-2}\mu k$.
[e] The C.G.S. electrostatic unit equals the C.G.S. electromagnetic unit. Electrostatic and electromagnetic dimensions are alike.
‡ f = frequency.

u-nit'a-ble (ū-nit'ā-b'l), *a.* Also **u-nite'a-ble.** Capable of union, by growth or otherwise.

u'ni-ta'ri-an (ū'nĭ-tā'rĭ-ăn; 115), *n.* [Cf. F. *unitaire*. See UNITARY, UNITY.] **1.** [*cap.*] *Theol. & Eccl.* One who denies the doctrine of the Trinity, believing that God exists only in one person; a unipersonalist; also, one of a denomination of Christians holding this belief. The churches of the Unitarian denomination are congregational in polity, except in Hungary, where they are organized under a bishop. They have never issued any authoritative confession of faith, one of their most distinctive principles being the right of private judgment in theological matters. They formerly differed widely among themselves, the conservatives holding a belief in supernaturalism and in various doctrines modified from those of the orthodox Trinitarian bodies; the radical school rejected supernaturalism. Now there is virtual unity on the broad basis of the doctrines of "the fatherhood of God, the brotherhood of man, the leadership of Jesus, salvation by character, and the progress of mankind onward and upward forever." Unitarian views are held by the Hicksite Friends, by many Universalists, and some others. See PRESBYTERIAN, *a.*
2. One who rejects the principle of dualism; a monist.
3. A monotheist. *Rare.* *Fleming.*
4. An advocate of unity or a unitary system; specif., one who advocates centralization in government. *Rare in U. S.*

u'ni-ta'ri-an (ū'nĭ-tā'rĭ-ăn; 115), *a.* **1.** Unitary.
2. [*cap.*] Of or pertaining to Unitarians or their doctrines.
3. *Polit. Sci.* Designating, or pertaining to, a form of government in which the general governmental powers are vested in one sovereign body; — opposed to *federal*.
In a *unitarian* or consolidated constitution, like that of Great Britain, organic changes may be effected with greater facility and safety than in a federal constitution such as that of the United States. *Quick & Garran.*

u'ni-ta'ri-an-ism (-ĭz'm), *n.* [Cf. F. *unitairianisme*.]
1. [*cap.*] The doctrines of Unitarians.
2. Any unitarian or unitary system, as of government.

u'ni-ta-rism (ū'nĭ-tā-rĭz'm), *n.* State of being unitary; a unitary theory or system.

u'ni-ta-ry (ū'nĭ-tā-rĭ), *a.* [Cf. F. *unitaire*. See UNITY.]
1. Of or pertaining to a unit or units; relating to, or characterized by, unity; as, the *unitary* method in arithmetic; a *unitary* or monistic tendency.
2. Of the nature of a unit; not divided; as, a *unitary* government.
unitary theory, *Chem.*, the modern theory which regards molecules as units whose parts are bound together in definite structure, with mutual and reciprocal influence on each other. Cf. BINARY THEORY, DUALISTIC SYSTEM OR THEORY.

u-nite' (ū-nīt'), *v. t.*; U-NIT'ED (-nīt'ĕd); U-NIT'ING (-nīt'-ĭng). [L. *unitus*, p. p. of *unire* to unite, fr. *unus* one. See ONE.] **1.** To put together so as to make one; to join, as two or more constituents, to form a single whole; to combine; connect; to cause to adhere; as, to *unite* bricks by mortar; to *unite* bars by welding; to *unite* two armies.
2. Hence, to join by a legal or moral bond, as families by intermarriage, nations by treaty, men by opinions; to join in interest, affection, fellowship, or the like.
Syn. — Combine, consolidate, amalgamate. See JOIN.

u-nite', *v. i.* **1.** To become one; to be cemented or consolidated or incorporated together; to combine, as by adhesion or mixture; to coalesce; to grow together.
2. To join in an act; to act in concert; as, all parties *united* in signing the petition.

u-nit'ed (ū-nīt'ĕd), *p. a.* **1.** Combined; joined; made one.
2. In agreement; harmonious; as, a *united* family.
3. *R. C. Ch.* Designating, or pert. to, any of various bodies of Oriental Christians acknowledging the supremacy of the Pope and in communion with the Church of Rome. Such bodies retain many local customs and rites.
United Armenians, *R. C. Ch.*, Armenian Christians who are in union with the Church of Rome. There have been such since the 14th century. They are found in various countries, and are under a patriarch whose residence is in Constantinople. — **U. Baptists.** *Eccl.* See BAPTIST, *n.*, 2. — **U. Brethren.** *Eccl.* See MORAVIAN, *n.*, 2. — **U. Brethren in Christ,** *Eccl.*, an evangelical denomination resembling the Methodists in doctrine and polity, founded by Philip William Otterbein and Martin Boehm in Frederick County, Maryland, in 1800. It is now divided into the United Brethren in Christ, and the United Brethren in Christ (Old Constitution), differing as to the constitutionality of the act of the General Conference of 1885 creating a commission to revise the confession of faith and the constitution.
The *United Brethren in Christ* are sometimes confounded with the Unitas Fratrum or Moravian Brethren. *H. K. Carroll.* — **U. Free Church of Scotland.** See PRESBYTERIAN, *a.* — **U. Greeks,** *Eccl.*, those Greek and other Eastern Christians who, in consequence of their acknowledgment of the supremacy of the Pope, are united to the Roman Catholic Church, but are allowed to use their own liturgies and to retain some of their ancient usages, such as the marriage of the lower clergy, Communion in both kinds, etc.; the Uniats. They include the Melchites, the Ruthenian Catholics, the Maronites, the Roumanian Catholics, etc., and are usually called Catholics of the Greek or Oriental Rite. — **U. Irishmen, Society of,** a society formed in Ireland in 1791 by Theobald Wolfe Tone, aiming to unite Protestants and Roman Catholics for the purpose of securing a repeal of the penal laws, an extension of the suffrage, etc. It failed of its object and was proclaimed. About 1795 it was reorganized as a secret society with the avowed aim of separating Ireland from the British empire, and was influential in bringing about the rebellion of 1798. — **U. Kingdom, the.** Great Britain and Ireland; — so named since January 1, 1801, when the Legislative Union went into operation. — **U. Methodist Free Churches.** See METHODIST, *n.*, 5. — **U. Norwegian Lutheran Church.** See LUTHERAN, *n.* — **U. Original Secession Church.** See PRESBYTERIAN, *a.* — **U. Presbyterian Church.** See PRESBYTERIAN, *a.* — **U. Provinces,** the seven provinces, Holland, Zealand, Utrecht, Friesland, Groningen, Overyssel, and Gelderland, which formed a union under the treaty of Utrecht in 1579, and led to the Netherland republic. — **U. Society of Believers in Christ's Second Appearing.** See SHAKER, 4. — **U. Synod in the South.** See LUTHERAN, *n.* — **U. Zion's Children.** See RIVER BRETHREN.

United States Christian Commission. An organization in the North, during the American Civil War, which supplied material comforts, reading matter, etc., to the Union soldiers, and performed services of a religious character in the field and in hospitals.

United States magazine rifle (model of 1903). *Mil.* A .30-inch caliber combined rifle and carbine adopted for all branches of the service by the United States government; — officially so designated. It is a magazine rifle of the general Mauser type, the magazine holding five cartridges and being loaded from a clip, but it has various modifications making it dis-

u'ni-tas Fra'trum (ū'nĭ-tăs frā'trŭm). [L.] *Eccl. Hist.* Lit., Unity of Brethren; — the official Latin title of the Moravian Church. See MORAVIAN, *n.*, 2.

unite. ✣ UNIT, UNITY.

unite. Var. of UNIT, *n.*, 4.

u-nite', *a.* [L. *unitus*, p. p. See UNITE, *v. t.*] United; joint.

u-nite'a-ble. Var. of UNITABLE.

u-nit'ed-ly (ū-nīt'ĕd-lĭ), *adv.* of UNITED. See -LY.

United States note. One of the legal-tender obligations of the United States commonly called greenbacks. *Official Name.*

unitee. ✣ UNITY.

u-nit'er (ū-nīt'ẽr), *n.* One that unites. [*a.* Not iterable.]

un-it'er-a-ble (ŭn-ĭt'ẽr-ă-b'l), *a.*

u-ni'tion (ū-nĭsh'ŭn), *n.* [LL. *unitio*, fr. L. *unire*. See UNITE, *v. t.*] Uniting; junction. *Obs.*

tinctively an American arm, including a cut-off and an extra strong bolt mechanism to provide for the increased velocity of 2,700 feet per second. The total weight is 9.69 pounds, including the bayonet. The length of barrel is 24 inches, and the knife bayonet with sharpened edge is 16 inches in length. It is provided with a wind-gauge sight graduated to 2,500 yards.

u'ni-tive (ū'nĭ-tĭv), *a.* [LL. *unitivus:* cf. F. *unitif.*] Having the power of uniting; causing, or tending to produce, union. — **u'ni-tive-ly**, *adv.*

unit rule. *U. S. Politics.* The rule, adopted by some delegations, that the entire vote of the delegation shall be cast as a unit for the person or side preferred by a majority vote.

u'ni-ty (ū'nĭ-tĭ), *n.*; *pl.* -TIES (-tĭz). [ME. *unitee*, F. *unité*, L. *unitas*, fr. *unus* one. See ONE; cf. UNIT.] **1.** State of being one; oneness; individuality.

Whatever we can consider as one thing suggests to the understanding the idea of *unity*. *Locke.*

2. Concord; harmony; conjunction; agreement; uniformity; as, a *unity* of sentiment, proofs, doctrine.

Behold, how good and how pleasant it is for brethren to dwell together in *unity!* *Ps.* cxxxiii. 1.

3. *Math.* **a** Any definite quantity, or aggregate of quantities or magnitudes taken as one, or for which 1 is made to stand in calculation; thus, in a table of natural sines, the radius of the circle is regarded as *unity*. **b** That multiplier in any system multiplication by which leaves the multiplicand unchanged. It is not the same as *unit*, which enters into addition. In any system there may be many units, as 1 and *i* in complex numbers, yet only one if any unity. But the unit 1, when it is not applied to any particular thing, is generally called *unity*.

4. A totality of related parts; a complex or systematic whole.

5. Selfsameness; identity. *Æsthetic* **unity** is the single and harmonious effect of a direct presentation, as an image or sense impression. **Formal unity** is the unity which pertains to an individual in abstraction from the **material unity** which is what constitutes the individual substance; as, for example, the particular Gothic architecture of Notre Dame is its *formal unity*, the particular space it occupies and the material of which it is made constitute its *material unity*. **Functional unity** is the unity of that which operates to a single end or system of ends; it is teleological unity. **Logical unity** is the unity of mutually relevant propositions in reasoning. **Metaphysical unity** is that of a self-identical subject, the unity of an absolute individual. It is opposed to **numerical unity**, which is external rather than inherent, and, consisting a distinction from like, is relative and not absolute. **Moral unity** is the functional unity of a moral subject; it is unity of intention and conduct. **Negative unity**, in *Hegelianism*, is an including unity which annuls and absorbs the individuality or separate subsistence of the parts within it, as the ocean swallows up its waves; — applied to the deity of pantheism, or the ultimate force of Spencerianism. **Organic unity** is the unity of an organism (which see).

6. In literary and art criticism, a combination or ordering of parts such as to constitute a whole, or promote an undivided total effect; the reference of the elements of a composition to a single main idea or point of view; also, conformity to this principle, or the singleness of effect or symmetry and consistency of style and character secured by it. The *unities* of place, time, and action were principles governing the structure of drama derived by writers of the French classical school from Aristotle's "Poetics." As rigidly formulated they required that the action of a play should be represented as occurring in one place, within one day, and with nothing irrelevant to the plot.

7. *Law.* Any of the peculiar characteristics of any estate held by several in joint tenancy. They are fourfold: unity of *interest*, unity of *title*, unity of *time*, and unity of *possession*; in other words, joint tenants have one and the same interest, accruing by one and the same conveyance, commencing at the same time, and held by one and the same undivided possession. **Unity of possession** is also a joint possession of two rights in the same thing by several titles, as when a man, having a lease of land, afterward buys the fee simple, or, having an easement in the land of another, buys the servient estate.

Syn. — Oneness, junction; concord, harmony. See UNION.

at unity, at one; in harmony. — **u. in variety**, *Æsthetics*, the principle that æsthetic values involve a variety of elements sufficient to avoid lack of interest, and a unity of the object such that its effect may be single and impressive; that character which avoids monotony on the one hand, and chaos on the other. — **U. of Brethren.** See MORAVIAN, *n.*, 2. — **u. of consciousness**, the self-identity joining together the successive experiences which form the life history of a mind. — **u. of God**, the doctrine that the distinctions, as of person or attribute, in the divine nature do not preclude its substantial unity.

u'ni-va'lent (ū'nĭ-vā'lĕnt; ū-nĭv'ā-lĕnt), *a.* [*uni-* + L. *valens, -entis*, p. pr. See VALENCE.] *Chem.* Having a valence of one; monovalent. See VALENCE. — **u'ni-va'lence** (-lĕns), **u'ni-va'len-cy** (-lĕn-sĭ), *n.*

u'ni-valve (ū'nĭ-vălv), *n.* [*uni-* + *valve.*] *Zoöl.* A mollusk shell consisting of one piece; also, any mollusk with a univalve shell; specif., any gastropod. Cf. BIVALVE, *n.*

u'ni-valve (ū'nĭ-vălv) } *a. Bot. & Zoöl.* Having one valve
u'ni-valved (-vălvd) } only; as, a *univalve* shell.

u'ni-va'ri-ant (ū'nĭ-vā'rĭ-ănt; 115), *a.* [*uni-* + *variant.*] *Phys. Chem.* Having one degree of freedom or variability.

u'ni-ver'sal (-vûr'săl), *a.* [L. *universalis:* cf. F. *universel*, OF. also *universal.* See UNIVERSE.] **1.** Of or pert. to the universe; pert. to the whole or to all, either collectively or distributively; unlimited; general; all-reaching; all-pervading; as, *universal* ruin, suffrage, benevolence, indignation. "Anointed *universal* King." *Milton.*

The *universal* cause
Acts not by partial, but by general laws. *Pope.*

2. Constituting, or considered as, a whole; total; entire; whole; as, the *universal* world. *Shak.*

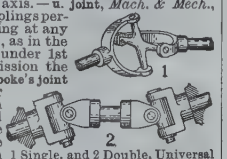
3. *Logic.* Forming the whole of a genus; relatively unlimited in extension; affirmed or denied of the whole of a class; as, a *universal* proposition; — opposed to *particular*; e. g., (*universal* affirmative) All men are animals; (*universal* negative) No men are omniscient.

4. *Mech. & Elec.* Adapted or adaptable to all or to various uses, shapes, sizes, etc.; as, a *universal* bevel, bevel protractor, bridge (for electrical measurements), drafting machine (replacing the T square and various instruments on the drawing board), driving shaft, gear cutter, grinder, milling machine, ratchet, (tilting) table (for machine tools), turner, switch, vise, etc.

5. *Roman & Civil Law.* Of or pert. to, or being, a universitas juris, or the totality of a person's rights and liabilities; as, a *universal* partnership. Cf. UNIVERSAL SUCCESSION.

Syn. — All, whole, total. See GENERAL.

universal affirmative. *Logic.* See def. 3, above, and MODE, 3 **b**, first figure. — **u. algebra.** *Math.* **a** The study of symbols and their combinations in accordance with laws derived by pure logic from a set of fundamental assumptions, entirely apart from any special interpretation of the symbols or the results of their combinations. **b** The theory of the multiplication of bilinear forms or matrices. — **u. arithmetic**, algebra. *Sir I. Newton.* — **U. Bishop**, a title first assumed in the Roman Church by Pope Boniface III. (Feb. 15–Nov. 12, 606). — **u. cause**, a cause which with one and the same efficiency concurs with others in producing different effects as God produces all sorts of results in one and the same manner. *Dict. of Philos.* — **u. chuck.** See 5th CHUCK, 4. — **u. church**, the whole body of Christian believers in the world; the catholic church (see CATHOLIC, *a.*, 3). — **u. compass.** See COMPASS, *n.*, 8. — **u. conversion**, *Logic*, conversion of a proposition into a universal proposition. — **u. coupling.** = UNIVERSAL JOINT. — **u. dial**, a sundial with an adjustable gnomon, by which the hour may be found in any part of the world, or under any elevation of the pole. — **U. Doctor.** [L. *Doctor Universalis.*] **a** Albertus Magnus (1193?–1280). **b** Thomas Aquinas (1225?–74?). **c** Alain de Lille (1114–1203?). — **u. geometry**, *Math.*, geometry in its most general aspects, as the doctrine of *n*-dimensional spaces or continua. — **u. glut.** See 5th GLUT, 2, *Cit.* — **u. grammar.** See GRAMMAR, 1. — **u. instrument**, *Astron.*, a species of altazimuth. The object end of the telescope is sometimes placed at right angles to the eye end, with a mirror, or totally reflecting prism, at the angle between the two, and the eye end constitutes a portion of the horizontal axis. — **u. joint**, *Mach. & Mech.*, any of various joints or couplings permitting swiveling or turning at any angle within defined limits, as in the ball-and-socket joint (see under 1st BALL). For power transmission the single or double form of **Hooke's joint** is widely used, the former transforming a uniform into a variable motion, and the latter transmitting the motion unchanged. The single variety consists, in its simplest form, of a cross pivoted at its ends to the forked ends of the two shafts, the axes of which must, in every case, intersect.



1 Single, and 2 Double, Universal Joint.

— **u. language**, any of various artificial languages designed for universal use, as by merchants, travelers, etc. They are characterized in common by phonetic spelling and simplicity of grammar and derivation. The most important are: **Ido** (which see); **Kosmos**, devised by Eugene A. Lauds, published at Berlin, 1894; **La Lingvo internacia** = ESPERANTO; **Lingua international**—MONDOLINGUE; **Mondolingue**, by J. Scott, Vienna, 1890; **Myrana**, by J. Stempfi Kempten, Germany, 1889; **Novilatin**, by E. Beerman, Leipzig, 1895; **Spelin**, by G. Bauer, Agram, Hungary, 1888; **Universala**, by Eugene Heintzeler, Stuttgart, Germany, 1893; and **Volapük** (which see). — **u. lay** = LANG-LAY. — **u. legacy**, *Civil Law*, a legacy by which the testator gives to one or more persons (**u. legatees**) all his estate. — **u. mill**, a rolling mill in which the metal is acted upon by a set of rollers, commonly horizontal and vertical, at each pass; — used in rolling girder and channel-bar sections, etc. — **u. negative.** *Logic.* See def. 3, above, & MODE, 3 **b**, first figure. — **u. partnership**, *Roman & Civil Law*, a partnership which includes all the property, present and future, of the partners and all burdens or losses which without fraud are incurred by either partner, whether by negligence or otherwise. Such a partnership includes profits, inheritances, legacies, gifts, etc., and it is liable for all money, keeping up public offices, dowries of married men, etc. It is exemplified by the community of property between husband and wife in Roman Dutch law and the Civil law. — **U. Postal Union.** See POSTAL UNION. — **u. postulate**, the criterion of truth proposed by Herbert Spencer, namely, that that must be true the negative of which is inconceivable. — **u. proposition.** *Logic.* See def. 3, above. — **u. right.** See RIGHT, *n.*, 2, 2d *Cit.* — **u. solvent.** *Alchemy.* = ALKAHEST. — **u. succession**, *Roman & Civil Law*, succession to the totality of a man's estate, including both his rights and liabilities, according to the principle that *heres est eadem persona cum defuncto*, "the heir is the same person as the deceased." The most important of the six modes of universal succession mentioned by Justinian are: *hereditas* (see HERES) and *bonorum possessio* (which see). Hence: **u. successor.** — **u. suffrage**, *Polit. Science*, suffrage of all; usually, specif., manhood suffrage. — **u. syllogism**, *Logic*, a syllogism the conclusion of which is a universal proposition. — **u. theorem**, *Math.*, a theorem that extends to any quantity restriction. — **u. umbel**, *Bot.*, a primary or general umbel; the first or largest set of rays in a compound umbel; — opposed to *partial umbel*. It is often subtended by a **universal involucre.** — **u. whole.** See WHOLE.

u'ni-ver'sal (ū'nĭ-vûr'săl), *n.* **1.** The whole; the general system of the universe; the universe. *Obs.*

2. *Logic.* **a** A universal proposition. See UNIVERSAL, *a.*, 3.

In all induction the *universal* is the conclusion, in none a major premise, and in none the ground of either the being or the knowing of the particulars. *Thos. Case (Encyc. Brit.).*

b One of the five predicables, namely, genus, species, difference, property, accident, named collectively *the universals*. **c** A general concept or that in reality to which it corresponds; an abstraction or an abstract and general term, whether conceived as a mere word or name (the nominalist view), as a truth, or predicate which may be truly thought or affirmed of reality (the conceptualist view), or as an actual character of reality (the realist view). The medieval controversy on the nature of *universals* derived its chief impetus from the importance of the problem in discussions of the nature of the Trinity. Extreme nominalists (as Roscelin), holding that only particular things can exist in nature, inferred the particularity and denied the unity of the persons of the Godhead; realists, recognizing universals as realities, maintained the essential unity of the divine nature. As a logical problem nominalistically treated, the controversy centered about the question of the reality of similarities or identities, classes being regarded as the only universals. The *universal* is that element of things which remains when all differences are abstracted — universals as classes being therefore mere factitious unities. Is it, then, an independent reality common to all the individuals of a given class? The nominalistic solution of this problem in Scholasticism was that there is no physical reality corresponding to the universal, although there are physical similarities, but that the *universal* has a conceptual reality, though by itself this cannot furnish a sufficient account of actuality, or concrete being.

That Plato's Ideas and Aristotle's Entelechies, regarded as self-activities, suggested originally the standpoint of realism is assumed in Hegel's philosophy, who regards the universal as the self-determined in the phase of determiner, while the particular is the self-determined in the phase of result from the action of the universal upon itself, forming an antithesis or contrast of activity and its result. Cf. REALISM, 1 **a**. *W. T. Harris.*

3. *Metaph.* Any metaphysical being which preserves or evinces an identity of nature through a series of changes or as embodying different relations, as the ego or self.

Self-consciousness, wherein the *universal*, or self, is the organic total of the facts of consciousness. *Josiah Royce.*

u'ni-ver'sal-ism (ū'nĭ-vûr'săl-ĭz'm), *n.* [Cf. F. *universalisme.*] **1.** [*cap.*] *Theol.* The doctrine or belief that all men will eventually be saved, or restored to holiness and happiness.

2. The quality or state of being universal; universality.

u'ni-ver'sal-ist (-ĭst), *n.* [Cf. F. *universaliste.*] **1.** One who affects to understand all the particulars in statements or propositions. *Obs. & R.* *Bentley.*

2. [*cap.*] *Theol.* One who believes in Universalism; specif., one of a denomination of Christians holding this doctrine as their distinctive article of belief. The denomination is chiefly confined to America, its polity is a modified Presbyterianism, at the head of which is a general convention, and its conditions of fellowship are the acceptance of certain general principles, viz.: the universal fatherhood of God, the spiritual authority and leadership of Jesus Christ, the trustworthiness of the Bible as containing a revelation from God, the certainty of just retribution for sin, and the final harmony of all souls with God; also, the acknowledgment of the authority of the general convention and assent to its laws.

U'ni-ver'sal-ist, *a.* Of or pertaining to Universalism or its adherents.

u'ni-ver'sal-is'tic (-ĭs'tĭk), *a.* **1.** Of or pertaining to the whole; universal.

2. Of or pertaining to universalism or the universal; like, or tending toward, universalism.

3. [*cap.*] Of or pertaining to the Universalist church or doctrine; Universalist.

universalistic hedonism, the doctrine that the supreme good is the greatest happiness of the greatest number.

u'ni-ver-sal'i-ty (-vĕr-săl'ĭ-tĭ), *n.*; *pl.* -TIES (-tĭz). [Cf. F. *universalité.*] **1.** Quality or state of being universal.

But *universality* — concrete *universality* — is not, we must understand, antagonistic to individuality. *B. Bosanquet.*

2. Unrestricted versatility or power of adaptation or comprehension; as, the *universality* of Shakespeare's insight.

3. The universe. *Obs.*

u'ni-ver'sal-ize (-vûr'săl-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'-ĭng). [Cf. F. *universaliser.*] To make universal. — **u'ni-ver'sal-i-za'tion** (-ĭ-zā'shŭn; ī-zā'shŭn), *n.*

u'ni-verse (ū'nĭ-vûrs), *n.* [L. *universum*, fr. *universus* universal; *unus* one + *vertere*, *versum*, to turn, that is, turned into one, combined into one whole: cf. F. *univers.* See ONE; VERSION.] **1.** All created things viewed as constituting one system or whole; the whole body of things, or of phenomena; the τὸ πᾶν of the Greeks, the *mundus* of the Latins; the world; creation; in a loose sense, all mankind or the world of human experience in general.

Our general conclusion as to the structure of the *universe* may be summed up in these four propositions: 1. The general form of the *universe* of stars to which our sun belongs is that of a flattened cylinder, or extreme oblate spheroid, as was supposed by Herschel and Struve. 2. The phenomenon of the Milky Way is not due alone to the fact that we see more stars in the equatorial regions of this spheroid, but to the fact that this region is occupied through its entire extent by a series of agglomerations of stars, within which space is richer in stars than in the interior where we are placed. 3. Our sun is situated near the central plane of the spheroid, but eccentrically so as to be nearer the boundary in a direction of perhaps 18 hours in right ascension, between the equator and 50° of south declination. 4. It is possible, but not yet certain, that we are so near the galactic stars in this region that we may soon be enabled to discover a proper motion among them. *Simon Newcomb.*

2. Any distinct field or province of thought or reality conceived as forming a closed system or self-inclusive and independent organization; often, specif., in logic, a universe of discourse (see below).

I regard the *universe* as made up of the sum of possibilities introduced into the question, whether these comprise combinations of the truth and falsity of what are called eternal, or only temporary propositions. *John Venn.*

universe of discourse, *Logic*, that collection of facts or ideas which is tacitly implied and understood in a given statement or discussion; thus, a proposition concerning "Americans" may be intended to apply only to American aborigines, or to citizens of the United States, it may include all North Americans, or be extended to South Americans as well, the *universe of discourse* in each case being determined by the sense in which the word is taken.

u'ni-ver'si-ty (-vûr'sĭ-tĭ), *n.*; *pl.* -TIES (-tĭz). [ME. *universite*, F. *université*, L. *universitas* all together, the whole, the universe, a number of persons associated into one body, a society, corporation, fr. *universus* all together, universal. See UNIVERSE.] **1.** The universe; the whole. *Obs.*

2. A body or group, esp. of persons, treated as a unit in the law, as a corporation, guild, association, or the like, as in ancient Rome; a universitas. *Obs. or Hist.*

3. An institution organized for teaching and study in the higher branches of learning, and empowered to confer degrees in special departments, as theology, law, medicine, and the arts. The universities of Europe in the Middle Ages were in greater part the outgrowth of church schools. The most famous were those of Bologna and Paris, established in the 12th century, the former being devoted chiefly to law, the latter to theology. These and other great schools that had won general prestige were called *studia generalia* (L., general studies), as being resorts of scholars from all parts, the word *universitas* being originally used only of the scholastic guild or guilds within the *studium*. The teaching in the medieval universities was organized under four faculties, from which are descended the modern faculties of theology, law, medicine, and philosophy. Matters of student organization and discipline were in the hands either of bodies known as "nations," or of endowed colleges for student residence. The former system was predominant in continental Europe, the latter in England. The two English universities, Oxford and Cambridge, are each made up of a number of colleges, which are each complete in its own organization, and providing lodging

U'ral–Al-ta'ic (ū'rȧl-ăl-tā'ĭk), *a.* **1.** Of or pertaining to the Urals and the Altai; as, the *Ural-Altaic* customs.
2. Designating, or pertaining to, a great linguistic family (the **Ural-Altaic languages**), or the peoples whose mother tongues are comprised in it. Physically these peoples vary from the pure Mongolian type of eastern Siberia to the Caucasian Finn and Magyar, the tribes of western Siberia and central Asia presenting every degree of variation between these two. The Ural-Altaic languages comprise most of the agglutinative languages of Europe and northern Asia. They vary in structure from the primitive and amorphic agglutination of the Mongolic to the complex elaboration of the Turkish and the developed inflection of Finnish. They are characterized by vowel harmony and by the constancy of stress upon the first syllable, which is always the root or stem. They are also called *Ugro-Altaic, Finno-Tatar, Scythian, Turanian*, etc. (see AGGLUTINATIVE LANGUAGES). They may be grouped as follows:

URAL-ALTAIC LANGUAGES.

SUB-FAMILY.	BRANCH.	LANGUAGES.	CHIEF LOCALITY.
FINNO-UGRIC.		See FINNO-UGRIC LANGUAGES.	
	East Turki *or* Uigurian.	Uigur, Jagatai, Uzbeg, Kara-Kalpak, Turkoman.	Central Asia, Northern Persia, Asiatic Turkey.

2. [*l. c.*] Of, pertaining to, or concerned with, the heavens, or the science of astronomy; astronomical.

u-ran'ic (ū-răn'ĭk), *a.* [Gr. *οὐρανός* heaven.] Of or pert. to the heavens; celestial; astronomical. *Carlyle.*

u-ran'ic, *a.* [From URANIUM.] *Chem.* Of, pert. to, or containing, uranium; specif., designating those compounds in which uranium has a valence higher than in *uranous* compounds.
uranic acid. **a** An acid of uranium, H_2UO_4, obtained as a yellow powder by boiling a solution of uranyl nitrate, $UO_2(NO_3)_2$, and by other methods. **b** By extension, any of various other acids corresponding to uranic oxide, UO_3, known only in their salts, as $H_2U_2O_7$, $H_2U_3O_{10}$, etc.

u-ran'i-nite (ū-răn'ĭ-nīt), *n. Min.* A mineral commonly occurring in black octahedrons with a hardness of 6.6 and a specific gravity as high as 9.7 when unaltered. It consists largely of uranium and is regarded as a uranate of uranyl, but it contains also thorium, the cerium and yttrium metals, and lead; further, it often yields when heated a gas consisting chiefly of helium. *Bröggerite, cleveite,* and *nivenite* are varieties. *Pitchblende* is regarded as a massive and altered form, of lower hardness and specific gravity. The recent discovery of radium in these minerals has given them great importance (see RADIUM).

u'ra-nite (ū'rȧ-nīt), *n.* [Cf. G. *uranit,* F. *uranite.*] *Min.* A general term for the uranium phosphates, autunite, of lime uranite, and torbernite, or copper uranite, formerly classed as a single species. The **uranite group** includes these and a few related minerals. — **u'ra-nit'ic** (-nĭt'ĭk), *a.*

u-ra'ni-um (ū-rā'nĭ-ŭm), *n.* [NL., fr. *Uranus* the planet. See URANUS.] *Chem.* An element of the chromium group, found in combination in pitchblende and certain other rare minerals, and reduced as a heavy, hard, nickel-white metal. Symbol, *U* or *Ur*; at. wt., 238.5. It was discovered by Klaproth in 1789. It has several valences, but the chief ones are four (uranous compounds) and six (as in the uranyl compounds). The metal is used to a small extent as a constituent of steel, and compounds of it are used in coloring porcelain and glass, in photography, etc. It is radioactive. It emits alpha rays and yields a product called **uranium X,** which emits beta and gamma rays. Radium is probably a product of this disintegration. See RADIUM.

u'ra-nog'ra-phy (ū'rȧ-nŏg'rȧ-fĭ), *n.* [Gr. *οὐρανογραφία*; *οὐρανός* heaven + *γράφειν* to write.] A description or chart of the heavens and the heavenly bodies; the construction of celestial maps, globes, etc.; uranology. — **u'ra-no-graph'ic** (-nō-grăf'ĭk), **u'ra-no-graph'i-cal** (-ĭ-kăl), *a.* — **u'ra-nog'ra-phist** (-nŏg'rȧ-fĭst), *n.*

u'ra-nol'o-gy (ū'rȧ-nŏl'ō-jĭ), *n.* [Gr. *οὐρανός* heaven + *-logy.*] A discourse or treatise on the heavens and the heavenly bodies; the study of the heavens; uranography.

u'ra-nom'e-try (-nŏm'ē-trĭ), *n.* [Gr. *οὐρανός* heaven + *-metry.*] *Astron.* **a** A chart or catalogue of fixed stars, esp. of stars visible to the naked eye. **b** The measurement of the heavens.

u'ra-no'so- (ū'rȧ-nō'sō-), *a. Chem.* Combining form for *uranous*; as in *uranoso*-uranic oxide.

u'ra-nous (ū'rȧ-nŭs), *a. Chem.* Pert. to or containing uranium; designating those compounds in which uranium has a lower valence as contrasted with the *uranic* compounds.

U'ra-nus (-nŭs), *n.* [L. *Uranus,* Gr. *Οὐρανός* Uranus, *οὐρανός* heaven, sky. Cf. URANIUM.] **1.** *Gr. Myth.* The personification of Heaven, son or husband of Gæa (Earth) and father of the Titans, the Hecatoncheires, the Cyclops, the giants, the Furies, etc. He hated his offspring and confined them in Tartarus, but, at the instigation of Gæa, his son Cronus attacked him and dethroned him.
2. *Astron.* One of the major planets, the most remote known (1909) except Neptune. It is nearly 1,800,000,000 miles from the sun, about 32,000 miles in diameter, and its period of revolution round the sun is about 84 of our years. See PLANET, 1. It is sometimes called *Herschel*, from Sir William Herschel, who discovered it in 1781, and named it *Georgium Sidus*, in honor of George III. Uranus has four satellites, *Ariel, Umbriel, Titania*, and *Oberon*, which move in a plane nearly perpendicular to the ecliptic. Symbol, ♅.

u'ra-nyl (ū'rȧ-nĭl), *n.* [*uranium* + *-yl.*] *Chem.* The bivalent radical UO_2, which behaves as an element in many uranium compounds.

ur'ban (ûr'băn), *a.* [L. *urbanus* belonging to the city or town, refined, polished, fr. *urbs, urbis*, a city: cf. F. *urbain.* Cf. URBANE.] **1.** Of or pertaining to a city or town; as, an *urban* population; *urban* customs; *urban* life.

Ur. *Abbr.* *Chem.* [no period, *l. c.*] Uranium.

U R. *Abbr.* Under the rule; — used on the tape of stock tickers.

U. R. *Abbr.* Uti rogas.

ur-. For various words in *ur-*, see forms in EUR-.

ura. + ARRACK.

uracan. + HURRICANE.

U'rai (ū'rĭ; ū'rā-ĭ). *D. Bib.*

u'ral (ū'rȧl), *or* **u-ra'li-um** (ū-rā'lĭ-ŭm), *n.* [Prob. fr. urethane + chloral.] *Pharm.* A bitter crystalline substance, a compound of chloral and urethane, used as a hypnotic.

u-ra'li (ōō-rā'lē), *n.* [See WOURALI.] See CURARE.

U-ra'lo-Al-ta'ic (ū-rā'lō-ăl-tā'ĭk), *a.* = URAL-ALTAIC.

u'ran (ū'răn), *n.* [Ar. *waran*, pl. *awrān.* Cf. VARAN.] A monitor lizard.

u'ra-nal'y-sis (ū'rȧ-năl'ĭ-sĭs), *n.* Chemical analysis of urine.

u'ra-nate (ū'rȧ-nāt), *n. Chem.* A salt of uranic acid.

U-ra'ni-an (ū-rā'nĭ-ăn), *n.* A hypothetical inhabitant of the planet Uranus.

U-ra'ni-cen'tric (ū-rā'nĭ-sĕn'trĭk), *a. Astron.* Referred to Uranus as a center.

U-ran'i-dæ (ū-răn'ĭ-dē), *n. pl.* [Gr. *Οὐρανίδαι.*] *Gr. Myth.* Descendants of Uranus.

u'ra-nif'er-ous (ū'rȧ-nĭf'ēr-ŭs), *a.* [*uranium* + *-ferous.*] Containing or yielding uranium.

u'ra-nin (ū'rȧ-nĭn), *n.* [From the yellowish green fluorescence (resembling that of *uranium* glass) of its solution.] See FLUORESCEIN.

u-ra'ni-on (ū-rā'nĭ-ŏn), *n.* [G., prob. fr. Gr. *οὐρανός* heaven.] *Music.* A key board instrument, invented by Buschmann in 1810, consisting of a series of pieces of wood, sounded by being pressed against a revolving wheel.

u'ra-nis'co-plas'ty (ū'rȧ-nĭs'kō-plăs'tĭ), *n.* [Gr. *οὐρανίσκος* top of a tent, palate (fr. *οὐρανός* sky) + *-plasty.*] *Surg.* Process of forming an artificial palate.

u'ra-nis-cor'a-phy, **u'ra-nis-cor'rha-phy** (-nĭs-kôr'rȧ-fĭ), *n.* [Gr. *οὐρανίσκος* the top of a tent, the palate (fr. *οὐρανός* sky) + *-rhaphy.*] *Surg.* Suture of the palate. See STAPHYLORAPHY.

u'ra-nism (ū'rȧ-nĭz'm), *n.* Uranogism.

uranium glass. A fluorescent yellow glass colored by adding uranium compounds. [RAYS.

uranium rays. = BECQUEREL

uranium yellow. A uranate of sodium used as a yellow pigment for painting on glass, etc., and in making uranium glass.

u'ra-no-cir'cite (ū'rȧ-nō-sûr'sīt), *n.* [G. *uranocircit*, fr. *uranit* uranite + Gr. *κίρκος* falcon (from *Falk*enstein in the Saxon Vogtland, where found).] *Min.* A hydrous barium uranyl phosphate in yellow-green crystals.

u-ran'o-lite (ū-răn'ō-līt), *n.* Also **u-ran'o-lith.** [Gr. *οὐρανός* heaven + *-lite.*] A meteorite or aërolite. *Rare.*

u'ra-no-met'ra (ū'rȧ-nō-mĕt'rȧ), *n.* [G. *uranospinit*, fr. *uran* uranium + Gr. *σπινος* siskin; — from its green color.] *Min.* A hydrous arsenate of calcium and uranium, in green tabular crystals.

u'ran-o-phane (ū-răn'ō-fān), *n.* [G. *uranophan*, fr. *uran* uranium + Gr. *φαίνειν* to show.] *Min.* A hydrous silicate of uranium and calcium, in yellow fibrous masses. Sp. gr., 3.81–3.90.

u'ra-no-pho-tog'ra-phy (ū'rȧ-nō-fō-tŏg'rȧ-fĭ), *n.* [Gr. *οὐρανός* sky + *photography.*] The photography of the heavens.

u'ra-no-plas'ty (ū'rȧ-nō-plăs'tĭ), *n.* [See URANISCOPLASTY.] *Surg.* The plastic operation for closing a fissure in the hard palate. — **u'ra-no-plas'tic,** *a.*

u'ra-nor'rha-phy (ū'rȧ-nôr'ȧ-fĭ), *n.* [Gr. *οὐρανός* palate + *-rhaphy.*] = STAPHYLORAPHY.

u'ra-nos'chi-sis (-nŏs'kĭ-sĭs), *n.* [NL.; Gr. *οὐρανός* palate + *σχίσις* cleavage.] *Med.* Fissure of the palate; cleft palate.

U'ra-no-scop'i-dæ (ū'rȧ-nō-skŏp'ĭ-dē), *n. pl.* [NL. See URANOSCOPY.] *Zoöl.* The family of fishes constituted by the stargazers. The type genus is *U'ra-nos'co-pus* (-nŏs'kō-pŭs).

u'ra-nos'co-py (-nŏs'kō-pĭ), *n.* [Gr. *οὐρανός* + *-scopy.*] Observation of the heavens or heavenly bodies.

u'ra-no-sphe'rite (-nō-sfē'rīt), *n.* [NL.; *urate* + *-osis.*] *Med.* Deposition of urates in the body tissues.

u'ra-nos'tis (-tĭs'ĭs), *n.* [NL.; *urate* + *-osis.*] *Med.* Deposition of urates in the body tissues.

u'ra-zine (ū'rȧ-zĭn; -zēn; 184), *n.* Also **-zin.** [G. *urazin*; *urin* urine + *hydrazin.*] *Org. Chem.* A crystalline, basic compound, $CO<\begin{matrix}NH-NH\\NH-NH\end{matrix}>CO$, of the triazine class, derivable (theoretically) from two molecules of urea.

u'ra-zole (-zōl), *n.* [G. *urazol*; for *uro-* + hydrazin + *-ol.*] *Org. Chem.* A crystalline acid compound, $C_2H_3O_2N_3$, of the triazole class, got by heating urea with hydrazine sulphate and in other ways; also, a derivative of it.

ur'ban, *n.* A dweller in a city or town. *Rare.*

Ur'ban (ûr'băn), *n.* [L. *Urbanus.* See URBANE.] Lit., of the town; courteous; — masc. propname. L. *Urbanus* (ûr-bā'nŭs); F. *Urbain* (ür'bĕN'); It. *Urbano* (ōōr-bä'nō); Sp. *Urbanus* (ōōr-bä'nōōs), *Urban* (ōōr'bän).

Ur'ban, Syl-va'nus, Gent. (sĭl-vā'nŭs ûr'băn). [See SYLVAN; URBAN.] The fictitious name under which the Gentleman's Magazine is edited, intended to indicate that it is concerned with town and country affairs.

Ur'bane (ûr'bān), *n. Bib.* Var. of ERBANE.

ur-bane'ly, *adv.* of URBANE.

ur-bane'ness, *n.* See -NESS.

ur-ban'i-cal (ûr-băn'ĭ-kăl), *a.* Urbane. *Obs.*

ur'ban-ize (ûr'băn-īz), *v. t.*; -IZED (-īzd); -IZING (-īz'ĭng). **1.** To render urban; to cause to have the characteristics of a city; as, electric railways *urbanize* rural districts. **2.** To render urbane; to refine; polish. *Howells.* — **ur'ban-i-za'tion** (-ĭ-zā'shŭn; -ĭ-zā'shŭn), *n.*

ur-bic'o-lous (ûr-bĭk'ō-lŭs), *a.* [L. *urbs, urbis*, city + E. *-colous.*] Dwelling in a city or cities; urban. *Rare.*

ur'ce-o-late (ûr'sē-ō-lāt), *a.* [L. *urceolus*, dim. of *urceus* a pitcher or waterpot.] Urn-shaped; gibbous below and contracted at the orifice.

ur'ce-ole (ûr'sē-ōl), *n.* [L. *urceolus* a little pitcher.] *E. C. Ch.* A vessel for water for washing the hands; also, one to hold wine or water; a cruet.

Urceolate Corolls of Vaccinium.

Ur'ce-o-li'na (-ō-lī'nă), *n.* [NL., fr. a genus *Urceola*, fr. L. *urceolus* (see URCEOLE); — from the shape of the flowers.] *Bot.* A genus of South American ornamental amaryllidaceous plants, cultivated under the name *urnflower*, having urceolate flowers, usually yellow and green, and broad leaves produced from a bulb.

ur'chin (ûr'chĭn), *n.* [ME. *urchon, irchon*, hedgehog, OF. *irechon*, var. of *ireçon, heriçon*, F. *hérisson*, deriv. of L. *ericius*, fr. *er* a hedgehog, for *her*; akin to Gr. *χήρ*, and prob. to E. *horrid.* Cf. HERISSON, HORRID.] **1.** A hedgehog. **2.** A sea urchin. **3.** A mischievous elf supposed sometimes to take the form of a hedgehog. "*Urchins*, ouphes, and fairies." *Shak.* **4.** A pert or roguish child, now usually a boy.

You did indeed dissemble, you *urchin*, you; but where's the girl that won't dissemble for an husband? *Goldsmith.*

5. Either of a certain two of the small card cylinders around the large drum of a carding engine.

ur'chin, *a.* **1.** Elfish; mischief-making. *Rare. Milton.* **2.** Trifling. *Obs.*

-ure. [F. *-ure*, L. *-ura.*] A suffix denoting: **a** *Act, process*, or *being*; as in censure, culture, exposure. **b** *Result* (of an act), *state, rank*, etc., as in picture, prefecture, signature.

ur're-a (ū'rē-ă), *n.* [NL. See URINE.] *Physiol. Chem.* **a** A very soluble, crystalline, nitrogenous substance, $CO(NH_2)_2$, the chief solid constituent of the urine of man and other mammals; — called also *carbamide*. It is also present in the urine of other animals and in small quantity in blood, serous fluids, lymph, the liver, etc. It can be made by various methods, as by the transformation of ammonium cyanate on heating, first performed by Wöhler in 1828. It unites with acids, bases, and salts to form crystalline compounds, as urea nitrate. By hydrolysis it yields ammonium carbonate. Urea is the main product of the katabolism of protein matter in the body, and about 35 grams of it is excreted daily by a man of average weight. **b** Hence, any of various derivatives of the above compound; as, alkylized *ureas.*

ur're-al (ū'rē-ăl), *a.* Of or pertaining to urea; containing, or consisting of, urea; as, *ureal* deposits.

ur're-am'e-ter (ū'rē-ăm'ē-tẽr), *n.* [*urea* + *-meter.*] *Physiol. Chem.* An apparatus for determining the amount of urea in urine, in which the nitrogen evolved by the action of certain reagents on a given volume of urine is measured, and the urea calculated. —**ur're-am'e-try** (-trĭ), *n.*

ur're-ase (ū'rē-ās; -āz), *n.* [*urea* + *-ase.*] *Chem.* An enzyme by the agency of which urea is hydrolyzed and converted into ammonium carbonate. It is present in the alkaline fermentation of urine and is produced by many bacteria, esp. *Bacterium ureæ* and *Micrococcus ureæ.*

U-red'i-na'les (ū-rĕd'ĭ-nā'lēz), *n. pl.* [NL. See UREDO.] *Bot.* An order of parasitic basidiomycetous fungi known as rusts, or rust fungi, from the rustlike spots or pustules they produce on various leaves and stems. Many are heteræcious, developing two or more spore stages, each on a different host. The order includes four families, of which the Pucciniaceæ is most important. See ÆCIUM, PYCNIUM, TELIUM, UREDINIUM; also CHLAMYDOSPORE.

u're-din'i-um (ū'rē-dĭn'ĭ-ŭm), *n.*; *pl.* **-IA** (-ĭ-ă). [NL., fr. L. *uredo* blight.] *Bot.* The sorus of the second spore stage in the life cycle of many rust fungi. It bears uredospores.

u'red'i-nous (ū-rĕd'ĭ-nŭs), *a.* **1.** *Bot.* Of the nature of a uredo; belonging to the *Uredinales.* **2.** *Med.* Affected with, or of the nature of, uredo.

u-re'do (ū-rē'dō), *n.* [L., a blast, blight, a burning itch, fr. *urere* to burn, to scorch.] **1.** *Bot.* One of the stages in the life history of many rust fungi (Uredinales), regarded at one time as a distinct genus. It is a summer stage preceding the teliostage (which see). **2.** *Med.* Nettle rash. See URTICARIA.

u-re'do-spore (-dō-spōr), *n.* *Bot.* One of the thin-walled summer spores developed by the uredinia of a rust fungus. They produce a vegetative mycelium immediately on germination. In some rust fungi the æciospores (which see) function as uredospores. Cf. TELIOSPORE.

a, a Uredospores; *b* Teliospore.

— **u-re'do-spor'ic** (ū-rē'dō-spōr'ĭk), *a.*

u're-ide (ū'rē-īd; -ĭd; 184), *n.* Also **-id.** *Chem.* Any of various compounds derived from urea and an acid or aldehyde by eliminating water. Those from one molecule of urea, as alloxan, are *monureides;* those derived from two, as uric acid, *diureides.*

U-re'na (ū-rē'nă), *n.* [NL., fr. Malayalam *uren*, name of one species.] *Bot.* A small genus of tropical malvaceous herbs or shrubs having small yellow flowers with five connate bracts, and fruit with hooked bristles. They yield a medicinal mucilaginous juice, and a useful fiber.

u-ret (ū-rĕt). [For earlier *-ure* (after Latinized forms in *-uretum*), fr. F. *-ure*, in *sulfure* (fr. L. *sulphur*), *phosphure, carbure*, used to express compounds with metals.] A suffix with the same meaning as *-ide.* See -IDE. *Obsoles.*

u-re'ter (ū-rē'tẽr), *n.* [NL., fr. Gr. *οὐρητήρ.* See URINE.] *Anat. & Zoöl.* The duct which carries away the urine from a kidney to the bladder or cloaca. In man each ureter is a membranous epithelium-lined tube of the diameter of a goose quill, and about sixteen inches long, which opens above into the pelvis of the kidney and below into the back part of the bladder at a very oblique angle. In mammals except monotremes the ureters open into the bladder; in other vertebrates, into the cloaca (in fishes often after uniting and forming an expansion which serves as a bladder). In the lower vertebrates the ureters are mesonephric, not metanephric ducts, and often serve also as sperm ducts in the male. — **u're-ter'ic** (ū'rē-tĕr'ĭk), *a.*

u-re'ter-i'tis (ū-rē'tẽr-ī'tĭs), *n.* [NL. See URETER; -ITIS.] *Med.* Inflammation of the ureter.

u-re'ter-o- (ū-rē'tẽr-ō-), **ureter-.** Combining form from Greek *οὐρητήρ*, ureter.

u-reth'ane (ū-rĕth'ān), *n.* [F. *uréthane.* See UREA; ETHER.] *Org. Chem.* Ethyl carbamate, $NH_2COOC_2H_5$, a white crystalline substance produced by the action of ammonia on ethyl carbonate or by heating urea nitrate and ethyl alcohol. It is used as a hypnotic, antipyretic, and antispasmodic. Hence, any ester of carbamic acid.

u-re'thra (ū-rē'thrȧ), *n.* [L., fr. Gr. *οὐρήθρα.* See URINE.] The canal which in most mammals carries off the urine from the bladder and in the male serves also as a genital duct. In *Human Anat.*, in the male, it is considered as divided into three portions, called the *prostatic* where it passes through the prostate gland; the *membranous*, a short section of narrow diameter; and the *spongy*, in which it lies in the corpus spongiosum. The posterior part of the spongy portion within the bulb of the corpus spongiosum, is called the *bulb* or *bulbous portion.* In the female the urethra is very short and not divisible into corresponding portions. — **u-re'thral** (-thrăl), *a.*

urethral fever, *Med.*, fever consequent upon operations on the urethra.

u-re-thri'tis (ū'rē-thrī'tĭs), *n.* [NL. See URETHRA; -ITIS.] Inflammation of the urethra. — **u're-thrit'ic** (-thrĭt'ĭk), *a.*

u-re'thro- (ū-rē'thrō-), **urethr-.** Combining form from Greek *οὐρήθρα, urethra.*

u-re'thro-plas'ty (ū-rē'thrō-plăs'tĭ), *n.* [*urethro-* + *-plasty.*] *Surg.* An operation for the repair of an injury or a defect in the walls of the urethra. —**u-re'thro-plas'tic** (-plăs'tĭk), *a.*

u-re'thro-scope (-skōp), *n.* [*urethro-* + *-scope.*] *Med.* An instrument for viewing the interior of the urethra.

u're-thros'co-py (ū'rē-thrŏs'kŏ-pĭ), *n. Med.* Examination of the urethra by means of the urethroscope. — **u-re'thro-scop'ic** (ū-rē'thrō-skŏp'ĭk), *a.*

u're-throt'o-my (ū'rē-thrŏt'ō-mĭ), *n.* [*urethro-* + *-tomy.*] *Surg.* Any incision of the urethra, esp. for relief of stricture. — **u-re'thro-tom'ic** (ū-rē'thrō-tŏm'ĭk), *a.*

u-ret'ic (ū-rĕt'ĭk), *a.* [L. *ureticus*, Gr. *οὐρητικός.* See URINE.] *Med.* Of or pertaining to the urine; diuretic; urinary; as, *uretic* medicine.

urge (ûrj), *v. t.*; URGED (ûrjd); URG'ING (ûr'jĭng). [L. *urgere*; akin to E. *wreak.* See WREAK, *v. t.*] **1.** To force onward; to press; push; drive; impel.

Through the thick deserts headlong *urged* his flight. *Pope.*

2. To press hard upon; to follow closely. *Pope.*

3. To press the mind or will of; to ply with motives, arguments, persuasion, or importunity; as, to *urge* one to go or stay; to *urge* one to consent.

My brother never
Did *urge* me in his act; I did inquire it. *Shak.*

4. To present in an earnest or pressing manner; to press upon attention; to insist upon; as, to *urge* an argument; to *urge* a petition; to *urge* the necessity of a case.

5. To provoke; to exasperate. *Obs. or Dial. Eng.*

Urge not my father's anger. *Shak.*

6. To ply hard; to treat forcibly; to take severe or violent measures with; as, to *urge* an ore with intense heat.

Syn. — Animate, incite, impel, instigate, stimulate.

urge (ûrj), *v. i.* **1.** To press on or forward. *Obs. or R.*

2. To declare, advance, or press earnestly a statement, argument, charge, or the like. *Shak.*

ur'gen-cy (ûr'jĕn-sĭ), *n.* [Cf. F. *urgence.* See URGENT.] Quality or state of being urgent; insistence; pressure as of necessity; as, the *urgency* of a petitioner, or of a need.

ur'gent (ûr'jĕnt), *a.* [F., fr. L. *urgens*, p. pr. of *urgere.* See URGE.] Urging; pressing; plying with importunity; calling for immediate attention; instantly important; as, an *urgent* appeal. "The *urgent* hour." *Shak.*

Ur-gin'e-a (ûr-jĭn'ē-ă), *n.* [NL., fr. name of an Arab tribe, *Ben Urgin*, in Algeria, near Bona, where it was first found.] *Bot.* A genus of liliaceous plants related to *Scilla*, but with a deciduous perianth and 3-angled capsule. They are natives of the Old World, esp. of the Mediterranean region. *U. maritima* is the squill of medicine. See SQUILL, 1.

u-ri'a (ū-rī'ă). [NL., fr. Gr. *-ουρία* (as in *δυσουρία* dysuria), fr. *οὖρον* urine.] A combining form used, chiefly in medicine, to signify *urine*, esp. implying an abnormal or diseased condition, as in *dysuria*, *polyuria*, *pyuria*, etc.

U-ri'ah (ū-rī'ȧ), *n.* [Heb. *Ûriyâh.*] **1.** Lit., light of Jehovah; — masc. prop. name.

2. *Bib.* A Hittite captain in the army of Israel who was at David's orders so exposed in battle as to be killed in order to give David Uriah's wife, Bath-sheba.

u'ric (ū'rĭk), *a.* [Gr. *οὖρον* urine: cf. F. *urique.* See URINE.] Of or pertaining to urine; obtained from urine.

uric acid, *Chem.*, a white, odorless and tasteless, nearly insoluble dibasic acid, $C_5H_4O_3N_4$, present in small quantity in the urine of man and most mammals and abundantly (in the form of urates) in the urine of birds, reptiles, and invertebrates, constituting their chief nitrogenous excretion. Traces of it are also found in the various organs of the body, and it is a common constituent, as it also is free acid or as a urate, of urinary or renal calculi and of the so-called gouty concretions. From acid urine, uric acid is frequently deposited, on standing in a cool place, in the form of a reddish yellow sediment, nearly always crystalline. Chemically, uric acid is 2, 6, 8-trioxypurine. See PURINE. On heating it decomposes into urea, ammonia, carbon dioxide, etc. It can be prepared artificially in several ways. — **u.-acid diathesis,** *Med.*, morbid condition due to an excess of uric acid or urates in the blood.

U'ri-el (ū'rĭ-ĕl), *n.* [Heb. *Ûrîʾēl.*] **1.** Lit., flame of God, or God is a light; — masc. prop. name.

2. In Oriental angelology, one of the archangels. In the second book of Esdras he is represented as sent by God to answer the questions of Esdras. Milton makes him "regent of the sun," and calls him "the sharpest-sighted spirit of all in heaven."

U'rim (ū'rĭm), *n. pl.* [Heb. *ûrîm*; cf. Babylonian *urîm* command, order, decision.] Certain objects mentioned in the Old Testament (*Ex.* xxviii. 30; 1 *Sam.* xxviii. 6; *Deut.* xxxiii. 8; *Ezra* ii. 63, etc.), usually in connection with the *Thummim*, as being used as mediums for the revelation of the will of God to his people or as being placed in the breastplate by the high priest on certain occasions. The nature of the Urim and Thummim and their original use are conjectural; and their use is not mentioned in the historical narratives after David's time. Perhaps the more widely accepted view is that they were originally forms of lots used for obtaining oracular answers, which were in later times preserved as symbolizing the divine guidance of Israel through the priests.

u'ri-nal (ū'rĭ-năl), *n.* [ME. *urinal(e)*, *orynal*, F. *urinal*, OF. also *orinal*, LL. *urinale*, prop. neut. of L. *urinalis*, a., fr. *urina* urine.] **1.** A vessel for holding urine; esp., a bottle or tube for holding urine for inspection.

2. A place or convenience for urinating purposes.

u'ri-na'ri-um (ū'rĭ-nā'rĭ-ŭm; 115), *n.* [LL. *urinarium.*] *Agric.* A reservoir for urine, etc., for manure.

u'ri-na-ry (ū'rĭ-nă-rĭ), *a.* [L. *urina* urine: cf. F. *urinaire.*] Pertaining to urine; pertaining to or designating the organs for the excretion and removal of urine.

urinary bladder, a distensible membranous sac forming part of the system of urinary organs of many vertebrates and serving for the temporary retention of the urine. In man it is situated in the pelvis in front of the rectum, and receives the urine from the two ureters, discharging it at intervals into the urethra through an orifice closed by a sphincter. It is lined with transitional hypoblastic epithelium, and develops from the proximal part of the allantois of the embryo. In the lowest mammals, and in birds, reptiles, and amphibians, the ureters and the bladder open separately into the cloaca. In fishes, if present, it is not homologous with that of the higher vertebrates, but is a dilatation of a ureter or of the united ureters. — **u. calculus,**

Ur-ba'nus (ûr-bā'nŭs). *D. Bib.* [ur'bem la'te-ri'ci-am in-ve'nit, mar-mo're-am re-li'quit (lăt'ē-rish'ĭ-ăm). He found the city (Rome) brick, he left it marble; — said of Augustus Cæsar. Altered from *Suetonius* (II. 29).

ur'bi-ca'ri-an (ûr'bĭ-kā'rĭ-ăn), *a.* [L. *urbicarius.*] Pertaining to a city. *Obs.*

Ur-bic'o-læ (ûr-bĭk'ō-lē), *n. pl.* [NL. See URBICOLOUS.] *Zoöl.* Syn. of HESPERIIDÆ.

‖ **ur'bi et or'bi.** [L.] To the city and the world; — used esp. in publishing papal bulls.

‖ **ur'bis et or'bis.** [L.] Of the city and the world.

ur'ce-o-lar (ûr'sē-ō-lär), *a.* Urceolate.

ur-ce'o-lus (ûr-sē'ō-lŭs), *n.*; *pl.* **-LI** (-lī). [L., a little pitcher.] **a** *Bot.* An urn-shaped organ. **b** *Zoöl.* The external tube of certain rotifers.

urchin fish. A porcupine fish.

ur'chon. Obs. or dial. Eng. var. of URCHIN. [See NORN.]

Urd (ûrd), *n.* Var. of URTH.

ur'dé, ur'dée (ûr'dā; -dē), *a. Her.* **a** = CLECHÉ. **b** Designating a line made up of two series of shortequidistant parallellines alternating and joined together by oblique crossing lines, forming a sort of dove-tail figure.

Ur'dhr (ōōr'thr'r). Var. of URTH.

Ur'du (ōōr'dōō), *n.* [Hind. *urdū* camp, *urdū-zabān* the language of the camp.] See HINDUSTANI, *n.*

ur'dy (ûr'dĭ), *a. Her.* Var. of URDÉ. [OUR.

ure. + EURE, EWER, HOUR, ORE,

ure (ūr), *n.* [Cf. F. *ure.* See URUS.] The urus. *Obs. or R.*

ure, *n. Obs. Scot.* a Haze. **b** Sweat.

ure (ūr), *n.* [Cf. Icel. *aurr* wet clay or loam.] Soil; esp., barren soil; clay. *Scot.*

ure (ūr), *n.* [ME. *ure*, OF. *oevre, uevre, euvre*, work, F. *œuvre*, L. *opera.* See OPERA, OPERATE; cf. MANURE, MANUVER.] Use; custom; practice; exercise. *Obs.*

ure, *v. t.* [Cf. OF. *ovrer, ouvrer*, to work. See URE, *n.*] To exercise; inure; to accustom by practice. *Obs.*

ure, *v. i.* To be accustomed. *Obs.*

urea ferment. = UREASE

u're-chi'tin (ū'rē-kĭ'tĭn), *n.*, **u're-chi'tox'in** (-kĭ-tŏk'sĭn), *n. Chem.* Two white, crystalline, poisonous glucoides extracted from the leaves of the apocynaceous genus *Urechites subereeta.*

U're-din'e-æ (ū'rē-dĭn'ē-ē), *n. pl.* [NL.] *Bot.* Syn. of UREDINALES. — **u're-din'e** (ū'rē-dĭn), *a.*

u're-din'e-ous (-dĭn'ē-ŭs), *a. Bot.* Of the Uredinales.

u-red'i-noid (ū-rĕd'ĭ-noid), *a.* [See UREDO; -OID.] *Bot.* Resembling the Uredinales.

u-re'do-go-nid'i-um (ū-rē'dō-gō-nĭd'ĭ-ŭm), *n.* A uredospore.

u-re'do-so'rus, *n.* [See UREDO; SORUS.] *Bot.* A uredinium.

u-re'do-spo-rif'er-ous (-spō-rĭf'ẽr-ŭs), *a.* Bearing uredospores.

u-re'do-stage, u-re'do-form, *n.* [*uredo* + *stage, -form.*] = UREDO, 1.

ureison. + ORISON.

u're-mi-a (ū-rē'mĭ-ă), **u-re'mic** (-mĭk). Vars. of URÆMIA, URÆMIC.

urent, *a.* [L. *urens*, p. pr.] Burning; parching. *Obs.*

u're-om'e-ter (ū'rē-ŏm'ē-tẽr). Vars. of UREAMETER, UREAMETRY.

ures. + OURS.

u're-sis (ū-rē'sĭs), *n.* [NL., fr. Gr. *οὐρησις*, fr. *οὐρεῖν* to urinate.] *Physiol.* Urination.

uresun. + ORISON.

u-re'tal (ū-rē'tăl), **u-re'ter-al** (-tẽr-ăl), *a. Anat.* Ureteric.

u-re'ter-al'gi-a (-ăl'jĭ-ă), *n.* [NL. See URETERO-; -ALGIA.] *Med.* Pain in the ureter.

u-re'ter-ec'to-my (-ĕk'tō-mĭ), *n.* [*ureter* + *-ectomy.*] *Surg.* Excision of a ureter.

u-re'ter-o-lith' (*n.* [*uretero-* + *-lith.*] *Med.* A concretion formed in the ureter. — **u-re'ter-o-lith'ic,** *a.*

u-re'ter-o-li-thot'o-my, *n.* [*uretero-* + *lithotomy.*] *Surg.* The operation of removing a calculus from the ureter.

u-re'ter-o-py-o'sis, *n.* [NL.; *uretero-* + *pyosis.*] *Med.* Purulent inflammation of the ureter.

u-re'ter-or-rha'gi-a (ū-rē'tẽr-ō-rā'jĭ-ă), *n.* [NL.; *uretero-* + *-rhagia.*] *Med.* Hemorrhage from the ureter.

u-re'ter-or'rha-phy (-ôr'ă-fĭ), *n.* [*uretero-* + *-rhaphy.*] *Surg.* Suture of the ureter

u-re'ter-o-ste-no'ma (-ō-stē-nō'mă), *n.* [NL.; *uretero-* + Gr. *στένωμα* a narrow place.] *Med.* Stricture of the ureter

u-re'ter-os'to-my (-ŏs'tō-mĭ), *n.* [*uretero-* + *-stomy.*] *Surg.* Operation of forming a permanent artificial opening into the ureter.

u-re'ter-ot'o-my (-ŏt'ō-mĭ), *n.* [*uretero-* + *-tomy.*] The operation of cutting into the ureter.

u-re'ter-o-u'ter-ine. *a.*, **u-re'ter-o-vag'i-nal,** *a.* See URETERO-urethr-. See URETHRO-.

u-re-thral'gi-a (ū-rē'thrăl'jĭ-ă), *n.* [NL.; *urethro-* + *-algia.*] *Med.* Pain in the urethra.

u-re'thrism (ū-rē'thrĭz'm), *n. Med.* Irritability of the urethra.

u-re'thro-cele (-thrō-sēl), *n.* [*urethro-* + *-cele.*] *Med.* A pouchlike protrusion of urethral mucous membrane in the female.

u-re'thro-cys-ti'tis, *n.* [NL.; *urethro-* + *cystitis.*] *Med.* Inflammation of that part of the mucous membrane of the bladder which surrounds the internal urethral orifice, occurring as a result of urethritis.

u-re-throm'e-ter (ū'rē-thrŏm'ē-tẽr). *n. urethro-* + *-meter.*] *Med.* An instrument for measuring the caliber of the urethral canal.

u-re'thro-pe'nile, *a.*, **u-re'thro-per'i-ne'al,** *a.*, **u-re'thro-rec'tal,** *a.* See URETHRO-.

u-re'thror-rha'gi-a (ū-rē'thrō-rā'jĭ-ă), *n.* [NL.; *urethro-* + *-rhagia.*] *Med.* Hemorrhage from the urethra.

u-re'thror'rha-phy (ū-rē'thrôr'ă-fĭ), *n.* [*urethro-* + *-rhaphy.*] *Surg.* Suture of the urethra.

u-re'thro-spasm (ū-rē'thrō-spăz'm), *n. Med.* Spasmodic contraction of the muscular fibers of the urethra.

u-re'thro-ste-no'sis. *n.* [NL.; *urethro-* + *stenosis.*] *Med.* Stricture or narrowing of the urethra.

u-re'thro-tome, *n.* [*urethro-* + *-tome.*] An instrument for cutting a urethral stricture.

u-re'thro-vag'i-nal, *a.*, **u-re'thro-ves'i-cal,** *a.* See URETHRO-.

Urge not my father's anger. *Shak.*

6. To ply hard; to treat forcibly; to take severe or violent measures with; as, to *urge* an ore with intense heat.

Syn. — Animate, incite, impel, instigate, stimulate.

urge (ûrj), *v. t.* **1.** To press on or forward. *Obs. or R.*

2. To declare, advance, or press earnestly a statement, argument, charge, or the like. *Shak.*

ur'gen-cy (ûr'jĕn-sĭ), *n.* [Cf. F. *urgence.* See URGENT.] Quality or state of being urgent; insistence; pressure as of necessity; as, the *urgency* of a petitioner, or of a need.

ur'gent (ûr'jĕnt), *a.* [F., fr. L. *urgens*, p. pr. of *urgere.* See URGE.] Urging; pressing; plying with importunity; calling for immediate attention; instantly important; as, an *urgent* appeal. "The *urgent* hour." *Shak.*

Ur-gin'e-a (ûr-jĭn'ē-ă), *n.* [NL., fr. name of an Arab tribe, *Ben Urgin*, in Algeria, near Bona, where it was first found.] *Bot.* A genus of liliaceous plants related to *Scilla*, but with a deciduous perianth and 3-angled capsule. They are natives of the Old World, esp. of the Mediterranean region. *U. maritima* is the squill of medicine. See SQUILL, 1.

u-ri'a (ū-rī'ă). [NL., fr. Gr. *-ουρία* (as in *δυσουρία* dysuria), fr. *οὖρον* urine.] A combining form used, chiefly in medicine, to signify *urine*, esp. implying an abnormal or diseased condition, as in *dysuria*, *polyuria*, *pyuria*, etc.

U-ri'ah (ū-rī'ȧ), *n.* [Heb. *Ûriyâh.*] **1.** Lit., light of Jehovah; — masc. prop. name.

2. *Bib.* A Hittite captain in the army of Israel who was at David's orders so exposed in battle as to be killed in order to give David Uriah's wife, Bath-sheba.

u'ric (ū'rĭk), *a.* [Gr. *οὖρον* urine: cf. F. *urique.* See URINE.] Of or pertaining to urine; obtained from urine.

uric acid, *Chem.*, a white, odorless and tasteless, nearly insoluble dibasic acid, $C_5H_4O_3N_4$, present in small quantity in the urine of man and most mammals and abundantly (in the form of urates) in the urine of birds, reptiles, and invertebrates, constituting their chief nitrogenous excretion. Traces of it are also found in the various organs of the body, and it is a common constituent, as it also is free acid or as a urate, of urinary or renal calculi and of the so-called gouty concretions. From acid urine, uric acid is frequently deposited, on standing in a cool place, in the form of a reddish yellow sediment, nearly always crystalline. Chemically, uric acid is 2, 6, 8-trioxypurine. See PURINE. On heating it decomposes into urea, ammonia, carbon dioxide, etc. It can be prepared artificially in several ways. — **u.-acid diathesis,** *Med.*, morbid condition due to an excess of uric acid or urates in the blood.

U'ri-el (ū'rĭ-ĕl), *n.* [Heb. *Ûrîʾēl.*] **1.** Lit., flame of God, or God is a light; — masc. prop. name.

2. In Oriental angelology, one of the archangels. In the second book of Esdras he is represented as sent by God to answer the questions of Esdras. Milton makes him "regent of the sun," and calls him "the sharpest-sighted spirit of all in heaven."

U'rim (ū'rĭm), *n. pl.* [Heb. *ûrîm*; cf. Babylonian *urîm* command, order, decision.] Certain objects mentioned in the Old Testament (*Ex.* xxviii. 30; 1 *Sam.* xxviii. 6; *Deut.* xxxiii. 8; *Ezra* ii. 63, etc.), usually in connection with the *Thummim*, as being used as mediums for the revelation of the will of God to his people or as being placed in the breastplate by the high priest on certain occasions. The nature of the Urim and Thummim and their original use are conjectural; and their use is not mentioned in the historical narratives after David's time. Perhaps the more widely accepted view is that they were originally forms of lots used for obtaining oracular answers, which were in later times preserved as symbolizing the divine guidance of Israel through the priests.

u'ri-nal (ū'rĭ-năl), *n.* [ME. *urinal(e)*, *orynal*, F. *urinal*, OF. also *orinal*, LL. *urinale*, prop. neut. of L. *urinalis*, a., fr. *urina* urine.] **1.** A vessel for holding urine; esp., a bottle or tube for holding urine for inspection.

2. A place or convenience for urinating purposes.

u'ri-na'ri-um (ū'rĭ-nā'rĭ-ŭm; 115), *n.* [LL. *urinarium.*] *Agric.* A reservoir for urine, etc., for manure.

u'ri-na-ry (ū'rĭ-nă-rĭ), *a.* [L. *urina* urine: cf. F. *urinaire.*] Pertaining to urine; pertaining to or designating the organs for the excretion and removal of urine.

urinary bladder, a distensible membranous sac forming part of the system of urinary organs of many vertebrates and serving for the temporary retention of the urine. In man it is situated in the pelvis in front of the rectum, and receives the urine from the two ureters, discharging it at intervals into the urethra through an orifice closed by a sphincter. It is lined with transitional hypoblastic epithelium, and develops from the proximal part of the allantois of the embryo. In the lowest mammals, and in birds, reptiles, and amphibians, the ureters and the bladder open separately into the cloaca. In fishes, if present, it is not homologous with that of the higher vertebrates, but is a dilatation of a ureter or of the united ureters. — **u. calculus,**

u're-chi'tin (ū'rē-kĭ'tĭn), *n.*, **u're-chi'tox'in** (-kĭ-tŏk'sĭn), *n. Chem.* Two white, crystalline, poisonous glucoides extracted from the leaves of the apocynaceous genus *Urechites subereeta.*

U're-din'e-æ (ū'rē-dĭn'ē-ē), *n. pl.* [NL.] *Bot.* Syn. of UREDINALES. — **u're-din'e** (ū'rē-dĭn), *a.*

u're-din'e-ous (-dĭn'ē-ŭs), *a. Bot.* Of the Uredinales.

u-red'i-noid (ū-rĕd'ĭ-noid), *a.* [See UREDO; -OID.] *Bot.* Resembling the Uredinales.

u-re'do-go-nid'i-um (ū-rē'dō-gō-nĭd'ĭ-ŭm), *n.* A uredospore.

u-re'do-so'rus, *n.* [See UREDO; SORUS.] *Bot.* A uredinium.

u-re'do-spo-rif'er-ous (-spō-rĭf'ẽr-ŭs), *a.* Bearing uredospores.

U'ri (ū'rĭ). *Bib.*

u-ri'a (ū-rī'ă). *D. Bib.*

Uriah Heep. See HEEP, URIAH.

u'ri-al (ū'rĭ-ăl). Var. of OORIAL.

U'ri-an (ū'rĭ-ăn), *n.* Masc. prop. name.

U'ri-an. Sir (ū'rĭ-ăn; ōō'rē-ăn). [G. *Urian.*] A designation formerly applied to one who was unknown or to one whose name it was thought improper to mention, and hence sometimes to the Devil. [URIAH.

U-ri'as (ū-rī'ăs). *Bib.* Var. of

u'ric-ac'i-dæ'mi-a, or **-de'mi-a** (ū'rĭk-ăs'ĭ-dē'mĭ-ă), *n.* [NL.; *uric acid* + *-æmia.*] A morbid condition due to accumulation of uric acid in the blood.

u'ri-dro'sis (ū'rĭ-drō'sĭs), *n.* [NL.; Gr. *οὖρον* urine + *ἱδρώς* to sweat.] *Med.* A morbid state in which constituents of the urine are excreted in the sweat.

U-ri'jah (ū-rī'jȧ). *Bib.*

urin-. See URINO-.

u'ri-na'æmi-a (ū'rĭ-nē'mĭ-ă), *n. Med.* = URÆMIA.

u'ri-nal-ist, *n.* One who diagnoses diseases from inspection of urine.

u'ri-nal'y-sis (ū'rĭ-năl'ĭ-sĭs), *n.* [NL. See URINO-; ANALYSIS.] *Med.* Analysis of the urine.

u'ri-nant (ū'rĭ-nănt), *a.* [L. *urinans*, p. pr. of *urinari* to plunge under water, to dive.] *Her.* Depicted palewise with the head in base; — said of a fish. Cf. HAURIENT.

Med., a concretion composed of some one or more crystalline constituents of the urine, liable to be found in any portion of the urinary passages or in the pelvis of the kidney. — **urinary pigments**, *Physiol. Chem.*, certain colored substances, *urochrome*, or *urobilin*, *uroerythrin*, etc., present in the urine together with *indican*, a colorless substance which by oxidation is convertible into colored bodies.

u'ri-na-ry (ū'rĭ-nā-rĭ), *n.*; *pl.* **-RIES** (-rĭz). A urinarium; also, a urinal.

u'ri-nate (ū'rĭ-nāt), *v. i.*; **-NAT'ED** (-nāt'ĕd); **-NAT'ING** (-nāt'ĭng). [LL. *urinare.*] To discharge urine; to make water. — **u'ri-na'tion** (-nā'shŭn), *n.*

u'rine (ū'rĭn), *n.* [ME. *urine*, F. *urine*, L. *urina*; akin to *urinari* to plunge under water, to dive, Gr. *οὖρον* urine; cf. Skr. *vār* water, Icel. *ūr* drizzling rain, AS. *wær* the sea; perh. ultimately akin to E. *wet.*] *Physiol.* In mammals, a fluid excretion from the kidneys; in birds and reptiles, a solid or semisolid excretion. In man, the urine is a clear, transparent fluid of an amber color and peculiar odor, with an average density of 1.02. The average amount excreted in 24 hours is from 40 to 60 ounces (about 1,200 cubic centimeters). Chemically, the urine is mainly an aqueous solution of urea, salt (sodium chloride), and uric acid, together with some hippuric acid and peculiar pigments. It usually has an acid reaction, owing to the presence of acid phosphates of soda or free uric acid. Normally, it contains about 960 parts of water to 40 parts of solid matter, and the daily average excretion is 35 grams (540 grains) of urea, 0.75 gram (11 grains) of uric acid, and 16.5 grams (260 grains) of salt. Abnormally, it may contain sugar as in diabetes, albumen as in Bright's disease, bile pigments as in jaundice, blood in diseases or injuries of the kidneys or urinary passages, or abnormal quantities of some one or more of the normal constituents.

u'ri-nif'er-ous (ū'rĭ-nĭf'ẽr-ŭs), *a.* [*urine* + *-ferous.*] Bearing or conveying urine; as, *uriniferous* tubules.

u'ri-nip'a-rous (-nĭp'ă-rŭs), *a.* [*urine* + *-parous:* cf. F. *urinipare.*] *Physiol.* Producing or preparing urine; as, the *uriniparous* tubes in the cortical portion of the kidney.

u'ri-no- (ū'rĭ-nō-), **urin-**. Combining form from Latin *urina*, meaning *urine*.

u'ri-no-gen'i-tal (-nō-jĕn'ĭ-tăl), *a. Anat. & Zoöl.* Pert. to or designating the organs or functions of excretion (production or removal of urine) and reproduction; urogenital. **urinogenital ridge**, *Embryol.*, a pair of ridges out of which the urinogenital organs are developed. — **u. sinus**, *Zoöl. & Embryol.*, a pouch or cavity communicating with the exterior, or with the cloaca (of which it may be a part), and receiving the urinary and genital canals.

u'ri-nom'e-ter (-nŏm'ē-tẽr), *n.* [*urino-* + *-meter.*] A small hydrometer for determining the specific gravity of urine. — **u'ri-nom'e-try** (-trĭ), *n.*

u'ri-nose (ū'rĭ-nōs) } *a.* [Cf. F. *urineux.* See URINE.] Of,
u'ri-nous (ū'rĭ-nŭs) } pert. to, like, or having the qualities or odor of, urine.

urn (ŭrn), *n.* [ME. *urne*, L. *urna*, prob. akin to *urceus* a pitcher, ewer: cf. F. *urne.*] **1.** A vessel of various forms, usually a vase furnished with a foot or pedestal, employed for different purposes, as for holding liquids, for ornamental uses, now esp. for preserving the ashes of the dead after cremation, and anciently for holding lots to be drawn. **2.** Fig., any place of burial; the grave. *Shak.* **3.** *Rom. Antiq.* = URNA, 2. **4.** *Bot.* In mosses, the theca. **5.** A kind of vessel for heating water at the table. **6.** *Mining.* A water cistern for a stamp mill.

ur'na (ŭr'nă), *n.* [L.] **1.** An urn. *Obs.* **2.** *Rom. Antiq.* A liquid measure. See MEASURE.

urn'al (ŭr'năl), *a.* Of, pert. to, or like, an urn or urns.

urn'flow'er (ŭrn'flou'ẽr), *n.* A plant of the genus *Urceolina.*

urn'ful (ŭrn'fo͝ol), *n.*; *pl.* **-FULS** (-fo͝olz). As much as an urn will hold; enough to fill an urn.

urn moss. A true moss; — so called in allusion to the urn-shaped thecæ.

u'ro- (ū'rō-). Combining form from Greek *οὖρον*, *urine.*

u'ro-. Combining form from Greek *οὐρά*, *tail.*

u'ro-bi'lin (ū'rō-bī'lĭn), *n.* [1st *uro-* + *bile* + *-in.*] *Physiol. Chem.* A yellow pigment in urine that has been exposed to light and air, formed from a colorless antecedent,

u'ro-bi-lin'o-gen (-bī-lĭn'ō-jĕn). Cf. HYDROBILIRUBIN.

u'ro-bi'li-nu'ri-a (ū'rō-bī'lĭ-nū'rĭ-ă), *n.* [NL.; *urobilin* + *-uria.*] *Med.* The presence of an excess of urobilin in the urine.

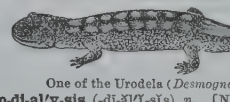
u'ro-cele (ū'rō-sēl), *n.* [1st *uro-* + *-cele.*] *Med.* A swelling of the scrotum due to extravasation of urine into it.

u'ro-chord (-kōrd), *n.* [2d *uro-* + *chord.*] *Zoöl.* The notochord of larval ascidians and of certain adult tunicates; — so called because chiefly confined to the caudal region. — **u'ro-chor'dal** (-kôr'dăl), *a.*

u'ro-chrome (-krōm), *n.* [1st *uro-* + *-chrome.*] *Physiol. Chem.* A yellow pigment to which the yellow color of normal urine is principally due. It appears to be closely related to urobilin.

u'ro-da'um (-dē'ŭm), *n.* [NL.; 2d *uro-* + Gr. ὁδαῖος on the way, ὁδός way.] *Zoöl.* The part of the cloaca, esp. of a bird, into which the ureters and genital ducts empty.

U'ro-de'la (-dē'lă), *n. pl.* [NL.; 2d *uro-* + Gr. δῆλος visible.] *Zoöl.* An order of Amphibia containing the salamanders, newts, Congo snake, and allies, having a long body, a long tail (retained through life), and short weak limbs. — **u'ro-de'lan** (-lăn), **u'ro-dele** (ū'rō-dēl), *a. & n.* — **u'ro-de'lous** (-dē'lŭs), *a.*



One of the Urodela (*Desmognathus fuscus*).

u'ro-di-al'y-sis (-dī-ăl'ĭ-sĭs), *n.* [NL.; 1st *uro-* + *dialysis.*] *Med.* A partial and temporary cessation of the secretion of urine. It occurs in some acute diseases.

u'ro-e-ryth'rin (-ē-rĭth'rĭn; -ĕr-ĭth'-), *n.* [See 1st URO-; ERYTHRIN.] *Physiol. Chem.* A pink or reddish pigment found in the urine under many pathological conditions, and also frequently in normal urine in very small quantity. The red color of urinary sediments is due to this pigment.

u'rog'e-nous (ū-rŏj'ē-nŭs), *a.* [1st *uro-* + *-genous.*] *Med.* Producing urine.

U'ro-gle'na (ū'rō-glē'nă), *n.* [NL.; 2d *uro-* + Gr. γλήνη socket, cavity.] *Zoöl.* A genus of flagellate protozoans in which many individuals are united in spherical, gelatinous, free-swimming colonies. Some species are said to cause a bad odor and taste in lake waters.

u'ro-hy'al (-hī'ăl), *a.* [2d *uro-* + *hyoid* + *-al.*] *Zoöl.* In fishes, designating, or pert. to, a median posterior bony element of the hyoid arch attached between the hypohyals. The term has also been applied to the basibranchials. In birds, designating, or pert. to, a median posterior process (or a separate piece) extending backward from the basihyal. It is a basibranchial element. — **u'ro-hy'al, *n.***

u'ro-lith (ū'rō-lĭth), *n.* [1st *uro-* + *-lith.*] *Med.* A urinary calculus. — **u'ro-lith'ic** (-lĭth'ĭk), *a.*

u'rol'o-gy (ū-rŏl'ō-jĭ), *n.* [1st *uro-* + *-logy.*] Medical science relating to the urine or the treatment of diseases of the urinary organs. — **u'ro-log'i-cal** (ū'rō-lŏj'ĭ-kăl), *a.*

u'ro-mel'a-nin (ū'rō-mĕl'ă-nĭn), *n.* [1st *uro-* + *melanin.*] *Physiol. Chem.* Any of various black pigments found in the urine in certain diseased conditions.

U'ro-my'ces (-mī'sēz), *n.* [NL.; 2d *uro-* + *-myces.*] *Bot.* A very large genus of pucciniaceous rust fungi having 1-celled teleutospores. The **beet rust** is caused by *U. betæ*; the **Windsor bean rust**, by *U. fabæ*; the **scarlet-runner bean rust**, by *U. appendiculatus.*

u'ro-pod (ū'rō-pŏd), *n.* [2d *uro-* + *-pod.*] *Zoöl.* Any of the abdominal appendages of a crustacean or other arthropod, esp. one of the posterior ones when larger than the rest or different in structure, as in the lobster, where they form part of the tail fin. — **u'rop'o-dal** (ū-rŏp'ō-dăl), *a.*

u'ro-pyg'i-al (-pĭj'ĭ-ăl), *a.* [See UROPYGIUM.] *Zoöl.* Of or pert. to the uropygium. — **uropygial gland**, *Zoöl.*, a large gland opening on the back at the base of the tail feathers in most birds, secreting an oily fluid which the bird uses in preening its feathers. It is especially developed in waterfowl, its oil helping to make the plumage shed water.

u'ro-pyg'i-um (-ŭm), *n.* [NL., fr. Gr. *οὐροπύγιον*, for ὀρροπύγιον; ὄρρος the end of the os sacrum + πυγή rump.] *Zoöl.* The fleshy and bony prominence at the posterior extremity of a bird's body, which supports the tail feathers. It contains the free caudal vertebræ and the pygostyle.

u'ro-sa'cral (ū'rō-sā'krăl), *a.* [2d *uro-* + *sacral.*] *Zoöl. & Anat.* Pert. to the caudal and sacral parts of the vertebral column; designating certain anterior caudal vertebræ of birds consolidated with the true sacral vertebræ and pelvic bones.

u'ros'co-py (ū-rŏs'kŏ-pĭ), *n.* [1st *uro-* + *-scopy:* cf. F. *uroscopie.*] The diagnosis of diseases by inspection of urine. — **u'ro-scop'ic** (ū'rō-skŏp'ĭk), *a.* — **u'ros'co-pist** (ū-rŏs'kŏ-pĭst; ū'rō-skō'pĭst), *n.*

u'ro-sep'sis (ū'rō-sĕp'sĭs), *n.* [NL.; 1st *uro-* + *sepsis.*] *Med.* Septic condition due to retention of urine and extravasation of the same into the tissues. — **u'ro-sep'tic** (-tĭk), *a.*

u'ro-stege (ū'rō-stēj), *n.* [2d *uro-* + Gr. στέγη roof.] *Zoöl.* One of the plates on the under side of the tail of a serpent. — **u'ros'te-gal** (ū-rŏs'tē-găl), *a. & n.*

u'ro-style (ū'rō-stīl), *n.* [2d *uro-* + Gr. στῦλος a pillar.] *Zoöl.* **a** A long, rodlike, unsegmented bone, representing a number of fused vertebræ, which forms the posterior part of the vertebral column of frogs and toads. **b** The hypural bone of a fish, or a similar bone formed by the fusion of two or more caudal vertebræ at the end of the tail in certain extinct turtles. — **u'ro-sty'lar** (-stī'lăr), *a.*

u'ro-tox'ic (-tŏk'sĭk), *a.* [1st *uro-* + *toxic.*] *Physiol.* Of or relating to the toxicity of the urine; as, the *urotoxic* coefficient, that is, the number of urotoxies formed in twenty-four hours per kilogram of body weight.

u'ro-tox'y (ū'rō-tŏk'sĭ), *n.*; *pl.* **-TOXIES** (-sĭz). *Physiol.* The amount of urine required to kill an animal weighing one kilogram; — used as a unit in expressing the toxicity of urines. According to Bouchard 50-60 cubic centimeters of normal human urine injected into the veins of a rabbit weighing one kilogram will kill it.

u'rot'ro-pin (ū-rŏt'rō-pĭn) } *n.* [1st *uro-* + *tropine.*]

2. *Law.* That enjoyment of property which consists in its employment, occupation, exercise, or practice ; specif., *Roman & Civil Law*, a personal servitude consisting in a jus utendi, or right to make use of a thing, as distinguished from the *usufruct*. The usuary had only a personal right limited by his own necessities or those of his family. He was not entitled to any of the fruits or profits of the subject of the use, except where the use was of land, when the later Roman law allowed him to take vegetables, wood, etc., for his family needs. The use of money or other thing of which the use was the only profit arising from it was equivalent to the usufruct.

☞ This sense is not to be confused with sense 9, below.

3. Occasion or need to employ ; necessity ; — often with *for* ; as, no further *use* for a book. "I have *use* for it." *Shak.*

4. Quality of being suitable for employment ; capability of being used or of serving to promote an end ; usefulness ; utility ; advantage ; as, there is small *use* in anger.

'T is *use* alone that sanctifies expense. *Pope.*

5. Continued or repeated practice ; customary employment ; usage ; custom ; habit.

7. *Liturgics.* The special form of ritual or liturgy or of any liturgical form or observance, used in some particular church, diocese, etc. ; as, the Roman or Anglican *use* ; esp., one of the local forms of the liturgy which existed in various English dioceses before the Reformation ; as, the Sarum, Salisbury, or Canterbury *use* (see LITURGY, 1, V) ; the York, Bangor, Hereford, and Lincoln *uses*.

From henceforth all the whole realm shall have but one *use*.
Preface to Bk. of Com. Prayer (Ch. of Eng.).

8. Premium for money ; interest ; usury. *Obs. or Dial.*

9. [Due to confusion with OF. *ues* profit, advantage, fr. L. *opus* need, business, employment, work (cf. OPERATE). The AF. *oes*, OF. *ues*, *oes*, would normally have produced an English *eece* (riming with *fleece*) ; it was prob. misunderstood by lawyers as a bad spelling of *us*(*e*), and so *use* was substituted for it in pronunciation and in spelling.] *Law.* Behalf ; advantage ; benefit ; profit ; specif., the benefit or profit of lands and tenements the legal title to which is given to a person other than the one entitled to the occupation or use (in sense 2) ; a trust of real estate. Deeds of land made to one person to, or for, the use of another appear to have been first commonly used in England by the friars to enable them to receive the benefit of land title to which by their vows they were unable to hold. The use imports a trust or confidence in the holder of the legal title, which, although not recognized by the common law, was protected by the chancellors in equity, many of whom were of the clergy. The statute of mortmain (which see) caused this to be perfected in the so-called doctrine, or law, of uses, by which the right of the cestui qui use (as the beneficiary was called) was recognized as an equitable title enforceable in chancery, distinct from the legal title vested in the trustee. By the Statute of Uses (27 Henry VIII., c. 10 ; 1535) the legal title was vested in certain cases in the cestui qui use, but the same object was again accomplished by the law of trusts, which was practically a refinement of the doctrine of uses. (See STATUTE, 2 ; MORTMAIN ; TRUST, 9.) The law of uses became part of the common law of the United States, but has been expressly abolished in some States, as New York. See SHIFTING USE, SPRINGING USE.

10. A rough block of iron or steel suitable for working up into small, or for welding in making large, forgings.

Syn. — USE, USEFULNESS, UTILITY. USE, as here compared (see HABIT), is very general in sense, and occurs chiefly in certain familiar phrases ; as, to be of *use* ; there 's no *use* in that ; what 's the *use* ? USEFULNESS is employed chiefly of things in the concrete ; UTILITY is more general and abstract ; as, the *usefulness* of a tool, the *utility* of an invention. But the two words are often interchangeable.

in use. a In employment ; in customary practice or observance. **b** In heat ; — said especially of mares.. *J. H. Walsh.* — **u. and wont,** customary practice ; custom.

use'ful (ūs'fo͝ol), *a.* Full of use ; producing, or having power to produce, good ; serviceable for any end or object ; helpful ; capable of any beneficial use, as distinguished from that which is vicious or pernicious ; having utility (which see) ; beneficial ; advantageous ; as, instruments *useful* in a hospital ; books *useful* for study ; *useful* knowledge or arts.

Consultation with oracles was a thing very *usual.* *Hooker.*

Syn. — Accustomed, common, wonted, ordinary, regular. — USUAL, CUSTOMARY, HABITUAL. USUAL, the general term, applies to whatever happens in the ordinary course of events; that is CUSTOMARY which is according to the usual practices, conventions, usages, and the like, whether of an individual or (esp.) of a community; HABITUAL implies settled practice or regularity or repetition, and has commonly personal or individual reference; as, "bid the main flood bate his *usual* height" (*Shak.*); "After the *customary* pause, Pontiac rose to speak" (*Parkman*); "an Englishman's *habitual* diffidence" (*Irving*). See COMMON, REGULAR, HABIT.

usual covenants. *Eng. Law.* **a** In conveyances, those covenants (called **covenants for**, or **of, title**) usually inserted in a deed conveying land to secure to the grantee the benefit of the title purported to be conveyed. They are: (1) The **covenant of seizin** (that the grantor is seized of the estate in question); (2) the covenant that the grantor has a good right to convey; (3) the **covenant for quiet enjoyment** (that the grantee's enjoyment of the conveyed estate shall not be interfered with by the grantor or by the lawful act of any one claiming under him); (4) the **covenant against encumbrances**; (5) the **covenant for further assurance** (that the grantor will make such further conveyances as may be necessary to perfect the grantee's title); and (6), in the United States, the **covenants of warranty** (which binds the covenantor to warrant and defend the title against any one claiming under paramount title an interest in the estate conveyed). Of these the 1st covenant is sometimes omitted, and in the United States the 6th often replaces the 3d. In some States the 6th covenant is the only one commonly used. **b** In the law of landlord and tenant, a covenant by the lessor for "quiet enjoyment" so far as concerns his own acts and those of persons claiming under or through him, and covenants by the lessee to pay rent, to pay taxes except those expressly payable by the lessor, to keep and deliver up the premises in repair, and to allow the lessor to enter and view the state of repair.

u/su-a-ry (-ă-rĭ), *n. Roman & Civil Law.* The beneficiary of a use. See USE, *n.*, 2.

u/su-ca/pi-on (ū/zŭ-kă′pĭ-ŏn), *n.* [L. *usucapio, -onis.*] *Roman Law.* The mode by which one acquired title to property by uninterrupted possession of it for a certain period (one year for movables, two for immovables) under a title acquired in good faith. Usucapion was a quiritary remedy and gave a quiritary title, while the *prescription* (which see) was a prætorian remedy, and originated only as a defense. In the later Roman law the two became merged.

u/su-capt (ū′zŭ-kăpt), *v. t. Roman Law.* To claim or acquire the title to by usucapion.

u/su-fruct (ū′zū-frŭkt), *n.* [L. *ususfructus, usus et fructus; usus* use + *fructus* fruit: cf. F. *usufruit.* See USE, *n.*; FRUIT.] *Roman & Civil Law.* The right of using and enjoying the fruits or profits of an estate or other thing belonging to another, without impairing the substance. This right (called a **perfect usufruct**) is generally created by a personal servitude, and includes both the use (**jus utendi**) and the enjoyment of the fruits (**jus fruendi**). Also, by extension, a similar right (an **imperfect**, or **quasi, usufruct**) allowed in things consumed in the using.

u-surp′ (ū-zûrp′), *v. t.*; U-SURPED′ (-zûrpt′); U-SURP′ING. [L. *usurpare, usurpatum*, to make use of, enjoy, get possession of, usurp; fr. *usus* use (see USE, *n.*) + (prob.) a derivative fr. the root of *rapere* to seize (cf. RAPID): cf. F. *usurper.*] To seize and hold in possession by force, or without right; — applied only to seizure of office, place, functions, powers, rights, etc.; as, to *usurp* a throne; to *usurp* the prerogatives of the crown; to *usurp* power; to *usurp* the right of a patron is to oust or dispossess him.

Syn. — USURP, ARROGATE, ASSUME. To ASSUME, as here compared (see ASSUME), is to take upon one's self, whether with or without right; to ARROGATE (see ARROGANT) is to assume unduly or with presumption; USURP implies forcible seizure, as of power, rights, functions, and the like, without right; as, "Pompey, Crassus, and Cæsar . . . divided the government betwixt them, which none of them was able to *assume* alone" (*Dryden*); "By *arrogating* to himself too much, he was in danger of losing that degree of estimation to which he was entitled" (*Johnson*); "[He], still affecting fame, *usurped* a patriot's all-atoning name" (*Dryden*).

u-surp′, *v. i.* To commit forcible seizure of place, power, functions, or the like, without right; to commit unjust encroachments; to be, or act as, a usurper.

u-surp′er, *p. pr. & vb. n.* Specif., *p. a.* Holding by, or marked by, usurpation. — **u-surp′ing-ly**, *adv.*

u/su-ry (ū′zhū-rĭ), *n.* [ME. *usurie*, fr. *usure*, F. *usure*, L. *usura* use, usury, interest, fr. *uti*, p. p. *usus*, to use. See USE, *v. t.*] **1**. A premium or increase paid, or stipulated, for a loan of money or goods; interest. *Obs. or Archaic.*

Thou shalt not lend upon *usury* to thy brother; *usury* of money, *usury* of victuals, *usury* of anything. *Deut.* xxiii. 19.

2. An unconscionable or exorbitant rate or amount of interest; specif., *Law*, interest in excess of a legal rate charged to a borrower for the use of money. In primitive societies the taking in return for a loan of money or goods of anything in excess of the loan appears always to have been a practice repugnant and in some cases unknown, due to the fact that in the early stages of civilization the thing loaned is not used as productive capital, but for consumption, generally by persons in want. The exaction then of a return seemed a taking advantage of the life necessities of another. Following the Jewish law, the taking of interest is prohibited by the common law, except under certain conditions. With the growth of commerce and manufactures usury became a source of profit and by various devices in evasion of the laws prohibiting it. With the Reformation legal sanction began to be given in European countries to the taking of interest up to a rate fixed by law; and to-day interest is allowed in all civilized countries, either unrestrictedly, except the prohibition of unconscionable or iniquitous bargains (as in Great Britain since 1854, and in parts of the United States), or with restriction to some legal rate of interest, with a penalty for exactions of more than that amount, as in various States of the United States. See INTEREST, 8; DRY EXCHANGE.

3. The taking, or practice of taking, usury (now usually, or always, in sense 2).

ut (ŭt; in *solmization*, ōōt), *n.* [L. *ut.* See SOLMIZATION; cf. GAMUT.] *Music.* The first note in Guido's musical scale, now usually superseded by *do.* See SOLMIZATION.

u/ter-us (ū′tĕr-ŭs), *n.*; *pl.* UTERI (-ī). [L.] **1**. *Anat. & Zoöl.* In female mammals, an organ for containing, and usually for nourishing, the young during the development previous to birth; the womb. Considered morphologically it is a greatly modified and enlarged section of an oviduct (or of the two oviducts united). In many of the lower mammals there is a separate uterus on each side, continuous with each Fallopian tube, but more often they unite for some distance, the single uterus thus formed being Y-shaped as in the primates and a few others the coalescence is complete and the uterus is somewhat pear-shaped, opening below into the vagina by a narrow *neck*, or *cervix*, the larger portion being termed the *body*, and receiving the Fallopian tubes on each side. The uterus has thick walls, consisting of an external serous coat, a very thick muscular coat of nonstriated muscle, and a mucous coat containing numerous glands. During pregnancy the uterus undergoes a remarkable increase in size, and changes in the condition of its walls, which in the higher forms take part in the formation of the placenta (which see).

one — that of public prosperity. The ideal of the modern Platonist is a religious one . . . , of individuals to be made more perfect by personal care, in a social system which is the life of each one of them writ large. *Encyc. Brit.*

u-til'i-ta'ri-an-ism (ū-tĭl'ĭ-tā'rĭ-ăn-ĭz'm), *n.* *Ethics.* The doctrine that the greatest happiness of the greatest number should be the end and aim of all social and political institutions, and that virtue is founded in utility, or that it is defined and enforced by its tendency to promote the highest happiness of mankind. *Utilitarianism* is essentially an English ethical system, having as its chief exponents Jeremy Bentham (1748-1832) and James and John Stuart Mill. Henry Sidgwick (1838-1900) specifically distinguished utilitarianism, as *universalistic hedonism*, from the older, egoistic systems of hedonistic ethics. Sidgwick defines *utilitarianism* (as conceived by himself) as "the ethical theory that the conduct which, under any given circumstances, is objectively right, is that which will produce the greatest amount of happiness on the whole; that is, taking into account all whose happiness is affected by the conduct."

u-til'i-ty (ū-tĭl'ĭ-tĭ), *n.*; *pl.* -TIES (-tĭz). [ME. *utilite*, L. *utilitas*, fr. *utilis* useful: cf. F. *utilité*. See UTILE.]
1. Quality or state of being useful; usefulness; profitableness to some desired end; as, the *utility* of manures upon land; the *utility* of the sciences; the *utility* of medicines.
The *utility* of the enterprise was, however, so great and obvious that all opposition proved useless. *Macaulay.*
2. *Econ.* Power to satisfy human wants. "Wants are here reckoned quantitatively with regard to their volume and intensity; not according to any ethical or prudential standard" (*A. Marshall*). Modern economists distinguish the **total utility**, measured by the loss which would be involved in the entire deprivation of a commodity, from the **marginal utility**, or **final utility**, which would be involved in the loss of a small amount of it. Thus the *total utility* of water is infinitely great; but the *marginal utility* of a single quart of water is ordinarily very small, because a man or a community has usually so much water at command that one more or less makes very little difference.
3. Happiness; the greatest good or happiness of the greatest number, — the foundation of utilitarianism. *J. S. Mill.*
4. A useful thing, as a tool or device used as an adjunct to a more important machine in a machine shop.
Syn. — Usefulness, advantageousness, benefit, profit, avail, service. See USE.

utility man. **1.** *Theater.* An actor who performs minor parts and does odd jobs.
2. Hence, a member of a professional baseball team who plays various positions in the absence of regular players.

u'til-iz'a-ble (ū'tĭ-lĭz'ă-b'l), *a.* Capable of being utilized; as, the *utilizable* products of the gas works.

u'til-i-za'tion (-lĭ-zā'shŭn; -lī-zā'shŭn), *n.* [Cf. F. *utilisation*.] Act of utilizing, or state of being utilized.

u'til-ize (ū'tĭ-līz), *v. t.*; U'TIL-IZED (-līzd); U'TIL-IZ'ING (-lĭz'-ĭng). [Cf. F. *utiliser*.] To make useful; to turn to profitable account or use; to make use of; as, to *utilize* the whole power of a machine; to *utilize* one's opportunities.
In former ages, the miles of corridors, with their numerous alcôves, might have been *utilized* as . . . dungeons. *Hawthorne.*

‖ **u'ti pos'si-de'tis** (ū'tī pŏs'ĭ-dē'tĭs). [L., as you possess.]
1. *Roman & Civil Law.* A species of interdict for deciding the right to the possession of immovables, and preserving things in statu quo pending the decision. At Roman law the party prevailed who was in actual possession at the time of the issue of the interdict and had not taken possession from his opponent by force, stealth, or with his permission. This interdict and utrubi finally became practically merged.
2. *Internat. Law.* Short for **principle of uti possidetis**; that is, the principle that a conclusion or treaty of peace between belligerents vests in them respectively as absolute property the territory under their actual control and things attached to it, and the movables then in their legal possession, except as otherwise stipulated.

ut'most (ŭt'mōst), *a.* [ME. *outemest*, *utmest*, *utemest*, AS. *ūtmest*, *ūtemest*, a superlative fr. *ūt*, *ūte*, out. See OUT; cf. AFTERMOST, OUTMOST, UTTERMOST.] **1.** Situated at the farthest point or extremity; most distant; extreme; last; as, the *utmost* limits of the land, the *utmost* extent of knowledge. "The *utmost* town in France." *Evelyn.*

2. One who composes in both Latin and the vernacular.

u'tri-cle (ū'trĭ-k'l), *n.* [L. *utriculus* a little womb, a calycle, dim. of *uter*, *utris*, a bag or bottle made of an animal's hide: cf. F. *utricule*.] **1.** A little sac or vesicle, as the air cell of a fucoid seaweed, the bladder of *Utricularia*, etc.
2. *Bot.* **a** A small, 1-celled, usually indehiscent, 1-seeded or few-seeded fruit with thin, membranous pericarp, as that of the goosefoots (*Chenopodiaceæ*), amaranths (*Amaranthaceæ*), etc. **b** A perigynium. **c** A parenchyma cell. *Obs.*
3. *Biol.* A cell. *Obs.*

u-tric'u-lar (ū-trĭk'ū-lăr), *a.* **1.** Of or pert. to a utricle, or utriculus; containing or having a utricle or utricles.
2. Resembling a utricle or bag, whether large or minute; — said esp. of certain substances, as sulphur, selenium, etc., when condensed from vapor and deposited on cold bodies, in small globules filled with liquid.

U-tric'u-la'ri-a (-lā'rĭ-ă; 115), *n.* [NL., fr. L. *utriculus* a small skin or leather bottle.] *Bot.* A large widely distributed genus of pinguiculaceous aquatic or bog plants, the bladderworts, with saclike ascidia which serve as animal traps. The aquatic species have floating stems with finely dissected leaves; the terrestrial forms usually bear a basal rosette of linear or subulate leaves. The scapose, often showy, flowers have a very irregular, spurred, bilabiate corolla.

Utricularia (*U. inflata*). 1 Bladder-bearing Leaf; 2 Scape of Flowers; 3 Fragment of Leaf, showing two enlarged Bladders.

u-tric'u-late (ū-trĭk'ū-lāt), *a.* Resembling a bladder; swollen like a bladder; inflated; utricular.

u-tric'u-lus (-lŭs), *n.* [L., little womb or matrix, calycle.] A utricle; esp., the part of the membranous labyrinth of the ear into which open the semicircular canals. See 1st EAR, 1.

ut'ter-bi (ŭt'ẽr-bī), *n.* [L., on which of two sides, where.] *Roman & Civil Law.* A species of interdict for deciding the right of possession of movables, and preserving things in statu quo pending the decision. At Roman law the party prevailed who had been in possession, acquired "nec vi, nec clam, nec precario" (i. e., without force, stealth, or his opponent's permission), for the longer period in the year preceding. See UTI POSSIDETIS.

ut'ter (ŭt'ẽr), *a.* [ME. *utter*, AS. *ūttra*, var. of *ūtera*, *ūterra*, a comparative adj.; fr. *ūte*, *ūt*, out; originally the same word as *outer*. See OUT; cf. OUTER, UTMOST.]

V

V (vē). **1.** The twenty-second letter of the English alphabet. It is a labiodental, or lip-teeth, consonant, the voiced, or sonant, correlative of *f*. V and U are varieties of the same character, U being the cursive form, while V is better adapted for engraving, as in stone. The two letters were formerly used indiscriminately (see U). The letter *w*, a doubled *v* called "double *u*," is a survival of this use. V does not occur in the oldest English texts, its sound being represented medially by *f*, as in *heofon*, *ofer*. The letter was probably introduced by French scribes, as was also *w*, and it occurs in Middle English for *w*, and initially in many words now beginning with *f*. V is from the Latin alphabet, where it was used both as a consonant (about like English *w*) and as a vowel. The Latin derives it from a form (Ⅴ) of the Greek Υ (see Y), this Greek letter being either from the same Semitic letter as the digamma Ϝ (see F), or else added by the Greeks to the alphabet which they took from the Semitic. See ALPHABET, *Illust.* Etymologically *v* is most nearly related to *u*, *w*; *f*, *b*, *p*; as in *vine*, *wine*; *avoirdupois*, *habit*, *have*; *safe*, *save*; *trover*, *troubadour*; *receive*, *recipient*. Cf. *U*, *F*, *W*. See *Guide to Pron.*, § 255 ff.

vag'a-bond (văg'ȧ-bŏnd), *a.* [F., fr. L. *vagabundus*, fr. *vagari* to stroll about, fr. *vagus* strolling. See VAGUE.] **1.** Moving from place to place without a settled habitation; wandering; as, a *vagabond* people; sometimes, strolling and worthless or vicious; as, the *vagabond* classes. **2.** Floating or borne about without any certain direction; driven to and fro. *Milton.* **3.** Of, pert. to, or characteristic of, one wandering without settled habitation, whether worthless or vicious or not; vagrant; as, a *vagabond* life. "*Vagabond* exile." *Shak.* **Syn.** — See VAGRANT.

vag'a-bond, *v. i.*; VAG'A-BOND'ED; VAG'A-BOND'ING. To play the vagabond; to wander like a vagabond; to stroll.

On every part my *vagabonding* sight
Did cast, and drown mine eyes in sweet delight. *Drummond.*

vag'a-bond, *n.* One who wanders from place to place, having no fixed dwelling, or, if he has one, not abiding in it; a wanderer; esp., such a person who is lazy and generally worthless and without means of honest livelihood; vagrant; tramp; hence, *Colleg.*, a worthless person; scamp; rascal. In legal usage *vagabond* was formerly used literally to denote a strolling, idle, worthless person, belonging, as described in old English statutes, to "such as wake on the night and sleep on the day, and haunt customable taverns and alehouses, and rout about; and no man wot from whence they came, nor whither they go." Now the term has no technical use in the United States, but is retained in various English statutes, as the Vagrancy Act of 1824 (5 G. IV. c. 83), by which the term is applied to certain offenders against good order specifically mentioned, who are not necessarily persons leading "a wandering and vagabond life." It was held in 28 Tex. App. 562 that the term was not equivalent to *vagrant*.

A fugitive and a *vagabond* shalt thou be. *Gen.* iv. 12.

vag'a-bond'age (-bŏn'dăj), *n.* [Cf. F. *vagabondage.*] The condition of a vagabond; state or habit of wandering about in idleness; vagrancy.

vag'a-bon-dis'mus (-bŏn-dĭz'mŭs; -dĭs'mŭs), *n.* [NL.] *Med.* A condition in which the skin becomes discolored following long exposure to weather, irritation, and uncleanliness.

va-ga'ri-ous (vȧ-gā'rĭ-ŭs; 115), *a.* Given to, or characterized by, vagaries; capricious; whimsical; crotchety.

va-ga'ry (-rĭ), *n.*; *pl.* -RIES (-rĭz). [Formerly used also as a v., to wander, fr. L. *vagari* to stroll about; but perh. due partly to confusion with *vagrant*. See VAGUE.] **1.** A wandering or strolling. *Obs.* **2.** Hence, a wandering of the thoughts; a wild or fanciful freak; a whim. "The *vagaries* of a child." *Spectator.* **Syn.** — See CAPRICE.

va-gas' (vȧ-găs'), *n.* [Armenian.] *Armenian Ch.* A vestment resembling an amice, with a breastplate attached on which are the names or figures of the twelve apostles.

va-gi'na (vȧ-jī'nȧ), *n.*; *pl.* L. -NÆ (-nē), E. -NAS (-nȧz). [L. *vagina* a scabbard or sheath.] **1.** *Anat. & Zoöl.* **a** A sheath or sheathlike part or tube; a theca. **b** Specif., in female mammals, a canal which leads from the uterus to the external orifice of the genital canal, or to the cloaca; — extended also to a canal of similar function or location in various other animals. That of mammals, like the uterus, is developed from the terminal part of both or one of the Müllerian ducts of the embryo. These unite to form a single median canal in all but some of the lowest mammals. In some marsupials the two vaginas are united at their anterior ends only, and from this point a median backward diverticulum, the median vagina, affords an additional passage (serving in parturition) to the urinogenital sinus. **2.** *Bot.* The expanded or sheathing part of some leaf bases. **3.** *Arch.* The shaft of a terminus, or its upper part, from which the bust or figure seems to issue or arise.

Vaginate Culm of Grass.

vag'i-nal (văj'ĭ-nȧl; *vȧ-jī'nȧl*; 277), *a.* **1.** Resembling, or pert. to, a sheath; thecal; as, a *vaginal* synovial membrane surrounding a tendon; the *vaginal* branches of the hepatic artery (which ramify in Glisson's capsule). **2.** *Anat. & Zoöl.* Pertaining to, or supplying, the vagina of the genital canal; as, the vaginal arteries, branches of the internal iliac artery, or the *vaginal* plexus of nerves or veins.

vaginal process. *Anat.* **a** A projecting lamina of bone (continuous with the tympanic plate) on the inferior surface of the petrous portion of the temporal bone. **b** Either of a pair of projecting laminæ on the inferior surface of the sphenoid which articulate with the alæ of the vomer.

vag'i-nate (văj'ĭ-nāt), *a.* [See VAGINA.] Invested with or as with a sheath, or vagina.

Vag'i-nic'o-la (văj'ĭ-nĭk'ō-lȧ), *n.* [NL.; L. *vagina* sheath + *colere* to inhabit.] *Zoöl.* A genus of Infusoria which form minute vaselike or tubular cases in which they dwell.

Vaginicola (*V. crystallina*). Much enlarged.

vag'i-nif'er-ous (-nĭf'ẽr-ŭs), *a.* [*vagina* + *-ferous.*] *Zoöl.* Having a sheath or theca.

va'gran-cy (vā'grȧn-sĭ), *n.* State of being a vagrant (which see); a wandering without a settled home; vagabondage.

va'grant (vā'grănt), *a.* [Prob. fr. OF. *waucrant*, *wacrant*, p. pr. of *waucrer*, *wacrer*, *walcrer* to wander, prob. of Teutonic origin (cf. MHG. *welkern*, v. i., to move, and E. WALK), but influenced by F. *vagant*, p. pr. of *vaguer* to stray, L. *vagarì* (cf. VAGARY).] **1.** Moving hither and thither without certain object; wandering from place to place without settled habitation; as, a *vagrant* beggar, breezes, fancies. **2.** Of, pertaining to, or characteristic of, one who roves or wanders without fixed destination or settled habitation; unsettled; vagabond; erratic; as, his *vagrant* nature.

That beauteous Emma *vagrant* courses took. *Prior.*

Syn. — VAGRANT, VAGABOND, TRUANT are here compared in their fig. senses. VAGRANT is often used of that which is roving or unsettled; VAGABOND heightens the implication of care-free wandering at will; TRUANT suggests more definitely a wandering or loitering away from where one ought to be. "He revolved through the family system like a *vagrant* comet in its orbit" (*Irving*); "curls blown *vagrant* in the wind" (*Keats*); "stray thoughts and *vagrant* fancies" (*Landor*); "I was overpowered by a host of conquering, *vagabond*, adventurous aspirations" (*Mrs. Humphry Ward*); "a *truant* disposition" (*Shak.*); to recall one's *truant* thoughts. See WANDER, RANDOM, CAPRICE.

va'grant, *n.* One who strolls from place to place; an idle wanderer; specif., one who has no settled habitation; a vagabond. In statutory law, in Great Britain and in various States in the United States, *vagrant* is arbitrarily defined to include any of various offenders against good order or persons liable to become a menace to the public peace or a public burden. Cf. VAGABOND.

va'grom (vā'grŭm), *a.* A corruption of VAGRANT; — used by Dogberry in Shakespeare's "Much Ado about Nothing." *Humorous.* "The *vagrom* cat." *Harper's Mag.*

vaist. † WASTE.

vaistie. † VASTY.

vaistour. † WASTER.

Vai'sya (vī'syȧ), *or* **Vai'shya** (vī'shyȧ), *n.* [Skr. *vaiçya.*] See CASTE, 2.

vait. † WIT, *v.*

vai'vode (vā'vōd), **vai'vode-ship.** Vars. of VOIVODE, VOIVODESHIP.

Va-jez'a-tha (vȧ-jĕz'ȧ-thȧ; vă'jĕ-zā'thȧ). *Bib.*

va-kas', **va-kass'** (vä-käs'). Vars. of VAGAS.

vake. Var. of VAIK. *Scot.*

va-kil', va-keel' (vȧ-kēl'; wȧ-), *n.* [Hind. (fr Ar.) & Ar. *wakīl.*] A native ambassador, agent, representative, attorney, or the like; esp., an authorized native public pleader in a court of justice.

vak-kal'i-ga (vȧ-kŭl'ĭ-gȧ), *n.* A member of a Hindu caste, of the higher Sudra rank, numerous in Madras.

val. † FAIL, VALE.

Val., *or* **val.** *Abbr.* Valenciennes (lace); valentine; value.

Va-la'chi-an (vȧ-lā'kĭ-ȧn). Var. of WALLACHIAN.

va-lanche' (vȧ-lănch'; vȧ-lănsh'), *n.* An avalanche. *Obs.*

Va'la-skjalf' (vä'lä-s k y ä l v'; wä'lä-), *n.* See ASGARD.

valay. † VALLEY.

vald. † WOULD, form of WILL, *v.*

Val-den'ses (vȧl-dĕn'sēz; wȧl-dĕn'sēz), **Val-den'sian** (vȧl-dĕn'shȧn). Vars. of WALDENSES, etc. [VEIL.]

vale. † FELE, VAIL, VALLEY.

va'le (vā'lē). [L.] Farewell; a farewell. [VALI.]

Va'le. *Norse Myth.* Var. of ‖ **va'le-at ac'co-ra vir'tus.** [L.] Virtue avails as an anchor.

‖ **va'le-at quan'tum va'le-re pot'est.** [L.] Let it pass, or be taken, for what it is worth.

valeaunce. † VALIANCE.

valeaunte. † VALIANT, *adv.*

valeie. † VAILEY.

valeisa, *n.* Valise. *Obs.*

valence. Var. of VALANCE.

va'lence (vā'lĕns), *n.* [L. *valens, -entis*, p. pr. of *valere* to have power, to be strong. See VALIANT.] **1.** *Chem.* The degree of combining power of an element (or radical) as shown by the number of atomic weights of hydrogen, chlorine, sodium, or the like, with which the atomic weight of the element (or the partial molecular weight of the radical) will combine, or for which it can be substituted, or with which it can be compared. An element or radical having a valence of one is said to be univalent or monovalent; of two, bivalent or divalent; of three, trivalent; of four, quadrivalent or tetravalent, etc. The valence of certain elements varies in different compounds; thus, nitrogen is trivalent in ammonia, NH_3, and pentavalent in ammonium chloride, NH_4Cl. Valence in degree may extend as high as seven or eight, as in the cases of iodine and osmium respectively. The doctrine of valence has been essential in distinguishing the equivalent from the atomic weight, and in explaining the chemical structure of compounds. Valence, according to the atomic theory, is a measure of the extent to which an atom is able to combine directly with others. It should not be confused with chemical affinity or activity (readiness to combine).

2. *Biol.* Morphological or taxonomic value or rank. *Rare.*

va-len'ci-a (vā-lĕn'shĭ-ā), *n.* [Perh. fr. *Valence* in France.] **a** A kind of woven fabric for waistcoats, with weft of wool and warp of silk or cotton. **b** = VALANCE, 1.

Va'len'ciennes' (vă'lăN'syĕn'; vā-lĕn'sĭ-ĕnz'; 277), *n.* [From *Valenciennes* in France.] **1.** Valenciennes lace.

2. *Mil.* A pyrotechnic mixture used for incendiary purposes, as of saltpeter, sulphur, antimony, and rosin.

Valenciennes lace. A rich kind of bobbin lace made orig. at Valenciennes, France, now mainly in Belgium. Each piece is made throughout by the same person and with the same thread, the pattern being worked in the net.

va'len-cy (vā'lĕn-sĭ), *n.*; *pl.* -CIES (-sĭz). *Chem.* = Valence. **b** A unit of combining power; a bond. See BOND, *n.*, 12.

val'en-tine (văl'ĕn-tīn), *n.* [Cf. OF. *valentin*, F. *valentine*; after St. *Valentine*.] A sweetheart chosen on St. Valentine's Day; also, a letter or missive of a sentimental or, by extension, of a comic or burlesque character, sent, usually anonymously, on St. Valentine's Day.

Val'en-tin'i-an (-tĭn'ĭ-ăn), *a.* Of or pertaining to Valentinus, who taught at Alexandria and Rome 140 and 160 A. D. (see GNOSTICISM), or the system of Gnosticism (called **Valentinian Gnosticism**) taught by him. He reckoned thirty æons extending from the divine summit of being, which was an Eternal One above and apart from all created being. Nous, or reason, and truth are the first emanations. Nous was named the Only Begotten. From Nous and truth came Logos and life, and from Logos and life came man and the church. These, with depth and silence, form the first eight æons, the æon retaining its Greek sense of eternal and complete (borrowing the thought of Aristotle's Entelechy). Besides these eight æons ten more descended from Logos and life, and twelve from man and church, making thirty æons in all. From the lowest step of the æons there descends the undivine world to save which Nous and truth cause the emanation of Christ and the Holy Ghost, who work the salvation of the inhabitants of the terrestrial world. *W. T. Harris.*

Val'en-tin'i-an-ism, *n.* An adherent of Valentinianism.

Val'en-tin'i-an-ism (-Iz'm), *n.* Valentinian Gnosticism.

val'er-ate (văl'ĕr-āt), *n.* Also **va-le'ri-an-ate** (vā-lē'rĭ-ăn-āt). *Chem.* A salt or ester of valeric acid.

va-le'ri-an (vā-lē'rĭ-ăn), *n.*, [LL. *valeriana*, perh. from some person named *Valerius*, or fr. L. *valere* to be strong, powerful, from its medicinal virtues: cf. F. *valériane*.] **a** Any plant of the genus *Valeriana*. The common valerian is *V. officinalis*. **b** *Pharm.* A drug consisting of the dried rootstalk and roots of *Valeriana officinalis*, used as a mild tonic and stimulant, esp. in nervous affections.

Va-le'ri-a'na (-ā'nă), *n.* [LL., valerian. See VALERIAN.] *Bot.* A large genus of perennial herbs, type of the family Valerianaceæ, having lobed or dissected leaves, and cymose white or pink flowers with spurless corollas. The species are widely distributed in temperate regions of both hemispheres. Also [*l. c.*], a plant of this genus.

Va-le'ri-a-na'ce-æ (*-a-nā'sē-ē*), *n. pl.* [NL.] *Bot.* A family of herbs typifying the order Valerianales. They have opposite leaves and mostly cymose flowers, the corolla regular or irregular, and the anthers free. The fruit is an achene crowned with the persistent calyx border. There are about 8 genera and 275 species, natives of temperate regions. Most of them possess tonic or stimulant properties. — **va-le'ri-a-na'ceous** (-shŭs), *a.*

Va-le'ri-a-na'les (-lēz), *n. pl.* [NL.] *Bot.* An order of metachlamydeous dicotyledonous plants consisting of the two families Valerianaceæ and Dipsacaceæ (which see).

Va-le'ri-a-nel'la (-nĕl'ă), *n.* [NL. dim. See VALERIANA.] *Bot.* A large genus of valerianaceous herbs disting. by the variously appendaged but not pappose calyx. The species are mainly natives of the Old World, some occurring in the United States. Several are edible. See CORN SALAD.

Va-le'ri-a-no'des (-nō'dēz). [NL., prob. *Valeriana* + Gr. *εἶδος* form (see 1st -ODE)]. *Bot.* A genus of mostly tropical herbs or herbs with solitary axillary flowers having two included stamens and two staminodia. *V. jamaicense* occurs as a weed in South Florida.

va-ler'ic (vā-lĕr'ĭk; -lē'rĭk), *n.* Also **va-le'ri-an'ic** (-lē'rĭ-ăn'-ĭk). [See VALERIAN.] *Chem.* Pert. to or designating any of four isomeric acids, $C_4H_9CO_2H$, of the fatty acid series. These are: (1) **Normal valeric acid**, or **propylacetic acid**, $CH_3(CH_2)_3CO_2H$, a liquid smelling like butyric acid and prepared artificially in various ways. B.P.$_{760}$ 186° C. (2) **Isovaleric acid**, or **isopropylacetic acid**, $(CH_3)_2CHCH_2CO_2H$, an oily liquid with an odor like old cheese. It occurs in many plants, as in valerian root, in certain animal oils, in perspiration, etc., and is also obtained by the oxidation of isoamyl alcohol from fusel oil. B. P. 176.3° C. (3) An acid, called also **methylethylacetic acid**, $CH(CH_3)(C_2H_5)CO_2H$, in the essential oil from the fruit of *Angelica archangelica*, in valerian root, etc., also prepared artificially. It is a liquid boiling at 177° C. (4) An acid, called also **trimethylacetic acid**, $C(CH_3)_3CO_2H$, prepared artificially. It melts at 35.5° C. and boils at 163.7° C. Ordinary valeric acid is considered to be a mixture of (1) with some of the dextro variety of (3).

va-ler'i-din (vā-lĕr'ĭ-dĭn), *n.* *Pharm.* A white crystalline substance, $C_{13}H_{19}O_2N$, obtained by heating (iso)valeric acid with para-phenetidine, used as a nervous sedative.

val'er-o- (văl'ĕr-ō-). *Chem.* A combining form (also used adjectively) indicating *derivation from*, or *relation to, valeric acid*; as, *valero*lactone.

val'er-o-lac'tone (-lăk'tōn), *n.* *Org. Chem.* A colorless oily liquid, $C_5H_8O_2$, the lactone of a hydroxy derivative of valeric acid; pentanolide.

val'et (văl'ĕt; văl'ā; 277: *see note below*), *n.* [F. *valet*, OF. *vallet, varlet, vaslet*. See VARLET, VASSAL.] **1.** A manservant; now, one who attends a man, taking care of his clothes and assisting with his toilet, etc.; a valet de chambre; a body servant.

2. *Man.* A kind of goad or stick with a point of iron.

☞ The pron. văl'ĕt, given by Buchanan (1766), Sheridan (1780), and later orthoepists, still prevails in the best usage.

val'et, *v. t. & i.*; VAL'ET-ED (văl'ĕt-ĕd; văl'ād); VAL'ET-ING. To serve as a valet. *Beaconsfield.*

‖ **va'let' de cham'bre** (vă'lĕ' dĕ shăN'br'). [F.] A body servant, or personal attendant.

val'e-tu'di-na'ri-an (văl'ē-tū'dĭ-nā'rĭ-ăn; 115), *a.* [See VALETUDINARY.] Of infirm health; seeking to recover health; sickly; weakly; infirm.

The virtue which the world wants is a healthful virtue, not a *valetudinarian* virtue. *Macaulay.*

val'e-tu'di-na'ri-an, *n.* A person of a weak or sickly constitution; one who is seeking to recover health.

val'e-tu'di-na'ri-an-ism (-Iz'm), *n.* The condition of a valetudinarian; a state of feeble health; infirmity.

val'e-tu'di-na-ry (-tū'dĭ-nă-rĭ), *a.* [L. *valetudinarius*, fr. *valetudo* state of health, health, ill health, *valere* to be strong or well: cf. F. *valétudinaire*. See VALIANT.] Infirm; sickly; valetudinarian.—**val'e-tu'di-na-ri-ness** (-rĭ-nĕs), *n.* It renders the habit of society dangerously *valetudinary*. *Burke.*

val'e-tu'di-na-ry, *n.* A valetudinarian.

Val-hal'la (văl-hăl'ă), *n.* [Icel. *valhöll*, lit., hall of the slain; *valr* the slain (akin to AS. *wæl*, OHG. *wal* battlefield, *wuol* defeat, slaughter, AS. *wōl* pestilence) + *höll* a royal hall. See HALL; cf. WALHALLA.] **1.** *Norse Myth.* The hall of Odin, into which he receives the souls of heroes slain in battle. From its 540 gates each morning the warriors go to fight, and at night they return to feast with the gods. They are the fallen heroes being their servitors. See ASGARD.

2. A hall or temple adorned with statues or other memorials of a nation's heroes; esp., the Pantheon near Ratisbon, in Bavaria, consecrated to the illustrious dead of Germany.

val'ian-cy (văl'yăn-sĭ), *n.* The quality or state of being valiant; bravery; valor.

val'iant (văl'yănt), *a.* [ME. *valiant*, F. *vaillant*, OF. *vaillant*, var. of *valant*, orig. p. pr. of OF. & F. *valoir* to be worth, L. *valere* to be strong. See WIELD; cf. AVAIL, CONVALESCE, EQUIVALENT, PREVAIL, VALID, VALUE.] **1.** Vigorous in body; strong; sturdy; powerful. *Obs.* *Walton.*

2. Intrepid in danger; courageous; brave. *Shak.*

And Saul said to David, . . . be thou *valiant* for me, and fight the Lord's battles. *1 Sam.* xviii. 17.

3. Performed with valor or bravery; heroic. "Thou bearest the highest name for *valiant* acts." *Milton.*

4. Brave or gay in appearance. *Obs.*

—**val'iant-ly,** *adv.* —**val'iant-ness,** *n.*

val'id (văl'ĭd), *a.* [F. *valide*, L. *validus* strong, fr. *valere* to be strong. See VALIANT.] **1.** Strong; powerful; efficient. *Obs. or R.* "*Valid* arms." *Milton.*

2. Founded on truth or fact; capable of being justified, supported, or defended; not weak or defective; well-grounded; sound; good; as, a *valid* argument; a *valid* objection.

An answer that is open to no *valid* exception. *I. Taylor.*

3. Specif.: *Law.* Having legal strength or force; executed with the proper formalities; legally sufficient or efficacious; incapable of being rightfully overthrown or set aside; as, a *valid* deed, covenant, title, marriage.

4. *Biol.* Founded on an adequate basis of classification; having distinctive characters of recognized importance; as, a *valid* species or genus.

Syn. — Efficacious, just, good, weighty, sufficient, sound.

val'i-date (văl'ĭ-dāt), *v. t.*; VAL'I-DAT'ED (-dā'tĕd); VAL'I-DAT'ING (-dā'tĭng). [Cf. LL. *validare*. See VALID.] To render valid; to give legal force to; to confirm.

Refusing to *validate* at once the election. *London Spectator.*

val'i-da'tion (văl'ĭ-dā'shŭn), *n.* [Cf. F. *validation*.] Act of validating, or state of being validated.

va-lid'i-ty (vă-lĭd'ĭ-tĭ), *n.* [Cf. F. *validité*, L. *validitas* strength.] **1.** Quality or state of being valid; strength; force; esp., power to convince; justness; soundness; as, the *validity* of an argument, of proof, of an objection.

This incommensurability of the necessary and the contingent, the scientific and the historical, answers to the difference between *validity* and reality. *James Ward.*

2. *Law.* Legal strength, force, or authority; that quality of a thing which renders it supportable in law or equity; legal sufficiency; as, *validity* of a will, contract, title.

3. Value. *Obs.* "Rich *validity*." *Shak.*

va-lise' (vă-lēs'; 277), *n.* [F. *valise*, fr. It. *valigia*; cf. LL. *valisia, valesia*; of uncert. orig.] **1.** A case, usually of leather and designed to be carried in the hand, for the clothes, toilet articles, etc., of a traveler; a traveling bag.

2. *Mil.* A roll or case affixed to the saddle of an off horse of an artillery carriage to carry articles of the driver's equipment. It is now rarely used.

Val'jean', Jean (zhăN văl'zhăN'). The hero of Victor Hugo's novel "Les Misérables." He is an ex-convict of great strength and courage, whose life is changed for the better by the act of a good bishop who gives him food and lodging, and, after he has stolen his benefactor's plate, saves him from punishment. He afterwards rises to be a great manufacturer and a municipal officer; but, his former convict life having been discovered by the implacable detective Javert, he is bitterly persecuted and suffers much, which he endures with great heroism and patience. He finally dies in peace. See MARIUS, COSETTE.

Valley of Humiliation, in Bunyan's "Pilgrim's Progress," the valley in which Christian defeated Apollyon. — Valley of the Shadow of Death, in Bunyan's "Pilgrim's Progress," the valley through which Christian was obliged to pass on his way to the Celestial City. "Now this valley is a very solitary place: the prophet Jeremiah thus describes it: 'A wilderness, a land of deserts and of pits, a land of drought, and of the Shadow of Death, a land that no man (but a Christian) passeth through, and where no man dwelt.'"

valley roof. *Arch.* A roof having one or more valleys.

valley train. *Phys. Geog.* The filling of gravel, sand, etc., deposited in a valley by drainage from glaciers.

Val'lis-ne'ri-a (văl'ĭs-nē'rĭ-ă), *n.* [NL., after Antonio *Valisnieri* (1661–1730), Italian naturalist.] *Bot.* A genus of submerged aquatic plants typifying the family Vallisneriaceæ. Of the two species, one is the tape grass.

Val'lis-ne'ri-a'ce-æ (-ā'sē-ē), *n. pl.* [NL.] *Bot.* A family of the formula $C_5H_9CONH_2$.

Va-le'ri-a (vă-lē'rĭ-ă), *n.* [L., fem. of *Valerius*.] Fem. prop. name. Cf. *Valère* (vă'lĕr'). It. *Valeria* (vä-lā'rē-ä); G. *Valerie* (vä-lā'rē-ē).

valerian oil. See OIL, *Table I.*

val'er-in (văl'ĕr-ĭn), *n.* (*valerie* + *glycerin.*) *Chem.* A glyceryl ester ($C_{15}H_{32}O_6$) of valeric acid. It is an oil and is a constituent of certain animal fats.

val'er-one (-ōn), *n.* *Chem.* A ketone, $(C_4H_9CO)_2CO$, got as an oily liquid by distilling calcium valerate with quicklime.

val'er-yl (-ĭl), *n.* [*valeric* + *-yl.*] *Chem.* The hypothetical radical C_5H_9O, the radical of valeric acid. Cf. BENZOYL.

val'er-yl-ene (-ĭ-lēn), *n.* *Chem.* A liquid hydrocarbon, C_5H_8; pentine; specif., methyl ethyl acetylene, $CH_3C{:}CC_2H_5$.

‖ **va'let' de pied'** (vă'lĕ' dĕ-pyā'). [F.] A footman.

‖ **va'let' de place'** (plās'). [F.] A valet who serves transient travelers or strangers, often, in Europe, acting as guide.

val'et-dom (văl'ĕt-dŭm; văl'ā-), *n.* See -DOM.

‖ **va-le'te ac plau'di-te.** [L.] Farewell and applaud.

val'et-ry (văl'ĕt-rĭ), *n.* Attendance or service of a valet. *Rare.*

val'e-tude, *n.* [L. *valetudo*.] Health; also, sickness. *Obs.*

val'e-tu-di-na'ri-a, *n.*, *pl.* of VALETUDINARIAN.

val'e-tu-di-na'ri-um (văl'ĕ-tū'dĭ-nā'rĭ-ŭm; 115), *n.*; *pl.* -RIA (-ă). [L.] An infirmary; a hospital. *Chiefly Rom. Antiq.*

val'e-tu'di-nous (-tū'dĭ-nŭs), *a.* Valetudinarian. *Obs.*

valew. + VALUE. [-WARD.]

vale'ward (vāl'wĕrd), *adv.* See **vale'-wa'ter,** *n.* [Cf. F. *aval* downstream.] Water flowing downstream. *Obs. or R.* [VALUE.]

valewe. + FALLOW, to fade; **valey, valeye.** + VALLEY.

va'li' (vă'lē'), *n.* [Turk., fr. Ar. *wālī*.] A governor-general of a vilayet.

Va'li (vä'lē), *n.* [Icel.] *Norse Myth.* One of the Æsir, son of Odin, and avenger of Balder. He survives Ragnarok.

val'iance (văl'yăns), *n.* [Cf. F. *vaillance*. See VALIANT.] **1.** Valiancy. *Obs. or R.*

2. Esteem. *Obs.*

3. A valiant deed. *Obs.*

val'iant, *adv.* Valiantly. *Obs.*

val'iant, *n.* A valiant person. *Obs.*

valiantise, *n.* [OF. & F. *vaillantise*.] Valiantness. *Obs.*

valiasnce. + VALIANCE.

val'id, *v. t.* [Cf. F. *valider* to validate.] To vouch for; to corroborate. *Obs.*

val'id-ly, *adv.* of VALID.

val'id-ness, *n.* See -NESS.

val'i-dol (văl'ĭ-dōl; -dŏl), *n.* *Pharm.* Menthol valerate, $C_{15}H_{28}O_2$, a liquid of mild odor and cooling taste, used as an antiseptic and antihydrotic.

val'i-dous. Var. of VALLIDOM.

val'inch (văl'ĭnch), *n.* [Cf. F. *avaler* to let down, drink up. Cf. AVALANCHE.] A tube for drawing liquors from a cask by the bung. *Obs.*

Va/lois' (vȧ/lwȧ'), *a.* [F.] Of or pertaining to the house of Valois, a French royal family reigning from 1328 to 1589.

Valois headdress, an arrangement of the hair, for women, drawn back from the forehead into a roll.

va-lo/ni-a (vȧ-lō/nĭ-ȧ), *n.* [It. *vallonia*, *vallonea*, fr. NGr. *βαλανιά*, *βαλανιδιά*, the holm oak, *βαλάνι*, *βαλανίδι*, an acorn, fr. Gr. *βάλανος*.] **1.** The immature dried acorn cups of the valonia oak. They contain from 25 to 40 per cent of tannin, and are used in tanning and dyeing, generally mixed with other substances. When ground they yield the so-called *valonia flour*. Cf. CAMATA.

2. [*cap.*] [NL., fr. It. *valonia*; perh. from its resemblance to an acorn.] *Bot.* A genus of marine green algæ constituting the family Valoniaceæ. The thallus is a single oval or cylindrical multinucleate cell, often an inch long.

valonia oak. A tall evergreen oak (*Quercus ægilops*) of southeastern Europe and Asia Minor. Its prickly acorn cups (valonia) and immature acorns (camata) are of commercial importance. The wood is used for furniture.

val'or, val'our (văl'ẽr), *n.* [ME. *valour*, OF. *valor*, *valur*, *valour*, F. *valeur*, LL. *valor*, fr. L. *valere* to be strong, or worth. See VALIANT.] **1.** Value; worth. *Obs.*

2. Strength of mind or spirit which enables a man to encounter danger with firmness; personal bravery; courage.

For contemplation he and *valor* formed. *Milton.*

3. A brave man; a man of valor. *Rare.* *Ld. Lytton.*

Syn.—Heroism, bravery, gallantry, boldness, intrepidity, fearlessness. See COURAGE.

val'or-i-za'tion (văl'ẽr-ĭ-zā'shŭn), *n.* [Pg. *valorização*.] Act or process of attempting to give an arbitrary market value or price to a commodity by governmental interference, as by maintaining a purchasing fund, making loans to producers to enable them to hold their products, etc.; — used chiefly of such action by Brazil.

val'or-ous (văl'ẽr-ŭs), *a.* [Cf. F. *valeureux*, LL. *valorosus*.] **1.** Having value or worth. *Obs.*

2. Possessing, exhibiting, or characteristic of, valor; brave. — **val'or-ous-ly**, *adv.* — **val'or-ous-ness**, *n.*

Val-sal'va (văl-săl'vȧ), *or, incorrectly*, **Val-sal'vi-an** (-vĭ-ăn), *a.* Of or pertaining to Valsalva, an Italian anatomist of the 17th century. — **Valsalvan experiment**, *Med.*, the process of inflating the middle ear by closing the mouth and nostrils, and blowing so as to puff out the cheeks. — **V. sinuses.** = SINUSES OF VALSALVA.

val'u-a-ble (văl'ū-ȧ-b'l), *a.* **1.** Susceptible of being measured or estimated as to value; appraisable; as, treasures of character not *valuable* in money.

2. Of financial or market value, esp. in considerable degree; commanding or worth a good price; as, a *valuable* horse, farm, cargo, franchise.

3. Of considerable worth in any respect; worthy; estimable; precious; as, a *valuable* friend; *valuable* counsel.

Syn. — VALUABLE, PRECIOUS. That is VALUABLE which has either permanent worth or useful qualities; PRECIOUS implies high value, whether intrinsic or resulting from some association; as, a *valuable* property, a *valuable* citizen; "Wisdom] is more *precious* than rubies" (*Prov.* iii. 15); "*precious* friends" (*Shak.*). See COSTLY, RICH, PRICE.

valuable consideration, *Law*, an equivalent or compensation having value given for a thing purchased, as money, marriage, services, etc. It may consist either in some right, interest, profit, or benefit accruing to one party, or some responsibility, forbearance, detriment, or loss, exercised by, or falling upon, the other party.

val'u-a-ble, *n.* A precious possession; a thing of value, esp. a small thing, as a jewel; — used mostly in *pl.*

val'u-ate (văl'ū-āt), *v. t.* To place a value on; to value. *Rare.*

val'u-a'tion (-ā'shŭn), *n.* **1.** Act of valuing, or of estimating value or worth; act of setting a price; estimation; appraisement; as, a *valuation* of lands; a *valuation* of life.

2. Value set upon a thing, estimated value; as, the goods sold for more than their *valuation*.

3. *Life Insurance.* The determination of the present value of a policy as determined by the present value of all the premiums expected to be received on the policy; — called **gross valuation** when based upon the total premiums (net premiums, plus loading, etc.), and **net valuation**, or usually **simply valuation**, when based upon the net premiums, the value in the latter case being equal to the reserve (which see). The net valuation is the one actually used.

valuation survey. *Forestry.* The measurement or other detailed study of the stand upon an area. Two kinds are distinguished: **a** The **strip survey**, which comprises the measurement of the stand, on a given portion of it, upon strips usually 1 chain wide. **b** The **plot survey**, which comprises the measurement of the stand, or a given portion of it, upon isolated plots not in the form of strips.

val'u-a'tor (văl'ū-ā'tẽr), *n.* One who assesses, or sets a value on, anything; an appraiser. *Swift.*

val'ue (văl'ū), *n.* [OF. *value*, fr. *valoir*, p. p. *valu*, to be worth, fr. L. *valere* to be strong, to be worth. See VALIANT.] **1.** The property or aggregate properties of a thing by which it is rendered useful or desirable, or the degree of such property or sum of properties; worth; excellence; utility; importance.

That all the world he set at no *value*. *Chaucer.*

Ye are of more *value* than many sparrows. *Matt.* x. 31.

2. Specif.: *Economics.* **a** Efficiency in exchange; power which an object confers upon its possessor, irrespective of political compulsion or personal sentiment, to command the commodities and services of others; purchasing power in the abstract. **b** Concrete purchasing power; the specific quantity of another object for which a given object can be exchanged; a price which can be actually obtained. The value of an article depends, not upon its *total* utility, but upon its *marginal* utility (see under UTILITY), diminishing as the supply increases. It will usually be proportionate to the cost of production; because when the value of an article is above its cost producers will tend to increase the supply, while if its value is below its cost producers will tend to diminish the supply. **c** Proper price; the quantity of money, goods, or services which an article is likely to command in the long run, as distinct from its price in an individual instance; a legitimate price, as distinct from an unfair or extortionate one; — sometimes called *normal value*, in contrast to *market value*.

The commercial or competitive theory bases *value* upon what the buyer is willing and able to offer for an article; the socialistic theory bases it upon what the article has cost the seller in the way of toil and sacrifice. *F. A. Walker.* *T. Hadley.*

d The estimate which an individual places upon some of his possessions as compared with others, independently of any intent to sell; — sometimes called *subjective value*, or, less correctly, *value in use*, and employed in a loose sense as nearly equivalent to *utility*.

Value in use is utility, and nothing else, and in political economy should be called by that name and no other. *F. A. Walker.*

3. Precise signification; import; as, the *value* of a word.

4. Esteem; regard; also, estimated worth; valuation; as, one's *value* for a friend. *Obs. or R.* *Dryden.*

5. *Music.* The relative length or duration of a tone or note, answering to *quantity* in prosody; thus, a quarter note has the *value* of two eighth notes.

6. **a** That property of a color by which it is distinguished as bright or dark; luminosity. See COLOR, 1; LIGHT, 1 **c**. **b** Degree of lightness as conditioned by the presence of white or pale color, or their opposites. **c** Hence, in painting and other graphic arts, the relation of one part or detail in a picture to another with respect to light and shade, esp. as affected by considerations of brightness or shadow, of distance, surface texture, and atmospheric plane. Thus a detail is **out of value** when it is too light or too dark to preserve the relationship of tone which it should have in the given surroundings, distance, etc.

7. In form *valew*. Valor. *Obs.* *Spenser.*

8. *Math.* Any particular quantitative determination; as, a function's *value* for some special value of its argument.

9. A valuable consideration, as in value received, a phrase often used, esp. on negotiable paper, to denote that it was given for a valuable consideration.

10. *pl.* The valuable ingredients to be obtained by treatment from any mass or compound; specif., the precious metals contained in rock, gravel, or the like; as, the vein carries good *values*; the *values* on the hanging walls.

Syn. — See PRICE.

at value, *Com.*, at the value fixed by the ruling, or current, market price; — a phrase used where goods are sold subject to the price being fixed at some time later than the sale, as when shipment is made. — **v. of service**, *Railroad Transportation*, the highest sum which any particular class of shippers will pay rather than forgo sending their goods by the route charging it. Such imposition of transportation charges on this basis is called "charging what the traffic will bear." — **v. received**, a phrase usually employed in a bill of exchange or a promissory note, to denote that it was not given without a consideration, as if an accommodation note.

val'ue (văl'ū), *v. t.*; VAL'UED (-ūd); VAL'U-ING (-ū-ĭng).

1. To estimate the value, or worth, of; to rate at a certain price or value; to appraise; also, now rarely, to reckon or regard with respect to number, power, amount, etc.; to rate; to estimate; as, to *value* a house at $10,000.

The queen is *valued* thirty thousand strong. *Shak.*

2. To rate or regard highly; to have in high esteem; to appreciate; prize; esteem.

Which of the dukes he *values* most. *Shak.*

3. To raise to estimation; to cause to have value, either real or apparent; to enhance in value. *Obs.*

Some *value* themselves to their country by jealousies of the crown. *Sir W. Temple.*

4. To take note or account of; to regard; esp., to regard carefully or as of importance. *Now Rare.*

In sickness . . . the mind doth *value* every moment. *Bacon.*

5. To be worth; to be equal to in value. *Obs.*

The peace between the French and us not *values*
The cost that did conclude it. *Shak.*

6. To represent as rich, trustworthy, or solvent. *Obs.*

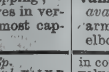
Syn. — Compute, rate, appraise; esteem, respect, regard, prize, appreciate. See ESTIMATE.

val'ue, *v. i.* In the phrase: **to value upon**, *Com.*, to draw a bill on or against. *Eng.*

val'ued (-ūd), *prel. & p. p.* of VALUE; specif.: *a.* Highly regarded; esteemed; prized; as, a *valued* friend. — **valued policy**, *Fire Insurance*, a policy in which the value of the goods, property, or interest insured is specified — opposed to *open policy*. — **v.-policy law**, *Fire Insurance*, a law requiring insurance companies to pay to the insured, in case of total loss, the full amount of the insurance, regardless of the actual value of the property at the time of the loss.

valv'al (văl'vȧl), **valv'ar** (văl'vär), *a.* [From VALVE.] *Biol.* Valvular. — **valval view**, *Bot.*, the view of a diatom in which the surface of one of the valves is next the observer; — called also *side view*. Opposed to *zonal view*.

Val-va'ta (văl-vā'tȧ), *n.* [NL. See VALVATE.] *Zoöl.* A genus of fresh-water tænioglossate operculate gastropods having the gill attached only by its base, so that it forms a featherlike process outside the shell when extended. **b** An order of starfishes having on the dorsal surface plates covered with a mail of minute granules.



Valvata (*V. tricarinata*). Nat. size.

valv'ate (văl'vāt), *a.* [L. *valvatus* having folding doors. See VALVE.] **1.** Resembling, or serving as, a valve; consisting of, or opening by, a valve or valves; valvular.

2. *Bot.* a Meeting at the edges without overlapping; — said of sepals or petals in æstivation, and of leaves in vernation. **b** Opening as if by doors or valves, as most capsules, some anthers, etc.

valve (vălv), *n.* [L. *valva* the leaf, fold, or valve of a door: cf. F. *valve*.] **1.** A door; esp., one of a pair of folding doors, or one of the leaves of such a door.

2. *Mech.* Any of numerous devices by which the flow of liquid, air or other gas, loose material in bulk, etc., may be started, stopped, or regulated by a movable part which opens, shuts, or partially obstructs one or more ports or passageways; also, the movable part of such a device. Cf. 4th COCK, 6. The movable part may be a hinged lid or disk, a ball which lifts or rolls, a plug or disk with beveled edge fitting in a correspondingly shaped seat, a swiveling plate, any of many variously shaped sliding devices, a rocking or rotating plug or cylinder partly cut away to permit flow in certain positions, etc. Valves may be operated by the difference of fluid pressure on opposite sides of the movable part, by hand, or mechanically. They often close by their own weight or by a spring. See CHECK VALVE, EXPANSION VALVE, GATE VALVE, LIFT VALVE, PISTON VALVE, SAFETY VALVE, SLIDE VALVE, THROTTLE VALVE, etc.

3. *Elec.* Any device, as a kind of vacuum tube or of electrolytic cell, that permits a flow of current in one direction only, used esp. for rectifying alternating currents.

4. *Anat.* Any of various structures for temporarily closing a passage or orifice or for permitting a movement of fluid in one direction only. It may consist of a sphincter muscle or of two, sometimes three, membranous folds inclined in the normal direction of flow. Reversal of this direction causes their free edges to come together. Such valves are numerous in the veins and lymphatics. See also MITRAL, TRICUSPID, and SEMILUNAR VALVES.

5. *Bot.* a One of the segments or pieces into which a dehiscing capsule or legume separates. **b** The lidlike portion of certain anthers, as of the barberry. **c** One of the two silicified shells or incasing membranes of a diatom.

6. *Zoöl.* **a** One of the distinct pieces, usually movably articulated, of which the shell of lamellibranch mollusks, brachiopods, barnacles, and some other shell-bearing animals consists. **b** One of the pieces forming the sheath of the ovipositor or external genital organs of many insects.

7. *Music.* A device in instruments of the horn and trumpet class for quickly varying the tube length in order to change the fundamental tone by some definite interval. It is usually either a form of piston or rotary valve. On depressing its key, the valve deflects the air through a supplementary tube. Three valves are commonly used, lowering the tone respectively by a step, half step, and a step and a half. By their means the natural brass instruments are rendered chromatic, but this and their comparative ease and quickness of manipulation are somewhat offset by the inferiority of tone caused by the angles which they introduce into the air column.

valve of Bau'hin' (bō'ăN') [after G. *Bauhin*, French anatomist], *Anat.*, the ileocæcal valve. — **v. of Has'ner** (häs'nẽr) [after Joseph von *Hasner* (1819-92), Austrian oculist], *Anat.*, an imperfect valve at the opening of the nasal duct into the inferior meatus of the nose. — **v. of Vieus'sens'** (vyŭ'săN') [after R. *Vieussens* (1641-1715), French anatomist], *Anat.*, a thin lamina of white matter extending between the superior peduncles of the cerebellum, forming the roof of the upper or anterior part of the fourth ventricle. — **valves of Kerck'ring** (kẽrk'rĭng) [after Theodor *Kerckring* (1640-93), German physician], *Anat.*, the valvulæ conniventes.

valve chest. *Mach.* A chamber in which a valve works; specif., a steam chest.

valved (vălvd), *a.* Having a valve or valves; valvate.

valve gear. *Mach.* Any of numerous gears by which motion is given to the valve or valves of an engine, esp. of a steam engine; specif., such a gear for a steam engine by which the cut-off may be varied while the engine is running, and the engine started, stopped, or reversed. Cf. LOOSE ECCENTRIC. The link motion (which see) forms an important class of valve gears, and is simplified in the radial gear by replacing either or both of the eccentrics, and sometimes also the slotted link, by one or more radius rods, etc. **Hackworth's valve gear** (fig. 1 in *Illust.*) is a typical radial gear with one eccentric. Reversing is effected by shifting over the slotted link (*C*) to the dotted position. **Joy's valve gear** (fig. 2) takes its motion from the connecting rod (*D*), as do some others. **Marshall's valve gear** (fig. 3) has one eccentric and no slotted link. Reversing is accomplished by moving over the swinging link (not shown) which carries the pivoted support (*E*) of the radius rod. The **Corliss valve gear** is a trip gear in which a central wrist plate, moved by an eccentric rod, operates four rocking valves, one steam valve and one exhaust valve at each end of the cylinder.

Valve Gears. *A* Valve Rod; *B* Eccentric.

valve'less, *a.* Having no valve or valves; specif., *Mach.*, having no separate valve, as a two-cycle engine in which the piston, in covering or uncovering port openings in the cylinder, acts as a valve to control admission and exhaust.

valve'let, *n.* A little valve; a valvule; esp., one of the pieces which compose the outer covering of a pericarp.

val'vu-la (văl'vŭ-lȧ), *n.*; *pl.* VALVULÆ (-lē). [NL., dim. fr. L. *valva* valve of a door.] *Anat.* A little valve or fold.

‖ **val'vu-læ con'ni-ven'tes** (văl'vŭ-lē kŏn'ĭ-vĕn'tēz) [NL., closing valves], *Anat.*, transverse or oblique folds of the mucous membrane lining the small intestine, which serve to detain the food and to increase the surface for secretion and absorption. They bear villi upon their surface. The two layers are bound together by submucous tissue. They become few and disappear in the lower part of the ileum.

val'vu-lar (văl'vŭ-lär), *a.* [Cf. F. *valvulaire*.] **1.** Of or pert. to a valve or valves; specif., *Med.*, of or pert. to the valves of the heart; as, *valvular* disease.

2. Containing, or opening by, valves; serving as a valve.

val'vu-li'tis (văl'vŭ-lī'tĭs), *n.* [NL. See VALVULA; -ITIS.] *Med.* Inflammation of a valve of the heart or of a vein.

val'yl-ene (văl'ĭ-lēn), *n.* [valerian + *-yl* + *-ene*.] *Chem.* An unsaturated hydrocarbon, C_5H_8, related both to ethylene and acetylene. It is a volatile liquid with a garlic odor formed by action of alcoholic potash on valerylene dibromide.

vam'brace (văm'brās), *n.* [F. *avant-bras*, lit., forearm, *avant* fore + *bras* arm. Cf. VANTBRACE.] In medieval armor, the piece designed to protect the arm from the elbow to the wrist. See REREBRACE, *Illust.*

val-lo'ne oak (vȧ-lō'nē). Var. of VALONIA OAK.

val-lo'ni-a. Var. of VALONIA.

val'ly (văl'ĭ; vȧl'ĭ). Dial. Eng. var. of FELLOE.

Va-lo'ni-a'ce-æ (vȧ-lō'nĭ-ā'sē-ē), *n. pl.* [NL.] *Bot.* See VALONIA, 2. — **va-lo'ni-a'ceous** (-shŭs), *a.*

valop. ✝ WALLOP.

val'or-ous-ness, *n.* See -NESS.

val'our. Var. of VALOR.

valouwe. ✝ FALLOW.

val'pa-ral'so oak (văl'pȧ-rȧ'-zō). The cañon live oak. *Calif.*

vals, valse. ✝ FALSE.

valse (vals), *n.* [F.] *Music.* = WALTZ, esp. a concert waltz.

valsen, valson. ✝ FAUSEN.

valsere. ✝ FALSER.

valsliche. ✝ FALSELY.

valter. ✝ FALTER, WATER.

val'u-a-bl. Valuable. *Ref. Sp.*

val'u-a-ble-ness, *n.* See -NESS.

val'u-a-bly, *adv.* of VALUABLE.

val'u-a'tion-al (-ā'shŭn-ăl), *a.* Of or pertaining to valuation.

val'ue-less, *a.* See -LESS.

val'ue-less-ness, *n.* See -NESS.

val'u-er (văl'ū-ẽr), *n.* One who values.

valure. ✝ VALOR.

valure, *n.* Value; worth. *Obs.*

valurous. ✝ VALOROUS.

valv. Valve. *Ref. Sp.*

val'va (văl'vȧ), *n.*; *pl.* VALVÆ (-vē). [L.] *Anat.* A valve.

val'va-sor (văl'vȧ-sôr). Var. of VAVASOR.

valve box. = VALVE CHEST.

valve casing. = VALVE CHEST.

valve, or valved, coupling. A pipe coupling containing a valve.

valve face. *Mach.* The part of the surface of a valve which comes in contact with the valve seat.

valve motion. = VALVE GEAR.

valve ring. = RELIEF FRAME.

valve view. = VALVAL VIEW.

val-vif'er-ous (văl-vĭf'ẽr-ŭs), *a.* [*valve* + *ferous*.] Having a valve or valves.

valv'i-form (văl'vĭ-fôrm), *a.* Like, or acting as, a valve.

val'vule (văl'vūl), *n.* [Cf. F. *valvule*.] A small valve or valvelike structure.

valyaunt. ✝ VALIANT.

valye. ✝ VAIL.

vamp (vămp), *n.* [ME. *vampe, vaumpe, vaunipe*, F. *avantpied* the forefoot, vamp ; *avant* before, fore + *pied* foot, L. *pes.* See ADVANCE, VAN of an army ; FOOT.] **1.** A short hose coming to the calf, formerly sometimes worn over a stocking ; a sock. *Obs. or Dial.* **2.** The part of a boot or shoe above the sole and welt, and in front of the ankle seam ; an upper. See SHOE, *Illust.* **3.** Any piece added to an old thing to make it look new. **4.** *Music.* An accompaniment, generally improvised, consisting of a repeated succession of simple chords.

vamp, *v. t.* ; VAMPED (vămpt) ; VAMP'ING. **1.** To provide, as a shoe, with new upper leather ; hence, to piece, as any old thing, with a new part ; to patch ; — often with *up.*

I had never much hopes of your *vamped* play. *Swift.*

2. *Music.* To make a vamp to ; to improvise.

vamp, *v. i. Music.* To play a vamp.

vam'pire (văm'pir), *n.* Also *vampyre.* [F. *vampire* (cf. It. *vampiro*, G. *vampyr*, D. *vampir*), fr. Slavic ; cf. Servian *vampir* ; perh. ultimately connected with Turk. dial. *uber* witch.] **1.** A bloodsucking ghost or reanimated body of a dead person ; a soul or reanimated body of a dead person believed to come from the grave and wander about by night sucking the blood of persons asleep, causing their death. This superstition is now prevalent in parts of eastern Europe, and was esp. current in Hungary about 1730.

The persons who turn *vampires* are generally wizards, witches, suicides, and persons who have come to a violent end, or have been cursed by their parents or by the church. *Encyc. Brit.*

2. Fig. : One who lives by preying on others ; an extortioner ; a bloodsucker.

3. Also **vampire bat.** Any of certain bats so called because they are or were popularly (but in most cases incorrectly) supposed to suck the blood of animals ; esp. : **a** The great or false vampire (*Vampyrus spectrum*) and species of the genus *Phyllostoma*, which are large but probably entirely harmless South and Central American leaf-nosed bats. **b** Any of those, the true vampires, which actually suck the blood of animals, including men. They belong to the South American genera *Desmodus, Diæmus*, and *Diphylla*, of the family Phyllostomatidæ. Their incisor and canine teeth are modified for cutting, the stomach is small and tubular, and the intestine very short and not adapted for any food except blood. The best-known species (*Desmodus rufus*) is reddish brown, tailless, and not much over three inches long. Its bite is not dangerous. **c** Incorrectly, any of various Old World fruit bats.

Head of False Vampire (*Vampyrus spectrum*).

Skull of True Vampire (*Desmodus*).

vam-pir'ic (văm-pĭr'ĭk), *a.* Of, pertaining to, or resembling, a vampire.

vam'pir-ism (văm'pĭr-ĭz'm ; văm'pĭ-rĭz'm), *n.* [Cf. F. *vampirisme.*] **1.** Belief in vampires (the ghosts).

2. The actions of a vampire ; act or practice of bloodsucking ; also, fig., the practice of extortion or of preying upon others, esp. secretly.

vam'plate (văm'plāt'), *n.* [F. *avant* before, fore + E. *plate.*] A round plate of iron on the shaft of a lance or tilting spear, to protect the hand.

van (văn), *n.* [Abbr. fr. *vanguard.*] The front of an army, fleet, or advancing body composed of individuals ; specif., in a military formation, the leading unit ; hence, the front or those at the front of any movement ; as, a nation in the *van* of progress.

van, *n.* [E., fr. L. *vannus* a van, or fan, for winnowing grain ; or dial. form of E. *fan.* Cf. FAN, WINNOW.] **1.** A fan or other winnowing device. *Obs. or Dial.*

2. A shovel used in dressing ore. Cf. VANNER, 2. *Dial. Eng.*

3. A wing. *Archaic.* "Plumy *vans.*" *Milton.*

van, *v. t.* ; VANNED (vănd) ; VAN'NING. [Cf. F. *vanner* to winnow, to fan. See VAN a fan.] **1.** To fan or winnow. *Obs. or Dial.*

2. To dress (ore) with a van or vanner. *Dial., S. W. Eng.*

van, *n.* [Abbr. fr. *caravan.*] **1.** A light wagon, either covered or open, used by tradesmen and others for the transportation of goods. *Eng.*

2. A large covered wagon, esp. one for moving furniture, etc., or one for conveying wild beasts, etc., for exhibition.

3. A close railway car for baggage. See CAR, *n.*, 2. *Eng.*

4. In a lumber camp, a small general store, sometimes on wheels, at which clothing, tobacco, and other small articles for the crew are kept for sale. *Local, U. S. and Canada.*

van, *v. t.* To carry in a van.

van'a-date (văn'ā-dāt), *n.* Also **va-na'di-ate** (vā-nā'dĭ-āt). [Cf. F. *vanadate.*] *Chem.* A salt of vanadic acid.

va-nad'ic (vā-năd'ĭk ; -nā'dĭk), *a. Chem.* Pert. to or containing vanadium ; specif., designating those compounds in which vanadium has a relatively higher valence than in the *vanadious* compounds ; as, *vanadic* oxide.

vanadic acid, *Chem.*, any of three oxyacids of vanadium, analogous to the three phosphoric acids and known respectively as *orthovanadic acid*, H_3VO_4, *metavanadic acid*, HVO_3, and *pyrovanadic acid*, $H_4V_2O_7$; specif., the ortho acid. Metavanadic acid is known as a golden-yellow crystalline solid, and is used as a pigment under the name of *vanadium bronze* or *yellow.* It lacks permanency.

va-nad'i-nite (-ĭ-nīt), *n. Min.* A mineral occurring in yellowish, brownish, and ruby-red hexagonal crystals. It consists of lead vanadate with a small proportion of lead chloride. H., 2.75–3. Sp. gr., 6.66–7.10.

va-na'di-ous (vā-nā'dĭ-ŭs), *a. Chem.* Pert. to or containing vanadium ; specif., designating compounds in which vanadium has a lower valence than in *vanadic* compounds.

vanadious acid, an acid, HVO_2, analogous to nitrous acid, known in the form of its salts, the *vanadites.*

va-na'di-um (-ŭm), *n.* [NL., fr. Icel. *Vanadís*, a surname of the Scandinavian goddess Freya.] *Chem.* A rare element of the nitrogen-phosphorus group, discovered in 1801 by Del Rio, and rediscovered in 1830 by Sefström. It is found combined, in vanadates, in certain minerals (as vanadinite and descloizite), and is reduced as a grayish white metallic powder with the sp. gr. 5.5 and fusing at about 3000° C. It is feebly basic and has strongly acid properties. It exhibits the valences 1, 2, 3, 4, and 5, the last being most stable. Symbol, *V* (or rarely *Vd*) ; at. wt., 51.0.

vanadium steel. Steel alloyed with vanadium (usually about 0.10 to 0.15%), an element which strengthens the steel and serves to remove oxygen and possibly nitrogen.

van'a-dyl (văn'ā-dĭl), *n.* [*vanadium* + *-yl.*] *Chem.* The radical VO, conveniently regarded as present in certain vanadium compounds.

Van'cou-ve'ri-a (văn'kōō-vē'rĭ-ā), *n.* [NL., from Fort *Vancouver*, California.] *Bot.* A genus of berberidaceous herbs containing two species, of western North America. They have dissected basal leaves and small panicled white flowers with numerous sepals and six petals. va'ri-a-bil'i-ty (vā'rĭ-ă-bĭl'ĭ-tĭ; 115), *n.* **1.** Quality or state of being variable; variableness.
2. *Biol.* The quality or attribute of animals and plants which causes them to exhibit variation; ability to vary, from whatever cause. Cf. VARIATION, 10.

va'ri-a-ble (vā'rĭ-ă-b'l; 115), *a.* [L. *variabilis*: cf. F. *variable.*] **1.** Having the capacity of varying or changing; changeable; as, *variable* winds; a *variable* quantity.
2. Liable to vary; too susceptible of change; mutable; fickle; unsteady; inconstant; as, passions are *variable*.
Lest that thy love prove likewise *variable*. *Shak.*
3. *Biol.* Not true to type; aberrant; inconstant; — said of a species or of a specific character.
Syn. — Changeable, mutable, fickle, unsteady, inconstant. **variable gear.** *Mach.*, a gear wheel of irregular outline, which gears with a corresponding wheel so that the velocity ratio changes one or more times throughout a single revolution. Hence, v. gearing. — **v.-speed gear.** *Mach.* = CHANGE GEAR. — **variable stars.** *Astron.*, fixed stars which vary in their apparent magnitude, usually in more or less uniform periods, regarded as due either to internal changes or to external causes, such as eclipse by a dark companion.

va'ri-a-ble (vā'rĭ-ă-b'l), *n.* **1.** That which is variable; that which varies, or is subject to change.
2. *Math.* **a** A quantity that may increase or decrease continuously or discontinuously; a symbol that admits of an infinite number of values in the same expression; as, in the equation of a circle $x^2 + y = r^2$, x and y are *variables*. **b** A symbol standing for any one of a class of things.
3. *Naut.* **a** A shifting wind, or one that varies in force. **b** *pl.* Those parts of the sea where a steady wind is not expected, esp. the parts between the trade-wind belts; sometimes, the doldrums.
4. *Astron.* A variable star.
variable of integration. See ARGUMENT OF INTEGRATION.

va'ri-ance (vā'rĭ-ăns; 115), *n.* [L. *variantia*: cf. OF. *variance.*] **1.** Act of varying, or state of being variant; change of condition; variation; deviation; alteration.
2. Variableness; fickleness. *Obs.*
3. Difference that produces dispute or controversy; disagreement; dissension; discord; dispute; quarrel.
That which is the strength of their amity shall prove the immediate author of their *variance*. *Shak.*
4. *Law.* A disagreement or difference between two parts of the same legal proceeding, which, to be effectual, ought to agree, as the writ and the declaration, or the allegation and the proof. Under modern code pleading variances that do not actually mislead the opposing party to his prejudice in maintaining his action or defense on the merits are generally considered immaterial or amendable.
at variance, in a state of difference; not in harmony or agreement; as, his acts are *at variance* with his words; hence, in a state of dissension or controversy; at enmity.
"*At variance* with himself." *Milton.*

va'ri-ant (vā'rĭ-ănt; 115), *a.* [L. *varians*, p. pr. of *variare* to change: cf. F. *variant*. See VARY.] **1.** Varying in form, character, or the like, from something of the same general kind; different; diverse; as, a *variant* spelling.
2. Variable; changeable; fickle; restless. *Archaic.*
He is so *variant*, he abit [abides] nowhere. *Chaucer.*

va'ri-ant, *n.* [Cf. F. *variante.*] **1.** Something which differs in form from another thing, though essentially the same; as, a *variant* of a story, passage, word.
2. *Math.* A rational function of n linear functions (the determinant of whose n^2 constant coefficients is *not* 0) of n linearly unconnected particular solutions of a rational homogeneous linear differential equation, and in which all the n^2 coefficients are essential.
3. *Biol.* That which exhibits variation from type.

va'ri-ate (-āt), *v. t. & i.*; VA'RI-AT-ED (-āt/ĕd); VA'RI-AT'-ING (-āt'ĭng). [L. *variatus*, p. p. of *variare*. See VARY.] To alter; to make or become different; to vary; diversify.

va'ri-ate (-āt), *a.* [L. *variatus*, p. p.] Varied; diversified.

va'ri-a'tion (-ā'shŭn), *n.* [ME. *variacioun*, F. *variation*, OF. also *-cion*, L. *variatio*. See VARY.] **1.** Act of varying; a partial change in the form, position, state, or qualities of a thing; modification; alteration; mutation; diversity; deviation; as, a *variation* of color, size, language.
The essences of things are conceived not capable of any such *variation*. *Locke.*
2. Extent to which a thing varies; amount of departure from a position or state; amount or rate of change; as, great *variations* in temperature, speed, prices, etc.
3. Variance; difference; disagreement. *Obs.*
4. *Gram.* Change of form of words; inflection.
5. *Music.* Repetition of a theme or melody with embellishments or modifications, in time, tune, harmony, or key; the presentation of a musical thought in new and varied aspects, yet keeping the essential features of the original.
6. *Alg.* a One of the different linear arrangements that can be made of any number of objects taken from a set. **b** The sequence + — or — + in a row of such signs or of terms affected by them.
7. *Astron.* A change in the mean motion, mean orbit, etc., of a planet or other heavenly body; as, the *variation* of the moon depending on its angular distance from the sun.
8. *Magnetism.* = DECLINATION, *n.*, 8.
9. *Mach.* The maximum angular or phase displacement of the revolving member or armature of a machine from the position of uniform rotation. Cf. PULSATION, 5.
10. *Biol.* In an organism, divergence in characters from those typical or usual in the group (esp. the species) to which it belongs; also, divergence in the characters of the offspring from those of the parents producing it. Also, the concrete result or effect of such divergence; esp., an organism differing from a type or from its parents. *Variation* is often regarded as opposed to *heredity*. Variation is practically universal among organisms, and the solution of its causal relations is the chief problem of the study of evolution. Simple individual variations, or those arising in certain of the individuals of one parentage, were regarded by Darwin as fortuitous, or due to chance and subject to the operation of natural selection (which see). Fluctuating, or continuous, variations are essentially individual variations which occur with frequency and themselves vary within limits or around a mean. Sudden pronounced variations are saltatory, or discontinuous, variations. Determinate, or

definite, variation is that supposed to follow certain fixed lines predetermined, according to various theories, by inherent tendencies, by accumulated hereditary impulses, or by environmental influences (see ORTHOGENESIS). **Geographic variation** is that in which the individuals of a given region possess common characters unlike those of the same stock in adjacent regions (see SUBSPECIES).

Syn. — Change, vicissitude, variety, diversity, deviation.

variation of a curve, *Math.*, the change of a curve between two fixed points A and B into another very near-lying curve between A and B, effected by changing slightly the parameter θ on which the coördinates x and y of any point of the curve depend (*Lagrange*); also, the curve itself produced by this variation, called also *varied curve.* — **v. of an integral,** *Math.*, the difference in value of the line integral $\int F(x, y, y')dx$ taken along a curve between two fixed points A and B and taken along any adjacent varied curve from A to B. — **v. of constants** or **parameters,** *Math.*, a method for solving a differential equation by first solving a simpler equation and then generalizing this solution properly so as to include the original equation by treating the arbitrary constants not as constants, but as variables.

variation compass. A compass of delicate construction for observing the variation of the magnetic needle.

va'ri-a-tive (vā'rĭ-ā-tĭv; 115), *a.* Of, pertaining to, or showing, variation. — **va'ri-a-tive-ly,** *adv.*

va'ri-a'tor (-ā'tẽr), *n.* One that variates; as, a speed *variator.* Specif.: *Elec.* A kind of joint that compensates for variations in length due to temperature changes.

var'i-cel'la (văr'ĭ-sĕl'ȧ), *n.* [NL. Cf. VARIOLA.] *Med.* Chicken pox.

var'i-cel'late (-sĕl'ăt), *a.* [Dim. of *varix* + *-ate.*] *Zoöl.* Having small or indistinct varices; — said of certain shells.

var'i-cel'loid (-sĕl'oid), *a.* [*varicella* + *-oid.*] *Med.* Resembling varicella; as, *varicelloid* smallpox.

var'i-co-cele' (văr'ĭ-kō-sēl'), *n.* [*varix* a dilated vein + *-cele:* cf. F. *varicocèle.*] *Med.* A varicose enlargement of the veins of the spermatic cord or of the veins of the scrotum. It is more common on the left side, and gives rise to the formation of a soft compressible tumor mass.

var'i-cose (-kōs; *see* -OSE), *a.* [L. *varicosus,* fr. *varix, -icis,* a dilated vein; cf. *varus* a blotch, pimple.] **1.** Irregularly swollen or enlarged; affected with, containing, or pert. to, varices or varicosities; as, a *varicose* nerve fiber, vein, ulcers. **2.** *Med.* Intended for the treatment of varicose veins; — said of elastic stockings, bandages, and the like.

var'i-co'sis (-kō'sĭs), *n.* [NL. See VARIX; -OSIS.] *Med.* The formation of varices; varicosity.

var'i-cos'i-ty (-kŏs'ĭ-tĭ), *n.; pl.* -TIES (-tĭz). Quality or state of being varicose; also, a varix.

var'i-cot'o-my (-kŏt'ŏ-mĭ), *n.* [See VARIX; -TOMY.] *Surg.* Excision of a varicosity.

va-ric'u-la (vȧ-rĭk'ū-lȧ), *n.* [L., a small varix.] *Med.* Varicosity of the veins of the conjunctiva.

va'ried (vā'rĭd; 115), *p. a.* **1.** Changed; altered. **2.** Various; diversified; diverse; as, a *varied* experience; *varied* interests; *varied* scenery. **3.** Marked conspicuously or contrastingly with several colors, as many animals.

varied bunting, a bunting (*Passerina versicolor*) related to the nonpareil, found in eastern Mexico and southern Texas. The male is handsomely colored, with the plumage largely of shades of purplish and red, — v. **curve.** *Math.* See VARIATION OF A CURVE. — **v. thrush,** a thrush (*Ixoreus nævius*) of western North America similar in form and size to the robin, but rufescent or orange brown underneath, with black mark on the breast.

Varied Thrush. ($\frac{1}{10}$)

va'ri-e-gate (vā'rĭ-ē-gāt; 115), *v. t.;* -GAT'ED (-gā'tĕd); -GAT'ING (-gā'tĭng). [L. *variegatus,* p. p. of *variegare* to variegate; *varius* various + root of *agere* to move, make. See VARIOUS; AGENT.] To diversify in external appearance, esp. with different colors; to dapple; streak.

The shells are filled with a white spar, which *variegates* and adds to the beauty of the stone. *Woodward.*

va'ri-e-gat'ed (-gā'tĕd), *p. a.* Having marks or patches of different colors. — **variegated copper ore,** bornite. — **v. langur,** v. monkey, the douc. — **v. sheldrake,** the paradise duck. — **v. spider monkey,** a black, white, and yellow South American spider monkey (*Ateles variegatus*).

va'ri-e-ga'tion (-gā'shŭn), *n.* **1.** Act of variegating, or state of being variegated; diversity of colors or tints. **2.** *Bot.* The presence of two or more colors in leaves, stems, etc., often in irregular patches or markings, whether due to special pigments or (in the case of yellow or white foliage leaves) to their absence through etiolation.

va-ri'e-tal (vȧ-rī'ĕ-tăl), *a.* Of or pert. to, or characterizing, a variety; constituting a variety, in distinction from an individual or species; subspecific.

va-ri'e-tal-ly, *adv.* In the manner or with the characters of a variety; subspecifically.

va-ri'e-ty (-tĭ), *n.; pl.* -TIES (-tĭz). [L. *varietas:* cf. F. *variété.* See VARIOUS.] **1.** State or quality of being various or varied; intermixture or succession of different things or qualities; diversity; multifariousness.

There is a *variety* in the tempers of good men. *Atterbury.*
Age cannot wither her, nor custom stale
Her infinite *variety.* *Shak.*

2. Act of varying; variation. *Obs.* **3.** That which is various; as: **a** A number or collection of different things; a varied assortment; as, a *variety* of silks. **b** Something varying or differing from others of the same general kind; one of a number of things that are akin; a sort; as, *varieties* of wood, land, rocks, etc. **c** *Biol.* A group of animals or plants related by descent, but distinguished from other similar groups only by characters considered too inconstant or too trivial to entitle it to recognition as a species, or whose distinguishing characters are dependent on breeding controlled by man for their perpetuation; often, any group of lower rank than a species. Cf. GEOGRAPHICAL VARIETY. Hybrids between varieties of the same species are generally easily produced and fertile. As used by Darwin, Asa Gray, and other naturalists, a *variety* indicated a group or association of individuals whose characters were too inconstant or too trivial to entitle it to specific rank, and which, unlike species, produced fertile offspring when intercrossed. In modern usage the category next below a species is termed a *subspecies* (which see), and there is a prevailing tendency to abandon the word *variety* on account of its indefiniteness in meaning. In botany *variety* is sometimes used to indicate a special differentiation of a species (cf. MUTATION, 6) correlated with environmental conditions. In horticulture it is still frequently applied to cultivated forms artificially produced (**cultural varieties**). Among domestic animals *variety* often designates a subdivision of breeds based on color or some other minor character. **d** *Min. & Petrog.* One of those forms in which a species or kind may occur, which differ in minor characteristics of structure, color, purity of composition, etc.; as, the sapphire is a blue *variety* of corundum. **4.** Such entertainment as is given in variety shows; the production of, or performance in, variety shows. *Cant.*

Syn. — VARIETY, DIVERSITY. VARIETY suggests the diversified character of the elements involved, rather than their absolute or essential difference; DIVERSITY implies more marked difference or even divergence; as, "Earth hath this *variety* from heaven of pleasure situate in hill and dale" (*Milton*); "when Babel was confounded, and the great confederacy . . . was split into *diversity* of tongues" (*Cowper*); "They had brought from their remote old homes all *varieties* of hereditary gifts" (*W. Pater*); "Even between people of the best taste there are *diversities* of opinion on the same subject" (*Cowper*). See DIFFERENCE, CHANGE.

variety show. A stage entertainment of successive separate performances, usually songs, dances, acrobatic feats, short dramatic sketches, exhibitions of trained animals, or any specialties. Often loosely called *vaudeville show.*

va'ri-form (vā'rĭ-fôrm; 115), *a.* [L. *varius* various + E. *-form.*] Having various forms; also, *Obs.*, ambiguous. — **va'ri-form'i-ty** (-fôr'mĭ-tĭ), *n.*

va'ri-o-loid (vā'rĭ-ō-loid; văr'ĭ-; 115, 277), *a.* [*variola* + *-oid.*] *Med.* Resembling smallpox; pertaining to the disease called varioloid.

va'ri-o-loid, *n.* [Cf. F. *varioloïde.* See VARIOLOID, *a.*] *Med.* A modified mild form of smallpox, or variola, occurring in persons who have been vaccinated.

va-ri'o-lous (vȧ-rī'ō-lŭs), *a.* [LL. *variolosus,* fr. *variola* smallpox: cf. F. *varioleux.*] *Med.* Of or pert. to smallpox; having pits, or sunken impressions, like those of smallpox.

va'ri-om'e-ter (vā'rĭ-ŏm'ē-tẽr; 115), *n.* [L. *varius* various + E. *-meter.*] *Elec.* An instrument for comparing magnetic forces, esp. in the earth's magnetic field.

va'ri-o'rum (vā'rĭ-ō'rŭm; 115, 201), *a.* [L., abbr. fr. *cum notis variorum* with notes of various persons.] Containing notes by different persons; — applied to a publication; as, a *variorum* edition of Shakespeare's works. — *n.* A change; variation; diversion. *Scot. & Dial.*

va'ri-ous (vā'rĭ-ŭs; 115), *a.* [L. *varius.* Cf. VAIR.] **1.** Different; diverse; several; manifold; as, men of *various* names; *various* occupations; *various* colors.

So many and so *various* laws are given. *Milton.*

2. Changeable; uncertain; inconstant; variable.

The names of mixed modes . . . are very *various.* *Locke.*

3. Having or manifesting varied characteristics; many-sided; diversiform; also, variegated; diversified.

A man so *various,* that he seemed to be
Not one, but all mankind's epitome. *Dryden.*
A happy rural seat of *various* view. *Milton.*

Syn. — See DIFFERENT. — **va'ri-ous-ly,** *adv.* — **va'ri-ous-ness,** *n.*

va-risse' (vȧ-rĭs'), *n.* [Cf. F. *varice* varix. Cf. VARIX.] *Far.* An imperfection on the inside of the hind leg in horses, different from a curb, but at the same height, and often growing to an unsightly size.

va'rix (vā'rĭks), *n.; pl.* VARICES (văr'ĭ-sēz). [L.] **1.** *Med.* A permanent uneven or tortuous dilatation of a vein due to local retardation of the venous circulation or relaxation of the walls; a varicose vein. Varices occur mostly in the superficial veins of the legs, esp. of pregnant women. **2.** *Zoöl.* One of the prominent ridges or ribs across each whorl of certain univalves showing a former position of the outer lip of the aperture.

2. To cover; hide; conceal; cloak; mask.
To keep your great pretenses *veiled*. *Shak.*

veiled (vāld), *pret. & p. p.* of VEIL. Hence: *a.* **1.** Covered by or as by a veil; hidden. "A *veiled* meaning." *Earle.*
2. *Singing.* Characterized by a veil. See VEIL, *n.*, 3 **d**.
veiled plate, *Photog.*, a fogged plate. — **V. Prophet of Kho'rassan'** (kō'rä-sän'), the hero and title of a tale in Thomas Moore's "Lalla Rookh," based on the history of Hakim or Ata, surnamed Mokanna, i. e., "the Veiled," the founder of an Arabian sect in the 8th century. He pretended to be a god, and wore a veil to hide the (alleged) dazzling brightness of his countenance, but in fact to conceal disfigurements received in battle. — **v. wool,** wool in which the fibers do not unite into distinct staples, but overlap so that the curves are intermixed and hardly discernible.

veil'ing, *p. pr. & vb. n.* of VEIL. Hence: *n.* **1.** Act of covering with a veil.
2. A veil; a thin covering; also, gauzy material, as for veils.

vein (vān), *n.* [ME. *veine*, F. *veine*, L. *vena*.] **1.** *Anat. & Zoöl.* One of the system of tubular branching vessels (arising by the union of the capillaries in the various organs and tissues) which carry the blood back to the heart. In man and the higher animals they resemble the arteries in structure, but are thinner-walled, and often have valves at intervals to prevent reflux of the blood, which flows in a steady stream and in most veins is impure and dark-colored. Many of the arteries in their course are accompanied by veins, the larger by a single vein, smaller ones oftener by two veins, called the **venæ comites**. In many invertebrates having arteries distinct veins are wanting, the blood returning to the heart by cavities or spaces between the organs or in the tissues. See CIRCULATION, 4 **a**.
2. *Bot.* One of the vascular bundles forming the framework or fibrous tissue of a leaf; — called also *nerve*. The veins may represent several separate steles arising from a polystele system, or one or more pairs of veins (meristeles) from the single stele of the stem. They differ much in arrangement, mode of branching, etc. See VENATION.
3. *Zoöl.* One of the thickened ribs, nervures, or nerves which serve to stiffen the wings of insects.
4. *Geol. & Mining.* **a** A crack in rock filled by mineral matter deposited from solution by underground water. **b** A comparatively narrow sheet of igneous rock injected into a crevice in rock; — called specif. an *eruptive*, or *intrusive, vein* (really a thin *dike*). It may vary from the size of a thread to a breadth of several yards. When large, it is usually called a *dike*. **c** A lode. See LODE, *n.*, 4 and *Note*. **d** A bed; as, a *vein* of coal.
5. A fissure or cavity, as in the earth or other substance.
Let the glass of the prisms be free from *veins*. *Sir I. Newton.*
6. A streak or wave of different color or shade, appearing in wood, and in marble and other stones; variegation.
7. Anything of distinctive character considered as running through something else; a strain; as, a *vein* of humor; a particular disposition or turn of mind, or a peculiar manner of speech or conduct expressive of it; as, a satirical *vein*.
He can open a *vein* of true and noble thinking. *Swift.*
Syn. — Strain, touch, tinge, shade, smack, tang. — VEIN, STREAK, SPICE, DASH. VEIN and (*Colloq.*) STREAK denote a particular strain, turn, or cast (esp.) of mind or disposition; SPICE and DASH suggest a slight admixture or infusion, esp. such as gives zest, relish, or pungency; as, "this humorous *vein*" (*Prior*); "In Swift he discovered an inimitable *vein* of irony" (*Johnson*); "He had always had a *vein* of childish obstinacy" (*Mary Wilkins*); a stubborn *streak*; "There was a *spice* of obstinacy about Miss Dale" (*Trollope*); "A king of England should have a *spice* of the devil in his composition" (*Smollett*); "Sévigné . . . lover of Montaigne, and with a *spice* of his free thought and speech" (*E. FitzGerald*); "He is a man with a *dash* of genius in him" (*M. Arnold*); "Godwin . . . has a *dash* of affectation" (*Lamb*); cf. "an all-pervading *dash* of the COXCOMB" (*Carlyle*). See BENT, TURN, COLOR, TASTE.
veins of Ga'len (gā'lĕn) [after Claudius *Galen*, Roman physician], *Anat.*, veins in the velum interpositum, discharging by one or two main trunks into the straight sinus.

vel'li-cate (vĕl'ĭ-kāt), *v. t.*; -CAT'ED (-kāt'ĕd); -CAT'ING (-kāt'ĭng). [L. *vellicatus*, p. p. of *vellicare* to twitch, fr. *vellere* to pluck, pull.] To twitch; also, to cause to twitch.

vel'li-ca'tion, *v. i.* To move spasmodically; to twitch.

vel'li-ca'tion (-kā'shŭn), *n.* [L. *vellicatio.*] Act of twitching, or of causing to twitch; also, *Med.*, a local twitching, or convulsive motion, of a muscular fiber, esp. of the face.

vel'li-ca-tive (vĕl'ĭ-kā-tĭv), *a.* Having the power of vellicating, plucking, or twitching; causing vellication.

‖ **vel-lón'** (vĕl-yōn'), *n.* [Sp.] Spanish copper money; — also used somewhat like the English word *sterling* in the phrase *real de vellón.* See 2d REAL.

Vel-lo'zi-a (vĕ-lŏ'zĭ-ȧ), *n.* [NL. See VELLOZIACEÆ.] *Bot.* A genus of tropical African and Brazilian arborescent perennials, typifying the family Velloziaceæ. They have branching stems clothed with the bases of the stiff, linear, pointed leaves. Some species are cultivated for their handsome bell-shaped flowers under the name of *tree lily.*

Vel-lo'zi-a'ce-æ (-ā'sē-ē), *n. pl.* [NL., after José *Velloso* Xavier (1742–1811), Brazilian botanist.] *Bot.* A family of plants (order Liliales), of 2 genera and about 60 species, distinguished from Amaryllidaceæ by woody stems, one-flowered peduncles, commonly persistent perianth, and more numerous stamens. — **vel-lo'zi-a'ceous** (-shŭs), *a.*

vel'lum (vĕl'ŭm), *n.* [ME. *velim*, OF. *veelin*, F. *vélin*, orig. a., fr. OF. *veel* calf. See VEAL.] **1.** A fine parchment, usually of calfskin, made clear and white, for writing upon, binding books, etc.; hence, a vellum manuscript. **2.** A membrane. *Obs. or Dial. Eng.*

vellum cloth. A fine kind of cotton fabric, made very transparent, and used as a tracing cloth.

vellum paper. Parchment paper; papyrin.

ve'lo (vē'lō), *n.* [Abbr. fr. *velocity.*] *Mech.* A velocity of one foot per second, a proposed unit of velocity.

‖ **ve-lo'ce** (vā-lō'chā), *adv.* [It., swift.] *Music.* With rapidity and dash.

vel'o-cim'e-ter (vĕl'ō-sĭm'ē-tĕr), *n.* [L. *velox, -ocis*, rapid + E. *-meter.*] An apparatus for measuring speed, as of machinery or vessels, or esp. of projectiles.

ve-loc'i-pede (vē-lŏs'ĭ-pēd), *n.* [L. *veloz, -ocis*, swift + *pes, pedis*, foot: cf. F. *vélocipède.*] See VELOCITY; FOOT.] Any of various relatively light vehicles propelled by the rider or riders; — applied esp. to early forms of bicycle and tricycle, and later to a form of railroad hand car. Cf. DRAISINE. See HAND CAR, *Illust.*

Old Form of Two-wheeled Velocipede.

ve-loc'i-ty (-ĭ-tĭ), *n.*; *pl.* -TIES (-tĭz). [L. *velocitas*, fr. *veloz, -ocis*, swift, quick; cf. F. *vélocité.*] **1.** Quickness of motion; swiftness; speed; celerity; rapidity; — said chiefly of inanimate things; as, the *velocity* of wind, a bullet, light, sound. **2.** *Mech.* Time rate of motion, esp. in a given direction and sense. Average velocity equals the total distance passed over, divided by the whole time taken. When the motion is uniform, i. e., when definitely small equal distances are passed over in equal times, this quotient represents the actual velocity at each instant. When the motion is not uniform the velocity at a given point is the limiting value of the fraction representing the average velocity over a space including the point when the numerator and denominator of this fraction are taken indefinitely small.

Syn. — Speed, rapidity, swiftness, quickness. — VELOCITY, CELERITY. VELOCITY (which is here compared in its popular sense only; for its scientific use see defs.) is used chiefly of the movement of inanimate objects, or of voluntary movements regarded merely as motion; CELERITY applies to such movements or (esp.) actions of living beings as suggest promptitude or dispatch; as, the *velocity* of a bullet; "His momentum depended on *velocity* of stroke" (*Carlyle*); "They [eaves swallows] dive downwards with such *velocity*" (*Richard Jefferies*); "The dinner . . . was dispatched with uncommon *celerity*" (*T. L. Peacock*); "some loitering fiddler . . . making up for lost time by traveling over a passage with prodigious *celerity*" (*Irving*). See HASTE, FAST.

velocity ratio. *Mach.* The ratio at any instant of time of the velocity of a piece to that of a piece that directly or indirectly drives it.

ve-lours' (vĕ-lōōr'), *n.* [F. Cf. VELURE.] One of many textile fabrics having a pile like that of velvet.

‖ **ve-lou'té'** (vĕ-lōō'tā'), *n.*, *or* **sauce velouté** (sōs; *F.* sōs). [F. *velouté*, lit., velvety.] *Cookery.* A white sauce or stock made by boiling down ham, veal, beef, fowl, bouillon, etc., then adding soup stock, seasoning, vegetables, and thickening, and again boiling and straining.

ve'lum (vē'lŭm), *n.*; *pl.* VELA (-lȧ). [L., an awning, a veil. See VEIL.] **1.** *Anat. & Zoöl.* A membrane or membranous partition likened to a veil or curtain; specif.: **a** The soft palate. **b** In hydromedusans and a few other jellyfishes (Cubomedusæ), an annular membrane projecting inward from the margin of the umbrella. **c** A delicate membrane bordering the mouth of some infusorians. **2.** *Zoöl.* A larval swimming organ, especially well developed in the later larval stages of many marine gastropods, but occurring also in those of many lamellibranchs and other mollusks, but not in cephalopods. It is developed from the preoral ciliated ring of the trochosphere stage, the ring of cilia becoming raised on a more or less prominent and contractile collarlike ridge, which in typical cases is produced into large lateral lobes bordered with long cilia. The velum probably serves also for respiration. **3.** *Bot.* **a** In many agaricaceous fungi, a thin membrane which in young sporophores extends from the stipe to the margin of the pileus or which envelops the whole plant. The former (**ve'lum par'tĭ-a'le** [pär'shĭ-ā'lē]) is ruptured by the growth of the pileus and remains as a ring of tissue (**annulus**) surrounding the stipe. The latter (**ve'lum u'nĭ-ver-sa'le**, or **vol'va** [ŭ'nĭ-vĕr-sā'lē, vŏl'vȧ]) is also ruptured by growth, but does not remain as an annulus. See VOLVA. **b** In *Isoetes*, the thin membrane which envelops a sporocarp.

ve'lum in'ter-po'sĭ-tum (ĭn'tĕr-pōz'ĭ-tŭm) [NL., membrane interposed], *Anat.*, a vascular membrane formed by a prolongation of the pia mater into the brain through the middle part of the transverse fissure. It separates the under part of the body and posterior pillars of the fornix from the third ventricle, and with it forms the roof. Laterally it covers the inner part of the optic thalamus. Its free margins form the choroid plexuses of the lateral ventricles; those of the third ventricle lie on its under surface.

vel'ure (vĕl'ŭr), *n.* [F. *velours*, OF. *velous*, fr. L. *villosus* hairy. Cf. VELVET.] **1.** Velvet, or some fabric resembling it, esp. one of linen, silk, or jute, used as drapery. **2.** A silk or plush pad used as a brush for silk hats; a lure.

vel'ure, *v. t.*; VEL'URED (-ûrd); VEL'UR-ING (-ûr-Ing). To brush with a velure; as, to *velure* a hat.

Vel'u-tĭ'na (vĕl'ū-tī'nȧ), *n.* [NL. See VELVET.] **1.** *Zoöl.* A genus of tænioglossate marine gastropods having a shell with few whorls and a thick periostracum. **2.** [*l. c.*] A member of this genus.

Velutina (*V. velutina*). Nat. size.

ve-lu'ti-nous (vē-lū'tĭ-nŭs), *a.* [It. *velluto* velvet. See VELVET.] Covered with a fine and dense silky pubescence; velvety.

vel'ver-et' (vĕl'vĕr-ĕt'), *n.* [From VELVET.] A kind of velvet having a cotton back.

vel'vet (vĕl'vĕt; -vĭt; 151), *n.* [ME. *velou-ette, velvet, velvet*, n. & a., a dim. of OF. *velu*, n. & a., LL. *vellutum* (cf. It. *velluto*), fr. (assumed) LL. *villutus* shaggy, fr. L. *villus* shaggy hair; akin to *vellus* a fleece, and E. *wool.* See WOOL; cf. VILLOUS.] **1.** A silk fabric having a short close nap of erect threads forming a thick soft pile. It is called **pile velvet** when the loops of the pile are uncut, and **cut velvet** when the loops are cut so that the pile is of single threads. Inferior qualities are made with a silk pile on a cotton or linen back. **2.** The soft and highly vascular skin which envelops and nourishes the antlers of deer during their rapid growth, but later peels off or is rubbed off by the animal.

to be, play, *etc.*, **on velvet,** in gambling or speculation, to have, or operate with, money previously won. *Slang.*

vel'vet, *a.* Like or suggesting velvet; velvety.

velvet ant, any species of solitary fossorial wasp of *Mutilla* or an allied genus, constituting the family Mutillidæ, in which the female is wingless, thus resembling an ant. They usually have the body covered with fine soft hair, often bright red or of some other conspicuous color or colors. They are able to sting, and, in many cases at least, are parasitic in the nests of bees or other Hymenoptera and feed while young on the larvæ of their hosts. — **v. bean,** a cultivated form (*Stizolobium pruriens utile*) of the cowhage, grown for forage and green manure in the southern United States; also, its seed, which is sometimes ground and fed to cattle. See COWHAGE. — **v. bur,** a tropical American verbenaceous herb (*Priva echinata*) the fruiting calyx of which is beset with small, hooked bristles. — **v. carpet,** a carpet having a cut pile; esp., more fully **tapestry velvet carpet,** a kind of carpet made like tapestry Brussels, but having the pile longer and cut so that the surface resembles that of Wilton carpet. — **v. cork,** the best kind of cork bark, supple, elastic, and not woody or porous. — **v. duck,** the common mullein. — **v. duck,** the velvet scoter. — **v. finish.** *Leather Manuf.* See GOZE LEATHER. — **v. flower,** love-lies-bleeding. — **v. grass,** a tall European grass (*Holcus lanatus*) with velvety stem and leaves. It is naturalized in the United States, and yields inferior forage. — **velvet guard,** velvet trimming, or one wearing it. *Obs.* — **v. osier.** See OSIER, 1. — **v. moss,** a North European lichen (*Gyrophora murina*), used in dyeing. — **v. plant.** **a** The common mullein, native of Europe, but at one time cultivated in England and called *American velvet plant.* **b** A Javanese asteraceous plant (*Crassocephalum aurantiacum*) with handsome velvety leaves. — **v. runner,** the European water rail. See RAIL. *Local, Eng.* — **v. scoter,** a large scoter (*Oidemia fusca*) of northern Europe and Asia, closely resembling the white winged scoter (*O. deglandi*) of America, to which the name is also extended. — **v. sponge,** a fine soft commercial sponge (*Spongia equina*, variety *mammiformis*) found in Florida and the West Indies. — **v. tamarind,** a West African cæsalpiniaceous tree (*Dialium guineënse*); also, its velvety black pod, used as food in Sierra Leone. — **v. violet,** the pansy violet.

vel'vet-een' (vĕl'vĕ-tēn'), *n.* [See VELVET.] **1.** A kind of cloth, usually of twilled cotton, sometimes ribbed, imitating velvet; cotton velvet. **2.** A velvety fabric made of mixed silk and cotton.

vel'vet-ing, *n.* The fine shag or nap of velvet; a piece of velvet; velvet goods.

vel'vet-leaf' (vĕl'vĕt-lēf'), *n.* Any of several plants which have soft, velvety leaves, as *Cissampelos pareira*, the Indian mallow, *Tournefortia argentea*, the tree mallow, the common mullein, etc.

vel'vet-y (vĕl'vĕ-tĭ), *a.* **1.** Velvetlike; soft and smooth in appearance or to the touch. **2.** Mild; smooth to the taste; as, *velvety* rum; hence, giving a contact like that of velvet; as, a *velvety* touch of a pianoforte player.

‖ **ve'na** (vē'nȧ), *n.*; *L. pl.* VENÆ (-nē). [L.] *Anat.* A vein. **ve'na as-cen'dens** (*a*-sĕn'dĕnz) [L. *ascendens* ascending], *Embryol.*, the ductus venosus. — **v. s'zy-gos ma'jor** *and* **mi'nor** (ză'ĭ-gŏs). See AZYGOUS VEINS. — **v. ca'va** (kā'vȧ), *pl.* VENÆ CAVÆ (-vē) [L. *cavă* hollow], *Anat. & Zoöl.*, one of the large veins by which in air-breathing vertebrates the blood is returned to the right auricle of the heart. They develop in part from, and replace in function, the cardinal veins and ducts of Cuvier of the embryo. Commonly two *anterior* venæ cavæ (returning blood from the head and fore limbs) and one *posterior* vena cava (returning blood from the posterior parts of the body and the viscera) are present. In man they are called respectively *superior* and *inferior* venæ cavæ, and but one superior (formed by the junction of the innominate veins) is present. The inferior vena cava is formed by the junction of the common iliac veins opposite the fifth lumbar vertebra, and passes up the front of the spinal column on the right side of the aorta, receiving the renal and hepatic veins and smaller tributaries in its course. — **v. co'mes** (kŏ'mēz), *Anat., sing.* of VENÆ COMITES. See VEIN, 1. — **v. con-trac'ta** (kŏn-trăk'tȧ) [L. *contracta* contracted], *Hydraul.*, any of the contracted parts of minimum size of a jet of fluid discharging from an orifice or aperture; — usually restricted to the one nearest the orifice. — **v. por'tæ** (pōr'tē; 201), *pl.* VENÆ PORTÆ [L., lit., vein of the entrance], *Anat. & Zoöl.*, the portal vein of the liver. See under PORTAL. — **v. sal'va-tel'la** (săl'vă-tĕl'ȧ). [NL. *salvatella*, dim. of L. *salvare* to save], the superficial vein on the back of the hand, coming from the little finger. The ancients considered bleeding from this vein very efficacious in curing disease.

‖ **ve'næ** (vē'nē), *n.*; *L. pl.* of VENA. — **v. ve'næ co'mi-tes** (kŏm'ĭ-tēz), *pl.*; *sing.* VENA COMES. [L. *comites* companions.] *Anat.* See VEIN, 1. — **v. The-be'si-i** (thē-bē'shĭ-ī), small veins which return the blood from the muscular substance of the heart to the right auricle. — **v. vor'ti-co'sæ** (vôr'tĭ-kō'sē) [L. *varticosus, verticosus*, lit., full of whirlpools], the veins of the outer layer of the choroid coat of the eye.

ve'nal (vē'năl), *a.* [L. *venalis*, fr. *venus, venum*, sale; akin to Gr. ὤνος price, Skr. *vasna*: cf. F. *vénal.*] **1.** Capable of being bought or obtained for money or other valuable consideration; made matter of trade or barter; salable; mercenary; purchasable; as, *venal* services.

The *venal* cry and prepared vote of a passive senate. *Burke.*

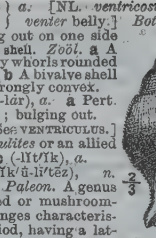
vent'hole' (vĕnt'hōl'), *n.* *Ordnance.* A vent.
ven'ti-duct (vĕn'tĭ-dŭkt), *n.* [L. *ventus* wind + *ductus* a leading, conduit, fr. *ducere*, *ductum*, to lead.] A passage or pipe for wind or air, as for ventilating apartments.
ven'til (vĕn'tĭl; *G.* vĕn-tēl'), *n.* [G. See VENTILATE.] A valve in various wind instruments, etc. See VALVE, 7.
ven'ti-la-ble (vĕn'tĭ-lȧ-b'l), *a.* Capable of ventilation.
ven'ti-late (-lāt), *v. t.*; VEN'TI-LA'TED (-lā'tĕd); VEN'TI-LAT'ING (-lā'tĭng). [L. *ventilatus*, p. p. of *ventilare* to toss, brandish in the air, to fan, to winnow, fr. *ventus* wind; akin to E. *wind*. See WIND rushing air.] **1.** To winnow; fan; as, to *ventilate* wheat. *Rare.*
2. To change or renew (air), as in a room. *Obs. or R.*
3. To cause fresh air to circulate through (to replace foul air simultaneously removed), as a room, mine, etc.
4. To purify by subjecting to fresh air; to oxygenate; as, the blood is *ventilated* by the lungs. *Obs. or R.*
5. To sift and examine; to bring out and expose to scrutiny and discussion; as, to *ventilate* questions of policy.
6. To give vent to; to utter; to make public.

Macaulay took occasion to *ventilate* one of those startling, but not very profound, paradoxes. *J. G. Sharp.*

7. To provide with a vent, or escape, for air, gas, etc.; as, to *ventilate* a mold, or a water-wheel bucket.
ven'ti-lat'ing (-lāt'ĭng), *p. pr. & vb. n.* of VENTILATE.
ventilating brick, a cored-out brick providing an air passage as for ventilation. — **v. millstone**, a millstone having a device for inducing a strong current of air through its grooves. — **v. saw**, a saw with a perforated blade or kerf.
ven'ti-la'tion (-lā'shŭn); *n.* [L. *ventilatio*: cf. F. *ventilation*.] Act of ventilating, or state of being ventilated; as: **a** Fanning; winnowing. *Archaic.* **b** Supplying with fresh air. **c** Oxygenation, as of the blood. *Obs. or R.* **d** Free discussion; public exposition. **e** Utterance; vent. *Obs. or R.*
ven'ti-la-tive (vĕn'tĭ-lā-tĭv), *a.* Of or pertaining to ventilation; adapted to secure ventilation; ventilating.
ven'ti-la'tor (-lā'tĕr), *n.* [Cf. F. *ventilateur*, L. *ventilator* a winnower.] One that ventilates; esp., a contrivance, as a shutter device forming an adjustable aperture, for the inlet of fresh air, or a machine for drawing off or expelling foul or stagnant air, or for introducing fresh air.
ven'tral (vĕn'trăl), *a.* [L. *ventralis*, fr. *venter* the belly; perh. akin to G. *wanst*: cf F. *ventral*.] **1.** Of or pertaining to the belly; abdominal; hence, in *Zoöl. & Anat.*, designating, pert. to, or situated on or towards, that surface of the body which in man is anterior, but in most vertebrates, arthropods, and other elongated animals is normally the lower surface; hæmal; — the opposite of *dorsal* (which see).
2. *Bot.* **a** Pertaining to or designating that surface of a carpel, petal, etc., which faces toward the center of a flower. **b** Pertaining to the lower side or surface of a dorsi-ventral organ or thallus; — opposed to *dorsal*.
ventral canal cell, *Bot.*, a small cell which is cut off from the central cell of an archegonium just below the neck. — **v. fin.** *Zoöl.* **a** In fishes, one of that pair of fins which correspond to the hind limbs of quadrupeds; a pelvic fin. In the less specialized fishes they are situated on the abdomen some distance behind the pectoral fins, but in many fishes are farther forward, and under the pectoral fins, or even under the throat. See FIN, 3. **b** An anal fin. *Rare.* — **v. segment.** *Physics.* See LOOP, *n.*, 3 **b**, and NODE, 7, *Illust.*
ven'tral, *n.* *Zoöl.* A ventral fin of a fish.
ven'tri-. Combining form from Latin *venter*, *ventris*, meaning *belly*. Cf. VENTRO-.
ven'tri-cle (vĕn'trĭ-k'l), *n.* [L. *ventriculus* the stomach, a ventricle, dim. of *venter* the belly: cf. F. *ventricule*. See VENTRAL.] **1.** *Anat. & Zoöl.* A cavity of an organ; esp.: **a** The chamber, or one of the chambers, of the heart which receives the blood from an auricle, and from which it is forced into the arteries. See HEART, 1. **b** In the brain, one of the system of communicating cavities which are continuous with the central canal of the spinal cord, and like it are derived from the medullary canal of the embryo. The cavities are lined with epithelium called *ependyma*, and contain a serous fluid. Those of the adult human brain are four (see BRAIN, 1), the so-called fifth ventricle being merely a part of the longitudinal fissure which has become closed off. **c** The fossa or pouch of each side of the larynx between the false vocal cords above and the true vocal cords below, also called **ventricle of Mor-ga'gni** (môr-gän'yē). In some apes they become very large.
2. *Obs. or R.* Any cavity of organic function; as: **a** The womb. **b** The stomach. *Obs.*
ven'tri-cose (vĕn'trĭ-kōs) } *a.* [NL. *ventricosus*, fr. L.
ven'tri-cous (vĕn'trĭ-kŭs) } *venter* belly.] *Bot. & Zoöl.* Bellied; inflated; swelling out on one side or unequally. — **ventricose shell.** *Zoöl.* **a** A spiral shell having the body whorls rounded or swollen in the middle. **b** A bivalve shell in which the valves are strongly convex.



Ventricose Shell.

ven'tric'u-lar (vĕn-trĭk'ū-lăr), *a.* **a** Pert. to a ventricle. **b** Bellied; bulging out.
ven'tric'u-lite (-līt), *n.* [See VENTRICULUS.] A fossil sponge of *Ventriculites* or an allied genus. — **ven'tric'u-lit'ic** (-lĭt'ĭk), *a.*
Ven'tric'u-li'tes (vĕn-trĭk'ū-lī'tēz), *n.* [NL. See VENTRICULUS.] *Paleon.* A genus of fossil, often vase-shaped or mushroom-shaped, hexactinellid sponges characteristic of the Cretaceous period, having a lattice-like skeleton in which the nodes formed by the crossing of the spicular threads are perforated. It is the type of a family **Ven-tric'u-lit'i-dæ** (-lĭt'ĭ-dē).

Ventriculite (*Cælaptychium seebachi*). A Side View; *B* Part of the Skeleton.

ven'tric'u-lus (vĕn-trĭk'ū-lŭs), *n.*; *L. pl.* -LI (-lī). [L., belly, dim. fr. *venter* belly.] *Anat. & Zoöl.* An internal cavity; a ventricle; specif., *Zoöl.*, in certain animals with a compound stomach, a division of that organ posterior to the proventriculus; in birds, the gizzard; in insects, the digestive stomach.
ven'tri-lo'qui-al (vĕn'trĭ-lō'kwĭ-ăl), *a.* Of, pert. to, resembling, or using, ventriloquism. — **ven'tri-lo'qui-al-ly**, *adv.*
ven-tril'o-quism (vĕn-trĭl'ō-kwĭz'm), *n.* [From L. *ventriloquus* a ventriloquist; *venter* the belly + *loqui*, p. p. *locutus*, to speak. See VENTRAL; LOQUACIOUS.] Act, art, or practice of speaking in such a manner that the voice appears to come from some source other than the vocal organs of the speaker. Voice cannot be produced in the stomach or elsewhere other than in the larynx. In ventriloquism the speaker takes a full breath, keeps the muscles of the chest, neck, lower jaw, and lips as motionless as possible, and speaks with the mouth almost closed and the glottis narrowed, not allowing the air to escape through the nose. The lower lip is slightly retracted and rested against the upper teeth, and the tongue articulations are greatly altered. Much of the deception depends on attention to the source of the sounds.
ven-tril'o-quist (-kwĭst), *n.* One who practices, or is skilled in, ventriloquism.
ven-tril'o-quis'tic (-kwĭs'tĭk), *a.* Of or pertaining to ventriloquism or ventriloquists.

Relig.* An ancient Italian goddess of bloom and beauty, protectress of gardens, whose worship was early introduced into Rome. She was later identified with the Greek *Aphrodite*, whose famous cult at Eryx, Sicily, was the source of the worship of **Ve'nus Er'y-ci'na** (ĕr'ĭ-sī'nȧ), to whom a temple was founded in Rome 217 B.C., as expiation for loss of chastity of three vestals, a temple to **Ve'nus Ver'ti-cor'di-a** (vûr'tĭ-kôr'dĭ-ȧ) was founded on April 1, and this day became the chief festival of Venus, the **Ven'e-ra'li-a** (vĕn'ē-rā'lĭ-ȧ). The worship of **Ve'nus Fe'lix**, goddess of fortune, was inaugurated by Sulla, who made **Ve'nus Pom'pe-ia'na** (pŏm'pē-yā'nȧ; -ā'nȧ) the tutelary of his colony, Pompeii. **Ve'nus Vic'trix**, goddess of victory, was popular in the military provinces of the empire; but the most important form of the goddess was **Ve'nus Gen'e-trix** (jĕn'ē-trĭks), to whom, as mother of Æneas and ancestress of his family, Cæsar dedicated a temple 46 B.C. See DI; cf. ADONIS, 1.
2. *Astron.* One of the most important of the planets, moving in an orbit between that of Mercury and that of the earth, at a mean distance from the sum of about 67,000,000 miles (for other elements see PLANET, *Table*). Venus passes through phases similar to those of the moon, and at its brightest is far more brilliant than any fixed star. As morning star, it was called by the ancients *Lucifer*; as evening star, *Hesperus*. Venus is surrounded by an atmosphere, doubtless abounding in clouds. Its period of rotation is probably about 225 days. The last two transits of Venus occurred in 1874 and 1882; coming transits occur in 2004, 2012, 2117, and 2125. See TRANSIT, 4 **b**.
3. Sexual intercourse; venery. *Obs.*
4. *Alchem.* The metal copper; — prob. so designated from the ancient use of the metal in making mirrors, a mirror being still the astronomical symbol of the planet Venus.
5. *Her.* Vert (green), in blazoning by the heavenly bodies.
6. *Zoöl.* A genus of marine bivalve mollusks comprising the quahog, or round clam, and numerous related species. They have a thick, oval, usually inflated shell, often with prominent concentric ridges, the lunule is well marked, and the internal margins are finely denticulate.
7. [*l. c.*] Any shell of *Venus* or an allied genus.

Ve'nus ac'crou'pie' (ă'krōō'pē') [F. *accroupie*, fem. p. p. of *s'accroupir* to crouch], a representation of Venus crouching undraped as if bathing, as in the Hellenistic marble statue in the Gabinetto delle Maschere, Vatican. — **Ve'nus a'dy-om'e-ne** (ăn'ă-dī-ŏm'ē-nē) [see ANADYOMENE], a representation of Venus arising at birth from the sea undraped and usually accompanied by a dolphin, represented by a famous lost painting of Apelles, and an attempted reproduction of the latter by Botticelli in the Accademia delle Belle Arti at Florence. — **V., Bor-ghe'se** (bōr-gā'sā), a marble statue by Canova (1805) in the Villa Borghese at Rome, representing as Venus Pauline Borghese (the sister of Napoleon I.), reclining on a chaise longue. — **V. Cal'lĭ-py'ge, Cal'lĭ-py'gus**, *or* **Kal'lĭ-py'gos** (kăl'ĭ-pī'jē; -gŭs; -gŏs), the Callipygian Venus. — **V. de' Me'di-ci** (dā mĕd'ē-chē) [after Cosmo *de' Medici* III., who brought the statue to Florence], a statue of Greco-Roman times in Parian marble, representing Venus looking toward the left, her hands disposed in affected modesty, found in Hadrian's Villa at Tivoli and brought about 1680 to Florence, where it stands in the Uffizi Gallery. The signature of Cleomenes on the base is considered a modern forgery. — **V. Gen'e-trix** (jĕn'ē-trĭks) [L. *genetrix* she that produces], a representation of Venus as the goddess of fecundity, usually holding an apple and raising the transparent, clinging drapery from her shoulder, represented by several ancient statues, the finest being in the Louvre. — **Venus of Arles** (ärlz; *F.* ärl), a Praxitelean marble statue, found in the ancient theater at Arles and now in the Louvre, representing Venus undraped above the thighs, looking toward her extended left hand while the right is raised and drawn aside. — **V. of Cap'u-a** (kăp'ū-ȧ; -ä), (kä'pwä), another statue found in the 18th century in the amphitheater at Capua, now in the Museo Nazionale at Naples, representing Venus undraped above the thighs, wearing a stephane, and looking down, her left foot on a helmet. The Greek original was a bronze, probably of the 4th century B.C. — **V. of Cni'dus** (nī'dŭs), a marble statue of Venus nude and shrinking as her drapery falls from her left hand on a hydria. The original by Praxiteles, which stood in the temple at Cnidus, is reproduced on the coins of Cnidus and in many replicas, of which the best is in the Vatican. — **V. of Mi'lo** (mē'lō), *or* **Me'los** (mē'lŏs), a Hellenistic marble statue, found on Melos in 1820 and now in the Louvre, representing Venus undraped above the thighs. Her arms are lost, and the mode of restoration is not agreed upon.

Venus of Milo.

The Venus of Melos, . . ., considered by many . . . to be the most beautiful of all the statues that have survived from antiquity. *E. A. Gardner.*

— **V. of the Capitol**, a Hellenistic statue of Parian marble, since 1752 in the Capitoline Museum at Rome, representing Venus nude, bending slightly forward and shielding herself with both hands. — **V. U-ra'ni-a** (ū-rā'nĭ-ȧ) [Gr. *Οὐρανία*, lit., the heavenly one], a representation of Venus as the goddess of heavenly or spiritual love, represented by the lost statue by Phidias at Elis. — **V. Vic'trix** (vĭk'trĭks) [L. *victrix* victorious], a representation of Venus as victorious or as a goddess of victory, as in the Venus of Capua.

Ve'nus-berg (vē'nŭs-bûrg; *G.* vā'nŏŏs-bĕrk). [G., Mountain of Venus.] The Hörselberg between Eisenach and Gotha in Germany, in a cave of which, according to medieval legend, Venus held her court, enticing persons into it and by music, revelry, and sensuous pleasures keeping them from ever returning. The name was also given to various other mountains. See TANNHÄUSER, and ECKHARDT, FAITHFUL.

Ve'nus's-comb' (vē'nŭs-Ĭz-), *n.* **a** = LADY'S-COMB. **b** A species of *Murex* (*M. tenuispina*) having a long tubular canal, with a row of long slender spines along both of its borders, and rows of similar spines on the body of the shell.

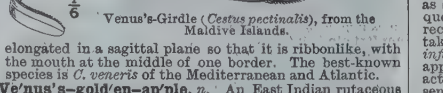
Ve'nus's-fan', *n.* A reticulated, fan-shaped gorgonia (*Gorgonia flabellum*) native of Florida and the West Indies. When fresh the color is purple or yellow, or a mixture of the two.

Ve'nus's-flow'er-bas'ket, *n.* An elegant tubular or cornucopia-shaped hexactinellid sponge of the genus *Euplectella*, native of the East Indies and the eastern coast of Asia. It consists of glassy, transparent siliceous fibers interwoven so as to form a firm network, and has long, slender, divergent anchoring fibers at the base, by means of which it stands erect in the soft mud at the bottom of the sea. The best-known species is *E. aspergillum* of the East Indies.

Venus's-Flower Basket (*Euplectella aspergillum*).

Ve'nus's-fly'trap', *n.* The insectivorous plant *Dionæa muscipula*. See DIONÆA.

Ve'nus's-gir'dle, *n.* A ctenophore of the genus *Cestus* in which the body is greatly compressed transversely and



Venus's-Girdle (*Cestus pectinalis*), from the Maldive Islands.

elongated in a sagittal plane so that it is ribbonlike, with the mouth at the middle of one border. The best-known species is *C. veneris* of the Mediterranean and Atlantic.

Ve'nus's-gold'en-ap'ple, *n.* An East Indian rutaceous shrub or tree (*Atalantia monophylla*) having a golden yellow fruit similar to a lime; also, the fruit itself.

Ve'nus's-hair', *n.* A delicate maidenhair fern (*Adiantum capillus-veneris*) having a slender black and shining stipe and branches.

Ve'nus's-hair'stone', *n.* *Min.* Quartz penetrated by acicular crystals of rutile.

Ve'nus's-look'ing-glass', *n.* Any campanulaceous plant of the genus *Specularia*, esp. *L. speculum*.

Ve'nus's-na'vel-wort', *n.* Any boraginaceous herb of the genus *Omphalodes*. Cf. NAVELWORT.

ve-ra'cious (vē-rā'shŭs), *a.* [L. *verax, -acis*, fr. *verus* true. See VERY.] **1.** Observant of truth; habitually speaking truth; truthful; as, a *veracious* historian.
2. Characterized by truth; true; as, a *veracious* story.

F. *véracité*, LL. *veracitas*.] **1.** Quality or state of being veracious, or true; specif.: **a** Habitual observance of truth; truthfulness **b** Power of conveying truth; correctness; as, *veracity* of vision. **c** Conformity with truth; trueness; as, the *veracity* of a judgment.
2. That which is true; a truth; the truth.
Syn. — See TRUTH.

ve-ran'da, ve-ran'dah (vē-răn'dȧ), *n.* [A word brought by the English from India; of uncertain origin; cf. Skr. *varaṇḍa*, Pg. *varanda*, Sp. *baranda*, Malay *baranda*.] *Arch.* An open gallery or portico, usually roofed, attached to the exterior of a building, used for sitting out of doors; — in the United States often called a *piazza*. See LOGGIA.

ve-ra'tric (vē-rā'trĭk; -răt'rĭk), *a.* [See VERATRUM.] *Chem.* Designating, or pert. to, a white crystalline acid, $C_9H_{10}O_4$, in sabadilla seed and also formed by decomposition of veratridine and other alkaloids. It is the dimethyl ether of protocatechuic acid.

ve-rat'ri-dine (vē-răt'rĭ-dĭn; -dēn; 184), *n.* Also **-din**. *Chem.* An amorphous alkaloid, $C_{37}H_{53}O_{11}N$, occurring in sabadilla seed; — called also *amorphous veratrine*.

ve-ra'trine (vē-rā'trĭn; -trēn; 184, 277), *n.* Also **ve-ra'trin, ver'a-tri'na** (vĕr'ȧ-trĭ'nȧ), **ve-ra'tri-a** (vē-rā'trĭ-ȧ). [Cf. F. *vératrine*. See VERATRUM.] *Chem.* A white, crystalline, poisonous alkaloid having an acrid, burning taste, obtained from the root of white or false hellebore (*Veratrum*) and from sabadilla seeds; — called also *cevadine*. The commercial article is a white, amorphous powder containing also veratridine, sabadilline, etc. Veratrine is sometimes used externally, as in ointments, in the local treatment of neuralgia and rheumatism.

ve-ra'trize (vē-rā'trīz), *v. t.*; -TRIZED (-trīzd); -TRIZ-ING (-trīz-Ĭng). To treat or drug with veratrine, as animals.

ve-ra'trol (vē-rā'trōl; -trŏl) } *n.* [*veratric* + *-ol.*] *Chem.*
ve-ra'trole (vē-rā'trōl) } The dimethyl ether of pyrocatechin, $C_6H_4(OCH_3)_2$, obtained by distilling veratric acid with barium oxide. It melts at 15° C.

Ve-ra'trum (vē-rā'trŭm), *n.* [L. *veratrum* hellebore.] *Bot.* A small genus of coarse melanthaceous herbs, the white or false hellebores. They have short poisonous rootstocks, large plicate clasping leaves in three vertical ranks, and panicled flowers with the perianth segments adnate to the ovary. The rootstocks of the American false hellebore, or Indian poke (*V. viride*), and of the European species (*V. album*), are used as a cardiac and muscular sedative; in large doses they are very poisonous. See VERATRINE.

verb (vûrb), *n.* [F. *verbe*, L. *verbum* a word, verb (cf. Gr. *ῥῆμα* word, verb). See WORD.] **1.** A word; a vocable. *Obs.*
2. *Gram.* A word which affirms or predicates something; the part of speech expressing some kind of action or mode of being. The verb in its various predicating forms is called *finite* in distinction from the *infinitive* and other *verbals*, and is distinguished for voice, mood, tense, person, and number. Verbs are commonly classed by their meanings as *transitive* and *intransitive*; also as *active, neuter*, and *passive*, or simply as *active* and *neuter*, some as *auxiliary, reflexive*, and *reciprocal*. By their forms verbs are classed according to conjugations, as *strong* and *weak, regular* and *irregular*, etc. *Deponent* verbs are so classed by both form and meaning. See these terms.

ver'bal (vûr'bȧl), *a.* [F., fr. L. *verbalis*. See VERB.] **1.** Of or pert. to words; consisting in, or having to do with, words only; esp., dealing with words rather than with the ideas to be conveyed; as, *verbal* art; a *verbal* critic; *verbal* change.

And loses, though but *verbal*, his reward. *Milton.*

Verbal refinements, instead of substantial knowledge. *Whewell.*

It is the angle (expressed in radians) through which the plane of polarization is rotated by a layer of the given substance of unit length, under the action of unit magnetic field. It is approximately in inverse proportion to the square of the wave length of the light employed.

Ver'det's' law (vĕr'dĕz'). *Physics.* The principle that in a given medium the rotation of the plane of a light ray by a magnetic field is proportional to the difference of magnetic potential between the points of entrance and exit.

ver'dict (vûr'dĭkt), *n.* [ME. *verdit*, OF. *veirdit*, prop. two words, *veïr dit*, *voir dit*, a true saying; *veir*, *voir*, true, L. *verus* + *dit* a saying, L. *dictum* a thing said; cf. LL. *verdictum*, *veredictum*. See VERY; DICTUM.] **1.** *Law.* The answer of a jury given to the court concerning any matter of fact in any cause, civil or criminal, committed to their examination and determination; the finding or decision of a jury on the matter legally submitted to them in the course of the trial of a cause. The ordinary comprehensive verdict in civil actions is "for the plaintiff" or "for the defendant," in criminal actions "guilty" or "not guilty," and these are each called a **general verdict**. A verdict of "not guilty" is conclusive at the common law. When a jury, whether at the direction of the court or otherwise, find the facts of the case, leaving to the court the application of the law to them, it is called a **special verdict**. In cases where the judge is not ready to receive the jury's verdict at the time of their arriving at a conclusion, he may authorize them to write, sign, and deliver it to the proper officer for custody until they shall be convened in court to announce it. This is called a **sealed verdict**. The decision of a judge or referee, upon an issue of fact, is not called a *verdict*, but a *finding*, or a *finding of fact*.

2. Decision; judgment; opinion pronounced; as, to be condemned by the *verdict* of the public.

ver'di-gris (vûr'dĭ-grēs), *n.* [ME. *verdegrees*, *verdegrece*, *vertegrece*, OF. *vert de Grice*, *vert de Grece*, lit., green of Greece, F. *vert-de-gris*; cf. LL. *viride grecum*.] **1. a** A green or greenish blue poisonous pigment and drug, obtained by the action of acetic acid on copper, consisting of one or more basic copper acetates. The essential constituent of blue verdigris has the formula $Cu(C_2H_3O_2)_2{\cdot}Cu(OH)_2{\cdot}5H_2O$. Green verdigris consists chiefly of $2Cu(C_2H_3O_2)_2{\cdot}Cu(OH)_2{\cdot}5H_2O$. Verdigris is less used as a pigment than formerly, being liable to fade, blacken, and react with other substances. It is used in dyeing and calico printing and in the preparation of other copper pigments. In medicine it is used externally, as in the form of an ointment, but is no longer an official remedy. **b** Normal copper acetate, $Cu(C_2H_3O_2)_2{\cdot}H_2O$, a dark green salt sometimes used as a glazing color; so-called distilled verdigris. **2.** Basic carbonate of copper, formed as a green or bluish rust on copper, brass, or bronze surfaces. *Colloq.*

verdigris green. A clear bluish green, as of verdigris.

ver'di-ter (vûr'dĭ-tẽr), *n.* [F. *vert-de-terre*, lit., green of earth.] **a** Verdigris. *Obs.* **b** Either of two basic carbonates of copper used as pigments, and prepared either by grinding the mineral azurite (giving *blue verditer*) and the mineral malachite (giving *green verditer*) or artificially; bice. Green verditer is fairly permanent in oil, but deficient in body; blue verditer is inferior to cobalt blue, etc.

verditer blue. A pale greenish blue color, like that of blue verditer.

ver'dure (vûr'dûr), *n.* [F., fr. L. *viridis* green. See VERDANT.] **1.** Greenness; esp., greenness and freshness of vegetation; also, such vegetation itself; a green growth.

A wide expanse of living *verdure*, cultivated gardens, shady groves, fertile cornfields, flowed round it like a sea. *Motley.*

2. Tapestry representing chiefly foliage, green trees, etc.

3. Taint; mold. *Obs.*

Ver'mes (vûr'mēz), *n. pl.* [L. *vermes*, pl. of *vermis* a worm.] *Zoöl.* In old classifications, an extensive and heterogeneous division (commonly a subkingdom or phylum) of the animal kingdom, containing the worms and various other groups included chiefly because they clearly did not belong in any of the other recognized divisions. As used by Linnæus, all the invertebrates except arthropods were included. As used by later authorities, it has been variously restricted, especially by the removal of the mollusks (and with them the brachiopods), the radiates, protozoans, etc., becoming in more recent usage approximately equivalent to the phyla Platyhelminthes, Nemathelminthes, Annulata, and Trochelminthes taken together. In the most recent and critical classifications it has been abandoned as unnatural.

Ver-mo'tus (vĕr-mō'tŭs), *n.* [NL., fr. L. *vermis* worm.] **a** *Zoöl.* A genus of marine tænioglossate gastropods. Their shells are regularly spiral when young, and the animal is free to creep about, but later the shell becomes permanently attached to some object, and the whorls developed later in life are separate and often irregularly bent and contorted like a worm tube. ver-mic'u-lite (-līt), *n.* [L. *vermiculus*, dim. of *vermis* worm.] *Min.* Any of a number of micaceous minerals, as kerrite, maconite, etc., which are hydrous silicates derived generally from the alteration of some kind of mica; — so called because the scales open out when heated, sometimes producing long, wormlike forms.

ver'mi-form (vûr'mĭ-fôrm), *a.* [L. *vermis* a worm + E. *-form.*] Resembling a worm.

vermiform appendix, *Anat.*, a narrow, blindly ending tube usually about three or four inches long and of the diameter of a goose quill, which extends from the cæcum, or commencement of the large intestine, in the lower right-hand part of the abdomen in a direction which varies in different individuals. Its walls contain much lymphoid tissue, and its cavity normally communicates with that of the cæcum, of which it represents an atrophied terminal part. It has no useful function. Cf. APPENDICITIS. — **v. body**, *Bot.*, a scolecite. — **v. process**. *Anat.* **a** The part of the median lobe of the cerebellum which appears on the upper or lower surface of the cerebellum. These parts are specifically distinguished as the *superior* and *inferior* vermiform processes, the former slightly prominent, the latter sunk in the valleculæ. **b** The median lobe or part of the cerebellum.

ver-mif'u-gal (vĕr-mĭf'ū-găl), *a.* [L. *vermis* a worm + *fugare* to drive away, fr. *fugere* to flee. See WORM; FUGITIVE.] *Med.* Tending to prevent, destroy, or expel, worms; anthelmintic.

ver'mi-fuge (vûr'mĭ-fūj), *n.* [Cf. F. *vermifuge*. See VERMIFUGAL.] *Med.* A medicine or substance that expels worms from animal bodies; an anthelmintic.

ver-mil'ion (vĕr-mĭl'yŭn), *n.* [F. *vermillon*. See VERMEIL.] **1.** The cochineal insect; also, the dye from it; vermeil. *Obs.*

2. A bright red pigment consisting of mercuric sulphide (HgS) obtained from the mineral cinnabar or prepared in either the wet or the dry way. It varies from crimson when coarse-grained to nearly orange when finely divided. It is highly valued by painters, and is also much used in coloring sealing wax, in printing, etc. **Mock vermilion, American vermilion**, and **Austrian vermilion** consist of basic chromate of lead. Sometimes **American vermilion** is also applied to an eosin vermillionette on red lead. **Para vermilion** is an organic red precipitated on an inert base; **radium vermilion** is a red lead coated with an organic color; **antimony vermilion** (which see) is antimony trisulphide.

3. Hence, a red color like the pigment; a lively and brilliant red; as, cheeks of *vermilion.*

4. Vermilion-colored cloth. *Obs.*

5. = VERMEIL, 4.

ver-na'tion (vĕr-nā'shŭn), *n.* [F. *vernation*, or L. *vernatio* the sloughing of the skin of snakes.] *Bot.* The disposition or method of arrangement of foliage leaves within the bud; prefoliation. The principal types of vernation are designated by the adjectives *plicate, valvate, conduplicate, involute, revolute, convolute, reclinate, circinate.* See these, and cf. ÆSTIVATION.

Ver'ner's law (vûr'nĕrz). *Philol.* A statement, propounded by the Danish philologist Karl Verner in 1875, which explains certain apparent exceptions to Grimm's law by the original position of the accent. Primitive Indo-European *k, t, p*, became first in Teutonic *h, th, f*, and appear without further change in old Teutonic, if the accent rested on the preceding syllable; but these sounds became voiced and produced *g, d, b*, if the accent was originally on a different syllable. Similarly *s* either remained unchanged, or it became *z* and later *r*. Example: Skt. *saptá* (accent on ultima), Gr. ἑπτά, Gothic *sibun* (seven). Examples in English are *dead* by the side of *death*, to *rise* and to *rear.*

ver'ni-er (vûr'nĭ-ẽr), *n.* [After Pierre *Vernier*, who invented it in 1631.] A short scale made to slide along the divisions of a graduated instrument, as the limb of a sextant, or the scale of a barometer, for indicating parts of divisions. It is so graduated that a certain convenient number of its divisions are just equal to a certain number, either one less or one more, of the divisions of the in-

ver'si-cle (vûr'sĭ-k'l), *n.* [L. *versiculus*, dim. of *versus*. See VERSE.] A little verse; specif.: **a** *Liturgies.* A short verse or sentence said or sung in public worship by the priest or minister, and followed by a response from the people; — indicated by the sign ℣. **b** A line of poetry or a short poem; — usually derogatory.

ver'si-col'or, *or* **-col'our** (-kŭl'ẽr), *a.* [L. *versicolor; versare* to change + *color* color.] **1.** Having various colors; variegated; party-colored; as, *versicolor* flowers. **2.** Changeable in color; chameleonlike; iridescent; as, *versicolor* silk; antique *versicolor* glass.

ver-sic'u-lar (vẽr-sĭk'ŭ-lẽr), *a.* [See VERSICLE.] Of or pert. to verses; designating distinct divisions of a writing.

ver'si-fi-ca'tion (vûr'sĭ-fĭ-kā'shŭn), *n.* [L. *versificatio*: cf. F. *versification.*] Act, art, or practice, of versifying, or making verses; metrical composition; prosody.

ver'si-fi'er (vûr'sĭ-fī'ẽr), *n.* **1.** One who versifies, or makes verses; as, not every *versifier* is a poet. **2.** One who converts into verse; esp., one who versifies prose; as, Dr. Watts was a *versifier* of the Psalms.

ver'si-fy (-fī), *v. i.*; -SI-FIED (-fīd); -SI-FY'ING (-fī'ĭng). [ME. *versifien*, F. *versifier*, L. *versificare*; *versus* a verse + *-ficare* to make. See VERSE; -FY.] To make verses.

I 'll *versify* in spite, and do my best. *Dryden.*

ver'si-fy, *v. t.* **1.** To turn into verse; to render into metrical form; as, to *versify* the Psalms. *Chaucer.* **2.** To relate or describe in verse; to compose in verse.

I 'll *versify* the truth, not poetize. *Daniel.*

ver'sion (vûr'shŭn), *n.* [F., fr. L. *vertere*, *versum*, to turn, to change, to translate, akin to E. *worth* to become. See WORTH to become; cf. ADVERTISE, AVERSE, CONTROVERSY, CONVERT, DIVERS, INVERT, OBVERSE, PROSE, SUZERAIN, VERSE, VORTEX.] **1.** A change of form, direction, or the like; transformation; conversion; turning. *Obs. or R.*

The *version* of air into water. *Bacon.*

2. Act of translating from one language into another. *R.* **3.** A translation; that which is rendered from another language; specif., a translation or rendering of the Bible or a part of it. The most important of modern versions of the Old and New Testaments are mentioned under BIBLE. Important ancient versions are: **Alexandrian version**, the Septuagint, **Aramaic versions**, including the Targums, and others of minor importance. **Armenian version** (whole Bible), begun about 400 A. D., the Old Testament based on the Septuagint, and the New first made from Syriac and then revised by Greek texts. **Coptic versions**, including chiefly the *Sahidic*, *Bohairic*, and *Middle Egyptian* versions. Of these the New Testament versions seem to be based on some Greek text; the Old Testament is based on the Septuagint. It is thought that they date, in part at least, from the 2d century A. D., and that the Sahidic New Testament was translated first. **Ethiopic**, or **Geez, version** (whole Bible), based on a Greek original, probably the Septuagint for the Old Testament. It seems to have been completed before the 7th century. The Ethiopic Old Testament has from the earliest times been universally used in all branches of the Abyssinian Church. **Georgian version** (whole Bible), of the 5th or 6th century, made from the Greek. **Gothic version** (whole Bible), completed about 400 A. D., largely made by Bishop Ulfilas. Only fragments are extant. **Greek versions**, including the Septuagint (see SEPTUAGINT, below) and others; as: *Aquila's version* (Old Testament), in Greek, done in the 2d century by one Aquila of Pontus. *Symmachus's version* (Old Testament), in Greek, probably done in the 2d century A. D. Who Symmachus was is uncertain. **Italic version** (whole Bible), the Old Latin text or version revised by Jerome, and finally superseded by his new translation, the Vulgate. It is often called *Itala*, from a passage in Augustine ("ille Doct. Christ." II. 15), where he mentions a text or translation under that name. But just what Augustine referred to is not agreed. See *Latin versions*, below. **Latin versions**, including not only the Vulgate, but the previously existing versions, called *Old Latin versions*. These earlier ones have been divided into three groups, the *African*, *European*, and *Italian*, of which the African is supposed to be the earliest, and the European a later revision or a translation, and the Italian a revision of this. **Peshitta.** See *Syriac versions*, below. **Samaritan Pentateuch**, which is really the Hebrew text as preserved by the Samaritans; and the **Samaritan Targum**, a translation of this into the Samaritan dialect. These are said to have their origin as early as 400 B. C. **Septuagint** (Old Testament), in Greek, begun probably in the 3d century B. C., with the various versions that are based upon it. See SEPTUAGINT. **Slavonic versions** (whole Bible), begun about 864, found in both the Cyrillic and the Glagolitic alphabets. **Syriac versions**, including the Peshitta, or Syriac Vulgate (see PESHITTA, I), and other versions, as: Tatian's *Diatessaron* (see DIATESSARON, 3), the **Evangelion da Mepharreshe**, lit., Gospel of the Separated (ones), a version of the four Gospels, probably made as early as the 2d century A. D. and sometimes called the **Separated Gospels** and **Curetonian version**. Its text is that of Cureton's Codex, and according to some that of the Codex Sinaiticus. **Philoxenian version**, or **Versio Philoxeniana** (New Testament, and parts of Old Testament), undertaken, about 508, by Philoxenus, bishop of Mabbogh. **Harclean version**, or **Versio Harklensis** (New Testament, except Revelation), a revision of the Philoxenian version made at Alexandria by Thomas of Harkel (Heraclea) about 616. "The text of the *Harclean version* is remarkable for its excessive literalness, and for the critical notes with which it is furnished." (*Encyc. Bibl.*) **Palestinian version** (New Testament), a version in the Western Aramaic dialect, closely akin to that of the later Galilean Jews, ascribed to a date not earlier than the 6th century. See Targums. See TARGUM. **Vulgate**, or **Latin Version**, of the early part of the 5th century. See VULGATE, 1.

4. An account or description from a particular point of view, esp. as contrasted with another account; as, he gave quite a different *version* of the affair.

5. *Med.* **a** A condition of the uterus in which its axis is deflected from its normal position without being bent upon itself. See ANTEVERSION, RETROVERSION, 2. **b** Act of turning the fetus in the uterus to aid delivery.

6. *Math.* Rotation determined in magnitude and direction by a vector function.

Syn. — See PARAPHRASE.

ver'sion-al (vûr'shŭn-ăl), *a.* Of or pert. to a version (translation).

ver'so (vûr'sō), *n.* [L., abl. of *versus*, p. p. of *vertere* to turn: cf. F. *verso.*] **1.** The reverse, or left-hand, page of a book or a folded sheet of paper; — opposed to *recto.* **2.** The reverse, as of a coin; — opposed to *obverse.*

ver'sor (vûr'sŏr), *n.* [NL., fr. L. *vertere*, *versum*, to turn. See VERSION.] *Geom.* The turning factor of a quaternion; — denoted by U placed before the quaternion. The change of one vector into another is considered in quaternions as made up of two operations: 1st, the rotation of the first vector so that it shall be parallel to the second: 2d, the change of length so that the first vector shall equal the second. That which expresses in amount and direction the first operation is a *versor*, and is denoted geometrically by a line at right angles to the plane in which the rotation takes place, and proportioned in length to the amount of rotation. That which expresses the second operation is a *tensor.* Every quaternion, expressing such a total operation, is the product of one and only one such tensor by one and only one such versor. See QUATERNION, 5.

verst (vûrst), *n.* [Russ. *versta*: cf. F. *verste.*] A Russian measure of length. See MEASURE.

‖ **Ver-stand'** (fẽr-shtänt'), *n.* [G.] *Ger. Philos.* The understanding, conceived as dealing with finite relations and dependent being, and giving rise to general notions or concept of experience (G. *Begriffe*); — disting. from *Vernunft.*

ver'su-al (vûr'shō-ăl), *a.* Of or pertaining to, or of the nature of, a verse or verses, esp. of the Bible.

ver'sus (vûr'sŭs), *prep.* [L., toward, turned in the direction of, fr. *vertere*, *versum*, to turn. See VERSION.] Against; — used chiefly in legal or in sporting language; as, John Doe *versus* Richard Roe. Abbr., *v.* or *vs.*

vert (vûrt), *n.* [F., green, fr. L. *viridis*. See VERDANT; cf.

---

vernier gauge *or* **gage.** = VERNIER CALIPER.

ver'nine (vûr'nĭn; -nēn; 143), *n.* Also **-nin.** [*vernal* + *-ine.*] *Chem.* A white crystalline alkaloid, $C_{16}H_{20}O_5N_2$, extracted from the shoots of the vetch, red clover, sugar beet, etc. By decomposition it yields guanine.

vernisch, vernish, vernisshen. ✝ VARNISH.

‖ **ver'nis' Mar'tin'** (vẽr'nĭs' mär'tăN'). [F. *vernis* varnish.] A preparation of green varnish with gold powder brought into use by the Martin family in France under Louis XV.; also, furniture polished with it.

‖ **ver'nix ca'se-o'sa** (vûr'nĭks kā'sē-ō'sȧ), *n.* [NL., cheesy varnish.] *Med.* A fatty substance covering the skin of the newborn child.

Ver'non, Di *or* **Di-an'a** (dī *or* dī-ăn'ȧ vûr'nŭn). The royalist heroine of Scott's "Rob Roy," a frank and spirited beauty, a daring shot and rider, carefully educated, but ignorant of the world. See OSBALDISTONE.

ver'no-nin (vûr'nō-nĭn), *n. Chem.* A glucoside extracted from the root of a South African species of *Vernonia*, as a deliquescent powder.

‖ **ver non sem'per vi'ret.** [L.] Spring does not always flourish.

ver'nous (vûr'nŭs), *a.* [L. *vernus.*] Vernal. *Obs.*

ver'o-nal (vẽr'ō-năl), *n. Med.* A white crystalline substance, used as a hypnotic. Chemically it is diethyl malonyl urea.

ver'o-ne'se. *n.* [It. *Veronese* of Verona.] A ship of Verona. *Obs.*

verquere, *n.* [OD. *verkeeren* to turn, pervert, play at tables, *verkeerspel* a game of tables.] An old game of tables. *Obs.*

verd.] **1.** *Eng. Forest Law.* **a** Everything that grows, and bears a green leaf, within the forest, esp. great and thick coverts. **b** The right or privilege of cutting growing wood, or, *Rare*, of pasturing animals in a forest. **Over vert** is great woods, and **nether vert** is the under woods; **special vert** consisted of all trees growing in the king's own woods within the forest, and in other woods all trees that bore fruit on which deer fed.

Vert, 2.

ver'te-bra (vûr'tĕ-brȧ), *n.*; *L. pl.* **-BRÆ** (-brē). [L. *vertebra*, fr. *vertere* to turn, change. See **VERSION.**] **1.** *Anat. & Zoöl.* One of the bony or (in primitive or young animals) more or less cartilaginous segments composing the spinal column or backbone. In some of the lower vertebrates each vertebra consists of several distinct elements or pieces which never become united. In the higher vertebrates a typical vertebra has a short, more or less cylindrical *body*, or *centrum*, whose ends articulate by means of disks or pads of elastic fibrous or cartilaginous tissue with the centra of the adjacent vertebræ. From the dorsal surface of the centrum a bony arch (the neural arch) arises, and forms, when the vertebræ are in place, part of the **spinal canal** through which the spinal cord runs. Two anterior (in man often called *superior*) and two posterior (*inferior* in man) **articular processes** project from the neural arch and articulate with the articular processes of the adjacent vertebræ. A median dorsal **spinous process**, or **neural spine**, projects from the summit of the neural arch, and a transverse process (or **diapophysis**) from each side of it. See **TRANSVERSE PROCESS.** Various additional processes, also articular facets for the ribs, may be present. Other bony elements (esp. short or rudimentary ribs, or, in the caudal region, hæmal arches or chevron bones) take part in the formation of some of the vertebræ of most animals. Cf. **SPINAL COLUMN.**

2. *Zoöl.* One of the series of ossicles, shaped somewhat like the centrum of a vertebra, which form the axis of an arm of an ophiuran, formed by the union of lateral halves, which remain separate in a few deep-sea forms.

‖ **ver'te-bra pro'mi-nens** (prŏm'ĭ-nĕnz) [L. *prominens* jutting out], *Anat.*, the seventh cervical vertebra; — so called from its long spinous process.

ver'te-bral (-brăl), *a.* [Cf. F. *vertébral.*] *Anat. & Zoöl.* **a** Of or pert. to a vertebra, vertebræ, or the vertebral column; spinal. **b** Composed of, or having, vertebræ.

vertebral aponeurosis, *Anat.*, a fascia of the back, separating the muscles which hold erect the spinal column and head from those which move the arm and shoulders. It extends from the spinous process to the angles of the ribs. — **v. artery**, *Anat.*, a large branch of the subclavian which ascends through the foramina in the transverse processes of each of the cervical vertebræ (except the last one or two), and, entering the cranium through the foramen magnum, unites with its fellow of the opposite side to form the basilar artery. — **v. canal**, *Anat. & Zoöl.*, the spinal canal. — **v. column**, *Anat. & Zoöl.*, the spinal column; the backbone. — **v. ossicle**, *Zoöl.*, a vertebra of the arm of an ophiuran. — **v. plate.** **a** *Embryol.* In most embryos of craniate vertebrates, the part of the mesoblast near the notochord. It forms the primitive segments. **b** *Zoöl.* A neural plate (of a turtle). — **v. ribs**, *Anat.*, the floating ribs. — **v. vein**, *Anat.*, a tributary of the innominate vein formed by the union of branches which originate in the occipital region and form a plexus about the vertebral artery in its passage through the foramina of the cervical vertebræ. It receives various branches, the anterior vertebral and posterior vertebral, which join it near its termination, being the chief.

ver'te-brar-te'ri-al (-brär-tē'rĭ-ăl), *a.* *Anat.* Of or pert. to a vertebra or vertebræ and an artery; — said of the foramina in the transverse processes of cervical vertebræ and of the canal which they form for the vertebral vessels.

Ver'te-bra'ta (-brā'tȧ), *n. pl.* [NL.] *Zoöl.* A comprehensive division of animals, containing all those with a backbone, or segmented spinal column (which is represented in the embryo by a notochord), together with a few obviously related but more primitive forms in which the backbone is represented by a notochord throughout life. It contains the mammals (including man), birds, reptiles, amphibians, fishes, cyclostomes, and lancelets, and, though formerly ranked as a phylum, or even contrasted with all other animals (*Invertebrata*) collectively, is now usually made a subphylum of the only slightly more comprehensive phylum Chordata. The body of a typical vertebrate is somewhat elongate and bilaterally symmetrical externally, but not with respect to all the internal organs. The head at the anterior end bears the mouth and chief sense organs. The framework of the body and limbs is an internal skeleton which consists of articulated bones and cartilages, of which the spinal column, or backbone, in the median dorsal part of the body, forms the main **axis**. The main nerve cord is peculiar in being tubular. It lies dorsal to the axis of the spinal column and is enlarged within the head to form the brain. The body cavity containing most of the viscera is ventrally situated. Respiration in strictly aquatic forms is by gills in the walls of the pharynx, which is pierced by clefts for the circulation of water. Terrestrial forms breathe by lungs communicating with the pharynx, but the embryos of all have vestiges of gill apparatus, indicating descent from aquatic forms. Never more than two pairs of limbs are present. These are variously developed as legs, wings, or fins, according to the habits of the animal. The Vertebrata include the most highly organized as well as the largest animals, and the average size of the members is comparatively large. The group originated very early, and was already well differentiated in the Ordovician, but its earliest members were doubtless wormlike animals without hard parts, and are not likely to be found fossilized. Also, in a broader sense, equiv. to *Chordata.*

ver'te-brate (vûr'tĕ-brāt), *a.* [L. *vertebratus.*] **1.** Having a backbone, or spinal column; also, of or pertaining to the Vertebrata.

2. *Bot.* Contracted at intervals, so as to resemble the spine in animals. *Obs. or R.*

ver'te-brate, *n. Zoöl.* One of the Vertebrata.

ver'te-brat'ed (-brāt'ĕd), *a.* **a** Vertebrate. **b** Composed of, or having, vertebræ or segments resembling vertebræ.

ver'te-bra'tion (-brā'shŭn), *n.* Segmentation into vertebræ or divisions like vertebræ.

ver'te-bro- (vûr'tĕ-brō-). Combining form denoting *connection with*, *or relation to*, *a vertebra*, *vertebræ*, *or the vertebral column*; as in *vertebrocostal.*

ver'tex (vûr'tĕks), *n.*; *pl.* E. **VERTEXES** (-tĕk-sĕz; -sĭz; 151), L. **VERTICES** (-tĭ-sēz). [L. *vertex, -icis*, a whirl, the pole of the heavens, top of the head, top, summit, fr. *vertere* to turn. See **VERSION**; cf. **VORTEX.**] **1.** The principal or highest point; top; summit; crown; apex.

2. *Anat. & Zoöl.* The top of the head.

3. *Craniom.* The highest point on the skull.

4. *Math.* The point in any figure opposite to, and farthest from, the base; the top; the terminating point of some particular line or lines in a figure or a curve, as where the sides of an angle meet, or where a curve (or surface) meets its axis. The *principal vertex* of a conic section is, in the parabola, the vertex of the axis; in the ellipse, either end of either axis, usually the left-hand vertex of the transverse axis; in the hyperbola, either vertex, usually the right-hand vertex of the transverse axis.

5. *Astron.* **a** The zenith. **b** That point on the limb of a heavenly body farthest from the horizon.

Syn. — See **CULMINATION.**

ver'ti-cal (vûr'tĭ-kăl), *a.* [Cf. F. *vertical.* See **VERTEX.**] **1.** Of or pertaining to the vertex; situated at the vertex, or highest point; directly overhead, or in the zenith.

2. Perpendicular to the plane of the horizon; upright; plumb; as, a *vertical* line.

3. *Bot.* **a** Upright; perpendicular; at right angles to the plane of the supporting surface. **b** In the direction of the axis; lengthwise.

4. *Anat. & Zoöl.* **a** Pert. to, or on, the vertex of the head. **b** Directed upwards or downwards at a right angle to the plane of the body or part or the surface of the earth.

Syn. — **VERTICAL, PERPENDICULAR, PLUMB.** *Vertical* and *perpendicular* agree in designating that which is situated at right angles to the plane of the horizon. A **VERTICAL** line is one on which, if produced, the zenith lies; a **PERPENDICULAR** line is one which, if produced, passes through the center of the earth; *vertical* often suggests direction upward, and is the more abstract term; *perpendicular* often suggests direction downward, and applies more frequently to concrete things; but the words are somewhat freely interchangeable. **PLUMB** is more familiar or colloq., and denotes accordance with the direction of a plumb line.

vertical angle. **a** *Math.* Either of two angles lying on the opposite sides of two intersecting lines or planes. **b** *Astron. & Geod.* An angle measured on a vertical circle, called an angle of *elevation*, or *altitude*, when reckoned from the horizon upward, and of *depression* when downward below the horizon. — **v. anthers**, *Bot.*, anthers which are basifixed at the apexes of the filaments. — **v. boiler.** See **BOILER**, *n.*, **3 c.** — **v. circle.** **a** *Astron.* Any great circle of the celestial sphere whose plane is perpendicular to that of the horizon; an azimuth circle. **b** *Geod.* A theodolite having a finely divided circle on its horizontal axis, for measuring altitudes. — **v. composition.** *Music.* = **VERTICAL STRUCTURE.** — **v. danger angle.** See **DANGER ANGLE.** — **v. diplopia.** See **DIPLOPIA.** — **v. engine**, an engine in which the piston moves vertically up and down, esp. one in which the crank shaft is below the cylinder. — **v. equation**, *Math.*, the equation (of a curve or surface) in which the vertex is the origin and the axis an axis of coördinates. — **v. escapement.** *Horol.* See **ESCAPEMENT, 3.** — **v. fins**, *Zoöl.*, the median fins of a fish; the dorsal, anal, and caudal fins. — **v. fire**, *Gunn.*, high-angle fire; — erroneously so called. — **v. index**, *Craniom.*, the ratio of the height of the cranium to its length, usually expressed in hundredths of the length. — **v.-inverted type.** = **STEAM-HAMMER TYPE.** — **v. keel.** See **FLAT KEEL, KEELSON b.** — **v. leaves**, *Bot.*, leaves which present their edges to the earth and the sky, and their faces to the horizon, as those of most Australian eucalypts. — **v. limb**, a graduated arc attached to an instrument, as a theodolite, for measuring vertical angles. — **v. line.** **a** *Dialing.* A line perpendicular to the horizon. **b** *Conic Sections.* A right line drawn on the vertical plane, through the vertex of the cone. **c** *Surv.* The direction of a plumb line; a line normal to the surface of still water. **d** *Geom., Drawing, etc.* A line parallel to the sides of a page or sheet, in distinction from a *horizontal line*, parallel to the top or bottom. — **v. plane.** **a** *Conic Sections.* A plane through the axis of a cone. **b** *Projections.* Any plane that passes through a vertical line. **c** *Perspective.* The plane passing through the point of sight, and perpendicular to the ground plane and to the picture. — **vertical sash**, a sash sliding up and down. Cf. **FRENCH SASH.** — **v. slur**, *Music*, the arpeggio sign; — loosely so called. — **v. structure**, *Music*, composition in which the successive chords are viewed vertically as to their harmonic structure. It is distinguished from *horizontal structure*, in which the voice parts are viewed as to their melodic progression.

Came *vested* all in white, pure as her mind. *Milton.*
2. *Early Feudal Law.* To put (a person) into possession of land by the ceremony of investiture.
3. To clothe (with authority, power, or the like); to put in possession so as to give an immediate fixed right of present or future enjoyment; to invest; furnish; endow; — followed by *with* before the thing conferred; as, to *vest* a court with power to try cases of life and death.
4. To place or give into the possession or discretion of some person or authority; to commit to another; to give or grant, or cause to pass or take effect, an immediate fixed right of present or future enjoyment of; — often with *in;* as, an estate is *vested* in possession; power of life and death is *vested* in the courts.
vest, *v. i.* **1.** To put on vestments or garments. *Rare.*
2. To become vested; to be fixed; to take effect or pass, as a title or right so that there is a present right of enjoyment or a present fixed right of future enjoyment; — often followed by *in;* as, upon the death of the ancestor, the estate, or the right to the estate, *vests* in the heir at law.
Ves'ta (vĕs'tȧ), *n.* [L. *Vesta*, akin to Gr. Ἑστία Vesta, ἑστία the hearth of the house, and perh. to Skr. *vas* to dwell, and E. *was.*] **1.** *Rom. Relig.* The goddess of the hearth and its fire, hence of the preparation of food. In the most ancient period she was the only goddess ranking with the foremost gods, and she was one of the few Roman divinities practically unaffected by Greek influence to the end of heathendom. Her temple was the oldest in Rome. It symbolized the hearth of the city, conceived as a larger household, and contained no image of the goddess, but a fire rekindled on the Roman New Year (March 1) by friction of wood and in charge of the vestal virgins. Only these and their representative, the Pontifex Maximus, had access to the temple except at Vesta's chief feast, the **Vesta'li-a** (vĕs-tā'lĭ-ȧ), June 9, when the Roman matrons were allowed to enter. In private worship Vesta was included among the Penates. See DI; cf. HESTIA, 1.
2. *Astron.* See ASTEROID, *Table.*
3. [*l. c.*] A short match with a shank of thin wax taper; also, later, a kind of short wooden match.
ves'tal (-tăl), *a.* [L. *Vestalis* belonging to Vesta, vestal. See VESTA.] **1.** Of or pertaining to Vesta.
2. Pertaining to, characteristic of, or befitting, a vestal virgin or a nun.
ves'tal, *n.* [L. *Vestalis* (sc. *virgo*): cf. F. *vestale.* See VESTAL, *a.*] **1.** *Rom. Relig.* A virgin consecrated to Vesta, and to the service of watching the sacred fire, which was to be perpetually kept burning upon her altar. See VESTA, 1. During the historical period, there were six, conceived as one sacral person, represented by one called the virgo **Vestalis maxima.** They prepared from the first fruits of the harvest in May the sacrificial meal for the Lupercalia, Vestalia, and Ides of September. The vestals were subjected to rigid discipline, including bodily chastisement for faults, and, in case of loss of chastity, burial alive.
2. A virgin; a woman pure and chaste; also, a nun.
vest'ed (vĕs'tĕd), *pret. & p. p.* of VEST. Hence: *a.*
1. Clothed; robed; esp., wearing vestments or some ceremonial costume. "The *vested* priest." *Milton.*
2. *Law.* That has become a complete and consummated right; that has taken effect as an immediate fixed right to present or future enjoyment; as, *vested* interests, *vested* rights, a *vested* legacy, etc.
vested remainder, *Law*, an estate settled to remain to a determined person after the particular estate is spent, importing a present title in the remainderman to the remainder. — **v. school**, in Ireland, a national school which has been built by the aid of grants from the board of Commissioners of National Education and is secured for educational purposes by leases to the commissioners themselves, or to the commissioners and the trustees.

ves'try (vĕs'trĭ), *n.*; *pl.* -TRIES (-trĭz). [ME. *vestrye*, prob. for *vestery*, from (assumed) *vester*, fr. OF. *vestier*, fr. LL. *vestiarium*, in L. a clothespress, wardrobe, prop. neut. of *vestiarius* belonging to clothes, fr. *vestis* a garment. See VEST, *n.*; cf. VESTIARY.] **1.** A repository for clothes or vestments; a wardrobe. *Obs. or R.* — 2 *Kings* x. 22. **2.** *Eccl.* **a** In liturgical churches, a room within or attached to a church building in which the vestments of the clergy, the altar linen and hangings, and the sacred vessels are kept; — now more usually called a *sacristy*. **b** In churches that are not liturgical, a room within, or a building attached to, a church building, used as a chapel, Sunday-school room, prayer-meeting room, etc.

3. In the Church of England and in the Protestant Episcopal Church, a body of persons intrusted with the administration of the temporal affairs of a parish; — so called from the former custom of holding parish meetings in the vestry of the church; also, in England, a parish meeting or a meeting of a vestry. In England vestries anciently regulated all parochial affairs, ecclesiastical or civil, but now their duties are only to elect churchwardens, levy church rates, and receive accounts of church trustees. Their civil duties have been transferred to the parish councils, etc. Vestries are either **general** or **common**, composed of all ratepaying parishioners, or **select**, consisting of a representative committee, the number of which is fixed by custom or statute, chosen by the ratepayers. In the Protestant Episcopal Church the vestry is a body of representatives of the parish elected annually by the parish meeting and constituting with the churchwardens the body which manages the temporal affairs of the parish. They represent the parish in law, have care and charge of its property, collect and disburse its revenues, and when the rectorship is vacant act for the parishioners in taking steps to choose and call a rector and to provide for his support. The rector is *ex officio* a member of the vestry and is entitled to preside, if present, at all of its meetings.

4. Short for *vestry meeting*. *Obs.*

ves'try-man (-măn), *n.*; *pl.* -MEN (-mĕn). One of a vestry.

Ve-su'vi-an (vē-sū'vĭ-ăn), *a.* [Cf. F. *Vésuvien*, It. *Vesuviano*.] Of, pertaining to, or resembling, Vesuvius, the volcano near Naples.

ve-su'vi-an, *n.* [G. *vesuvian*. See VESUVIAN, *a.*] **1.** *Min.* Vesuvianite.

2. [See VESUVIAN, *a.*] A kind of match or fusee for lighting cigars, etc.

ve-su'vi-an-ite (-īt), *n.* [See VESUVIAN, *n.*, VESUVIUS, *a.*] *Min.* A mineral occurring in tetragonal crystals, and also massive, of a brown to green color, rarely sulphur yellow and blue. It is a basic silicate of aluminium and calcium with some iron and magnesium, and is common at Vesuvius. Also called *idocrase*. H., 6.5. Sp. gr., 3.35–3.45.

vetch (vĕch), *n.* [Also *fitch*, ME. *ficche*, *feche*, for *veche*; fr. OF. *veche*, var. of *vece*, F. *vesce*, fr. L. *vicia*.] **a** Any fabaceous plant of the genus *Vicia*, some species of which are valuable for fodder. The common vetch is *V. sativa*; the American vetch is *V. americana*. See VICIA. **b** Any of numerous other fabaceous plants of different genera, as the chickling vetch, horse vetch, kidney vetch, etc.

vetch'ling (-lĭng), *n.* [*vetch* + 1st *-ling*.] Any small fabaceous plant of the genus *Lathyrus*, esp. *L. pratensis*.

vet'er-an (vĕt'ẽr-ăn), *a.* [L. *veteranus*, fr. *vetus*, *veteris*, old; akin to Gr. ἔτος year, Skr. *vatsara*. See WETHER.] **1.** Grown old in experience; long exercised or practiced in anything, esp. in military life; as, a *veteran* officer.

Flattery of *veteran* diplomatists and courtiers. *Macaulay.*

2. Of, pertaining to, or characteristic of, a veteran; as, *veteran* skill, steadiness, etc.

vet'er-an, *n.* [Cf. F. *vétéran*. See VETERAN, *a.*] **1.** One long exercised in any service or art, esp. in war; one who has had much experience in service or who has seen specific service; as, Napoleon's *veterans*. The term has been used in various specific and technical senses, as in interpreting provisions of statutes, military orders, etc. (where it sometimes designates one who has reënlisted after a full term or terms of service), in determining eligibility to associations of *veterans*, so called, etc. The general and popular meaning, however, is one who has seen service, as distinguished from a recruit or a soldier in his first enlistment; as, a *veteran* of several battles, of several wars, of a specified war, etc.; a campaign like that of the Wilderness turned boy recruits into *veterans* in a week.

2. *Forestry.* Any tree over two feet in diameter, measured breast-high.

vet'er-i-na'ri-an (-ĭ-nā'rĭ-ăn; 115), *n.* [L. *veterinarius*. See VETERINARY.] One skilled in, or treating, diseases and injuries of domestic animals; a veterinary surgeon.

vet'er-i-na-ry (vĕt'ẽr-ĭ-nā-rĭ), *a.* [L. *veterinarius* of or pert. to beasts of burden and draft, fr. *veterinus*, prob. orig., of or pert. to yearlings: cf. F. *vétérinaire*. See VETERAN, WETHER.] Of or pert. to the art of healing or treating the diseases of domestic animals, as oxen, horses, sheep, etc.

vet'er-i-na-ry, *n.*; *pl.* -RIES (-rĭz). A veterinarian.

vet'i-tive (vĕt'ĭ-tĭv), *a.* [L. *vetare*, *vetitum*, to forbid.] Prohibiting; having, or pert. to, the power of vetoing.

vet'i-ver (-vẽr), *n.* [Tamil *vetti-ver*.] An East Indian grass (*Andropogon squarrosus*); also, its fragrant roots, much used for making mats and screens, and yielding an essential oil (**vetiver oil**). See OIL, *Table I.* Called also *kuskos*.

ve'to (vē'tō), *n.*; *pl.* -TOES (-tōz). [L. *veto* I forbid.] **1.** An authoritative prohibition or negative; interdiction.

This contemptuous *veto* of her husband's on any intimacy with her family. *G. Eliot.*

2. Specif.: A right or power (often called the **veto power**) possessed by one department or branch of a government to forbid or prohibit finally or provisionally the carrying out of projects attempted by another department; esp., a power vested in the chief executive to prevent permanently or temporarily the enactment of measures passed by the legislature. This executive power is called an **absolute veto** when it is conclusive on the legislature, as in case of the tribune of the plebs in ancient Rome; a **qualified**, or **limited**, **veto**, when conclusive except against the vote of an extraordinary majority of the legislature on a reconsideration, as in case of the President of the United States; a **suspensive veto**, when the law is merely suspended until reconsidered by the legislature and becomes a law if repassed by an ordinary majority. (Also see PERSONAL VETO.) The veto power of the President of the United States arises from the provision of the Constitution (Art. I., sec. 7, cl. 2 & 3), which, however, does not use the word *veto*, and extends to all bills and to every order, resolution, or vote to which the concurrence of both branches of legislature may be necessary. The veto power of the British crown is one of the residuary powers of the crown, but has not been exercised since 1708, and is now practically nominal. The power of one branch of a legislature to withhold its assent to any part or parts of a bill or measure initiated in the other branch and to assent to any other parts is often called the **veto in detail** or **power of veto in detail**; thus, to deprive a branch of the legislature of the power to amend money bills is to deprive it of the *veto in detail*.

3. The exercise of such authority; an act of prohibition or prevention; as, a *veto* is probable if the bill passes; also, *Chiefly U. S.*, a document or message (often called **veto message**) communicating the reasons of the executive for not officially approving a proposed law.

ve'to (vē'tō), *v. t.*; VE'TOED (-tōd); VE'TO-ING. To prohibit; negative; also, to refuse assent to, as a legislative bill, so as to prevent its enactment or cause its reconsideration.

Véto, M. et Mme. (mĕ-syū', *or* m'-syū', ā mà'dàm' vā'tō'). [F.] Louis XVI. and his queen, Marie Antoinette; — so called opprobriously by the French Revolutionists. The expression originated in the indignation of the people at the *veto* allowed the king on the resolves of the National Assembly. The name occurs in the celebrated song "La Carmagnole."

ve'to-ism (vē'tō-ĭz'm), *n.* Use or advocacy of the veto power, esp. for the chief executive. — **ve'to-ist**, *n.*

vex (vĕks), *v. t.*; VEXED (vĕkst) or, *Chiefly Rare or Poetic*, VEXT; VEX'ING. [L. *vexare*, *vexatum*, to vex, orig., to shake; perh. for *guegso* and akin to E. *quake*: cf. F. *vexer*.] **1.** To shake or toss about; to disquiet; disturb; agitate.

White curl the waves, and the *vexed* ocean roars. *Pope.*

2. By extension, to agitate; discuss; dispute; moot; — chiefly in such phrases as, *a vexed question*, *point*, etc.

3. To annoy or anger, as by petty provocations; to irritate; plague; as, *vexed* by ridicule; by extension, to trouble grievously; to harass; afflict.

Ten thousand torments *vex* my heart. *Prior.*

Syn. — See HARASS.

vex, *v. i.* To be irritated; to fret; worry. *Obs. or R.*

vex-a'tion (vĕk-sā'shŭn), *n.* [L. *vexatio*: cf. F. *vexation*.] **1.** A vexing; state of being vexed; trouble; irritation.

Passions too violent . . . afford us nothing but *vexation* and pain. *Sir W. Temple.*

2. Specif., act of harassing, or vexing, by process of law. **3.** Weariness; fatigue. *Obs.* **4.** A cause of trouble or disquiet; affliction.

Your children were *vexation* to your youth. *Shak.*

Syn. — VEXATION, CHAGRIN, MORTIFICATION. VEXATION implies displeasure and irritation; CHAGRIN connotes acute annoyance, coupled with a sense of dissatisfaction or disappointment; MORTIFICATION often adds to *chagrin* the implication of shame or humiliation; as, "All is vanity and *vexation* of spirit" (*Eccl.* i. 14); "In disappointments, where the . . . expectations [have been] sanguine . . . sorrow may degenerate into *vexation* and *chagrin*" (*Cogan*); "I hid myself a fortnight in the country, that my *chagrin* might fume away without observation" (*Johnson*); "There was . . . some reason for your previous vanity, as well as your present *mortification*"; cf. "He did not wish, as it seemed, to *mortify* me by an absolute refusal" (*De Quincey*). See HARASS, EMBARRASS.

vex-a'tious (-shŭs), *a.* [See VEXATION.] **1.** Causing vexation; annoying; also, troubling grievously; afflictive; as, a *vexatious* neighbor. "Continual *vexatious* wars." *South.* **2.** Full of vexation, trouble, or disquiet; disturbed.

He leads a *vexatious* life. *Sir K. Digby.*

vexatious suit, *Law*, a suit instituted maliciously and without probable cause.

— **vex-a'tious-ly**, *adv.* — **vex-a'tious-ness**, *n.*

vex'il-lar (vĕk'sĭ-lär), *n.* [Cf. F. *vexillaire*, L. *vexillarius*.] A standard bearer.

vex'il-la-ry (-lă-rĭ) } *n.* Pertaining to or designating the vexillum.

vexillary æstivation *or* **estivation**, *Bot.*, a mode of æstivation in which one large upper petal folds over, and covers, the other smaller petals, as in most papilionaceous plants.

vil'i-pend, *v. i.* To be disparaging or depreciatory.

vill (vĭl), *n.* [OF. *ville*, *vile*, a village, town, F. *ville* a town, city. See VILLA.] A village. *Now Chiefly Hist.*

vil'la (vĭl'ȧ), *n.* [L. *villa*, LL. also village, dim of L. *vicus* a village: cf. It. & F. *villa*. See VICINITY; cf. VILL, VILLAGE, VILLAIN.] **1.** *Early Eng. Hist.* A village.

2. Orig., a country property; as, Cicero had a *villa* at Baiæ; hence, a somewhat pretentious rural or suburban residence, often placed in extensive grounds.

vil'lage (-ăj), *n.* [F., fr. L. *villaticus* belonging to a country house or villa. See VILLA; cf. VILLATIC.] **1.** *Early Eng. Hist.* A tract of land with some houses, forming a unit for purposes of national police and taxation. This tract corresponded to the present civil parish (see PARISH, 1 a). These villages were of two types: the one, now sometimes called the nucleated village, having a single cluster of houses in the midst of its fields; the other having houses scattered in small clusters, or hamlets. The first type was characteristic of the eastern part of England, and the second of the western part, where Celtic arrangements were not completely effaced. Both the area and the population varied widely (as in the civil parishes of the 19th century), there being a hundred or more households in some and only a dozen or less in others. The basis or reason for the divisions is not yet known.

2. Hence: Any small aggregation of houses in the country, being in general less in number than in a town or city and more than in a hamlet; specif.: **a** In the United States, such a collection incorporated as a municipality and governed by a board of three or more trustees and a president, locally elected, and having a treasurer, clerk, collector, and street commissioner. **b** Any of various territorial divisions incorporated as "villages" under statutory authority, as under various civil codes in the United States, in the Province of Quebec, etc., or officially or conventionally called "villages."

village community. A primitive organized agricultural community. The term *village community* varies with the historical theories of the writers using it. About the middle of the 19th century it was used to designate the free, autonomous, communistic group unit which in the mark system was considered to be the political unit at the base of modern states, and which was believed by the followers of that theory to be represented in the early self-dependent agricultural communities of England, Germany (the *mark*), India, Russia (the *mir*), etc. Later writers vary in holding to a modified form of this theory or in rejecting it altogether, varying in the interpretation of the established facts. Cf. THREE-FIELD SYSTEM; 2d MARK, 2.

vil'lag-er (-ăj-ẽr), *n.* An inhabitant of a village.

vil'lain (-ĭn), *n.* In sense 1 now usually **vil'lein.** [ME. *vilein*, F. *vilain*, LL. *villanus*, fr. *villa* a village, L. *villa* a farm, country house. See VILLA.] **1.** Orig., apparently, any free common villager or village peasant of the same classes lower in rank than the thegn, as enumerated in the Domesday Book; a churl; specif., in a restricted sense, a free peasant of a class lower than a sokeman and higher in rank than the cotters and bordars (and colliberts). These peasant freemen appear to have had a wergild of 200 Saxon shillings (£4) and a manbote of 30 shillings, to have had property rights in both real and personal property, and not to have been adscript to the soil. Later, by about the 13th century, the term *villein* was applied to a class of unfree peasants, or serfs, who as regards their lord were slaves; were in their legal relations with respect to all others. They appear to have had no rights against their lords, except that of protection from being maimed or killed, and were subject to be sold by their lords or removed from their lands at will. From this status they gradually improved in condition, becoming the free peasantry of later days, their precarious tenure of land generally developing into the customary copyhold tenures (see COPYHOLD). It was formerly erroneously supposed that *villein regardant* designated a peasant adscript to the soil, and *villein in gross* an absolute slave (see REGARDANT, *a.*, 1).

2. A baseborn or clownish person; a boor. *Obs. or R.*

Pour the blood of the *villain* in one basin, and the blood of the gentleman in another, what difference shall there be proved? *Becon.*

3. One capable or guilty of great crimes; a deliberate scoundrel; a knave; rascal; — often used playfully without evil implication; as, the little *villain* has stolen my hat.

Calm, thinking *villains*, whom no faith could fix. *Pope.*

vil'lain (vĭl'ĭn), *a.* [F. *vilain*.] *Rare.* **a** Of, pert. to, or composed of, villains, or villeins. **b** Befitting a villain; as: (1) Clownish; loutish. (2) Wicked; scoundrelly; dastardly.

vil'lain-ous (-ŭs), *a.* [Cf. OF. *vileneus*.] **1.** Befitting a villain, or scoundrel; proceeding from, or revealing, great depravity; evil; as, a *villainous* assault.

2. Mean; bad; wretched; vile; as, *villainous* weather; a *villainous* jargon. "*Villainous* saltpeter." *Shak.*

— **vil'lain-ous-ly**, *adv.* — **vil'lain-ous-ness**, *n.*

vil'lain-y (-ĭ), *n.*; *pl.* -LAINIES (-ĭz). [ME. *vilanie*, *vileinye*, *vilenie*, F. *vilenie*, OF. also *vilanie*, *vileinie*. See VILLAIN, *n.*] **1.** State of being a serf; serfdom. *Obs.*

2. Quality or state of being villainous, or evil; extreme depravity or wickedness; as, the *villainy* of a seducer.

3. Abusive, discourteous, or foul speech. *Obs.*

He never yet no *vileinye* ne said. *Chaucer.*

4. Discourteous conduct; boorishness. *Obs.*

5. A villainous act; a deed of deep depravity; a crime.

vin'di-ca-ble (vĭn'dĭ-kȧ-b'l), *a.* Capable of being vindicated; justifiable. — **vin'di-ca-bil'i-ty** (-bĭl'ĭ-tĭ), *n.*

vin'di-cate (-kāt), *v. t.*; VIN'DI-CAT'ED (-kāt'ĕd); VIN'DI-CAT'ING (-kāt'ĭng). [L. *vindicatus*, p. p. of *vindicare* to lay claim to, defend, avenge. See VENGEANCE.] **1.** To lay claim to; to assert a right to; to claim. *Rare.* *Pope.*

2. *Roman & Civil Law.* To assert one's legal right to (a thing); to recover by legal process.

3. To defend or secure against assault of any kind; to maintain; defend. *Obs. or R.*

[He] that *vindicates* his country from a tyrant. *Massinger.*

4. To support or maintain as true or correct, against denial, censure, or objections; to free from all suspicion of wrong, dishonor, invalidity, or the like; to sustain; justify; as, to *vindicate* one's honor; to *vindicate* a claim, right, or title; to *vindicate* an official or an official act.

5. To avenge; punish. *Obs.* *Bacon.*

Syn. — Defend, maintain, assert, claim; absolve, excuse, exculpate, exonerate. — VINDICATE, JUSTIFY. TO JUSTIFY, as here compared (see JUSTIFY), is esp. to maintain the right, justice, or propriety of something, and may or may not suggest an attitude of defense or apology; VINDICATE commonly carries more definitely the implication of successful defense, as against some charge, denial, or censure; as, "Her thought was trying to *justify* her delight in the colors by merging them in her mystic religious joy" (*G. Eliot*); "So does he *vindicate* Pompilia's fame" (*R. Browning*); "that . . . I may assert eternal Providence, and *justify* the ways of God to men" (*Milton*); "Laugh where we must, be candid where we can; but *vindicate* the ways of God to man" (*Pope*). See ASSERT, EXCULPATE, EXCUSE.

vin'di-ca'tion (-kā'shŭn), *n.* [L. *vindicatio* a laying claim, defense, vindication.] Act of vindicating, or state of being vindicated; specif., defense; justification against denial or censure; as, the *vindication* of one's honor.

vin'di-ca-to-ry (vĭn'dĭ-kȧ-tō-rĭ), *a.* **1.** Tending or serving to vindicate; of or pert. to the act of vindicating; specif., justificatory; vindicative.

2. Inflicting punishment; avenging; punitive. *Obs. or R.*

vin-dic'tive (vĭn-dĭk'tĭv), *a.* [For *vindicative*, confused with L. *vindicta* revenge, punishment, fr. *vindicare* to vindicate. See VINDICATE; cf. VINDICATIVE.] **1.** Disposed to revenge; prompted or characterized by revenge; retaliatory; as, a *vindictive* spirit, punishment, man.

2. Punitive. *Obs. or Archaic.*

Syn. — VINDICTIVE, REVENGEFUL are often interchangeable; but REVENGEFUL is commonly the stronger term; as, "There was nothing *vindictive* in his nature; but, if revenge came his way, it might as well be good" (*Stevenson*); "Read the cardinal's together . . . and his potency together. You know his nature, that he 's *revengeful*, and I know his sword hath a sharp edge" (*Shak.*). See AVENGE, REQUITAL.

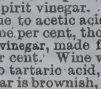
vine'dress'er (vīn'drĕs'ẽr), *n.* One who cultivates, prunes, or cares for, grapevines. *Is.* lxi. 5.

vin'e-gar (vĭn'ē-gẽr), *n.* [ME. *vinegre*, F. *vinaigre*; *vin* wine (L. *vinum*) + *aigre* sour. See WINE; EAGER, *a.*] A sour liquid used as a condiment, or as a preservative, and obtained by the fermentation of dilute alcoholic liquids, as wine, cider, or beer. Vinegar may be made, as cider vinegar usually is, by keeping the liquid in a warm place in contact with air often with the addition of "mother." The **Orleans process** for wine vinegar is continuous, wine being added in installments to vinegar in a large oak cask, and vinegar drawn off from time to time. In the quick **vinegar process** the liquid, which is allowed to trickle slowly over shavings or other porous material placed in a tall vat, collects at the bottom as vinegar. This process is usually employed for malt, beer, and spirit vinegar. The characteristic sourness of vinegar is due to acetic acid, of which it ordinarily contains three to nine per cent, though the so-called **vinegar essence**, or **double vinegar**, made from spirits, contains as high as fourteen per cent. Wine vinegar is pale yellow to red, contains also tartaric acid, and has a highly valued aroma. Cider vinegar is brownish, contains malic acid, and has an odor of apples. Malt and beer vinegars are brown, and contain various dissolved substances. Spirit vinegars, which naturally have little color or aroma, are often colored and flavored, and imitation vinegar is made from pyroligneous acid. Vinegar was once largely used in pharmacy as a menstruum, as in **vinegar of opium**, etc., but, on account of its tendency to decomposition, it has been replaced by dilute acetic acid.

vinegar of opium, *Pharm.*, a solution of opium in diluted acetic acid; black drop.



vinegar eel. A minute nematode worm (*Anguillula aceti*), often found in great numbers in vinegar, sour paste, and other fermenting vegetable substances; also, sometimes, one of other species of the family Anguillulidæ.

vinegar fly. Any of several fruit flies, esp. *Drosophila ampelophila*, which breed in imperfectly sealed preserves and in pickles.

Vinegar Eel, Female, much enlarged. *m* Mouth; *o* Eggs; *v* Genital Opening; *x* Anus.

vin'e-gar-roon' (vĭn'ē-gȧ-rōōn'), *n.* [Cf. Sp. *vinagre* vinegar. Cf. VINAIGRIER.] A whip scorpion, esp. a large Mexican species (*Thelyphonus giganteus*) popularly supposed to be very venomous; — so called from the odor that it emits when alarmed.

vinegar tree. The staghorn sumac, whose acid berries have been used to intensify the sourness of vinegar.

vin'e-gar-y (vĭn'ē-gẽr-ĭ), *a.* Of the nature of vinegar; hence, sour; unamiable; crabbed.

vine hawk moth. Any of several hawk moths whose larvæ feed on grapevine leaves, esp. *Pholus achmeon* and *Ampelophaga myron*. See HOG CATERPILLAR.

vine maple. A maple (*Acer circinatum*) of the northwestern United States, whose stems are often prostrate and strike root freely, forming dense thickets.

vī'o-lin' (vī'ō-lĭn' *or, esp. in British usage,* vī'ō-lĭn), *n.* [It. *violino*, dim. of *viola*. See 2d VIOL.] **1.** *Music.* The modern treble instrument of the viol class, distinguished in its developed form from the typical *viol* (which see) by having the back scooped out and slightly rounded like the belly, a low bridge, *f*-shaped sound holes, thick but narrow handle, acute corners, and four strings tuned to *g*, *d'*, *a'*, and *e'''* (see 5th PITCH, 12); — called also colloquially *fiddle*. It is made of carefully chosen maple and pine, and in superior instruments every detail, as of the adjustment between bridge, sound post, and sound holes, and of the model, jointing, and varnish, is studied to bring about the utmost sonority and refinement of tone. Violin making was brought to its highest perfection by the masters in Cremona, in northern Italy, esp. by Nicola Amati, Stradivari, and Guarneri. The violin is unique for varied, rich, and expressive tone quality, and has the first place in the orchestra.
2. A violin player; as, the first *violin*.

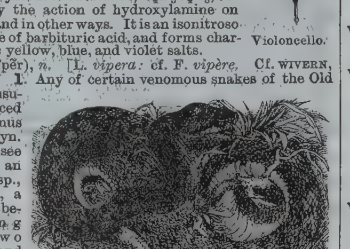
It is an isonitroso derivative of barbituric acid, and forms characteristic yellow, blue, and violet salts.

vī'per (vī'pẽr), *n.* [L. *vipera*: cf. F. *vipère*, Cf. WIVERN, WEEVER.] **1.** Any of certain venomous snakes of the Old World, usually placed in the genus *Vipera*, syn. *Petias* (see below); an adder; esp., *V. berus*, a species becoming about two feet long, and varying in color from red, brown, or gray, with dark markings, to black. It is found from England, where it was formerly abundant, across Europe and Asia to Sakhalin. Its bite is often very severe, but rarely fatal to man. In southern Europe other closely related species of the same genus occur. Also, any of the snakes of several Old World genera, as *Daboia*, *Bitis*, and *Cerastes*, closely related to the above, which constitute the family Viperidæ, in the narrow sense of that word. In broader sense, the pit vipers (Crotalinæ) are also included, the typical Viperidæ then forming the subfamily Viperinæ. See PIT VIPER. Loosely or popularly various venomous or supposedly venomous snakes are called *vipers*. It is claimed that *Coluber* (which see) should be retained as the generic name of the vipers instead of (as usual) for that of certain harmless snakes. According to this view the family name *Viperidæ* must be replaced by *Colubridæ*, and certain other changes from the nomenclature of snakes adopted in this dictionary necessarily follow.



Common European Viper.

2. A dangerous, treacherous, or malignant person.

Who committed . . .
To such a *viper* his most sacred trust. *Milton.*

viper fish. A small, slender, phosphorescent deep-sea fish (*Chauliodus sloanei*). It has long ventral and dorsal fins, a large mouth, and very long, sharp teeth. Also, any of various other related fishes.

A man was driven to depend for his security against misunderstanding, upon the pure *virtue* of his syntax. *De Quincey.*
3. Excellence of any kind; merit; worth; value; as, to make *virtue*, or a *virtue*, of necessity, i. e., to make a merit of what cannot be helped, to yield to necessity. "I can sing, weave, sew, and dance, with other *virtues.*" *Shak.*
4. Moral practice or action; conformity to the standard of right; moral excellence; integrity of character; uprightness of conduct; rectitude; morality. Also, a particular moral excellence; as, the *virtue* of temperance, of charity, etc. "The very *virtue* of compassion." *Shak.* Socrates identified *virtue* with wisdom, which he conceived to be knowledge of the good, holding it to be incredible that any man could know and yet not act in accordance with the good. Plato distinguished four cardinal virtues, wisdom or prudence, courage or fortitude, temperance, and justice or righteousness. Aristotle regarded *virtue* as a habit implying the choice of excellence in conduct, the excellence being realized in a mean between excess and defect. He divided the virtues into the *moral*, having to do with practical life, and the *intellectual*, the virtues of wisdom and insight; and in this he was followed by the medieval writers. St. Augustine conceived charity as the source of all virtue, and he distinguished as cardinal virtues (following Plato), prudence, fortitude, temperance, and justice. Christian moralists adopted these the natural virtues, and further distinguished from them the **supernatural, theological,** or Christian virtues of faith, hope, and charity, these being infused by God into human nature. Patience and humility are sometimes added to the cardinal virtues by Christian writers. According to Mencius (Meng tse) the cardinal virtues comprise wisdom, humanity, justice, propriety.
Virtue is not to be considered in the light of mere innocence, or abstaining from harm, but as the exertion of our faculties in doing good. *Bp. Butler.*

vir'u-lence (vĭr'ōō-lĕns) ‖ *n.* [Cf. F. *virulence*, L. *virulentia* (-*tia* an offensive odor, a stench.)] **1.** Quality or state of being virulent or venomous. **2.** Extreme bitterness or malignity of temper; malignancy. "Refuted without satirical *virulency*." *Barrow.*

vir'u-lent (-lĕnt), *a.* [L. *virulentus*, fr. *virus* poison; cf. F. *viruleni*. See VIRUS.] **1.** Extremely poisonous or venomous; noxious; deadly; as, a *virulent* disease. **2.** Bitter in enmity; malignant; as, a *virulent* invective. **Syn.** — See POISONOUS.

—vir'u-lent-ly, *adv.* **— vir'u-lent-ness**, *n. Rare.*

vi'rus (vī'rŭs), *n.* [L., a slimy or poisonous liquid, poison, stench; akin to Gr. ἰός poison, Skr. *visha*. Cf. WIZEN, *v. i.*] **1.** *Med.* The poison or contagium of an infectious disease; the specific poison introduced into a human or animal organism with the exciting agent of an infectious disease, and by which the disease is communicated or transmitted; as, the *virus* of smallpox; also, vaccine virus. **2.** Hence: **a** Any morbid corrupting quality in intellectual or moral conditions; something that poisons the mind or the soul; as, the *virus* of licentiousness. **b** Malignity; malice; virulence. *Now Rare.*

‖ **vis** (vĭs), *n.; pl.* VIRES (vī'rēz). [L.] Force; — used esp. in various Latin phrases (which see in the *Vocabulary*).

vi'sa (vē'zȧ; vē-zȧ'), *n.* [F., fr. L. *visa*, fem. sing. or neut. pl. of *visus*, p. p. of *videre* to see.] A visé.

vi'sa, *v. t.*; VI'SAED (vē'zȧd; vē-zȧd'); VI'SA-ING. To visé.

vis'age (vĭz'ĕj), *n.* [F. *visage*, fr. *vis* face, L. *visus* a seeing, a look, fr. *videre*, *visum*, to see. See VISION.] The face, countenance, or look of a person or an animal; — chiefly applied to the human face; hence, aspect; appearance; semblance. "A *visage* of demand." *Shak.*

His *visage* was so marred more than any man. *Is.* lii. 14.

Syn. — See FACE.

vis'aged (-ĕjd), *a.* Having (such) a visage; — usually in composition. "Grim-*visaged* war." *Shak.*

‖ **vis'-à-vis'** (vē'zȧ-vē'), *n.* [F., opposite, face to face.] **1.** One that is face to face with another; esp., one who faces another in dancing. **2.** A carriage in which persons sit face to face. **3.** A kind of S-shaped couch or double chair in which persons seated in the opposite sides are face to face.

‖ **vis'-à-vis'**, *adv. & a.* Face to face; opposite.

Vi-sa'yan (vē-sä'yȧn), *or* **Bi-sa'yan** (bē- ; 133), *n.* [Cf. Sp. *Bisayo* a Visayan.] A member of the most numerous of the native races of the Philippines, occupying the Visayan Islands and the northern coast of Mindanao; also, their language (see MALAYO-POLYNESIAN). The Visayans possessed a native culture and alphabet.

vis-ca'cha, **viz-ca'cha** (vĭs-kä'chȧ; 268), *n.* [Sp., fr. Quichua *huisk'acha*.] A burrowing South American rodent (*Viscaccia viscacia*) allied to the chinchillas, but much larger. Its fur is soft and rather long, mottled gray above, white or yellowish white beneath, with a white band across the muzzle and a dark one on each cheek. It inhabits grassy plains in colonies called **vis'ca-che'ras** (vĭs'kä-chā'rȧs).

Vis-ca'ri-a (vĭs-kā'rĭ-ȧ ; 115), *n.* [NL., fr. L. *viscum* mistletoe, birdlime; — so named from its viscous stem.] *Bot.* A small genus of boreal or alpine silenaceous herbs, having erect stems, narrow leaves, and terminal cymose flowers with the calyx not inflated and the petals appendaged. *V. alpina* is the red alpine campion.

vis'cer-a (vĭs'ēr-ȧ), *n. pl.; sing.* (rarely used) VISCUS (-kŭs). [L.] The internal organs, esp. those of the cavities of the body or trunk, as the heart, liver, intestines, etc.

vis'cer-al (-ăl), *a.* [Cf. F. *viscéral*, LL. *visceralis*.] *Anat. & Zoöl.* Of or pert. to the viscera; splanchnic; as, the visceral layer of a serous membrane, that part reflected over the organs contained in the cavity it lines. Cf. PARIETAL, 1.

visceral arches. *Zoöl. & Embryol.* **a** In the skeleton of vertebrates, a series of bony or cartilaginous inverted arches developed in the walls of the mouth cavity and pharynx. In typical cases a visceral arch consists of a curved segmented bar or rod on each side, meeting its fellow of the opposite side (either directly or with the intervention of a median piece) at the ventral end. The first, anterior, or *mandibular* arch, is greatly modified, to form or take part in the formation of the skeleton of the jaws; the second or hyoid arch is also modified for particular functions (see HYOID a, b). The succeeding ones are collectively termed *branchial* arches, as their chief function is to support the gills of water-breathing vertebrates, and are best developed in fishes, but vestiges of one or more are present even in all land vertebrates. **b** In a looser sense, designating the above skeletal elements together with the structures surrounding and supported by each. — v. clefts, *Zoöl. & Embryol.*, furrows or clefts (which may or may not extend through from the exterior to the cavity of the mouth and pharynx) on each side of the neck region between successive visceral arches. That between the mandibular and hyoid arches is usually entirely closed and obliterated in the adult, though persisting as the *spiracle* in certain primitive fishes. The remaining ones are the *branchial clefts.* — v. ganglia, *Zoöl.*, in most mollusks, a pair of ganglia which in some cases lie close to, or are fused with, the pleural ganglia, in other cases lie much farther back, but connected with the pleural ganglia by *pleurovisceral* connectives. They are also connected with each other by a commissure, thus forming with the pleurovisceral connectives a loop, known as the *visceral loop.* This loop is twisted like a figure 8 in the streptoneurous gastropods. It gives off branches to the gill or gills, osphradium, parts of the mantle, and various viscera. — v. loop. *Zoöl.* See VISCERAL GANGLIA. — **visceral nerves**, *Zoöl.*, nerves supplying viscera; specif., in mollusks, nerves forming the visceral loop.

vis'cer-ate (vĭs'ēr-āt), *v. t.* -AT'ED (-ā'tĕd); -AT'ING (-ā'tĭng). To eviscerate. — **vis'cer-a'tion** (-ā'shŭn), *n.*

vis'cer-i- (vĭs'ēr-ĭ-), **vis'cer-o-** (vĭs'ēr-ō-). Combining forms for *viscera.*

vis'cid (vĭs'ĭd), *a.* [L. *viscidus*, fr. *viscum* the mistletoe, birdlime made from the berries of the mistletoe; akin to Gr. ἰξός.] Sticking or adhering, and having a ropy or glutinous consistency; viscous; glutinous; sticky; as, tar, gums, etc., are more or less *viscid.*

vis-cid'i-ty (vĭ-sĭd'ĭ-tĭ), *n.* Quality or state of being viscid; stickiness; also, viscid matter; glutinous concretion.

vis-co'dal (vĭs-kō'dăl), *a.* [See VISCOUS; -OD.] Somewhat viscous. Cf. MOBILE, *a.*, 2 **c.**

vis'cose (vĭs'kōs), *n.* [L. *viscosus* viscous.] A viscid solution of cellulose thiocarbonates made by treating cellulose with caustic alkali, carbon disulphide, and water. By the action of heat and of certain salts it regenerates cellulose. It is used for artificial silk, sizing and glazing, and as a cement.

vis'co-si-ty (vĭs'kŏ-sĭm'ē-tĕr), *n.* *Viscosity* + *-meter.*] An instrument for measuring the degree of viscosity of liquids, as solutions of gum. — **vis'co-si-met'ric** (-sĭ-mĕt'rĭk), **vis'co-si-met'ri-cal** (-rĭ-kăl), *a.*

vis-cos'i-ty (vĭs-kŏs'ĭ-tĭ), *n.* [Cf. F. *viscosité*, LL. *viscositas.*] **1.** Quality or state of being viscous. **2.** *Physics.* a Resistance offered by a fluid to the relative motion of its particles; internal friction. **b** Capability possessed by a solid of yielding continually under stress.

vis'count' (vī'kount'), *n.* [ME. *vicounte*, OF. *visconte*, *vezconte*, F. *vicomte*, LL. *vicecomes*; L. *vice* (see VICE, *a.*) + *comes* a companion, LL., a count. See COUNT.] **1.** An officer who formerly acted in place of the count, or earl. In England his duties were later mostly transferred to the sheriff (who represented the king); hence, erron., the sheriff. **2.** A nobleman next below an earl or count and next above a baron. The title became hereditary, with tenure of land, under the feudal system, but now carries simply noble rank. As such it was first conferred in England by Henry VI.

vis'count'ess (vī'kount'ĕs), *n.* [Cf. F. *vicomtesse*, LL. *vicecomitissa.*] **1.** A viscount's wife; also, a lady holding corresponding rank in her own right. **2.** A size of slate. *Brit.* See SLATE, 3, *Table.*

vis'cous (vĭs'kŭs), *a.* [L. *viscosus.* See VISCID.] **1.** Adhesive or sticky, and having a ropy or glutinous consistency; viscid; glutinous; as, a *viscous* juice.

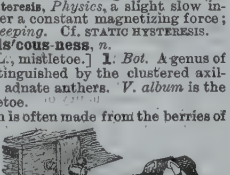
viscous fermentation, fermentation resulting in a viscous or gummy product. — **v. hysteresis**, *Physics*, a slight slow increase of magnetism under a constant magnetizing force; — called also *magnetic creeping.* Cf. STATIC HYSTERESIS.

—vis'cous-ly, *adv.* **— vis'cous-ness**, *n.*

Vis'cum (vĭs'kŭm), *n.* [L., mistletoe.] **1.** *Bot.* A genus of Old World mistletoes distinguished by the clustered axillary bracted flowers with adnate anthers. *V. album* is the common European mistletoe.

2. [*l. c.*] Birdlime, which is often made from the berries of the European mistletoe.

vise, **vice** (vīs), *n.* [ME. *vis*, *vice*, *vyce*, a winding stair, OF. *vis*, *viz*, F. *vis* a screw, winding stair, fr. L. *vitis* a vine, pl. *vites*; prob. akin to E. *withy.*] **1.** A screw. *Obs.* **2.** Any of various tools or devices having two jaws, closing by a screw, lever, cam, or the like, for holding work, as in filing.



1 Carpenter's Wooden Vise; 2 Paring and allel Swivel Bench Vise.

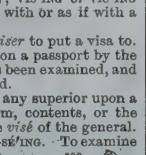
3. A tool for drawing lead into cames for casements.

vise, **vice**, *v. t.*; VISED or VICED (vīst); VIS'ING or VIC'ING (vīs'ĭng). To hold, force, or squeeze, with or as if with a vise. *Rare.*

‖ **vi-sé'** (vē-zā'), *n.* [F. *visé*, p. p. of *viser* to put a visa to. See VISA.] **1.** An indorsement made on a passport by the proper authorities, denoting that it has been examined, and that the bearer is permitted to proceed. **2.** A signature of formal approval by any superior upon a document requiring approval as to form, contents, or the like; as, all telegrams had to bear the *visé* of the general.

vi-sé' (vē-zā'), *v. t.*; VI-SÉD' (-zād'); VI-SÉ'ING. To examine and indorse for approval, as a passport.

Vish'nu (vĭsh'nōō), *n.* [Skr. *Vishnu*, fr. *vish* to pervade.] *Hindu Myth.* The second god of the Hindu Trimurti, or trinity, called the preserver, in contrast to Brahma, the creator, and Siva, the destroyer. He is regarded by the Vaishnavas as the supreme deity. In early Hinduism he was a sun god. Vishnu has many avatars, or incarnations, the earliest being as the giant fish which saved from the flood the ancestor of mankind (Brahma is also credited with this act). His most important avatars are as Rama and Krishna, under which forms he has millions of worshipers.



Vishnu.

vis'i-bil'i-ty (vĭz'ĭ-bĭl'ĭ-tĭ), *n.* [L. *visibilitas*: cf. F. *visibilité.*] **1.** Quality or state of being visible. **2.** A thing visible. *Obs.*

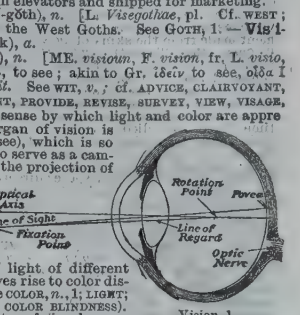
vis'i-ble (vĭz'ĭ-b'l), *a.* [F., fr. L. *visibilis*, fr. *videre*, *visum*, to see. See VISION.] Perceivable by the eye; capable of being seen; perceptible; as, a *visible* star; hence, apparent; discoverable; as, no *visible* means of support.

Maker of heaven and earth, and of all things *visible* and invisible. *Bk. of Com. Prayer.*

visible church. *Theol.* = CHURCH VISIBLE. — **v. horizon.** = APPARENT HORIZON. — **v. spectrum.** See SPECTRUM, 2. — **v. speech**, *Phon.*, a system of characters invented by Prof. Alexander Melville Bell to represent all sounds that may be uttered by the vocal organs, and intended to be suggestive of the position of the organs in uttering them. — **v. supply**, *Com.*, the total of what is known to be available, as of grain in elevators and shipped for marketing.

Vis'i-goth (vĭz'ĭ-gŏth), *n.* [L. *Visegothæ*, pl. Cf. WEST; GOTH.] One of the West Goths. See GOTH, 1. — **Vis'i-goth'ic** (-gŏth'ĭk), *a.*

vi'sion (vĭzh'ŭn), *n.* [ME. *visioun*, F. *vision*, fr. L. *visio*, fr. *videre*, *visum*, to see; akin to Gr. ἰδεῖν to see, οἶδα I know, and E. *wit.* See WIT, *v.*; cf. ADVICE, CLAIRVOYANT, ENVY, *n.*, EVIDENT, PROVIDE, REVISE, SURVEY, VIEW, VISAGE, VISIT.] **1.** The sense by which light and color are appreciated. The organ of vision is the eye (which see), which is so constructed as to serve as a camera obscura for the projection of images upon the retina, thus enabling perception of form (see CAMERA, 2), while the action upon the retina of light of different wave lengths gives rise to color discriminations (see COLOR, *n.*, 1; LIGHT; cf. AFTERIMAGE, COLOR BLINDNESS). The cerebral center of visual sensation is in the occipital region of the brain (see BRAIN, 1), and excitation of this area produces visual sensation even when the eye is not stimulated. It was formerly supposed that the eye perceived objects by means of a pencil of rays, **visual rays**, diverging from the eye so as to cover the field of vision, and that through these the qualities of the objects were transmitted to the mind. Vision is either *monocular* or *binocular*, the latter having a slightly extended field of vision and being especially adapted to the perception of three-dimensional space.



Vision, 1.

2. Act of seeing external objects; actual sight; perception.

Faith here is turned into *vision* there. *Hammond.*

3. Act or power of perceiving mental images, as those formed by the imagination; as, a poet's *vision.*

The *vision* and the faculty divine. *Wordsworth.*

4. That which is seen; an object of sight; as, she was a *vision* of delight; a hideous *vision.* *Shak.*

5. Esp., that which is seen otherwise than by the ordinary sight; an imaginary, supernatural, or prophetic sight; an apparition; as, *visions* of wealth; the *visions* of Isaiah.

Your young men shall see *visions.* *Joel* ii. 28.

Syn. — See DREAM.

vi'sion, *v. t.*; VI'SIONED (-ŭnd); VI'SION-ING. **1.** To see in or as if in a vision; to dream, fancy, imagine, or the like.

For them no *visioned* terrors daunt. *Scott.*

2. To manifest to the sight, esp. as if in a vision.

So think the anger of God apparently *visioned* or shown unto thee in the knitting of my brows. *Nash.*

vi'sion-al (-ăl), *a.* Of or pertaining to a vision; hence, unreal; imaginary. — **vi'sion-al-ly**, *adv.*

vi'sion-a-ry (-ĕr-ĭ), *a.* [Cf. F. *visionnaire.*] **1.** Of or pertaining to a vision or visions; characterized by, or favorable for, visions. "The *visionary* hour." *Thomson.*

2. Disposed to see visions; given to reverie, fancy, or the like; dreamy; imaginative; hence, apt to accept and act on fancies as if realities; impractical.

Or lull to rest the *visionary* maid. *Pope.*

3. Of the nature of a vision; existing in imagination only; fanciful; hence, having no solid foundation; impracticable; chimerical; as, a *visionary* scheme or project. *Swift.*

Syn. — Fanciful, fantastic, unreal, unfounded, vain, wild, deceitful, delusive; ideal, romantic. — VISIONARY, CHIMERICAL, UTOPIAN, QUIXOTIC. VISIONARY, as here compared, applies to that which is merely fanciful, or which can never be realized in fact; that is CHIMERICAL which is wildly or fantastically visionary or unreal; as, "Goldsmith had long a *visionary* project, that . . . he would go to Aleppo, in order to acquire a knowledge . . . of any arts peculiar to the East, and introduce them into Britain" (*Boswell*); "This was a *visionary* scheme, . . . a project far above his skill" (*Swift*); "This is all mere Utopia, . . . the *chimerical* system of Plato's commonwealth" (*Fielding*); "They have annexed to every species of knowledge some *chimerical* character of terror and inhibition" (*Johnson*). That is UTOPIAN which is visionary or chimerical in its assumption of an ideal perfection; QUIXOTIC implies extravagantly chivalrous devotion to visionary ideals; as, "a danger . . . lest . . . we should unwarily conclude friendship a false ideal good, a mere *utopian* pleasure" (*Cowper*); "to play adroitly either on her affectionate ardor or her *quixotic* enthusiasm" (*G. Eliot*); "His moral attitude to his fellow creatures was that of one who was . . . *quixotically* high-minded" (*J. M. Robertson*). See FANCIFUL, ENTHUSIAST, IMAGINARY, FABULOUS.

vi'sion-a-ry, *n.*; *pl.* -RIES (-rĭz). **1.** One who sees visions, or phantoms. **2.** One who relies, or tends to rely, on visions, or impractical ideas, projects, or the like; an impractical person.

vi'sioned (vĭzh'ŭnd), *a.* Having the power of seeing visions; inspired; also, seen in visions.

vir'u-lent-ed, *a.* Made virulent. *Obs.*

2. Specif., a superior, or a person lawfully appointed for the purpose, who makes formal visits of inspection.

The king is the *visitor* of all lay corporations. *Blackstone.*

3. *Zoöl.* A visitant.

Syn. — VISITOR, VISITANT, GUEST. VISITOR is the general word; a VISITANT is esp. one who, or that which, visits one as if from without one's own sphere; as, to entertain *visitors*, a frequent *visitor* at his friend's house; a supernatural *visitant*; "At the sound of this the *visitant* returned. . . . Markheim . . . thought he bore a likeness to himself: and always, like a lump of living terror, there lay in his bosom the conviction that this thing was not of the earth" (*Stevenson*); "The cottagers . . . beheld with wondering awe their fleeting *visitant*" (*Shelley*). As compared with *visitor*, GUEST emphasizes the idea of hospitable entertainment; as, "For now her father's chimney glows in expectation of a *guest*" (*Tennyson*). See VISIT.

‖ **vis ma'jor.** [L. *major* greater.] *Law.* A superior force which under certain circumstances is held to exempt from contract obligations; inevitable accident; — a civil-law term used as nearly equivalent to, but broader than, the common-law term *act of God* (which see).

vis'or, viz'or (vĭz'ẽr; vĭ'zẽr; 277), *n.* [ME. *visere*, F. *visière*, fr. OF. *vis* face. See VISAGE, VISION.] **1.** A mask for the face; hence, a disguise or mask, lit. or fig. *Obs. or Archaic.* "My very *visor* began to assume life." *Scott.*

2. The visage; face. *Obs.*

The finished garden to the view
Its *vistas* opens. *Thomson.*

2. A mental view, or prospect, extending over a series of events, thoughts, or the like; as, the news opened up a long *vista* of hopes; *vistas* of memory or of future years.

vis'u-al (vĭzh'ū-ăl), *a.* [L. *visus* a seeing, sight; cf. F. *visuel*, OF. also *visual*, L. *visualis*. See VISION.] **1.** Of or pertaining to sight; used in sight; serving as the instrument of seeing; as, the *visual* nerve. *Milton.*

2. That can be seen; visible; as, *visual* objects.

visual angle, the angle formed by two rays of light, or two straight lines drawn from the extreme points of an object to the center of the eye. — **v. axis** *or* **line.** = LINE OF VISION. — **v. cone,** *Persp.*, a cone formed by lines joining the points in the field of vision with the point of sight, or the eye. — **v. field,** *Optics*, that portion of the image thrown on the retina which falls within the region of distinct vision; that part of the scene confronting an observer which can be distinctly perceived without moving the eye. — **v. plane,** any plane passing through the point of sight; in binocular vision, the plane in which lie the visual axes of the two eyes. — **v. point,** the point at which the visual rays unite; the position of the eye. — **v. purple,** *Physiol. Chem.*, a purple-red pigment contained in the retinal rods of human eyes and those of most animals. It is quickly bleached by light, passing through the colors, red, orange, and yellow, and is also easily destroyed by heat and chemical reagents. Its function is not understood. Also called *rhodopsin*, or visual red. See DIFFERENCE PHR. — **v. ray,** a line or ray from an object to the eye, or point of sight. See VISION, *n.*, 1. — **v. white,** *Physiol.*, the final product in the action of light on visual purple. It is reconverted into visual purple by the regenerating action of the choroidal epithelium. — **v. yellow,** *Physiol.*, a product, between visual purple and visual white, formed in photochemical action of light on visual purple.

vis'u-al'i-ty (-ăl'ĭ-tĭ), *n.*; *pl.* -TIES (-tĭz). **1.** Quality or state of being visual, or visible; visibility.

2. A mental image or picture; a view; glimpse. *Carlyle.*

vis'u-al-i-za'tion (-ăl-ĭ-zā'shŭn; -ī-zā'shŭn), *n.* **1.** The act or power of forming visual images or mental representations of objects not present to the sense.

2. A mental image or representation formed by visualizing.

3. In literature, the quality of suggesting vivid or distinct visual images of whatever is described.

vis'u-al-ize (vĭzh'ū-ăl-īz), *v. t.*; -IZED (-īzd), -IZ'ING (-īz'-Ing). To make visual, or visible; esp., to form a mental image of (something not before the eye); to image or picture mentally; as, to *visualize* the face of one absent.

vis'u-al-ize, *v. i.* To form a mental image of something not present before the eye at the time.

vis'u-al-iz'er (-īz'ẽr), *n.* One who visualizes or is proficient in visualization; esp., *Psychol.*, one whose mental imagery is prevailingly visualization. Cf. AUDILE, MOTILE.

‖ **vis vi'va** (vĭs vī'vȧ). [L. *viva* living.] *Mech.* Living force; the force of a body moving against resistance, or doing work, in distinction from *vis mortua*, or dead force; kinetic energy. As formerly used it was equivalent to the product of the mass into the square of the velocity, that is, double the value now denoted by *kinetic energy*. The term is not usually understood to include that part of the kinetic energy of the body due to vibration of its molecules.

Vi-ta'ce-æ (vī-tā'sē-ē), *n. pl.* [NL. See VITIS.] *Bot.* A family of woody or herbaceous vines (order Rhamnales), having simple, palmate, or pinnate leaves, the stems usually tendril-bearing, and small, greenish, clustered flowers succeeded by a berry like, several-seeded fruit. There are 11 genera (including *Vitis*, the grape, *Parthenocissus*, the Virginia creeper and the Japanese ivy, and *Cissus*) and about 450 species. — **vi-ta'ceous** (vī-tā'shŭs), *a.*

vi'tal (vī'tăl), *a.* [L. *vitalis*, fr. *vita* life; akin to *vivere* to live: cf. F. *vital*, It. *vitale*. See VIVID.] **1.** Belonging or relating to life, either animal or vegetable; as, *vital* energies; *vital* functions; *vital* actions.

2. Contributing or necessary to life; as, *vital* blood, food.

And *vital* virtue infused, and *vital* warmth. *Milton.*

3. Containing life; living. "Spirits that live throughout, *vital* in every part." *Milton.*

4. Being the seat of life; being that on which life depends; hence, rarely, fundamentally affecting life; mortal; as, a *vital* wound; the wound was in a *vital* part.

5. Hence, fundamentally affecting the value, efficiency, or the like, of anything; fundamental; as, a *vital* error in reasoning; loosely, highly important; essential.

A competence is *vital* to content. *Young.*

6. Capable of living; viable. *Rare.* *Sir T. Browne.*

vital air, oxygen gas; — so called because essential to animal life. *Obs.* — **v. capacity,** *Physiol.*, the breathing capacity of the lungs, expressed by the number of cubic inches of air which can be forcibly exhaled after a full inspiration. — **v. force,** *Physiol.*, that form of energy which is manifested in the phenomena of life, esp. when regarded as distinct from other forces of nature (mechanical, chemical, etc.). The vital forces, according to Comte, are nerve force (*neurism*), growth force (*bathmism*), and thought force (*phrenism*), all under the direction and control of the vital principle. Cf. LIFE, 3. — **v. functions,** *Physiol.*, those functions of the body on which life is directly dependent, as the circulation of the blood, digestion, etc. — **v. principle,** an immaterial force, to which when present in organized matter the functions peculiar to living beings have been ascribed. — **v. spirit.** See SPIRIT, 1 (2). — **v. statistics,** statistics treating the duration of life and the circumstances affecting its duration in a community. — **v. tripod.** *Physiol.* = TRIPOD OF LIFE.

vi'tal-ism (vī'tăl-ĭz'm), *n. Biol.* The doctrine that the functions of a living organism are due to a vital principle or force distinct from physical forces. — **vi'tal-is'tic** (-ĭs'tĭk), *a.*

vi'tal-ist (-ĭst), *n.* A believer in vitalism. Cf. *physicist*, 3.

vi-tal'i-ty (vī-tăl'ĭ-tĭ), *n.* [L. *vitalitas*: cf. F. *vitalité*.] State or quality of being vital; specif.: **a** Vital force or animation; the principle of life; as, the *vitality* of eggs. **b** Power of enduring or continuing; as, the *vitality* of slang. **c** Quality of being lifelike; lifelikeness. *Rare.*

vi'tal-ize (vī'tăl-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'Ing). [Cf. F. *vitaliser*.] To endow with life, or vitality; to give life to; to make alive; as, *vitalized* blood; to *vitalize* the patriotism of a people. — **vi'tal-i-za'tion** (-ĭ-zā'shŭn; -ī-zā'shŭn), *n.* — **vi'tal-iz'er** (vī'tăl-īz'ẽr), *n.*

vi'tals (vī'tălz), *n. pl.* [L. *vitalis*. See VITAL.] Organs that are most necessary for life; esp., the heart, lungs, and brain.

2. Hence: The parts essential to the life, health, or soundness of anything; as, the *vitals* of a state.

vit'el-la'ri-an (vĭt'ĕ-lā'rĭ-ăn; 116), *a.* *Zoöl.* Pertaining to a vitellarium.

vit'el-la'ri-um (-ŭm), *n.*; *pl.* -RIA (-ȧ). [NL. See VITELLUS.] *Zoöl.* In many flatworms and rotifers, a modified part of the ovary which produces yolk-filled cells serving to nourish the true eggs; — disting. from *germarium*.

vit'el-lig'e-nous (-lĭj'ē-nŭs), *a.* [*vitellus* + *-genous.*] *Zoöl.* Producing yolk; — designating, specif., certain cells formed in the ovaries of many insects, and supposed to supply nutriment to the developing ova.

vi-tel'lin (vī-tĕl'ĭn; vī-), *n.* [Cf. F. *vitelline*. See VITELLUS.] *Physiol. Chem.* **a** A protein in the yolk of egg, formerly regarded as a globulin, now as a nucleoalbumin; — called specif. *ovovitellin*. As ordinarily prepared it contains lecithin. **b** Any of several related substances in the seeds of plants, in the crystalline lens, etc.

vi-tel'line (-ĭn), *a.* [L. *vitellus* the yolk of an egg.] *Embryol. & Zoöl.* Of or pertaining to the yolk of an egg.

vitelline artery, *Embryol.*, in vertebrate embryos, an artery arising from the aorta, or one of the aortic trunks of the embryo and distributed by numerous branches over the yolk sac. There are usually two main vitelline arteries. Cf. VITELLINE VEINS. — **v. duct,** *Embryol.*, the duct by which the yolk sac or umbilical vesicle remains connected with the alimentary tract. — **v. gland.** *Zoöl.* = VITELLARIUM. — **v. membrane,** *Embryol.*, a membrane inclosing the egg proper and corresponding to the cell wall of an ordinary cell; — so called because in the hen's egg it is represented by the membrane inclosing the ball of yolk. In many invertebrates it is not present until the egg is fertilized, but is then immediately secreted by the egg, thus preventing other spermatozoa from entering. — **v. veins,** *Embryol.*, in vertebrate embryos, the veins which return the blood from the yolk sac or umbilical vesicle to the heart, or later to the portal vein, of the embryo. In mammals their function of bringing nutriment to the embryo is soon superseded by that of the umbilical veins or vein.

vi-tel'lus (-ŭs), *n.* [L., the yolk of an egg.] *Embryol.* The yolk of an egg. Also, in older usage, when yolk and protoplasm were not clearly distinguished, the entire cell contents of an egg cell. See YOLK.

Vi'tex (vī'tĕks), *n.* [L., the chaste tree.] *Bot.* A large genus of verbenaceous shrubs and trees having divided leaves and forking cymes of small flowers with a short tube and bilabiate limb. The species are widely distributed in warm regions. Several, as *V. agnus-castus*, the chaste tree, are cultivated. Many yield valuable timber.

vocal bands, vocal cords. — **v. chink**, the glottis. — **v. cords**, *Anat.*, either of two pairs of folds of mucous membrane which project into the cavity of the larynx. Their free edges are toward the middle line and extend dorsoventrally. The upper pair (**superior**, or **false**, **vocal cords**) are thick and are not directly concerned in the production of voice. They inclose the superior thyro-arytenoid ligaments. The lower pair (**inferior**, or **true**, **vocal cords**) inclose the inferior thyro-arytenoid ligaments, and extend from the inside surface of the thyroid cartilage near the median line to the **vocal processes** (or angles of the base) of the arytenoid cartilages. The passage of the breath between the edges of these folds when drawn tense and approximated together produces the voice. See *Guide to Pron.*, § 29. — **vocal fremitus**, *Med.*, the perceptible vibration of the chest wall produced by transmission of the sonorous vibrations in vocalization. — **v. lips**, vocal cords. — **v. music**, music made by, or prepared for, the human voice, with or without accompaniment; — disting. from *instrumental music*. — **v. resonance**, *Med.*, the sound transmitted to the ear when auscultation is made while the patient is speaking.

vo'cal (vō'kȧl), *n.* [Cf. F. *vocal*, L. *vocalis*. See VOCAL, *a.*] *Phon.* A vocal sound; specif.: **a** An element of speech, consisting of pure vocal tone; a vowel or diphthong; a tonic; — disting. from *subvocal* and *nonvocal*. **b** A liquid or vowel-like consonant, as *l* or *n*.

2. To change into, or use as, a vowel; as, to *vocalize* w.

3. To furnish with vowels or vowel points, as in Arabic.

vo'cal-ize, *v. i.* To utter vocal sounds, as in singing.

vo-ca'tion (vō-kā'shŭn), *n.* [L. *vocatio* a bidding, a calling, invitation, fr. *vocare* to call, akin to *vox*, *vocis*, voice: cf. F. *vocation*. See VOCAL.] **1** A calling; a summons; a call; specif.: **a** Convocation, as of an assembly. *Obs.* **b** A calling to a particular state, business, or profession.

Not having the *vocation* of poverty to scribble. *Dryden.*

c *Theol.* A call or invitation given by God to the Christian life or to some particular service or state, as, esp., that of an ecclesiastic or religious.

2. Regular or appropriate employment; calling; occupation; profession; as, to change one's *vocation*.

Syn. — VOCATION, AVOCATION, HOBBY. VOCATION denotes one's regular calling or profession; an AVOCATION is something which calls one away from one's ordinary pursuits; the word commonly suggests a subsidiary or minor occupation, and its employment in the sense of *vocation* is contrary to good usage; as, "men not contented with their own *vocations*" (*Hooker*); "as if his whole *vocation* were endless imitation" (*Wordsworth*); "The season of the year brings with it so many *avocations* into the garden . . . that I have little or no leisure for the quill" (*Cowper*); "interrupted eternally with these petty *avocations*" (*Scott*); "A comparatively small part of the book has to do with the work for which the writer will be remembered. Much of it is a register of his *avocations* and secondary enthusiasms" (*Atlantic Monthly*). A HOBBY is a favorite avocation; the word often connotes a mildly indulgent attitude towards what is regarded as extreme or disproportionate; as, "Yet John was not without his *hobby*. The fiddle relieved his vacant hours" (*Lamb*); to ride one's *hobby* too hard. See OCCUPATION.

vo-ca'tion-al (-ăl), *a.* Of or pert. to vocation. — **vocational school**, a school the main purpose of which is to provide training for the occupations, or vocations, whether in the professions, commerce, or trades; a trade school.

— **vo-ca'tion-al-ly**, *adv.*

voc'a-tive (vŏk'ȧ-tĭv), *n.* [L. *vocativus*, fr. *vocare* to call.] Of or pertaining to calling; used in calling; specif., *Gram.*, designating, or pertaining to, the case denoting that which is addressed; as, *Domine*, O Lord.

voc'a-tive, *n.* [L. *vocativus* (sc. *casus*): cf. F. *vocatif*.] *Gram.* The vocative case, or a word in that case. Also, the relation of object of address denoted by that case.

vo-cif'er-ant, *n.* One who is vociferant.

vo-cif'er-ate (-āt), *v. i.*; -AT'ED (-āt'ĕd); -AT'ING (-āt'ĭng). [L. *vociferari*, p. p. of *vociferari* to vociferate; *vox*, *vocis*, voice + a derivative of *ferre* to bear. See VOICE; BEAR to carry.] To cry out loudly or violently; to bawl; clamor.

vo-cif'er-ate (vō-sĭf'ẽr-āt), *v. t.* To utter with a loud voice; to shout out.

vo-cif'er-a'tion (-ā'shŭn), *n.* [L. *vociferatio*: cf. F. *vocifération*.] Act of vociferating; outcry; clamor.

Violent gesture and *vociferation* naturally shake the hearts of the ignorant. *Spectator.*

vo-cif'er-ous (vō-sĭf'ẽr-ŭs), *a.* [Cf. F. *vociférc*.] Making a loud outcry; clamorous; noisy; as, *vociferous* heralds.

Syn. — Noisy, bawling, brawling, turbulent. — VOCIFEROUS, CLAMOROUS, OBSTREPEROUS, BLATANT. VOCIFEROUS implies a loud outcry; CLAMOROUS suggests urgent or persistent vociferousness; OBSTREPEROUS commonly adds the implication of turbulence or unruliness; that is BLATANT which is offensively loud or clamorous; as, "watermen, fishwomen, oysterwomen, and . . . all the *vociferous* inhabitants of both shores" (*Fielding*); "I will be . . . more *clamorous* than a parrot against rain" (*Shak.*); "the mingled roar of *obstreperous* merriment" (*Johnson*); "this peevishly *obstreperous* little bell" (*Hawthorne*); "They were heretics of the *blatant* sort, loud-mouthed and shallow-minded" (*Expositor*). See TALKATIVE.

— **vo-cif'er-ous-ly**, *adv.* — **vo-cif'er-ous-ness**, *n.*

vod'ka (vŏd'kȧ), *n.* [Russ., lit., little water.] A Russian distilled alcoholic liquor commonly made from rye, sometimes from potatoes, and rarely from barley. Sometimes, in Russia, any kind of whisky, brandy, etc.

vogue (vōg), *n.* [F. *vogue* a rowing, vogue, fashion, It. *voga*, fr. *vogare* to row, to sail; cf. Pr. *vogar*; perh. fr. OHG. *wagōn* to move, and akin to E. *way*. Cf. WAY.] **1.** The way or fashion of people at any period; temporary mode, custom, or practice; style; mode; as, a word now in *vogue*. "Another kind of *vogue*." *Hawthorne.*

2. Popular repute or acceptation for a time; as, a custom that had a great *vogue*.

3. Common report; rumor. *Rare.*

Syn. — See FASHION.

voice (vois), *n.* [ME. *voice*, *vois*, *voys*, OF. *vois*, *voiz*, F. *voix*, L. *vox*, *vocis*, akin to *vocare* to call, Gr. ἔπος a word, ὄψ a voice, Skr. *vac* to say, to speak, G. *erwähnen* to mention. Cf. ADVOCATE, ADVOWSON, AVOUCH, CONVOKE, EPIC, VOCAL, VOUCH, VOWEL.] **1.** Sound uttered by the mouth of living beings, esp. that uttered by human beings in speech or song, crying, shouting, etc.; sound thus uttered considered as possessing some special quality or character; as, the human *voice*; a pleasant *voice*; a manly *voice*. Specif., vocal sound of the kind or quality heard in the vowels and in such consonants as *b*, *v*, *d*, etc.; sonant or intonated utterance; tone; — distinguished from mere *breath* sound as heard in *f*, *s*, *sh*, etc., and also from *whisper*. See BREATH, 10; WHISPER. Voice, in this latter sense, is produced by action of the vocal cords, not like the strings of a stringed instrument, but as a pair of membranous lips which, being continually forced apart by the expired breath, and continually brought together again by their own elasticity and muscular tension, break the breath current into a series of puffs, or pulses, sufficiently rapid to cause the sensation of tone. The *power*, or loudness, of such a tone depends on the force of the separate pulses, and this is determined by the pressure of the expired air, together with the resistance on the part of the vocal cords. Its *pitch* depends on the number of pulses within a given time, that is, on the rapidity of their succession. Cf. 5th PITCH, 12; and see *Guide to Pron.*, § 29. *Male voices* are divided into tenor, barytone, bass; *female voices* into soprano, mezzo-soprano, contralto. Male and female voices differ chiefly in pitch, the lowest female tone being an octave or more higher than the lowest male voice, and the highest female tone about an octave above that of the male; but they are also distinguished by their quality, the female voice being softer. The compass of the human voice is, in general, about three octaves, reaching from the D of the deep bass to the B flat of the upper soprano, but an individual voice usually has a compass, for singing, of more than two octaves. *Voice* forms the basis of articulate *speech*, being rendered articulate by action of the vocal organs above the glottis. It is possessed by all animals in which the lungs and larynx (or syrinx in the case of birds) exist, but is disting. from mechanical *noises*, as stridulation, etc., sometimes called voice. Fishes are dumb, as far as true vocal utterance is concerned, though they sometimes emit various noises from their throats (see DRUMFISH, GRUNT, *n.*, 2, etc.). The general name for the voice of animals is *cry*, and such cries are given many distinctive names, according to their quality; as, *bark*, *bleat*, *bray*, *gobble*, *squeal*, *trumpet*, etc. In animals other than man, the voice reaches its highest development in certain birds, as the singing birds, the parrot, raven, etc. See TENOR, 5 **a**; 3d BASS, 2; BARYTONE, 1; CONTRALTO; SOPRANO; MEZZO-SOPRANO; 2d REGISTER, 7 **a**.

Her *voice* was ever soft;
Gentle, and low; an excellent thing in woman. *Shak.*

2. The faculty or power of utterance; speech; utterance; as, anger gave him *voice*.

3. Any sound regarded as, or likened to, vocal utterance.

The floods have lifted their *voice*. *Ps.* xciii. 3.

4. Anything likened to human speech as an instrument or medium of expression; also, signification of feeling or opinion through a medium conceived of as like human speech; as, the *voice* of the people; the *voice* of nature. "My *voice* is in my sword." *Shak.*

I, now the *voice* of the recorded law,
Pronounce a sentence on your brother's life. *Shak.*

A drinker of black, strong, *volcanic* wines. *Tennyson.*

2. Produced, influenced, or changed by a volcano or by volcanic agencies; made of materials from volcanoes.
volcanic ash, *or* **ashes.** See ASHES, 3. — **v. bomb.** = BOMB, *n.*, 5. — **v. cone,** a conical hill built up of cinders, tufa, or lava, by volcanic eruptions. — **v. foci,** the subterranean centers of volcanic action; the points beneath volcanoes where the causes producing volcanic phenomena are most active. — **v. glass,** natural glass produced by the cooling of molten lava too rapidly to permit of crystallization. See OBSIDIAN, PITCHSTONE, PUMICE. — **v. mud,** mud formed by the mixture with water of volcanic ashes or disintegrated volcanic rocks. — **v. neck,** *Geol.,* a column of igneous rock formed by congelation of lava in the conduit of a volcano and later exposed by the removal of surrounding rocks. — **v. rocks,** *Geol.,* igneous rocks solidified on or near the surface, as basalt and obsidian. See IGNEOUS ROCKS. — **v. wind,** *Meteorol.,* a wind associated with a volcanic outburst and due to the eruption or to convection currents over hot lava.

vol'can-ic'i-ty (vŏl'kăn-ĭs'ĭ-tĭ), *n.* [Cf. F. *volcanicité.*] Quality or state of being volcanic; volcanism.

vol'can-ism (vŏl'kăn-ĭz'm), *n.* Volcanic power or action; volcanicity. As used in physical geography and geology, the term ordinarily includes all natural processes resulting in forming volcanoes, lava fields, laccoliths, stocks, dikes, etc.

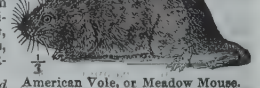
vol'can-ist, *n.* [Cf. F. *volcaniste, vulcaniste.*] One versed in the study of volcanic phenomena; also, a Plutonist.

vol'can-ize (vŏl'kăn-īz), *v. t.;* -IZED (-īzd); -IZ'ING (-īz'ĭng). [See VOLCANIC; cf. VULCANIZE.] To subject to, or cause to undergo and be affected by, volcanic heat. — **vol'can-i-za'tion** (-ĭ-zā'shŭn; -ī-zā'shŭn), *n.*

vol-ca'no (vŏl-kā'nō), *n.;* *pl.* -NOES or -NOS (-nōz). [It. *volcano, vulcano,* fr. L. *Vulcanus* Vulcan, the god of fire. See VULCAN.] A vent in the earth's crust from which hot rock, steam, etc., issue; also, a hill or mountain composed wholly or in part of the ejected material. Such a mountain is more or less conical in form, and often has a depression or crater at its top. A volcano is called **active** while it is in eruption, **dormant** during a long cessation of activity, and **extinct** after eruptions have altogether ceased. Most volcanoes are in the sea or near it, and many are in groups or linear series. Volcanoes include many of the most conspicuous and lofty mountain peaks of the earth, as Vesuvius in Italy (4,267 ft.), Mauna Loa in Hawaii (13,671 ft.), and Cotopaxi in South America (19,693 ft.), which are still active; and Popocatepetl in Mexico (17,883 ft.), Shasta in California (14,380 ft.), and Rainier in Washington (14,363 ft.), which are either dormant or extinct. The character of volcanic eruptions varies from the quiet outpouring of fluid lava, as in Hawaii, to violent explosions like that of Krakatao in 1883.

vol'can-ol'o-gy (vŏl'kăn-ŏl'ō-jĭ), *n.* [*volcano* + *-logy.*] The science treating of volcanic phenomena. — **vol'can-o-log'i-cal** (-ō-lŏj'ĭ-kăl), *a.* — **vol'can-ol'o-gist** (-ŏl'ō-jĭst), *n.*

vole (vōl), *n.* [From dial. *volemouse;* cf. Norw. dial. *voll* field. Cf. WOLD.] Any of numerous mouselike or ratlike rodents constituting the genus *Microtus,* syn. *Arvicola,* typical of the subfamily Microtinæ of the family Muridæ, and various allied genera, as *Evotomys* and *Synaptomys* (see LEMMING MOUSE). The typical voles (genus *Microtus*), the smaller kinds of which are called also **meadow mice** and **field mice,** have a stout body, rather blunt nose, short tail, and short ears. They inhabit both moist meadows and dry uplands and often do much damage to crops. Well-known British species are the **water vole** (*M. amphibius*), frequenting wet places, and the **field vole,** or common field mouse (*M. agrestis*), a small species common in grainfields, etc. In eastern North America *M. pennsylvanicus,* with many subspecies, is the common **meadow mouse.**



American Vole, or Meadow Mouse.
